### Bachelor of Arts in Construction Management

104

### College of Performing Arts

- Master of Music Overview
  
- Master of Music: Composition (M.M.)
  
- Master of Music: Conducting (Instrumental or Choral) (M.M.)
  
- Master of Music: Jazz Studies (M.M.)
  
- Master of Music: Performance (Instrumental or Vocal) (M.M.)
  
- Master of Arts in Theatre: Arts Administration (M.A.)

114

### College of Humanities & Social Sciences

- Master of Arts in Criminal Justice (M.A.)
  
- Master of Arts in History (M.A.)
  
- Certificate of Graduate Study in Global History (COGS)
  
- Certificate of Graduate Study in History (COGS)
  
- Certificate of Graduate Study in Urban Health Disparities (COGS)
  
- Bachelor of Arts in Disaster Preparedness and Emergency Management (B.A.)
  
- Bachelor of Arts in Human Services (B.A.)
  
- Bachelor of Arts in Law & Justice Studies (B.A.)
  
- Bachelor of Arts in Liberal Studies: Humanities/Social Science (B.A.)
  
- Bachelor of Arts in Sociology (B.A.)
  
- Bachelor of General Studies (BGS)

126

### College of Science & Mathematics

- Doctor of Philosophy in Clinical Psychology (Ph.D.)
  
- Master of Arts in Applied Behavior Analysis (M.A.)
  
- Master of Arts in Clinical Mental Health Counseling (M.A.)
  
- Master of Arts in Mathematics (M.A.)
  
- Master of Science in Bioinformatics (M.S.)
  
- Master of Science in Computer Science (M.S.)
  
- Master of Science in Data Analytics (M.S.)
  
- Master of Science in Pharmaceutical Sciences (M.S.)
  
- Master of Arts in School Psychology (M.A.)
  
- Certificate of Advanced Graduate Study in Applied Behavior Analysis (CAGS)
  
- Certificate of Advanced Graduate Study in Clinical Mental Health Counseling (CAGS)
  
- Certificate of Graduate Study in Computational Data Analytics (COGS)
  
- Certificate of Graduate Study in Cyber Security (COGS)
  
- Certificate of Graduate Study in Health Data Management (COGS)
  
- Certificate of Graduate Study in Networks (COGS)
  
- Certificate of Graduate Study in Software Engineering (COGS)
  
- Certificate of Graduate Study in Web Development (COGS)
  
- Post-baccalaureate Certificate in Applied Behavior Analysis

From Normal to Extraordinary: A History of Rowan University

Rowan University has evolved from its humble beginning in 1923 as a normal school, with a mission to train teachers for South Jersey classrooms, to a comprehensive public research university with a strong regional reputation.

In the early 1900s, many aspiring New Jersey teachers lacked proper training because of a shortage of schools in the state that provided such an education. To address the problem in South Jersey, the state decided to build a two-year training school for teachers, known then as a normal school.

The town of Glassboro was an early favorite because of its excellent rail system, harmonious blend of industry and agriculture, natural beauty and location in the heart of South Jersey. Several towns in the region competed to be the site of the new normal school because of the economic benefit and prestige such an institution would bring.

In 1917, to sway the decision in their favor, 107 Glassboro residents raised more than $7,000 to purchase 25 acres, which they offered to the state for free if the borough were selected as the site. The tract of land included the Whitney mansion (now known as Hollybush) and carriage house. Before the purchase, the entire property belonged to the Whitney family, prominent owners of the Whitney Glass Works during the 1800s. This show of support, along with the site’s natural beauty, convinced the selection committee that Glassboro was the perfect location.

A Strong Foundation

In September 1923, Glassboro Normal School opened with 236 students arriving by train to convene in the school’s first building, now called Bunce Hall. Dr. Jerohn Savitz, the institution’s first president, expanded the curriculum as the training of teachers became more sophisticated.

Despite the rigors of the Depression, the program was expanded to four years in 1934, and in 1937 the school changed its name to New Jersey State Teachers College at Glassboro. The college gained a national reputation as a leader in the field of reading education and physical therapy when it opened a clinic for children with reading disabilities in 1935 and added physical therapy for the handicapped in 1944. The college was one of the first in the country to recognize these needs and was in the forefront of the special education movement.

Rowan’s second president, Dr. Edgar Bunce, created a junior college program in 1946 to serve World War II veterans taking advantage of the GI Bill.

In the 1950s, Dr. Thomas Robinson, the University’s third president, expanded the curriculum, increased enrollment and added several buildings to the campus. In 1958, the school’s name was changed to Glassboro State College to better reflect its mission.

A Historic Summit

The University received worldwide attention when it hosted a historic summit conference between President Lyndon Johnson and Soviet Premier Aleksei Kosygin in Hollybush. The University was chosen because of its strategic location midway between Washington, D.C., and the United Nations in New York City, where Kosygin was scheduled to speak. The meetings between the two leaders, held June 23-25, 1967, presaged a thaw in the Cold War and eased world tensions.
Rapid Growth to Serve Needs
The University’s fourth president, Dr. Mark Chamberlain, guided the college through its next phase of growth as enrollment doubled and G.S.C.C became a multi-purpose institution. As new majors and a Business Administration Division were added, four divisions grew into schools and a board of trustees was formed. In 1969, the University opened a campus in Camden to expand its educational services. With a 1978 Division III National Championship in baseball, the first of 11 national championships for the institution, the athletic program established itself as one of the premier athletic programs in the country.

The college’s fifth president, Dr. Herman James, assumed the leadership of the institution in 1984. Under his direction, Rowan expanded by establishing the first doctoral program among the state’s public institutions and adding the Colleges of Engineering and Communication. Dr. James was also responsible for the construction of Campbell Library, the Student Recreation Center and Rowan Hall, home to the College of Engineering.

A Transformative Gift
In July 1992, industrialist Henry Rowan and his wife Betty donated $100 million to the institution, then the largest gift ever to a public college or university. Later that year, the school changed its name to Rowan College of New Jersey to recognize its benefactors’ generosity. The Rowans’ only request was that a College of Engineering be created with a curriculum that would address the shortcomings of engineering education.

The college achieved University status in 1997 and changed its name to Rowan University under Dr. James’ leadership. The College of Engineering quickly earned national accolades for its successful new curriculum.

Dr. Donald J. Farish was appointed Rowan’s sixth president in July 1998. Under his leadership, the University implemented an aggressive improvement plan that addressed academic and student support initiatives as well as campus construction and renovation projects.

Major construction projects included the University townhouses; Science Hall; Education Hall; and the Samuel H. Jones Innovation Center, the first building of the South Jersey Technology Park at Rowan University.

During his tenure, the University also entered into a public-private partnership that led to the construction of Rowan Boulevard, a $400-million, mixed-use redevelopment project that links the campus with Glassboro’s historic downtown. The corridor features student and market-rate housing, a Barnes & Noble collegiate superstore, a Courtyard at Marriott Hotel, an urgent care center and numerous retail and dining outlets. Work is underway on other facilities.

A Broader Mission
During this period, Rowan founded Cooper Medical School of Rowan University—the first new medical school in New Jersey in more than 35 years and the first-ever M.D.-granting four-year program in South Jersey—in partnership with Cooper University Health Care.

The medical school welcomed its first class in the summer of 2012 into a new, six-story building adjacent to Cooper University Hospital in Camden. Close to 3,000 students applied for 50 spots in the medical school’s charter class, which graduated in May 2016.

The Board of Trustees named then-Provost Dr. Ali A. Houshmand as interim president in July 2011 and then the University’s seventh president in June 2012.

As provost, Dr. Houshmand established the College of Graduate and Continuing Education and started Rowan’s online education program, which now are part of Global Learning & Partnerships. As president, he dramatically reduced institutional expenses and increased revenue while expanding enrollment and academic programs.

In 2012, several of the colleges were restructured and schools were created, among them the colleges of Business, Communication & Creative Arts, Education, Engineering, Humanities & Social Sciences, Performing Arts, and Science & Mathematics.

In 2016-17, the University opened Holly Pointe Commons, freshman and sophomore housing strategically located on Rt. 322, and new buildings for the William G. Rohrer College of Business and Henry M. Rowan College of Engineering, which will enable the high-demand programs to double their enrollment.

N.J. Medical & Health Sciences Education Restructuring Act
On July 1, 2013, Rowan again changed dramatically when the New Jersey Medical and Health Sciences Education Restructuring Act went into effect. The Restructuring Act designated Rowan as New Jersey’s second comprehensive public research institution, transferred the University of Medicine and Dentistry of New Jersey’s School of Osteopathic Medicine to Rowan and partnered Rowan with Rutgers-Camden to create health sciences programs in the City of Camden.

Rowan became the second institution in the nation to have both a D.O.-granting medical school (RowanSOM) and an M.D.-granting medical school (Cooper Medical School of Rowan University). The transfer of programs also led to the creation of the Graduate School of Biomedical Sciences and gave Rowan its third campus, with Stratford joining Glassboro and Camden, New Jersey, as homes to Rowan programs.

Recognized Nationally
Rowan has attracted the attention of national organizations that evaluate colleges and universities. U.S. News & World Report consistently ranks Rowan among the top tier Northern Regional Universities and among the top three public institutions in the category, and includes the Henry M. Rowan College of Engineering among the best institutions where
the highest engineering degree offered is a bachelor’s or master’s. The Princeton Review includes the William G. Rohrer College of Business among its best business schools yearly.

**Numerous Opportunities**
Rowan continues to expand its programs and partnerships. Among the most recent—and vital to higher education in New Jersey—was its June 2015 partnership with Burlington County College (now Rowan College at Burlington County) to improve access to affordable four-year undergraduate degrees. That move followed one two years earlier with Gloucester County College (now Rowan College at Gloucester County) that enables students to pursue Rowan bachelor’s degrees at the county college or transfer seamlessly to the University after earning an associate degree and meeting standards.

Today, Rowan’s approximately 18,000 students can select from 74 bachelor’s, 51 master’s, four doctoral degree and two professional (medical) degree programs—along with undergraduate and post-baccalaureate certificates—in colleges and schools across four campuses.

**2016-17: Our Greatest Year Yet**
Since its founding, Rowan has enjoyed many truly big years but the 2016-17 school year may have been our greatest yet! Among many high points, we attained Carnegie classification as a doctoral research university, proudly saw alumni Jean and Ric Edelman commit $25 million to preserve and expand the Rowan University Fossil Park (which was renamed in their honor), opened three new academic buildings and a new, privately built residence hall, added eight new academic programs and saw total enrollment and interest in the University continue to rise.

From the modest normal school begun 90 years ago, Rowan University has become an extraordinary comprehensive institution that has improved the quality of life for the citizens of New Jersey and the surrounding states.

**Rowan University Mission and Strategic Pillars**
Rowan University will become a new model for higher education by being inclusive, agile, and responsive, offering diverse scholarly and creative educational experiences, pathways, environments, and services to meet the needs of all students; maintaining agility by strategically delivering organizational capacity across the institution; and responding to emerging demands and opportunities regionally and nationally.

The University achieves its mission through four Strategic Pillars:

**Access**
We are committed to expanding quality educational opportunities for students by increasing our enrollment capacity; supporting student success; utilizing an increasing array of pedagogies and platforms; and creating new pathways to undergraduate, graduate, post-graduate, and professional studies.

**Affordability**
We are committed to keeping education affordable by managing costs; diversifying our revenue streams; reducing student debt; limiting tuition increases to the rate of inflation as measured by the consumer price index; and enhancing internship and employment opportunities for our students and graduates.

**Quality**
We are committed to providing rigorous, experiential, and engaging educational experiences; support for scholarly, creative, and research activities; a vibrant and healthy campus life; a rich intellectual, cultural, and artistic environment; and a safe, supportive and inclusive culture that respects and values the diversity of all of its members.

**Economic Engine**
We are committed to benefiting our local and state communities by making every effort to partner with and invest in regional businesses and organizations that contribute in meaningful ways to furthering our mission; preparing an educated citizenry and skilled workforce; enhancing the health of our citizens and the quality of life; and developing innovative products, services, and ideas.
Using This Catalog

Rowan University has multiple catalogs:

- The Undergraduate Catalog includes the program requirements and course descriptions for all traditional-format undergraduate programs (courses offered on-campus and across 16-weeks each term).
- The Global Learning & Partnerships (Rowan Global) Catalog includes program requirements and course descriptions for accelerated, online, and off-site undergraduate programs and all graduate and post-baccalaureate programs.
- The Cooper Medical School of Rowan University (CMSRU) Catalog describes the curriculum and policies for the Doctor of Medicine (MD) program.
- The Rowan University School of Osteopathic Medicine Catalog describes the curriculum and policies for the Doctor of Osteopathic Medicine (DO) program.
- The Graduate School of Biomedical Sciences (GSBS) Catalog describes the curriculum and policies for the academic programs offered by GSBS.

Academic Calendar 2017-2018

**Fall Semester 2017**
- Labor Day (no classes) Monday, September 4
- Semester Classes Begin Tuesday, September 5
- Thanksgiving Recess (no classes) Thursday - Saturday, November 23-25
- Semester Classes End Tuesday, December 12
- Reading & Review (no classes) Wednesday, December 13
- Finals Week Thurs-Wed, December 14-20 (includes Saturday, December 16)
- Flexible Time Day Thursday, December 21

**Spring Semester 2018**
- Semester Classes Begin Tuesday, January 16
- Spring Break (no classes) Monday - Saturday, March 12-17
- Semester Classes End Thursday, April 26
- Reading & Review (no classes) Friday, April 27
- Finals Week Mon-Sat, April 30-May 5 (includes Saturday, May 5)
- Commencement Week Monday - Friday, May 7-11

**Summer Sessions 2017**
- Memorial Day (no classes) Monday, May 28
- Fourth of July (no classes) Wednesday, July 4

Summer Sessions are Subject to Change. Visit the Office of Winter, Summer, and Special Sessions for the Term calendars www.rowan.edu/winter/summer/calendars

NOTE:
Please note that this calendar applies to traditional programs offered on the Glassboro and Camden campuses during the fall and spring semesters. Visit www.rowan.edu/university/academic/calendars and use the links listed for calendars from The Division of Global Learning & Partnerships, Office of Winter, Summer, and Special Sessions, the Cooper Medical School of Rowan University, the Rowan University School of Osteopathic Medicine, and the Graduate School of Biomedical Sciences.

The Division of Global Learning & Partnerships is Rowan University’s vehicle to identify and meet the specific needs of the adult student population. Our students include recent college graduates pursuing graduate or doctoral studies, returning college students pursuing the completion of a baccalaureate degree, employees/employers seeking professional development, and life-long learners seeking personal enrichment. The Division places foremost emphasis on making quality education accessible, convenient, and affordable through delivery modes that address the vast range of adult student learning needs and preferences. In partnership with Rowan University’s nine academic colleges, Rowan Global currently offers several doctoral/specialist level programs (including both Ph.D. and Ed.D. programs), over 50 master’s level programs (including concentrations), more than 50 graduate-level and post-baccalaureate certificate programs and endorsements, and a host of accelerated undergraduate degree-completion.

Rowan Global course/program offerings and corresponding services are classified into four major categories:
- **Traditional-format graduate-level** (including post-baccalaureate and doctoral) courses/programs for both part-time and full-time students. Courses are commonly face-to-face, 16 weeks, and held on one of Rowan’s campuses.
- **Non-traditional format courses/programs at every level** (undergraduate, post-baccalaureate, graduate, doctoral). Courses are offered online, hybrid, off-site, Saturday-only, in an accelerated 7-week timeline, or some combination of these.
- All Rowan University **summer and intersession** courses.
- **Professional development and personal enrichment** non-credit courses, workshops, and seminars.

**Locations and Campus Information**
The Division of Global Learning & Partnerships is located on Rowan University's Main Campus in Glassboro, New Jersey, and in the University District in Camden, New Jersey.

Rowan Global's Glassboro campus is housed inside the Enterprise Center, a mixed-use facility on the newly developed Rowan Boulevard next to the Barnes and Noble University Bookstore, and among several eateries, health services, and luxury apartment and condominiums.
The Camden campus is located in the historic First National Bank and Trust Company building and annex, on the corner of Cooper and Broadway, and serves as the heart of Rowan Global's Camden campus. The Camden campus provides an array of services for students, faculty, and staff, including access to the Barnes and Noble University District Bookstore and Café and the Rutgers University Paul Robeson Library.

Rowan Global's Camden campus offers a variety of undergraduate degree-completion programs, including Law and Justice, Sociology, Human Services, and Disaster Preparedness and Emergency Management; a Doctorate in Education; and several academic enrichment programs designed to advance access to higher education among diverse populations, including the acclaimed Intensive English Language Program for English Language Learners (IELP) and the Achieving Success through Collaboration, Engagement, and Determination (ASCENT) program.

While parking privileges are available on both campuses, Rowan University also provides a daily courtesy shuttle that runs between the Glassboro and Camden campuses.

Rowan Global Academic & Student Affairs

Academic & Student Affairs at the Division of Global Learning & Partnerships oversees Rowan Global policy, courses, and academic programs. The Academic Affairs Unit is comprised of the Office of Graduate and Degree Completion Studies, the Adult and Experiential Learning Center, Rowan Global Student Services, and the Office of Winter, Summer, and Special Sessions.

Rowan Global Policies
Rowan Global Academic Affairs works with the Provost’s Office, the Vice President of the Division of Global Learning & Partnerships, and the Graduate Advisory Council (GAC) to ensure that Rowan Global policy is communicated and applied fairly and consistently to all students.

Every student pursuing studies at Rowan University is subject to the university’s policies and procedures as outlined in the official Student Handbook available online at www.rowan.edu/studentaffairs/handbook.html.

The Rowan University Student Handbook provides an overview of policies and practices governing undergraduate, post-baccalaureate, and graduate work at the institution. The University expects students to access and review this Handbook in order to remain informed of rules, regulations, policies and practices in the Rowan catalog or issued by the faculty, administration and the Rowan University Board of Trustees.

Students enrolled in programs or courses offered by Rowan Global (those in online, hybrid, off-site, and/or accelerated programs or registered for courses with a letter appearing after the section number in the Rowan Section Tally) should be aware that they may be required to follow slightly different policies, practices and/or deadlines (due to accelerated scheduling, this is especially true for admissions, registration as well as dropping/adding/withdrawing from classes/programs).

If a University policy or process should differ for a Rowan Global student, the Handbook will direct the student to www.rowanu.com/policies. Any questions about Rowan Global policy may be addressed to Rowan Global Academic Affairs.
The Office of Graduate and Degree Completion Studies works closely with Rowan University's academic schools, colleges, and off-site partners to present programs that are current and applicable to contemporary students and their desired academic and career paths. The Office of Graduate and Degree Completion Studies hosts nationally and internationally acclaimed programs of graduate study, including master and doctorate level programs, certificates of graduate study, and certificates of advanced graduate study; houses degree completion programs for adult learners returning to education; develops, promotes, and celebrates programs that are delivered at several convenient times/locations and in a variety of online and face-to-face formats; and provides oversight and administrative support for all Rowan Global program development, updates, and launches. The office maintains a strong relationship with the Upsilon Chapter of Alpha Epsilon Lambda (AEL)—an honor society dedicated to Graduate & Professional Students—and our Graduate Faculty, Department Chairs, and College Administrators to develop and implement graduate, undergraduate, and degree-completion programs.

The Office of Winter, Summer, and Special Sessions celebrates a year round college experience for students. Rowan University hosts a combination of its own graduate and undergraduate students, as well as visiting students from local, regional, national, and international universities. Through accelerated Winter and Summer courses, students earn credits to stay on track in a four year program, graduate early, earn credits towards an additional program of study, and/or complete academic and professional programs for employment growth and opportunities. Winter and Summer sessions are offered online, hybrid, and face to face to accommodate a sizable and diverse population of learners. Additionally, the Office of Winter, Summer, and Special Sessions coordinates special efforts to offer college credit-bearing courses to highly achieving high school juniors and seniors at a reduced tuition rate through the Rowan University College Acceleration Program (CAP) and High School Online Dual Credit Initiative. Rowan University courses offered through CAP and the High School Online Dual Credit Initiative fulfill several of Rowan University's general education requirements and are designed to be transferrable to other institutions of higher education.
Adult & Experiential Learning Center
Laurie Baker
Director
Enterprise Center, 3rd Floor
856.256.5794
bakerl@rowan.edu

Marisa Israel
Assistant Director
Enterprise Center, 3rd Floor
856.256.5234
israelm@rowan.edu

The Adult and Experiential Learning Center serves as the point of entry for adult learners seeking degree completion and certificate programs online, on-the-ground at the Rowan University Camden campus, and/or on-site at Rowan University's partner colleges. The Adult and Experiential Learning Center offers outreach, admissions, and first-term enrollment counseling; ongoing academic advising and student support to adult learners enrolled in Rowan Global undergraduate and certificate programs, including study in Psychology, Law and Justice, Liberal Studies, Construction Management, Nursing, Human Services, Disaster Preparedness and Emergency Management, and Fundamental Computing; opportunities to accelerate degree completion through a variety of assessments and articulation agreements, including credit by examination, ACE-evaluated transcripts of prior learning, military training, and union apprenticeships; and opportunities to earn college credit through prior learning and workplace experience.

Credit for Institutional Prior Learning Assessment
Rowan Global Learning and Partnerships encourages undergraduate students to seek college credit for assessment of experiential learning. Prior Learning Assessment, the evaluation of knowledge and competencies for the purpose of awarding college credit, validates the level of knowledge gained from experiential learning. Institutional Prior Learning Assessment pathways offer adult, returning, and other non-traditional learners the opportunity to accelerate degree completion. Learners demonstrate college-level education, competencies, and knowledge gained outside the university setting. Experiential learning may result from various life experiences, including business ownership, civic leadership, workplace training, volunteer work, military training, assessment of nationally recognized licenses, and union-sponsored apprenticeships. Individualized assessments may include professional credentials, standardized tests, military and corporate recommendations, institutional credit by examination, and portfolio assessment. College credit is awarded for college-level learning and not for experience alone.

Adult learners, returning to college or just beginning, may wish to explore available Credit for Prior Learning Assessment opportunities. Students interested in exploring Credit for Prior Learning may contact Rowan Global Learning & Partnerships’ Adult & Experiential Learning Center by email: bakerl@rowan.edu or phone: 856.256.5794.

Rowan Online
Michael Ciocco
Director
Enterprise Center, 2nd Floor
856.256.5164
ciocco@rowan.edu

Rowan Online, develops, delivers, and supports online courses and programs. Rowan online courses are offered in a Learning Management System and are characterized by a user-friendly environment that incorporates multi-media technologies, including digital slide shows, audio, and video to deliver course content as effectively as in the classroom setting. Students engage one another and the course instructor using internet-based communication tools including email, chat rooms, and online discussion boards. Rowan Online provides technical support, including after-hours support for emergencies.

Rowan Global’s online programs, with little exception, are delivered using either all online accelerated coursework or using a combination of online and face-to-face coursework (hybrid). Both students enrolled in online or hybrid courses are Rowan students with the same access to Rowan’s state-of-the-art facilities and on-campus resources.
Rowan Global Student Services

Rowan Global Student Services assists students in Rowan Global programs and supports the faculty and staff of Rowan University’s individual colleges and administrative offices. In collaboration with University Scheduling and Rowan University faculty and staff, Student Services provides outstanding service and expedient access to education for a growing population of national and international graduate, undergraduate, and post-baccalaureate students in a variety of course delivery modes from traditional to fully-online programs.

Rowan Global Student Services is comprised of three student specialists who assist students with financial/tuition concerns, communicate with partner schools and satellite campuses to clarify articulation of partnership roles and ongoing opportunity for students, provide clarity of university processes and policies and maintain and promote currently effective systems, provide a voice for students as they transition into higher education environment, and identify and solves student matters regarding all aspects of academic engagement.

Transfer Credit Processing

Applicants seeking to transfer credits must submit a Graduate and Post-bac Transfer Credit Evaluation Form (available for download at www.rowanu.com/forms ) and all required supporting materials (official transcripts, syllabi, course descriptions) at the time of application.

Most graduate programs at Rowan University allow incoming matriculated students to transfer up to 12 graduate-level credits provided that a grade of B or better was earned, the courses and credits are deemed equivalent to required courses and credits in the program, and the coursework was taken within the past 10 years. For the transfer credit policy for a particular graduate program, please contact the program’s Academic Advisor.

Registration

For matriculated Rowan Global students, registration plans vary according to program. Information regarding how and when to register will be included in the matriculation confirmation email sent to new students upon receipt of a completed and signed Matriculation Signature Page. Any registration-related questions should be directed to Rowan Global Academic & Student Services at globalstudent@rowan.edu.

Senior Privilege

Rowan Global Student Services coordinates the Senior Privilege process at Rowan that allows qualified students to enroll in up to six credits of graduate-level courses prior to completion of a Bachelor’s degree and while paying the undergraduate tuition rate. Seniors (students with 90+ earned hours) at Rowan University who have at least a 3.000 cumulative undergraduate GPA may request permission to register for one graduate level course per semester through the Senior Privilege process by submitting the proper forms (available at www.rowanu.com/forms ) to Rowan Global Academic & Student Services before the close of registration for the term in question. For more details about this policy and process please consult: www.rowanu.com/policies .

Financial Aid

Pam Gordy
Director
Savitz Hall, 1st Floor
856.256.4459
financialaid@rowan.edu

Brittnie Thomas
Assistant Director, Financial Aid
Marketing and Enrollment Management
Enterprise Center, 2nd floor
856-256-5141
thomasb@rowan.edu

The Financial Aid Office strives to:

• Provide access to higher education by effectively managing federal, state, institutional, and private financial resources while adhering to any applicable laws, regulations, and policies;
Types of Aid

There are generally four main types of aid: Grants, Loans, Work-Study, and Scholarships. There may also be special aid options for those who are already NJ Stars, EOF recipients, transfer students, or those eligible for veteran’s benefits.

Applying for Aid

Rowan Global students, regardless of how their course is offered (online, off-campus, hybrid, or face-to-face), must follow the same process for financial aid as other Rowan students. To apply for financial aid, all students must complete the Free Application for Federal Student Aid (FAFSA) online at www.fafsa.ed.gov. (Rowan’s FAFSA code is 002609.) Applying for the FAFSA begins the federal aid process and since it is separate from any individual school’s admission process, a student does not need to be admitted to an institution to begin. Rowan Global strongly encourages its students to apply for aid early and to apply for any academic year in which they are eligible.

Eligibility

Degree granting programs are academic programs that lead to a degree including bachelor’s, master’s, doctoral, and specialist programs. While a student does not need to be admitted to apply for federal aid, a student must be admitted and matriculated (have officially accepted the offer of admission) via the signed Rowan Global Student Guide & Agreement Signature Page in order to receive federal aid should they qualify. Financial Aid cannot be packaged or applied to any Rowan student account until you are officially matriculated into an academic program. It is also not possible to apply financial aid retroactively to a previous term, even within the same academic year.

You must apply each academic year for federal aid; and, while you may be awarded an estimated aid package for the year, aid is only officially disbursed by Rowan’s Financial Aid Office each fall or spring term to matriculated students who are registered for the appropriate minimum number of credits that particular term. This could mean that you receive aid one term but not the next. Also keep in mind that aid might not be applicable for those matriculated Rowan Global students who begin a program mid-term because they are usually only taking one course which does not usually qualify for the federal part-time minimum enrollment for aid.

For an undergraduate-level student 6 credit hours per term is the minimum required to qualify for federal financial aid. For a graduate-level (or doctoral) student, 4.5 credit hours per term is the minimum. (These are both considered part-time status.) Financial aid is therefore not applicable for those terms in which the total number of credits for which a student is registered is fewer than 6 (for undergraduates) or 4.5 (for graduates).

Title IV Ineligible Programs

While Certificates of Graduate Study (COGS), Certificates of Advanced Graduate Study, Graduate Endorsements/Certifications, and Post-Baccalaureate programs are classified as academic, they are non-degree programs. As such, these programs are ineligible for Title IV funding. Title IV programs include financial aid from the Federal Pell Grant, Federal SEOG, Federal TEACH Grant, Federal Stafford Loans, and Federal Work Study. However, prospective students are encouraged to seek other forms of assistance such as employer tuition reimbursement, private loans, or scholarships.

Federal Return of Title IV Funds Policy

Federal regulations require Title IV financial aid funds to be awarded under the assumption that a student will attend the institution for the entire period in which federal assistance was awarded. When a student withdraws from all courses for any reason, including medical withdrawals, he/she may no longer be eligible for the full amount of Title IV funds that he/she was originally scheduled to receive. The return of funds is based upon the premise that students earn their financial aid in proportion to the amount of time in which they are enrolled. A pro-rated schedule is used to determine the amount of federal student aid funds he/she will have earned at the time of the withdrawal. Thus, a student who withdraws in the second week of classes has earned less of his/her financial aid than a student who withdraws in the seventh week.

Once 60% of the semester is completed, a student is considered to have earned all of his/her financial aid and will not be required to return any funds.

Federal law requires schools to calculate how much federal financial aid a student has earned if that student:

- Completely withdrawals; or
- Stops attending before completing the semester; or,
- Does not complete all modules (courses which are not scheduled for the entire semester or payment period for which he/she has registered at the time those modules began).

Based on this calculation, Rowan University students who receive federal financial aid and do not complete their classes during a semester or term could be responsible for repaying a portion of the aid they received. Students who do not begin attendance must repay all financial aid disbursed for the term.
About the Division of Global Learning & Partnerships

Registrar
Rebecca Gollihur
Savitz Hall, 1st Floor
856.256.4367
gollihur@rowan.edu
registrar@rowan.edu

The Office of the University Registrar oversees registration and registration-related issues for all of Rowan's undergraduate and graduate (non-medical) students. The Registrar coordinates compliance with the Statewide Transfer Agreement and provides resources for transfer students, including the management of ongoing transfer credit articulations and credit postings for individual undergraduate and graduate students. In addition, the Office has oversight for student records, including transcripts, enrollment verifications, coordination of graduation audits, and the awarding of all Rowan degrees, certificates, and diplomas. The Office also coordinates updates to official curriculum in the system, including programs and courses. The Registrar works closely with all academic colleges as well as University Scheduling, the Offices of Admissions, Advising and Student Retention, and directly supports the Office of Academic Affairs.

Non-matriculated students
(Not admitted to a degree or certification programs)

- **Undergraduate courses**: Non-matriculated students with a high school diploma or its equivalent may register for undergraduate courses for which they are otherwise eligible. Non-matriculated undergraduate students are not permitted to register for more than 11.5 credits in any term or accumulate more than a total of 24 undergraduate credits prior to formal acceptance into an undergraduate program. To inquire about registering for coursework as a non-matriculated undergraduate student, please visit www.rowan.edu/registrar.

- **Post-baccalaureate courses**: Non-matriculated undergraduate students who have already earned a Bachelor’s degree are not permitted to accumulate more than a total of 6 undergraduate-level credits prior to formal acceptance into a post-baccalaureate program. To inquire about registering for coursework as a non-matriculated post-baccalaureate student, please visit www.rowan.edu/registrar.

- **Graduate courses**: Non-matriculated students with a Bachelor’s degree or its equivalent may register for graduate courses for which they are otherwise eligible. Non-matriculated graduate students are not permitted to accumulate more than a total of 9 graduate credits prior to formal acceptance into a graduate program. To inquire about registering for coursework as a non-matriculated graduate student, please visit www.rowan.edu/registrar.

Courses taken as a non-matriculated student are not guaranteed to count toward a future Rowan program. Not all courses are open for registration to non-matriculated students. Please click on the course registration number (CRN) in the Rowan Section Tally (http://banner.rowan.edu/reports/reports.pl?task=Section_Tally) to view any pre-requisites or restrictions assigned to that course.

Non-matriculated students pay for their coursework according to the tuition rate assigned to the course level for each course for which they register. (For tuition rates, consult www.rowan.edu/bursar).

Bursar
Leonardo T. Freyre
Savitz Hall, 1st Floor
856.256.4150
bursar@rowan.edu

The Bursar's Office is responsible for all billing of students and for the collection of payments.

Each term, a statement of expenses will be mailed electronically. All charges must be paid in full each semester on or before the date stipulated in the statement of expenses given each student. Students who do not pay their bills will be withdrawn from classes in accordance with the University policy on outstanding financial obligations. Credit may be extended to students engaged in negotiations concerning state scholarships, loans or grants. Questions regarding university expenses should be discussed with personnel in the Bursar's Office.

Checks in payment of all charges should be made payable to Rowan University. Payment may also be made with MasterCard, Visa, Discover or American Express. Detailed information on use of these credit cards is available to students prior to the beginning of each semester. All students qualify for the deferred payment program. Information on the deferred payment plan is available on the “Instructions for Term Invoice” page on-line at the Rowan Self Service web site at www.rowan.edu/selfservice.

Tuition and fees, regulated by Rowan University, are subject to change without notice to individual students.
Rowan Global Marketing and Enrollment Management

Saudia Beverly
Director of Admissions & Enrollment Management
Enterprise Center, 2nd Floor
856.256.5147
beverly@rowan.edu

The Division of Global Learning & Partnerships coordinates all admissions and admissions-related activities for Rowan Global academic programs.

Applying to Rowan Global
Admission to Rowan University as an undergraduate, post-baccalaureate, or graduate-level student is competitive. All applicants are admitted according to the standards and requirements established by Rowan’s academic departments. Each component of the application is carefully reviewed and taken into consideration for each candidate. Additional policies and information about Rowan Global Admissions and applying can be found at www.rowanu.com/admissions.

Eligibility for Admissions
Admission requirements for each academic program offered through the Division of Global Learning & Partnerships at Rowan University can be found at www.rowanu.com/programs.

• Undergraduate admission: Rowan Global offers non-traditional degree-completion (transfer) programs for undergraduate students. Any applicant who has completed 24 or more college credits at another institution is considered a transfer student. Students seeking a second bachelor’s degree are also considered transfer students, whether they graduated from Rowan or from another institution. Most undergraduate-level programs at Rowan require a minimum GPA for admission. However, meeting that minimum does not guarantee admission due to competition for available openings. Admission decisions for applicants who’ve attended college more than five years ago are based on motivation, life experiences, career advancement, and college transcripts.

• Post-baccalaureate and graduate admission: To be admitted to a post-baccalaureate or graduate-level program at Rowan University, an applicant must have earned a baccalaureate degree from a regionally-accredited college or university in the United States or its equivalent from a foreign institution of higher education. Faculty-admission committees for post-baccalaureate and graduate-level programs use different evaluation criteria, according to the requirements of the profession and the number of applicants applying to the program.

• To apply to a Rowan Global program (undergraduate, post-baccalaureate, or graduate-level) please visit www.rowanu.com/programs and click on your program of interest for information and links to application deadlines and instructions.

Honors Admission for Rowan Graduates
Rowan undergraduate students who have graduated within the last three years, or Rowan seniors in their final semester, are exempt from paying an application fee and from taking standardized tests (except where it is necessary to meet standards recommended by accrediting bodies, certification agencies, statutory regulations, and/or professional societies) if they have achieved a cumulative GPA of 3.8 or greater in their undergraduate coursework and meet all other admission requirements.

Non-U.S. Transcript/Academic Credentials Requirements
Any Rowan Global applicants (regardless of U.S. citizenship) who attended a non-U.S. institution for more than one term and/or who earned a Bachelor’s degree (or its equivalent) and/or Master’s degree (or its equivalent) from a non-U.S. institution or where English was not the official language of instruction is required to submit to Rowan Global Admissions official English translations (if transcript is not in English) and a course-by-course transcript evaluation to determine equivalency. Acceptable evaluation agencies* are:

• World Education Services (WES) (www.wes.org)
• Educational Credentials Evaluators (ECE) (www.ece.org)
• Josef Silny (www.jsilny.com)

*Note: Rowan University has no affiliation with these companies and may accept an evaluation from other companies under special circumstances; however, the above agencies are proven to provide fast and accurate services to students and their evaluations are trusted by colleges throughout the U.S.
English-language Proficiency Requirements for Non-native Speakers

International applicants are required to submit official copies of successful scores from one of the two tests listed below. (This requirement is waived for any applicant whose first language is English, any applicant who has been studying or working in the U.S. for two or more years, or whose undergraduate institution uses English as the language of instruction. Other ESL programs do not qualify.)

- TOEFL (Test of English as a Foreign Language) (www.toefl.org). Minimum required scores are: 550 or higher - paper test; 79 or higher - internet test; 213 or higher - computerized test

Additional Requirements for International Applicants

At Rowan University, non-U.S. citizens requiring the F-1 or J-1 visa must complete two separate processes to be admitted to the University and to be considered for the Rowan-sponsored I-20 necessary to obtain the proper visa.

- The first process is the academic admissions process. All applicants must submit complete application packets including all required materials for their particular program of interest by the appropriate deadline to Rowan Global Admissions and be evaluated for admission and matriculation into a full-time academic program.
- The second process is the financial review, which is coordinated independently by the International Center (IC) at Rowan University. Applicants must complete all of the steps outlined by the IC in order to demonstrate that they have the financial resources necessary to support themselves for the duration of their studies at Rowan. Without complete information and appropriate certification, Rowan’s International Center cannot issue the I-20 necessary to obtain an F-1 or J-1 visa. For a full list of financial review requirements and instructions please visit www.rowan.edu/internationalstudents.

General Information about Standardized Tests

Test scores must be no older than five years and must be official reports submitted to Rowan Global Admissions directly from the testing agency*. Applicants must designate Rowan University as a recipient of their test scores or scores will not be released. (Only the most recent exam results are used for admission purposes.) Rowan’s code for most standardized tests is 2515 except for the ACT (not required of graduate students) which is 2560, and the IELTS and GMAT, which both include instructions for proper score submission at the time of testing.

*Some testing agencies may only provide an address for “The Graduate School.” If that is the only option available, select it, but please include a note on the application indicating that test scores were sent to that address.

Changing Academic Program after Matriculation

Matriculated students who have already begun a program, may decide that a different Rowan program better suits their needs. If that is the case, students must complete a new online application for their program of interest and also indicate in the “Change of Program” section of the application that they are a currently enrolled student. Depending upon the admission requirements of the new program, additional materials may need to be submitted. Any questions about the COP process should be directed to the enrollment counselor assigned to the new program of interest.
General Education at Rowan University

A well-rounded education is a goal in itself and there are important aspects of this education that the university as a whole wants to emphasize. These aspects include a thorough grounding in communication and an exposure to university level science, mathematics, social and behavioral science, and the humanities.

Broadly speaking, the general education program will:

1. Develop students' abilities to speak and write effectively, think clearly and critically
2. Develop students' abilities to use computational, quantitative, and problem solving skills, as well as scientific thinking and modes of inquiry
3. Increase students' understanding of the complexity of issues in humanities, arts, social and behavioral sciences and the practice of free inquiry in their analyses and examination of values.
4. Provide opportunities for students to explore concentrations, minors, or disciplines outside of their own in greater depth.

As one of the fundamental principles of a general education curriculum is to experience a variety of disciplines, students are required to take courses from five areas: Communication; Science and Mathematics; Social and Behavioral Sciences; History, Humanities, and Language; and Non-Program Courses.

At Rowan University, the minimum number of hours required for a four-year degree is 120 semester hours, and all students are required to earn a combined total of 42 semester hours of General Education and Rowan Experience courses. (The Rowan Experience Requirements are described in detail in the next section.) Different degree programs vary in the number of hours required for Free Electives and the Major. Students must plan their program of study in consultation with an advisor in order to meet all the requirements of a specific major program.

Within General Education, there are specific areas of study or discipline groups. All of the semester hour requirements listed below are considered minimum requirements. Specific requirements may vary by degree type (Bachelor of Arts, Bachelor of Science) and/or by major program of study.

General Education Requirements by Area of Study

Following are the minimum numbers of credits required in each of five areas of study within General Education. In addition to meeting the minimum credit hours in each bank, students must earn a COMBINED TOTAL of 42 credits of General Education courses and Rowan Experience courses.

<table>
<thead>
<tr>
<th>General Education Areas</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communication</td>
<td>6</td>
</tr>
<tr>
<td>Science and Mathematics</td>
<td>7</td>
</tr>
<tr>
<td>Social and Behavioral Sciences</td>
<td>6</td>
</tr>
<tr>
<td>History, Humanities and Language</td>
<td>6</td>
</tr>
<tr>
<td>Non-Program Courses</td>
<td>6</td>
</tr>
</tbody>
</table>

These are minimum requirements for each area of study or discipline group. Specific major programs may expand the requirements within any of these categories in order to meet program and learning outcome objectives as well as meeting the minimum 120 semester hour requirement for a four-year degree. Specific General Education courses may be required for individual majors if they serve as prerequisites for required courses within that major.

General Education courses must be selected so that the following requirements are satisfied:

1. All students must take College Composition I (3 s.h.) or Intensive College Composition I (4 s.h.) as well as College Composition II (3 s.h.).
2. The minimum of 6 s.h. of Communication is fulfilled by College Composition I and II. For all other banks requiring 6 or more semester hours, students must take courses from at least two different disciplines within the bank.
3. All students must take at least one course from the list of mathematics courses listed under Science and Mathematics.
4. All students must take at least one approved course that includes an in-class laboratory experience (LAB) under Science and Mathematics. Transfer courses must include the in-class lab experience. Students may not test out of the lab experience.
5. All courses at the university can be used in the Non-Program Bank, as long as they are not courses in the major program of the student.

Students Transferring from a New Jersey Community College to Rowan University

Students who have completed an Associate of Arts or Associate of Science degree at a New Jersey community college will receive at least 60 hours of transferrable credit towards the appropriate Bachelor of Arts or Bachelor of Science Program. With regard to General Education, it is assumed that transfer students will have met all lower division General Education requirements expected of students having completed the first two years of a four-year program. In most situations, students will receive transfer credit for a combination of General Education Courses, Rowan Experience Courses, Free Electives, and Major Requirements totaling at least 60 semester hours of credit or approximately one-half of a basic four-year degree.
Exceptions to this assumption will occur when students have failed to complete required course work at the community college that is required for entrance into a required Rowan University course. Coordination between the student and advisor at the community college is necessary in planning for the transfer to Rowan University. Specific program requirements are available on the Rowan University home page.

For students transferring to the university without completing an Associate of Arts or Associate of Science degree, it is expected that credits taken at a New Jersey community college that are applicable to an Associate of Arts or and Associate of Science degree will be transferable to the basic four-year degree program at Rowan University. Transfer students must meet the specific graduation requirements of the Rowan University degree program to which they seek to transfer. It is expected that through careful planning, the transfer student will be able to meet these requirements within their two years of study at the community college and the following two years of study at Rowan University.

**General Education Requirements**

General Education is designed to fulfill the aim of a liberal education. It is intended to provide the breadth of knowledge and balance of judgment befitting a college graduate, regardless of major. At Rowan University, General Education is divided into five areas of study with specific goals. The educational goals of the five areas of study are:

**Communication Bank Goals**

1. Students will develop the ability to write a structured, well-reasoned, ordered and grammatically correct document appropriate to the intended audience.
2. Students will develop the ability to research and properly reference the work of others.

**Science and Mathematics Bank Goals**

1. Students will demonstrate an ability to identify and apply fundamental concepts in science and math.
2. Students will demonstrate an ability to collect, interpret and verify lab data.
3. Students will demonstrate an ability to analyze and manipulate data, and to access and organize information.

**History, Humanities, and Languages Bank Goals**

1. Students will demonstrate an understanding of major concepts, theories, and methods in at least two areas of history, humanities, culture, or world languages.
2. Students will develop an understanding of systems of thought and language.

**Social and Behavioral Sciences Bank Goals**

1. Students will demonstrate an understanding of major concepts, theories, and methods in at least two areas of the social and behavioral sciences.
2. Students will demonstrate an understanding of the development of human society as it relates to culture, geography, and language in the context of an emerging interdependent, global community.
3. Students will demonstrate an ability to apply basic methodologies used in the measurement of social and behavioral sciences.

**Non-Program Electives Bank Goals**

1. Students will develop a deeper understanding of at least one area outside of the major program of study as a means of creating a broader, customized, and complete program of general education.
2. Students will choose courses to enhance the major degree program and better prepare them to meet future professional and life objectives.

Some general courses offered at Rowan University fulfill one or more of the Rowan Experience Requirements, or are applicable to the Honors Concentration, or meet a combination of General Education, Rowan Experience, and Honors Concentration Requirements. Such courses are signified as follows:

- (ACE) Artistic and Creative Experience
- (H) Honors Concentration Course
- (LIT) Broad-based literature course
- (LAB) In-class laboratory experience
- (PS) Public Speaking
- (M/G) Multicultural/Global
- (RS) Rowan Seminar
- (WI) Writing Intensive

The General Education course listing can be viewed in the Approved General Education Courses section of the university catalog.
Non-Traditional-Format Undergraduate Offerings
Rowan also offers a few of its undergraduate degree programs in non-traditional modes of delivery (online, off-site, hybrid, accelerated, etc.) through the Global Learning & Partnerships (Rowan Global). For a list of available programs and related details, please visit www.rowanu.com/programs

Note: Admission to all traditional-format undergraduate programs at Rowan University is coordinated by the main Admissions Office (admissions@rowan.edu).

Admission to the non-traditional-format undergraduate programs at Rowan University is coordinated by the Rowan Global Admissions Office globaladmissions@rowan.edu or www.rowanu.com.

The Rowan Experience
All students must take courses that define the unique aspects of a Rowan University degree and are described as the Rowan Experience. The Rowan Experience consists of courses that require a demonstration of specific skills or provide specific kinds of experiences that the university deems significant for all graduates. All students must complete a course or series of courses with the following six Rowan Experience designations during their four-year education:

1. Artistic and Creative Experience (ACE)
2. Literature (LIT)
3. Multicultural/Global (M/G)
4. Public Speaking (PS)
5. Rowan Seminar (RS). Rowan Seminars are to be taken by all FRESHMEN. This requirement is waived for transfer students entering with sophomore, junior or senior standing.
6. Writing Intensive (WI). Writing Intensive courses MUST be taken at Rowan, and College Composition II or its equivalent must be completed prior to enrolling in a WI course.

Many courses are designated as ACE, LIT, M/G, PS, WI, and RS, including many General Education courses and many courses taken only by students within their designated major. Courses may also carry more than one designation so that one course may meet two or more Rowan Experience requirements as well as General Education or major requirements.

As noted in the previous section, all students must take a minimum of 42 credits of General Education and Rowan Experience courses. The purpose of this requirement is to ensure a broad-based education. Consequently, M/G, LIT, ACE, PS, WI and RS courses that are taken within the major program of study DO NOT COUNT towards this minimum total of 42 credits. Note, too, that General Education and Rowan Experience course requirements vary depending on the specific degree program, so students should plan their program of study in consultation with their academic advisors.

The specific goals of the Rowan Experience Requirements are to:

1. Help first-year students make a smooth academic transition to the university community, serious scholarship and the life of the mind (RS).
2. Develop the ability to give oral presentations on a variety of subjects that are well reasoned, ordered, correct, and appropriate for the intended audience (PS).
3. Have students explore the diverse ways in which human beings have confronted the perennial questions of human existence through various imaginative and discursive literary works (LIT).
4. Develop students' knowledge of the multi-faceted culture in which we live, contemporary social and cultural milieu, and the global implications of an increasingly interdependent and multicultural world (MG).
5. Develop the ability to create and/or critically evaluate works of art through experiential courses designed to expose students to the plastic and performing arts (ACE).

The Rowan Experience course listing can be viewed in the Approved Rowan Experience Courses section of this catalog.

Graduate & Post-Baccalaureate Programs
All post-baccalaureate and graduate-level programs (including doctoral, master level, and professional certificates) offered at Rowan University are administered by the Division of Global Learning & Partnerships Office of Graduate and Degree Completion Studies and housed across the academic colleges of Business, Communication & Creative Arts, Education, Engineering, Health Sciences, Humanities & Social Sciences, Performing Arts, Science & Mathematics; the schools of Earth & Environment and Health Professions; and Graduate School of Biomedical Sciences, Cooper Medical School of Rowan University, and Rowan School of Osteopathic Medicine.

The role of the Division of Rowan Global Learning & Partnerships (Rowan Global) is to provide leadership, coordination, and administrative support for quality post-baccalaureate and graduate-level programs at Rowan University, as consistent with national, state, and regional educational needs. Led by the Vice President of the Division of Global Learning & Partnerships and professional staff of Rowan Global, the Graduate Council, and the academic program advisors/faculty, the post-baccalaureate and graduate experiences are integral components of the overall mission of the University.
Graduate-level programs at Rowan provide those who already possess bachelor’s or master’s degrees an opportunity to continue to advance their education.

**Rowan University Degrees Offered:**

- Certificates of Advanced Graduate Study (CAGS; post-master)
- Certificates of Graduate Study (COGS; post-baccalaureate)
- Certificates of Undergraduate Study (CUGS)
- Professional Certificates

Post-Baccalaureate programs are non-degree, undergraduate programs that enable bachelor degree holders to obtain professional certifications in a variety of areas. The requirements and curricula of the post-baccalaureate programs are often similar to the requirements and curricula listed for the corresponding undergraduate degree programs and may also have the same national accreditation and/or state approval (in the case of College of Education certifications) as the corresponding undergraduate degree programs.

Available offerings at the post-baccalaureate (undergraduate) level include but are not limited to the following certification and non-degree options:

- Post-baccalaureate (post Bachelor) programs in Applied Behavior Analysis and Cartography and GIS.
- State certifications/endorsement programs (also post Bachelor) for school nursing, principals, supervisors, teacher of students with disabilities, driver education, learning disabilities teacher consultant (LDTC), bilingual/bicultural education, English as a Second Language

Credit requirements for each program vary greatly according to level, degree and professional standards. Many programs will accept transfer credit from accredited institutions. For a full list of programs offered through Rowan Global, please visit [www.rowanu.com/programs](http://www.rowanu.com/programs).

Rowan Global serves the adult non-traditional student population by offering programs and courses that meet the needs of individuals with busy personal and professional life-styles. Consequently, several programs are available in an accelerated format, and/or online, hybrid, or face-to-face formats at a number of locations outside of the Rowan University Main Campus. Program formats and locations are provided in the Rowan Global Learning & Partnerships Catalog (for accelerated, online and off-site undergraduate programs and all graduate and post-baccalaureate programs) under the “Programs Offered” section for each academic college.

Note: Admission to all post-baccalaureate and graduate programs at Rowan University (both traditional-format and non-traditional-format), as well as all non-traditional-format undergraduate programs, is coordinated by Rowan Global Admissions (global@rowan.edu or [www.rowanu.com](http://www.rowanu.com)).

**Tuition & Fees**

Tuition and fees* for the Division of Global Learning & Partnerships vary with the nature of the program, location, and mode of delivery. Rowan Global costs (tuition and fees) can be found at either of these websites: [www.rowan.edu/bursar](http://www.rowan.edu/bursar) or [www.rowanu.com/tuition](http://www.rowanu.com/tuition).

*Tuition and fees are subject to annual change and do not include the cost of textbooks and personal expenses.

**Outstanding Financial Obligations**

The University may deny a student graduation, readmission, registration, or records because of outstanding financial obligations to the University. This action can be taken in cases where reasonable notice of a debt and the consequences of nonpayment have been given to the student. If a student does not meet his/her outstanding obligations by the established deadlines under the policy, the student will automatically be denied registration for the following semester, in addition to losing all other university services. Denial for future semesters will also be continued until such time as the obligation is met. The student will have the right to a hearing in cases of dispute concerning an obligation. The request for a hearing must be submitted in writing by the student to the appropriate department or office head in which the obligation exists. If it becomes necessary, any appeal of a decision resulting from such a hearing must be arranged through the collection manager, Business Office, Savitz Hall, or Dean of Students, Savitz Hall.

The University will have the right to withhold the degree and all records, including certification, transcripts, placement services, etc., pending satisfactory financial arrangements.

A complete text of the Outstanding Financial Obligations Policy may also be obtained from the collection manager, the business office, or the Dean of Students in Savitz Hall.
Office of the President

Ali A. Houshmand  
President  
856.256.4100  
presidenthoushmand@rowan.edu

Robert Zazzali  
Senior Vice President for Community and Economic Development  
856.256.4110  
zazzali@rowan.edu

Joanne Connor  
Chief of Staff and Liaison to the Board of Trustees  
856.256.4102  
connorj@rowan.edu

The President works with the Board of Trustees and the Executive Cabinet to determine the vision and strategy for the University. The President’s Office is comprised of the President, his Chief of Staff and the Senior Vice President for Community & Economic Development.

Division of Academic Affairs

James Newell  
Senior Vice President and Provost  
Bole Hall  
856.256.4012  
newell@rowan.edu

Roberta Harvey  
Vice President for Academic Affairs  
Bole Hall  
856.256.5140  
harvey@rowan.edu

Tricia Yurak  
Associate Provost for Academic Affairs  
Bole Hall  
856.256.5144  
yurak@rowan.edu

The Academic Affairs Division is headed by the Provost or Chief Academic Officer. The Provost is responsible for leadership and oversight of academic programs, faculty affairs, and library services. The Deans of the Colleges of Business, Communication & Creative Arts, Education, Engineering, Performing Arts, Humanities & Social Sciences, Science & Mathematics, and Schools of Earth and Environment, School of Health Professions, The Office Of International Initiatives & Support Services, and Thomas N. Bantivoglio Honors Concentration report to the Provost. The Office of the University Registrar, Faculty Center for Excellence in Teaching and Learning, and Assessment report to the Vice President for Academic Affairs. The Vice President and associate provosts for Academic Affairs, and Library Information Services also report to the Provost. The Provost reports directly to the President.
Division of University Research

Shreekanth Mandayam  
Vice President  
James Hall, Suite 3129  
856.256.5333  
shreek@rowan.edu

Sarah Piddington  
Assistant Vice President  
South Jersey Technology Park (SJTP)  
856.256.5482  
piddington@rowan.edu

The Office of the Vice President for Research is responsible for promoting, supporting and administering the research, scholarly and creative activity of Rowan faculty, staff and students. The Division of University Research oversees five departments.

Division of Student Affairs

Jeff Hand  
Senior Vice President  
Savitz Hall, Third Floor  
856.256.5185  
handj@rowan.edu

Rory McElwee  
Vice President for Enrollment & Student Success  
Savitz 323  
856.256.5187  
mcelwee@rowan.edu

The Division of Student Affairs encompasses several key areas at Rowan University committed to attracting high caliber students and retaining them through graduation. In short, we are a division dedicated to our students’ success. Student Affairs includes the departments of Admissions, Financial Aid, University Web Services, Conference & Event Services, Student Diversity, Office of University Scheduling, Academic Success Center, Card Services Office, Community Standards, Counseling & Psychological Services, Dr. Harley E. Flack Student Mentoring Program, ACEND, Greek Affairs, Healthy Campus Initiatives, Office of Career Advancement, Orientation and Student Leadership Programs, Recreation Center, Residential Learning and University Housing, Student Activities, Student Center, Student Enrichment and Family Connections, Student Government Association, Student Health Services, Student Organizations, Volunteerism, Community Engagement, & Commuter Services, Wellness Center at Winans Hall, and in the Retention area, University Advising Services, University Transfer Services, University Retention Systems, the Office of Academic Transition & Support Programs, the Tutoring Center, and Testing Services. Together, these departments recruit students, help finance their education, advise them on college and career choices, and communicate with them via the Rowan University web and mobile sites. Our main office is in Savitz Hall but, Student Affairs is literally all over Rowan. While you may not have realized it, we met you before you first stepped foot on campus, we'll advise you while you're here and, hopefully, our impression will stay with you long after you leave. The Division of Student Affairs provides academic support and retention programs for students from their first semester through their graduation.

Richard L. Jones  
Vice President and Dean of Students  
Savitz Hall, Room 203  
856.256.4283  
jonesrl@rowan.edu

The Office of the Vice President for Student Affairs and Dean of Students provides guidance and support to students in the following areas; students facing prolonged absences due to a health problem or other extenuating circumstances; reporting sexual assault; and other related student issues.
Campus Recreation
Kevin George
Director
856.256.4927
georgek@rowan.edu

Campus Recreation is committed to providing exceptional programs, services, and facilities that promote and encourage a balanced, healthy lifestyle. We are dedicated to creating a safe, welcoming, and inclusive environment that enhances student learning and skill development, fosters enjoyment and appreciation for recreational life, and enriches the quality of life for the Rowan Community.

The Recreation Center is a three-story, 76,000 square foot recreational activities facility. The building houses an eight-lane swimming pool, a three-lane indoor track, a three-court multi-sport gymnasium, five racquetball courts (one used for indoor cycling) and a group exercise room. The facility also has a 9,000 square foot fitness and weight room, conference room, locker/shower facilities, and a juice/smoothie bar and café. The main desk of the facility operates as ID access/control area, equipment checkout center, and as the program/membership registration area.

The Satellite Fitness Center is located on the corner of Mick Dr. and Victoria Ave. and encompasses over 17,000 square feet. The building offers a free weight room, spaces for functional training, connected cardiovascular equipment, non-motorized equipment, various multi-functional strength systems, and a men's, women's and inclusive locker/shower rooms.

The Recreation Center offers 18 hour days and the Satellite Fitness Center offers 16 hour days during the academic year, with modified hours during the weekends, holidays, and breaks over the course of the year.

Access to facilities, programs, and services is granted to full time students with a current and active Rowan ID card. Students taking 6 or fewer credits may purchase a membership.

Campus Recreation offers a broad range of programs and services; coordinating or co-sponsoring over 200 programs annually in the following programmatic areas: intramural sports, fitness and wellness, aquatics, sport clubs, informal recreation and special events. Although the foundation of our department rests on serving student recreational needs as a priority, we are also committed to a broader constituency.

Card Services Office
Christine Noon
Director of Card Services
Chamberlain Student Center
856-256-4531
noon@rowan.edu

The Card Services Office is responsible for managing all aspects of the official Rowan University identification card and coordination of all activities related to the use of the RowanCard. These responsibilities include managing the University wide card system applications, monitoring the University wide card systems for proper performance, coordinating all distributed responsibilities for University wide card systems, and coordinating integration of all departmental card system applications. The office provides all training related to card systems amongst all campuses. In addition, the office serves as the point of contact for students experiencing problems with their ID card.

Community Standards
Joseph Mulligan
Assistant Vice President
Chamberlain Student Center, Suite 210
856.256.4242
mulligan@rowan.edu

The Office of Community Standards articulates and upholds the standards of behavior expected within the University community. The office addresses violations of the student code of conduct through the university disciplinary system to ensure respect for all members of the community and the maintenance of a collaborative and learning-centered environment.
Counseling and Psychological Services

David F. Rubenstein, Ph.D.
Associate Vice President for Student Wellness
Wellness Center at Winans Hall
856.256.4333
wellnesscenter@rowan.edu

Counseling and Psychological Services (CPS) at the Wellness Center provides confidential mental health and substance abuse services to enrolled students. CPS provides individual and group counseling, triage and emergency evaluations, psychological testing and outreach programs in the area of mental health and substance abuse prevention. Some common areas addressed in counseling for college students include addressing academic stressors, coping with personal and family relationship issues, stress and anxiety management, coping with depression, eating and body image issues, dealing with grief and loss, trauma and substance use.

The University's Stress Management and Response Team (SMART) is coordinated through the Wellness Center and each professional staff is a core member of the team. This university-wide group is available to meet with various divisions, departments, organizations, and groups on campus in order to assist with response to traumatic events that impact particular groups of students or university community as a whole.

Healthy Campus Initiatives

Allie Pearce, MA
Assistant Director, Healthy Campus Initiatives
Wellness Center at Winans Hall
856.256.4333
hci@rowan.edu

Healthy Campus Initiatives (HCI) at the Wellness Center educates students about making healthy decisions and choices regarding their personal wellness that will enhance their college experience. All members of the Rowan community are encouraged to attend workshops, programming, and campus events aimed at increasing knowledge and developing attitudes and beliefs that promote health and wellness in several areas. These areas include suicide prevention and sexual health.

Social Justice, Inclusion and Conflict Resolution

Gardy J. Guiteau
Director
Robinson Hall, Room 118
856-256-5495
socialjustice@rowan.edu

Formed through the collaborative efforts of students, faculty and staff, the Office of Social Justice, Inclusion and Conflict Resolution exists to promote an inclusive university community where individuals are empowered to grow in their understanding of identity, social justice, and the skills needed to lead a more just society. The office provides dedicated physical space and resources for underrepresented and underserved students at Rowan University. The office serves as an umbrella for the following programs and centers:

Harley E. Flack Student Mentoring Program

Temple Jordan
Assistant Director
Robinson Hall, Room 215L
856-256-5860
harleyflackmentoring@rowan.edu

The Harley E. Flack Student Mentoring Program was founded in 1992, and provides a comprehensive array of mentoring services. Services are designed and delivered using methods based on strong evidence, which indicates that these programs support retention and student success.

Multicultural Center

John T. Mills
Assistant Director
Robinson Hall, Room 214B
856-256-5860
multicultural@rowan.edu

The Multicultural Center is an evolution of the long established Office of Multicultural Affairs, which has been merged into the new structure. The Multicultural Center serves as a resource for students from diverse cultural and identity groups, and
is intended to promote the celebration diversity, development cross cultural understanding and competency, and inclusion of diverse people in the Rowan community.

**Spiritual Exploration Center**
Robinson Hall, Room 215A
856-256-5860
interfaith@rowan.edu

The Spiritual Exploration Center aims to promote a campus environment that is inclusive of student’s religious and spiritual identities and allows for expression and exploration of spiritual and religious beliefs and values. Programs and initiatives of the center will advance understanding and appreciation of the contributions of communities of faith.

**LGBTQIA+ Center**
Robinson Hall, Room 215J
856-256-5860
LGBTQ@rowan.edu

The LGBTQIA+ Center located in the Office of Social Justice, Inclusion, and Conflict Resolution (SJICR) aims to create a safe space for students who identify as LGBTQIA+ and support students’ exploration of their identity. SJICR staff working to fulfill the goals of this center advocate for campus inclusion of the LGBTQIA+ community at Rowan.

**Women’s Center**
JoAnna Murphy
Assistant Director
Robinson Hall, Room 215N
856-256-5860
women@rowan.edu

The Women’s Center develops programing aimed at addressing the needs of all women and empower students to promote a campus community inclusive of all genders and respectful of gender differences. Programs and initiatives of the center will support efforts to address inequity, promote understanding of women's and gender issues, and create a space for women to build bridges and a strong sense of community.

**Student Activities**
Constantine Alexakos
Assistant Director
Chamberlain Student Center, Room 209
856.256.4696
alexakos@rowan.edu

The Office of Student Activities (OSA) supports the mission of the Division of Student Affairs. This office is also responsible for oversight and advising of both Rowan After Hours and Student University Programmers. Through constant collaboration with campus partners, the OSA plans and implements co-curricular programs for all students that are designed to stimulate personal development, create opportunities for student engagement, and contribute to building campus community.

**Student Center**
Tina Pinocci
Associate Vice President
Chamberlain Student Center
856.256.4604
pinocci@rowan.edu

The Chamberlain Student Center serves as a safe and welcoming environment with unlimited opportunities for personal development and enhanced student learning experiences. Through quality services, programs and facilities, the Student Center is "more than just a building."

The main administrative office of the Chamberlain Student Center is responsible for a variety of services within the building, including scheduling and reservations for meeting or program spaces, assistance with set-up or AV tech needs, employment of student staff, and enforcement and interpretation of building policies and procedures. The administrative staff also oversees the following service areas within the facility: the Information Desk, ID Processing Center, Profs Place, and the game room.

Additional offices and services housed within the facility include: Student Activities, Greek Life, RowanCard Services, Volunteerism, Community Engagement & Commuter Services, Student Government Association, Student University Programmers, Mailroom and Campus Dining Services (Food Court, Marketplace, Owl's Nest, Profs Place, Starbuck’s, and...
Student Health Services
Scott Woodside
Director for Student Health Services
856.256.4333
wellnesscenter@rowan.edu

Student Health Services (SHS) at the Wellness Center strives to remove health-related barriers to learning, to promote optimal wellness, to enable students to make informed decisions about health issues, and to empower students to be self-directed and well informed health care consumers.

Licensed physicians, nurse practitioners and registered nurses provide quality, professional healthcare to all students who are matriculated and currently enrolled at Rowan University.

All incoming matriculated students must provide SHS with a complete health record that can be downloaded from our website. This packet has simple, yet detailed information regarding your immunization history and other health requirements that must be submitted by July 15th (December 15th for Spring admission).

All matriculated students are required to have health insurance as a condition of full-time enrollment at Rowan University. To enroll in the health insurance plan offered by United Healthcare, visit www.firststudent.com and follow the instructions. To waive the Rowan University health insurance plan, visit the Health Insurance tab on the Bursar's Office website and follow the instructions www.rowan.edu/bursar Failure to waive the United Insurance plan will result in automatic enrollment into the plan. Further information is available at the "Health Insurance" or the "Mandatory Pre-Entrance Health Forms" tabs at the left on our website www.rowan.edu/health

Volunteerism, Community Engagement & Commuter Services
Andrew Perrone
Assistant Director
Chamberlain Student Center, Suite 210
856.256.4597
perrone@rowan.edu

The Office of Volunteerism, Community Engagement & Commuter Services provides programming, resources, and support to promote a Rowan community of active citizens. We work collaboratively with university faculty and community partners to design a range of curricular and co-curricular service-learning opportunities. Students who engage with service learning, volunteerism and community engagement at Rowan will reflect on meaningful volunteer experiences as they develop a lifelong commitment to their communities. We also collaborate with Glassboro Administration and officials to assist with community concerns that may arise related to Rowan students sharing community life with residential neighbors. Furthermore, the VCECS office also provides programming and support resources geared towards Rowan University's commuter student population.

University Advising Services
University Advising Services, UAS, is an organization of professional academic advisors within the Student Success area of the Division of Student Affairs. The hallmarks of UAS advising are exceptional student-centeredness and responsiveness; excellence in advisor training and ongoing professional development; adherence to standard advising services and protocols; and collaboration with academic units and other campus personnel and services. UAS works to construct a collaborative, learning-centered environment committed to engaging students in the development and implementation of meaningful educational goals, informed academic planning, and major selection consistent with their personal values, interests, and abilities. We also provide our students guidance with regard to effective navigation of university systems and processes. UAS partners with Departments and Colleges to provide and coordinate advising services to Rowan students in specific majors. UAS offers a range of services, including individual appointments, walk-in hours, group advising sessions in or out of class sessions, and more.

University Advising Center (UAC)
Carol Eigenbrot
Associate Director
Savitz Hall, Third Floor
856.256.4459
eigenbrotc@rowan.edu

The University Advising Center (UAC) serves as the advising hub for advising related information. In addition, academic advisors in the UAC advise all Exploratory Studies students and all students considering changing their major, as well as students in select majors.
College of Education Advising Center
Dorothy Abruzzo-Klumpp
Associate Director
James Hall, Second Floor
856.256.4420
abruzzo-klumpp@rowan.edu

The College of Education Advising Center provides academic advising for students enrolled in College of Education programs and selected School of Health Professions programs. Additionally, informational meetings are available for students considering these programs.

UAS Services for CHSS, CCCA, SEE, and CPA
Julia Beth Rey
Associate Director
James Hall, Second Floor
856.256.5871

UAS Services for RCB, CSM, and SHP
Amy Ruymann
Associate Director
Business Hall 305F
856.256.5563

Academic Success Center
John Woodruff
Director
Savitz Hall, 3rd floor
856.256.4259
successcenter@rowan.edu

The Academic Success Center provides a myriad of comprehensive programs and services that assist students in enhancing and maximizing their academic potential from Orientation through Graduation. The Center provides services in the following areas: tutorial services, veterans affairs, disability resources, testing, academic coaching program, and an array of academic support workshops. Disability Resources provides accommodations and assistance to students with various documented disabilities in accordance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) of 1990. Students who meet University admissions requirements (i.e., otherwise qualified to attend the University) are required to submit appropriate documentation so that the University can determine whether they qualify for reasonable accommodations. Veterans Affairs handles all military education benefits and provides support services for our student veterans and programming for the campus community to recognize and appreciate their contributions.

Student Access & Success Center
Penny McPherson-Myers
Associate Vice President for Diversity and Organizational Effectiveness
Savitz Hall, 3rd floor
856.256.4086
mcphersonp@rowan.edu

Achieving Success through Collaboration, Engagement and Determination (ASCEND)
Dawn Singleton
Director
ASCEND Glassboro, Savitz Hall, 3rd floor
856.256.5700
singletond@rowan.edu

ASCEND Camden, Academic Building, 2nd Fl.
856.256.9230
www.rowan.edu/ascend

The ASCEND program is an educational pipeline scholarship program for first generation, underrepresented, and/or low income students which utilizes a series of intentional programming to support students in the program. Within the ASCEND program there are two components: the Educational Opportunity Fund Program (EOF) and the RISE Program.
The EOF program provides access, preparation, orientation, and academic support for students who are among the first in their family to attend college, and for those who otherwise may face unique challenges in college due to economic, cultural, or educational circumstance.

To be considered for the EOF program, students must complete the Common Application and select EOF. The four main requirements for EOF applicants are:

1. At least one year residency in New Jersey.
2. A background of historical poverty as indicated by the Free Application for Federal Student Aid (FAFSA) and supporting documentation.
3. Potential for college level success as demonstrated by an interview, letters of recommendation, etc.
4. A High School or General Equivalency Diploma.

The RISE Program is a special admissions scholarship program designed for highly motivated students who may not meet Rowan University's regular admission criteria nor the EOF financial criteria, but would benefit from additional academic support and resources. There is no financial eligibility criteria for the RISE program. However, students are required to complete the FAFSA.

To be considered for the RISE program, students must submit the Common Application. Admissions officers identify potential candidates, review admission information and conduct student interviews to determine admittance. Selected students of the ASCEND program are conditionally admitted and required to participate in a six week summer bridge program. This program provides college survival skills, leadership skills, academic coursework and support, STEM enrichment activities, and orientation for transition into the University environment. During the summer program, the ASCEND staff evaluates the students’ demonstrated ability to successfully transition into Rowan University and makes a recommendation regarding the appropriateness of fall admission.

ASCEND students are assigned an ASCEND counselor to provide a broad range of academic and personal support services, including counseling, tutoring, and leadership development from freshman year through graduation. ASCEND Counselors interact with students in individual and small group settings. Financial assistance is provided to qualified students.

The Office Of International Initiatives & Support Services

Li Yang
Robinson Hall, 117
856.256.2914

The Office of International Initiatives & Support Services is committed to comprehensive internationalization at Rowan through collaborative efforts that infuse global perspectives throughout the university’s teaching, learning, and service.

The OIISS offers the expertise in international partnership development and governmental regulations pertaining to non-immigrant Visas. We are the primary facilitator for faculty, student or staff engaging internationally for their studies, research, employment, or for the development of collaborative programs and agreements with universities and organizations abroad. The OIISS works closely with multiple departments at Rowan, including: Academic Colleges, Admissions, Advising, The Faculty Center, the Health Center, Residence Life, the Registrar, and Financial Aid. Through this collaboration, we can attract high quality international students and provide the support, training and services necessary for student retention and success. The OISS staff is also responsible for the ongoing support of international students and scholars through academic and cultural workshops, enrichment activities, and social programming to facilitate a positive campus experience. By engaging the wide array of expertise across our campus, our international students are integrated into campus life, thus providing opportunities for all students, faculty and staff to globalize their experiences and perspectives, a critical component of life in the 21st century.

The OIISS is responsible for the following areas:

• International Student & Scholar Support Services
  ◦ Issue I-20s for prospective F-1 students and dependents
  ◦ Issue DS-2019 for prospective J-1 students and dependents
  ◦ Advise students on OPT activities and status
  ◦ Plan and deliver arrival and orientation activities for new international students
  ◦ Work collaboratively with Foundations Office to advise students receiving international scholarships, such as Inductotherm

• SEVIS Compliance Oversight
  ◦ Stay up to date on federal regulations from DHS and USCIS as they impact non-immigrant students and scholars
  ◦ Maintain compliance within SEVIS regarding university certificate and degree programs
  ◦ Maintain institutional compliance with DHS, USCIS and DOS

• International Recruitment & Admission Strategies
  ◦ Identify, implement and oversee strategies for increasing student enrollment, working in collaboration with the Office of Admissions
  ◦ Oversee the International Scholarship opportunities at Rowan

• International Partnerships & Initiatives
Oversee government sponsored programs, such as the Brazil Science Mobility Project and Saudi Arabian Cultural Mission
Identify viable international partners for internationalizing student learning opportunities and faculty research opportunities
Work collaboratively with Academic Affairs and Office of General Counsel to implement and oversee partnerships
Collaborate with university advising on study abroad partnerships & initiatives, and promoting study abroad opportunities throughout the university

• English Language Programs
  - Intensive 5-level English language program for international and domestic students to learn English
  - Conditional Admission Program for students applying to Rowan University
  - Pathway classes for matriculated students who need additional English language & culture support
  - Upward Bound Program pre-college program for high school English language learners in Camden City

• Campus Internationalization Initiatives
  - Plan campus activities that promote internationalization
  - Advisor to Rowan’s International Student Organization
  - Plan activities for International Week
  - Collaborate with offices across the campus to develop initiatives that integrate global perspectives into every day life at Rowan
  - Cultural Liaison Program

The Office of International Initiatives and Support Services has offices at the Glassboro and Camden Campuses:
Glassboro Campus, Office of International Initiatives & Support Services, Robinson Hall 117
Camden Campus, English Language Programs, College Hall 516

Tutoring Center
Benita Regusters
Coordinator
Savitz Hall, Third Floor
856.256.4462
tutoringcenter@rowan.edu

Tutoring is available free of charge to all Rowan University undergraduate students. The Tutoring Center provides small-group or drop-in tutoring in most subject areas. Students may request academic assistance on a one time basis or may be scheduled for regular assistance on a weekly basis throughout the semester. The purpose of tutoring is to complement classroom instruction, not replace it. Workshops on learning strategies and effective study techniques are presented at various times throughout the academic year.

Division of Information Resources & Technology (IRT)

Memorial Hall
856.256.4401
irt@rowan.edu
www.rowan.edu/irt

For help with a technology-related issue, please contact:
IRT Support Center
856.256.4400
support@rowan.edu

The Division of Information Resources & Technology (IRT) provides university-wide support for all information resources governance processes, information technology infrastructure, information security, business applications, data governance, and information management services.
IRT is committed to helping students, faculty and staff with computer, network, telephone/voicemail, username/password and other technology issues. IRT provides that support via phone, email, in-person consultations and on-site visits.
By providing the university with information and technology resources and services that support and enhance academic and administrative programs, IRT promotes student-centeredness, excellence in instructional practice, quality management, and efficiency and integrity of operations.

Mission
We empower students to achieve sustainable careers through professionally oriented programs and real-world immersion experiences, integrating relevant faculty research, entrepreneurial thinking, responsible leadership, and community collaboration.

We achieve our mission through a commitment to –

Professionally Oriented Programs and Sustainable Careers: Our students develop the strong disciplinary expertise, poise and professionalism necessary to excel in their first positions, as well as the skills to tackle new opportunities as technologies and business models evolve. We feature career-oriented dual-degree options, major-minor pairings, and the ability to combine certificate programs with existing majors.

Entrepreneurial Thinking and Responsible Leadership: We offer entrepreneurially focused curricular and co-curricular programs to help students develop the creativity, initiative, and persistence that characterize the entrepreneurial mindset. As a Principles for Responsible Management Education (PRME) founding signatory, we are committed to developing students' abilities to generate sustainable value for their employers and society at large.

Relevant Faculty Research: We are aligned with the University's broad definition of research, which includes activities that positively impact the educational experience, the scholarly community, and the economic vitality of the region.

Real-world Immersion and Community Collaboration: We provide multiple real-world immersion experiences for our students that set them apart in a crowded job market. This, combined with our commitment to the economic development of the region, compels us to actively engage with the business and nonprofit communities in our region in ways that benefit all.

Vision
To be a first choice business school for enterprising students and discerning employers, a research hub, and an economic catalyst for the region and beyond.

Accreditation
Rowan University's business programs are accredited by AACSB International (The Association to Advance Collegiate Schools of Business). To achieve this prestigious accreditation, the business programs successfully demonstrated a wide range of quality standards relating to faculty qualification, strategic management of resources, interactions of faculty and students, as well as a commitment to continuous improvement and achievement of learning goals in degree programs.
In addition, the College is just one of a few AACSB International schools in the nation to have the Management Information Systems Program also accredited by ABET, the Accreditation Board for Engineering and Technology, Inc.

**Departments**
The William G. Rohrer College of Business houses the departments of Accounting and Finance, Management and Entrepreneurship, and Marketing and Business Information Systems. (Not all departments offer programs through the Division of Global Learning & Partnerships.)

**Programs Offered**
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit [www.rowanu.com/programs](http://www.rowanu.com/programs).

**Academic Program Policy Categories**

For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

**Category 1**: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Category 2**: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Category 3**: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Policy Prior to Fall 2013 Matriculation**

The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

**Master’s Degrees**

**Master of Business Administration (MBA)**

The Master of Business Administration (MBA) program at Rowan University provides contemporary graduate business education to professionals from diverse fields and academic backgrounds. The program prepares students as team leaders and team players with effective interpersonal, oral, and written communication and group process skills. The MBA curriculum emphasizes critical thinking, quantitative analysis and computing applications, and the technological and international nature of business.

The Rohrer College of Business MBA program offers small class sizes with an average student/faculty ratio of 18 to 1. The program attracts graduates from business, sciences, engineering, and other programs, whose careers are leading them to positions of increasing responsibility in business or industry. Graduates are prepared to assume managerial positions in commercial, not-for-profit, and governmental organizations/agencies.
The MBA program consists of 12 graduate classes with nine required and three elective courses. For students enrolled in the face-to-face MBA, the three elective courses allow the individual student to tailor the academic program to meet his or her specific career development needs. For students enrolled in the fully online or Rowan College of Burlington County (RCBC) version of the program, the three elective courses will be offered based on availability (more information is provided below). Prospective students who do not have the required foundation courses may choose to apply directly to the MBA program, and complete their foundation courses while enrolled as a graduate student.

Rowan’s Master of Business Administration (MBA) program is especially designed to accommodate both full-time students and full-time employees. The program is personal, pragmatic, and progressive. Classes are conveniently scheduled in the evening and online to accommodate demanding work schedules. Rowan’s reputation makes the reasonable cost of a Rowan MBA a wise investment. Rowan’s MBA tuition is among the lowest for AACSB accredited programs in the Philadelphia region.

**Foundation Courses**

Eligible applicants must have successfully completed the following undergraduate foundation courses at an accredited institution. (Foundation courses FC-6 and FC-7 must be completed at a 4-year institution to fulfill foundation course requirements. FC-1 through FC-5 may be taken at a junior/community college.) During the admissions process, the MBA academic advisor will determine foundation course equivalencies and how any unfinished undergraduate foundation courses can be scheduled concurrently with graduate enrollment. If applicable, official notification of any unfinished foundation courses will be included in the applicant’s official admission decision letter from Rowan University.

- FC-1. Calculus Techniques & Applications (3.0 s.h.)
- FC-2. Statistics I (3 s.h.)
- FC-3. Foundations of Accounting (3 s.h.) or Principles of Accounting I & II
- FC-4. Principles of Economics: A Survey (3 s.h.) or Microeconomics & Macroeconomics
- FC-5. Principles of Marketing (3 s.h.)
- FC-6. Principles of Finance (3 s.h.)
- FC-7. Operations Management (3 s.h.)

**MBA CONCENTRATIONS**

The MBA program offers the degree with the following concentration options.

- Accounting
- Finance
- Management Information Systems (MIS)
- Management
- Supply Chain & Logistical Systems
- General Business* (offered fully online and to RCBC students)

Certificates of Advanced Graduate Study (Non-degree)

Certificate of Advanced Graduate Study (Post-MBA CAGS) Overview
Completion of a Certificate of Advanced Graduate Study (CAGS) will afford Rowan MBA alumni as well as MBA graduates of other AACSB accredited universities the opportunity to complete an area of concentration or complete a new concentration. The Post MBA CAGS provides MBA graduates an opportunity to prepare themselves for opportunities in a rapidly changing workplace by enrolling in concentrations related to their current or expected career paths.

Concentrations
The Post-MBA CAGS program offers the following concentration options: Accounting, Finance, Management, and Management Information Systems (MIS).

Certificates of Graduate Study (Non-degree)

Certificate of Graduate Study in Accounting (COGS)

The Accounting Certificate of Graduate Study (COGS) is designed so that students can expand their knowledge in specialized accounting subjects as well as obtain additional courses needed to reach the 150 credit requirement to be licensed as a CPA. Students may also choose to begin earning their MBA by first completing the COGS in Accounting.

Program Requirements

- Accounting Certificate of Graduate Study at Rowan University requires the completion of 12 graduate semester hours (s.h.) made up of 4 courses.
- Students who have not earned a bachelor's in accounting must take Managerial Accounting (ACC 03500), along with 3 electives.

Required Courses

12 s.h.

Choose four (4) from the following options.

<table>
<thead>

Certificate of Graduate Study in Business (COGS)

The Business COGS provides graduate course exposure to students who are ultimately interested in pursuing the MBA degree. There are many potential graduate students who are considering the MBA degree. However, they hesitate investing the time and energy required to complete the GMAT exam (a requirement for admission to Rowan's MBA program) without fully understanding the nature of the coursework. The purpose of the COGS in Business is to provide an opportunity for aspirant MBA applicants to take several classes before they apply to the MBA Program. Students who wish to later pursue a Rohrer College of Business MBA may have all COGS credits transferred into the Rohrer College of Business MBA program, assuming they have earned a grade of "B-" or better in all courses.

GMAT Waiver: Students who earn a 3.85 or higher cumulative GPA at the completion of all 5 COGS in Business courses will have the GMAT requirement waived, should they decide to apply to the MBA program.

Program Requirements

Required Courses

15 s.h.

(i.e.: semester hours/credit hours)
Course # | Course Title | S.H.
---|---|---
ACC 03500 | Managerial Accounting | 3
MGT 01510 | Professional, Legal & Managerial Responsibilities | 3
MGT 06500 | Designing Developing & Leading High Performance Organizations | 3
MIS 02500 | Issues in Management Information Systems | 3
MKT 09500 | Marketing Management | 3

**Total Required Credits for the Program**
15 s.h.

**Foundation Courses**

Eligible applicants must have successfully completed the following undergraduate foundation courses at a regionally accredited institution. During the admission process, the MBA academic advisor will determine foundation course equivalencies. If applicable, official notification of any unfinished foundation courses will be included in the applicant's official decision letter from Rowan University.

- FC-1. Foundations of Accounting or Principles of Accounting I and II
- FC-2. Principles of Marketing

Students admitted without having completed these foundation courses may complete them while enrolled in the COGS in Business program. The foundation courses must be completed before the corresponding course for which the foundation course is a pre-requisite and do not count toward the 15 required semester hours for the program.

**Graduation/Exit, Benchmark, and Thesis Requirements**

None

**Minimum Required Grades and Cumulative GPA**

The COGS in Business is a Category 3 program.

**Certificate of Graduate Study in Management Information Systems/MIS (COGS)**

The Certificate of Graduate Study in Management Information Systems/MIS (COGS) will enhance a student's preparedness to assume jobs in a world of rapidly changing technology by preparing them to develop business solutions through the use of information and technology resources. Students will be experienced in dealing with technological issues, understand the role of humans in developing technology-based solutions, and have the ability to manage technology-related projects. Students may also choose to begin earning their MBA by first completing the COGS in MIS.

DEGREE COMPLETION

Bachelor of Science in Business Administration: Global Bus. & Leadership (BSBA: GBL)

The Department of Management and Entrepreneurship coordinates the Bachelor of Science in Business Administration: Global Business and Leadership program. An interdisciplinary program, the Bachelor of Science in Business Administration: Global Business and Leadership program is a degree-completion program for students who have already completed an Associate of Science in Business Administration program. The Business Administration major is a degree for students seeking a broad-based education in business. The Global Business and Leadership concentration provides students with a broad understanding of challenges and opportunities of leading business organizations in a global environment. Offered online, the program provides maximum flexibility for students while maintaining a high level of academic rigor.

The Bachelor of Science in Business Administration requires the common Business Core of the College of Business courses. These courses provide a solid understanding of the business functions and are required of all students majoring in business. The concentration, Global Business and Leadership, consists of 11 required courses intended to provide students with an understanding of the globalization on all of an organization's business functions.

Students working toward a Bachelor of Science in Business Administration: Global Business and Leadership degree must achieve a 2.00 grade point average, overall, as well as a 2.50 grade point average in the required business courses in order to earn the degree.

General Education

All students must complete the University General Education requirements as described on page 14

Rowan Experience

All students must complete the Rowan Experience requirement as described on page 16

Required Courses (may be included in General Education) 15 s.h.

History
The College of Communication was established July 1, 1996, after unanimous final approval by the Rowan University Board of Trustees at their June 1996 meeting. In 2012, the Department of Art joined the college, and the college was renamed the College of Communication and Creative Arts to reflect the full range of programs and courses.

Introduction
The College of Communication and Creative Arts at Rowan University blends the theoretical, the creative, and the practical, building upon an expansive base of general education courses that serve to develop a liberal arts perspective in all areas. Experimental learning is a strong component of the programs and internships are encouraged in all majors.

Departments
The College of Communication and Creative Arts houses six departments: Art, Communication Studies, Journalism, Public Relations and Advertising, Radio, Television, and Film, and Writing Arts. (Not all departments offer programs through the Division of Global Learning & Partnerships.)

Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs.

Academic Program Policy Categories
For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-“ grades
- Earn no grades lower than a “B-“
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a “B-“
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C“
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Policy Prior to Fall 2013 Matriculation
The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

Master's Degrees

Master of Arts in Public Relations (M.A.)
The Master of Arts in Public Relations emphasizes real-world applications of theories and techniques offered in an environment that emphasizes collaborative learning. The program attracts a cross section of students with experience levels ranging from recent graduates to senior managers. The Master of Arts in Public Relations curriculum grounds students in four key areas: writing, research, problem solving, and planning. While most students choose to take courses in organizational/corporate public relations, students may also choose to take a series of courses in public affairs or educational public relations and design the master's project in those areas.

Program Requirements
The following courses make up the Master of Arts in Public Relations program.
- Required Courses: 21 semester hours (s.h.)
- Elective Courses: 12 semester hours (s.h.)

Required Courses

MAPR 01561 Advanced Techniques in Communication  3
MAPR 01620 Seminar in Public Relations (2 semesters)  6

Students wishing to focus on Educational Public Relations should also take FNDS 21502 Foundations of Education 3.0 and a
graduate-level Psychology course.

**Elective Courses**

Approved modules and electives (depending on concentration). Please discuss with academic advisor.

**Total Required Credits for the Program**

33 s.h.

**Foundation Courses**

Eligible applicants must have successfully completed the following undergraduate foundation course at an accredited
institution. During the admissions process, the Master of Arts in Public Relations academic advisor will determine
foundation course equivalencies. If applicable, official notification of any unfinished foundation courses will be included in
the applicant’s official admission decision letter from Rowan University.

FC-1. Publication Layout and Design (JRN 02317) (3.0 s.h.)

Students admitted without having completed this foundation course may complete it while enrolled in the Master of Arts
Public Relations program. The foundation course must be taken before completing the program and does not count toward
the 33 required semester hours for the master's degree.

**Graduation/Exit, Benchmark, and Thesis Requirements**

Students write a research project on any aspect of public affairs, educational communication, or corporate communication
to complete the program. A comprehensive oral/written exam is also required. (No Thesis)

**Minimum Required Grades and Cumulative GPA**

The MA in Public Relations is a Category 3 program.

For details regarding satisfactory academic progress and graduation requirements, please visit www.rowanu.com/policies.

**Master of Arts in Writing (M.A.)**

The Master of Arts in Writing is an innovative, interdisciplinary degree that integrates the scholarship on composition and
new media with the practice of creative, journalistic, academic, and electronic writing.

The Master of Arts in Writing provides students with a strong theoretical foundation in writing studies through four core
courses and offers several areas in which students may develop their personal and professional goals, including composition
studies, new media, and creative writing/journalism. A Master’s Project is a requirement of the program.

Rowan University undergraduates majoring in the Bachelor of Arts in Writing Arts program can apply to the accelerated
Bachelor of Arts/Master of Arts dual degree (4+1) program allowing them to earn both the Bachelor of Arts and Master of
Arts degrees in five years. Please see information about the Bachelor of Arts/Master of Arts admissions requirements at
academics.rowan.edu/ccca/departments/writingArts/AcceleratedBAMA.html for details.

Certificates of Graduate Study (Non-degree)

Certificate of Graduate Study in Creative Writing (COGS)
By participating in a curriculum that combines the writing workshop model with the study of craft through a close reading of published texts, students will engage in the advanced practices of the genres of their choice. They will learn to engage in a process of composition that, when combined with the development of a critical vocabulary, allows students to give, receive, and use criticism in their revisions. As they discover and develop their individual style, voice, and literary vision, they will acquire the discipline and the creative and organizational strategies necessary to prepare for and advance them toward publication.

Certificate of Graduate Study in Editing & Publishing for Writers (COGS)

Due to recent changes in the publishing industry (corporate mergers, ever-advancing publishing technologies, radical alterations in traditional book distribution and bookselling) writers are now compelled to be excellent editors and marketers of their own work. Utilizing a curriculum that combines advanced editing and revision of works of the student’s own choice (nonfiction book, YA novel, poetry, articles and essays), along with the hands-on opportunities in classes, students will acquire a necessary understanding of contemporary editing and publishing procedures in a variety of print and digital environments, including periodicals, and digital and book publishing, as well as the discipline and organizational strategies necessary to prepare and submit a variety of types of work for publication.

Certificate of Graduate Study in Integrated Marketing Communication & New Media (COGS)

The Certificate of Graduate Study (COGS) in Integrated Marketing Communication and New Media provides insight into how company efforts to offer greater accountability from their marketing efforts have intensified, and how new media have proliferated.

This has intensified the search for new ways to get more accountability from marketing communication efforts. The result has been a growing understanding on the part of corporate management that (1) the efficiencies of mass media advertising are not what they used to be; (2) consumers are more sophisticated, cynical, and distrusting than ever before; (3) tremendous gaps exist between what companies say in their advertising and what they actually do; and (4) in the long run, nourishing good customer relationships is far more important than making simple exchanges.

There is now a growing movement toward integrating all the messages created by various communication agencies and sent out by various departments within the company to achieve consistency. This process is known as Integrated Marketing...
Communication.
Students can use the coursework from this Certificate of Graduate Study and apply it toward the Master of Arts in Public Relations program.

Certificate of Graduate Study in School Public Relations (COGS)
The School Public Relations Certificate of Graduate Study provides students with a broad overview of School Public Relations and a focus on several essential components of the field. By investigating and assessing real world case studies, students will develop an understanding of the need for formal planning and evaluation of an educational organization's public relations initiatives.

Students can use the coursework from this Certificate of Graduate Study and apply it toward the Master of Arts in Public Relations program.

Program Requirements
The School Public Relations Certificate of Graduate Study is a part-time program offered in an accelerated online format. It requires the completion of 9 graduate semester hours (3 courses) which are possible to complete in only 2 to 3 consecutive semesters. The courses that make up the School Public Relations Certificate of Graduate Study may also be applied towards Rowan University's Master of Arts in Public Relations program or the IMC & New Media Certificate program.

Coursework
The following courses make up the School Public Relations Certificate of Graduate Study program. Each course is scheduled in 8 week modules with each week of work starting every Tuesday at 8:00 a.m. and ending every Monday at midnight (Eastern Standard Time).

Required Courses 6 s.h.
(s.h.: semester hours/credit hours)
Certificate of Graduate Study in Writing, Composition & Rhetoric (COGS)

This 9-credit program for teachers and other writing professionals improves students’ knowledge of contemporary theories, issues, and practices in writing and writing instruction. Students develop their writing abilities by analyzing their own writing and that of published writers. Courses emphasize composition theory, writing assessment, and the role of technology in writing.

Certificate of Graduate Study in Writing & New Media (COGS)
The Certificate of Graduate Study in Writing & New Media will increase students’ awareness of composing opportunities, theories, and practices that are emerging as a result of the ubiquity of new media technologies and online writing spaces. Students will learn how to effectively compose in and for a variety of online writing spaces using a variety of modes and genres. Students will also learn theories in areas that hold significant import for understanding the implications of new media communication technologies: information architecture, visual rhetoric, social media, computers and writing, and designing with web standards. These marketable skills will enhance students’ current and future career opportunities.

Mission
To positively impact and develop local, regional, national, and global educational communities by
• collaborating with partners in the field to promote learning and the mental and physical health of diverse learners in
  all settings;
• integrating teaching, research, and service to advance knowledge in the field; and,
• preparing and supporting professionals through the development of knowledge, skills and dispositions
  with the ultimate goal of ensuring equitable educational opportunities for all learners.

Vision
The College of Education will be a leading force in preparing and supporting reflective practitioners who use education to
transform our global society.

Accreditation
Rowan University’s teacher education program, one of the largest and most comprehensive in New Jersey and in the nation,
has been accredited by the National Council for Accreditation of Teacher Education (NCATE), now known as the Council
for the Accreditation of Educator Preparation (CAEP), since 1956. In addition, College of Education programs have
received national recognition from the following professional organizations:
• ACEI Association for Childhood Education International
• ACTFL American Council on the Teaching of Foreign Languages
• CEC Council for Exceptional Children
• ELCC Educational Leadership Constituent Council
• IRA International Reading Association
• NAEC National Association for the Education of Young Children
• NASP National Association of School Psychologists
• NASPE National Association for Sport and Physical Education
• NCSS National Council for the Social Studies
• NCTE National Council of Teachers of English
• NCTM National Council of Teachers of Mathematics
• NSTA National Science Teachers Association
• TESOL Teachers of English to Speakers of Other Languages

In addition, the Master of Arts in Counseling in Educational Settings program is accredited by the Council for
Accreditation of Counseling and Related Educational Programs (CACREP).

The New Jersey State Department of Education also approves Rowan’s programs.

† New Jersey Department of Education (NJDOE) Requirements and Certifications
The New Jersey Department of Education (NJ DOE), not Rowan University, grants certifications based on requirements
set by the state. While coursework for specific programs meets the academic requirements for NJ DOE certification, it is
the student’s responsibility to ensure that all other certification requirements are met, including, but not limited to,
appropriate type and level of license and years of experience. NJ DOE certification requirements are subject to change.
Certification applications are evaluated, by NJ DOE, based on the most current state requirements. For current NJ DOE
licensure information, go to http://www.state.nj.us/education/educators/license/.
Departments
The College of Education is composed of four (4) academic departments. They include:

- Educational Services & Leadership
- Interdisciplinary & Inclusive Education
- Language, Literacy, & Sociocultural Education
- Science, Technology, Engineering, Art, & Mathematics (STEAM) Education

(Not all departments offer programs through the Division of Global Learning & Partnerships.)

Support Services
In addition to the academic departments, the College of Education houses several offices that support the academic programs including:

The Office of Field Experiences
The Office of Field Experiences coordinates all field placements, including school or clinical settings required for graduation and state certification applications. The mission of the College of Education is to prepare educators to transform classrooms and schools into learning communities that foster academic achievement, social responsibility, personal responsibility, and social justice. The Office of Field Experiences is located in the College of Education Advising Center in Herman D. James Hall, 2nd floor. Hours are 8:30 a.m. to 4:30 p.m., Monday through Friday.

The College of Education Advising Center (CEAC)
The College of Education Advising Center provides students with the necessary support and guidance as they pursue their educational goals and courses through the College of Education. It is a resource that offers program advisement for current and prospective students. The center is focused on providing accurate and timely information to assist students who are working toward a degree and/or licensure in a number of professional education careers.

The John J. Schaub Instructional Technology Center
The John J. Schaub Instructional Technology Center consists of a Computer Laboratory and an Instructional Materials Center (IMC). The Instructional Technology Center provides facilities, technology, materials, and training in the four areas of Instructional Technology: print technology, audio-visual technology, computer technology, and integrated technology. It is the primary instructional technology resource and training facility for students and faculty in the College of Education. The IMC houses PreK-12 teaching kits and other materials related to the educational programs offered by the College of Education. It is a comfortable study space that serves as a teachers' library and workroom for students in the College of Education.

Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs .

*Coursework in this program counts as approximately one half of the coursework required for the Master of Education in Teacher Leadership.

**Coursework in this program counts toward the coursework required for the Master of Arts in School Administration.

***Coursework in this program counts toward the coursework required for the Doctor of Education in Educational Leadership program.

† The New Jersey Department of Education (NJ DOE), not Rowan University, grants certifications based on requirements set by the state. While coursework for specific programs meets the academic requirements for NJ DOE certification, it is the student’s responsibility to ensure that all other certification requirements are met, including, but not limited to, appropriate type and level of license and years of experience. NJ DOE certification requirements are subject to change. Certification applications are evaluated, by NJ DOE, based on the most current state requirements. For current NJ DOE licensure information, go to [www.state.nj.us/education/educators/license/](http://www.state.nj.us/education/educators/license/).

### Admissions

For the most up-to-date information regarding admission requirements, entry points, and application deadlines, please visit [www.rowanu.com/programs](http://www.rowanu.com/programs). Click on your program of interest to be connected to program and admission details.

### Academic Program Policy Categories

For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

**Category 1:** To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Category 2:** To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Category 3:** To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

### Policy Prior to Fall 2013 Matriculation

The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.
DOCTORAL DEGREES

Doctor of Education in Educational Leadership (Ed.D.)

The Educational Leadership doctoral program provides opportunities for students to acquire and construct knowledge that enhances their ability to transform educational institutions to meet the challenging needs of an ever-changing society. This is achieved by educating students to become reflective practitioners who comprehend and evaluate professional literature and research and who understand leadership and change. In addition, students learn how to translate the research and theory into practice.

Benchmarks & Dissertation

The Doctor of Education in Educational Leadership degree at Rowan University requires the completion of 60 graduate semester hours (S.H.) made up of 16 courses (48 S.H.) and 12 S.H. of dissertation. The program includes three distinct benchmarks. Benchmark I takes place after the completion of four of the five core courses and consists of a written assessment, followed by an interview with a committee of faculty. Benchmark II consists of a presentation of dissertation proposal to a committee of faculty. Benchmark III is the dissertation symposium.

Track Options

The doctoral program offers 3 tracks. Each track includes 4 specialized courses. All of the track courses are 8 weeks long and offered 100% online, regardless of the overall delivery format chosen. The 3 track options are:

1. Higher Education: This track is for educators who are looking to gain advanced knowledge in the field of higher education, with a special focus on administration and leadership at the post-secondary/four-year college level.

2. P-12: This track is for those educators who are looking to gain advanced knowledge in the field, with a special focus on developing the leadership skills and dispositions necessary to enact lasting and meaningful change within the preschool through secondary school levels.

3. Nurse Educator: This track is for those educators who are looking to gain advanced knowledge in the field, with a special focus on educating nurses.

4. A Community College Leadership Initiative (CCLI) track is typically offered on a biennial basis. This track is for those educators who are looking to gain advanced knowledge in the field, with a special focus on community college.

Residency Requirement

The Doctor of Education in Educational Leadership program is available in a number of different delivery modes, including online. Those who choose the online delivery format will be required to complete 2 residencies as outlined below:

• Residency I: Students will spend three days/two nights (Friday to Sunday) on the campus of Rowan University becoming familiar with campus resources, University policies and procedures, the mission and conceptual framework of the College, and program expectations of the Educational Leadership Department. This orientation-based residency is a wonderful introduction to the doctoral experience that serves to enhance the online learning environment by providing a face-to-face opportunity to engage with cohort members and Educational Leadership faculty and staff. Students will attend workshops designed to acquaint them with leadership development, action research and change strategies, reflective practice, social justice issues, and the development and implementation of professional learning communities. On-campus housing is available.

• One day at Rowan's Glassboro campus for the written portion of the Benchmark I exam. The exam is given twice per year. Students choose when they wish to take it after the completion of foundational first-year coursework.

• Residency II: A weekend stay at the conclusion of year two on Rowan's Glassboro campus. This residency will focus on preparing students for dissertation work and the dissertation process.

### Required Dissertation Research Course
Doctor of Education in Educational Leadership students must complete a minimum of 12 semester hours of Dissertation Research.

### Course # | Course Title | S.H.
---|---|---
- EDST 24795 | Dissertation Research | 12

**Note about Dissertation Research:** In order to maintain matriculation in the program, students must register for at least 1 semester hour of EDST 24795 (Dissertation Research) per term until their dissertation is complete and approved and at least 12 Dissertation Research semester hours total have been completed.

### Total Required Semester Hours for the Program
60 s.h.

#### Foundation Courses
None

#### Graduation/Exit, Benchmark, and/or Thesis Requirements
- Students must successfully complete and defend dissertation.

**Benchmarks:** Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks' timing and assessments will be shared with the student throughout the program by the academic advisor.

**Benchmark I:**
- **Timing:** Occurs after the completion of 12 prescribed semester hours (Phase I)
- **Requirements:** Benchmark consists of two parts: A timed, written examination, followed by an interview with a committee of faculty.
- **Options:** If the student does not successfully pass the benchmark on the first try, then the student is invited to re-take the exam. Student will not be permitted to continue coursework during this time. If unsuccessful or the student chooses not to attempt the exam when offered a second time, the student will be dismissed from the program.

**Benchmark II:**
- **Timing:** Occurs after the completion of 30 prescribed semester hours (Phase II)
- **Requirements:** Student may present his or her dissertation proposal at a time mutually agreed upon by the student and his or her dissertation committee. The dissertation proposal must be approved before moving onto the completion of the dissertation project.
- **Options:** If the student does not successfully pass the benchmark, meaning an approved dissertation proposal is not obtained, then the student is able to revise and take again while continuing dissertation coursework.

**Benchmark III:**

---

Rowan University Division Of Global Learning & Partnerships Catalog 2017-2018
College of Education

- **Timing:** Occurs after the completion of all 60 prescribed semester hours (Phase III)
- **Requirements:** Student must successfully complete and defend a dissertation at a final symposium.
- **Options:** If the student does not successfully pass the benchmark, then the student may resubmit and defend the dissertation. If still unsuccessful, student will not be approved for graduation from the program.

**Doctor of Philosophy in Education (Ph.D.)**
The Doctor of Philosophy in Education is a multi-disciplinary research-focused degree anchored in the educational complexities of access, success, and equity that is designed to prepare candidates globally to assume roles as faculty and researchers in one of four concentrations: Counselor Education, Literacy Education, Higher and Postsecondary Education, and Special Education. The unique underpinning of this program is the intersection of two primary research foci: (1) a commitment to redressing systemic and persistent barriers to quality education and (2) a dedication to using rigorous empirical research with area schools, districts, colleges, and other educational partners to improve equity in educational outcomes. The Doctor of Philosophy offers its candidates opportunities to engage in research, college level teaching, and clinical experiences that respond to the regions and the nation's persistent challenges with educational access and equity in traditionally underserved communities.

The Doctor of Philosophy at Rowan University requires the completion of 72 graduate semester hours (S.H.) made up of 18 S.H. of core courses, 12 S.H. of research courses, 21 S.H. of concentration specific courses, and 21 S.H. of dissertation.

**Concentrations**
The doctoral program offers 4 concentrations:

1. **Counselor Education:** The Counselor Education concentration is designed specifically for those who wish to pursue careers as counselor educators at the university level, or as supervisors in schools or clinical settings. The program is committed to promoting the counseling profession and evidenced-based practices and initiatives through advanced curricular experiences that address systemic and persistent barriers for P-20 students.

2. **Higher and Postsecondary Education:** The Higher and Postsecondary Education concentration is for students with an interest in careers as academic faculty, researchers, senior college and university administrators, and policy analysts. Our curriculum provides a strong theoretical foundation in the areas of teaching and learning; public policy and the social, economic, and political factors that impact postsecondary institutions; and educational assessment and reform.

3. **Literacy Education:** The Literacy Education concentration is designed for candidates interested in leadership roles in research, policy, and teaching in higher education. The courses examine influential theories and research that address the developmental, cognitive, motivational, multimodal, literary, linguistic, sociocultural and sociopolitical foundations of literacy. The program is strongly framed by a critical stance that emphasizes the transformative potential of language and literacy and the accompanying implications for educational and social change.

4. **Special Education:** The Special Education concentration is designed to prepare students for leadership roles in research, service, and teaching in higher education in the field of special education. Through clinical experiences, advanced courses, and research experiences, students will be prepared to develop and implement evidence-based practices that will enhance the educational outcomes of students with exceptional learning needs.

Graduation/Exit, Benchmark, and/or Thesis Requirements

- Students must successfully complete and defend a dissertation.

Benchmarks: Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks' timing and assessments will be shared with the student throughout the program by the Academic Advisor.

**Benchmark I:**
- **Timing:** Successful completion of Year 1 - Paper & Portfolio Review.
- **Requirements:** Students will prepare a short paper (1,000 words or less) that addresses reflections on and significant milestones regarding three prongs: 1. Concentration; 2. Program core; and 3. Research. Student should also prepare a portfolio that provides substantiating evidence for each prong.

**Benchmark II:**
- **Timing:** Taken at the end of year 2.
- **Requirements:** All doctoral candidates are required to pass a comprehensive examination prior to dissertation. The exam assesses candidates' knowledge of research methodology and substantive theoretical and empirical issues, and serves as assessment of competencies that are relevant to the development of the dissertation.

**Benchmark III:**
- **Timing:** Occurs after the completion of all 51 prescribed semester hours and successful completion of the PhD comprehensive examination.
- **Requirements:** Student must successfully complete the PhD Dissertation Proposal.

**Benchmark IV:**
- **Timing:** Occurs after the completion of a minimum of 21 S.H. of required dissertation research credits and successful completion of the PhD Dissertation Proposal.
- **Requirements:** Student must successfully complete the PhD Final Dissertation Defense.

Minimum Required Grades and Cumulative GPA

The PhD in Education is a Category 1 program.

Educational Specialist in School Psychology – School Psychologist Certification (Ed.S.)

The Educational Specialist is an advanced degree that enables the candidate to develop practitioner expertise in psychological, educational, professional and related areas. Candidates hone skills in assessment, consultation, counseling and intervention to prepare to work with children and adolescents, parents, guardians, teacher and other educational professionals in a school setting. To earn the Educational Specialist degree, a candidate must complete all courses, a school-based 300 hour practicum, and a school-based 1200-hour externship/internship.

Upon completion of the Educational Specialist degree, candidates are eligible for New Jersey Department of Education certification as a school psychologist†. Rowan University Educational Specialist graduates may also apply to become a Nationally Certified School Psychologist (NCSP). Rowan University's School Psychology program is an approved program by the National Association of School Psychology (NASP).

MASTER’S DEGREES

Master of Arts in Counseling in Educational Settings (M.A.)
This program leads to a Master of Arts degree in Counseling in Educational Settings, and also New Jersey certification in School Counseling†. Graduates may work in elementary, middle, and/or secondary school settings, providing student counseling services. Such services include individual and group counseling for students regarding personal, social, and educational needs; consultation with faculty and other professional staff; assessment of individual students regarding personal-social, academic and career interests and needs; consultation with families regarding the individual's educational progress and career-related plans; and working cooperatively with community resources. A number of our graduates seek careers in Higher Education settings, such as Residence Hall, Student Services, and Career and Academic Planning.

**Master of Arts in Higher Education (M.A.)**

The Master of Arts in Higher Education is intended for individuals who wish to pursue careers at 2 or 4-year institutions. This program offers 3 concentrations:

**Administration (Concentration P807)**

Graduates of this program go on to careers in student affairs including residential life, admissions, academic advising, student activity planning and programming, judicial affairs, and service learning/volunteerism.

Students in this concentration are required to prepare and keep a portfolio throughout the duration of the program experience. The portfolio serves as a tool to help faculty observe student progress and learning which is assessed through a Synthesis/Reflective Application Exercise conducted usually at the end of the first year of study but prior to enrolling in the Seminar/Internship in Higher Education Administration I capstone course.

**Instruction (Concentration P808)**

This concentration is intended for those who wish to pursue employment opportunities as adjunct instructors or as instructors in developmental education/basic skills programs or in selected science disciplines at 2 or 4-year colleges. This track is not recommended for those who plan to seek full time tenure track professional positions in a specific discipline.

This concentration is offered in a limited number of academic areas: Computer Science, Mathematics, English as a Second Language, and Reading. It is also possible to craft programs in Biology, Physics, and Chemistry. The programs in the concentration range from 31-37 credits, depending on the academic specialty:

- Computer Science (37 credits)
- Mathematics (37 credits)
- English as a Second Language (34 credits)
- Reading (31 credits)

Academic specialties in Biology, Physics, and Chemistry may vary according to student experience. Please consult the Academic Advisor for more information.

**Academic Advising**

The Academic Advising concentration is intended for those individuals who wish to increase their knowledge and skills as well as those who seek an entry level position in a 2-year or 4-year college or university, specifically in an academic advising role in higher education, whether in an advising center, an academic department or college, or in a tutoring center or other specialized academic setting.

Students in this concentration are required to prepare and keep a portfolio throughout the duration of the program experience. The portfolio serves as a tool to help faculty observe student progress and learning which is assessed through a Synthesis/Reflective Application Exercise conducted usually at the end of the first year of study but prior to enrolling in the Seminar/Internship in Higher Education Administration I capstone course.

Master of Arts in Learning Disabilities (M.A.)

The Master of Arts in Learning Disabilities is an innovative program designed to provide motivated teachers with the knowledge and skills needed to meet the multitude of challenges found in both regular and special education classrooms. The program is designed to prepare classroom teachers to meet the needs of students with learning difficulties. Collaborative field experiences are included. This program received national accreditation and recognition from CAEP and CEC.

Master of Arts in Reading Education (M.A.)

The Masters of Arts in Reading Education is nationally accredited by the National Council for Accreditation in Teacher Education in conjunction with the International Literacy Association. Students in the program will have the opportunity to develop both a contemporary conceptual framework and effective strategies that are appropriate for guiding literacy development in classroom and clinical environments.

The goals and objectives for the program and for the individual courses therein are aligned with the International Literacy Association standards, preparing reading specialists to work with professionals and students to enable all students to meet the appropriate New Jersey Core Curriculum Standards in Language Arts/Literacy.

The course of studies provides students with an understanding of the basic principles of developmental and remedial reading instruction for grades pre-k-12. Students acquire advanced knowledge of the reading process. They engage in hands-on experiences in diagnosing and teaching learners who are having difficulty with literacy acquisition. The program prepares professionals to teach literacy to all learners and serve as leaders in supporting their colleagues in the field.
There are two concentration options in this program. The total number of required credits varies from 30-33 depending upon the concentration selected during the application process.

- **Concentration I**: Reading Practitioner is best intended for those who wish to pursue advanced study in literacy education and become more knowledgeable about instructional strategies in English Language Arts, especially those that align with the Common Core Standards. Students in this track are not required to have teaching certification, but are required to have access to a classroom and/or school district setting as well as a group of children to work with. This concentration does NOT lead to NJ Reading Specialist Certification.

- **Concentration II**: Reading Specialist is best intended for those who hold a current state teaching certificate, have at least two year's full-time teaching experience, and who want to expand their knowledge, skills, and dispositions in teaching literacy and coaching colleagues. Students learn procedures for administering reading programs in elementary and secondary schools. While enrolled in the course Clinical Experiences in Reading, students are required to engage in tutoring at the highly regarded clinic held on Rowan's Glassboro campus. There is an emphasis on reflective practice with colleagues and peer mentoring as part of this experience. This concentration leads to NJ Reading Specialist Certification†.

**Program Requirements Concentration I**

- The Master of Arts in Reading Education: Reading Practitioner is a part-time program offered in an accelerated online format. It requires the completion of 30 graduate semester hours (10 courses), which are possible to complete in only 5 consecutive semesters. Students must successfully complete and present a cumulative digital portfolio, which includes a comprehensive paper.

**Required Courses for Concentration I**

**Program Requirements Concentration II**

- The Master of Arts in Reading Education: Reading Specialist is a part-time program offered in an accelerated hybrid format with three courses requiring face-to-face meetings on Rowan's Glassboro campus and the remaining courses taking place 100% online. It requires the completion of 33 graduate semester hours (10 courses), which are possible to complete in only 6 consecutive semesters. Students must successfully complete a comprehensive exam and thesis.

- Total semester hours required for program completion: 33 Semester Hours (s.h.)
- Thesis Requirement: Yes

Master of Arts in STEM Education (M.A. STEM)
The need for teachers in high-need disciplines continues to grow. This program addresses these needs by selecting exceptionally able college seniors and career changers with science, technology, engineering, or mathematics backgrounds from across the country and supporting them to develop successful careers as highly skilled math, science, and technology teachers.

The Master of Arts in STEM Education (M.A. STEM) offers the unique opportunity for students who have undergraduate degrees in the mathematics, engineering, or the sciences to pursue an initial New Jersey teaching certificate in mathematics and/or one of the sciences† and a master's degree simultaneously.

This program is carefully designed such that all coursework has a STEM (Science, Technology, Engineering, Mathematics) focus that provides the ideal pedagogical preparation for prospective Mathematics or Science teachers in the K-12 setting. This 13-month program includes an early field experience, face-to-face, online, and hybrid courses, and a year-long teacher residency. The culminating experience is a seminar in which students transition from teacher candidate to teacher by planning for leading their own classrooms.

Concentrations within the Master of Arts in STEM Education:
• Science
• Mathematics

Master of Arts in School Administration (M.A.)
This principal preparation program provides the candidate with the opportunity to learn the diagnostic and prescriptive skills necessary to function as a collaborative leader in a P-12 learning organization. The program meets the requirements established by the New Jersey Department of Education for state certification as a public school administrator in positions such as assistant superintendent for curriculum and instruction, principal, assistant principal, vice principal, and director. In order for candidates to qualify for the Certificate of Eligibility (C.E.) for the principal endorsement, they must achieve a satisfactory score on the School Leaders Licensure Assessment.

Graduation/Exit, Benchmark, and/or Thesis Requirements

Benchmarks: Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks timing and assessments will be shared with the student throughout the program by the Academic Advisor.

Benchmark I:
- **Timing:** Occurs after the completion of 12 prescribed credits (Phase I)
- **Requirements:** Candidates must successfully complete all Phase I courses and begin collecting a sample of course products from Phase I courses that demonstrate formative or developing achievement of appropriate ISLLC/ELCC standards to be ultimately included in final professional portfolio. Discuss details with Academic Advisor.
- **Options:** If the student does not successfully pass the benchmark, then the student is invited to re-take any necessary coursework.

Benchmark II:
- **Timing:** Occurs after the completion of 30 prescribed credits (Phase II)
Requirements: Candidates must take the School Leader Licensure Assessment and have an approved tentative plan for the Practicum and Seminar in Administration and Supervision courses (internship). Discuss details with the Academic Advisor.

Options: If the student does not successfully pass the benchmark, then the student is able to re-take Assessment Exam or any incomplete coursework, until such time as benchmark is passed or student is made inactive.

Minimum Required Grades and Cumulative GPA
The Master of Arts in School Administration is a Category 1 program.

Master of Arts in School Psychology (M.A.)
Completion of the Master of Arts (M.A.) in School Psychology provides a background in the theories, major knowledge, and methodological procedures in school psychology. This program (or its equivalent) is required for admission into the Educational Specialist (Ed.S.) program. The Master of Arts and Educational Specialist in School Psychology combine to meet the requirements for NJ Department of Education certification in School Psychology†.

Master of Arts in Special Education (M.A.)

This advanced program is designed for individuals who possess an instructional certificate and want to pursue a Master of Arts in Special Education. The purpose of the program is to provide advanced studies focusing on educational, psychological and sociological needs of the children and youth with disabilities. The course work and related field experiences are designed to foster an understanding of students with special needs, combined with pedagogical skills to accommodate these needs and provide appropriate curriculum modifications when necessary. Upon completing the program, candidates earn a Master of Arts in Special Education.

Track Information

There are currently three track options in this program. The total number of required credits varies from 30-36 depending upon the track selected during the application process.

- **Track I: Graduate Endorsement** is designed for those who wish to qualify for State of New Jersey Teacher of Students with Disabilities Certification while simultaneously earning their Master's degree†.
- **Track II: Autism Spectrum Disorders** is designed for those who are already licensed to teach Special Education, but are interested in working with students with significant disabilities, especially autism spectrum disorders.
- **Track III: Learning Disabilities** is designed for teachers who are looking to broaden their knowledge and skills to better serve students with learning difficulties.

Master of Education in Teacher Leadership (M.Ed.)
The Master of Education in Teacher Leadership program is a graduate program of Rowan University's CAEP accredited College of Education. It is designed for teachers who want to develop and hone their leadership skills but wish to remain in the classroom. Candidates work with curriculum, become mentor/master teachers, and develop programs aimed at improving schooling for all children.

The Master of Education degree program has three goals:
1. To develop teacher leaders who practice teaching skills aligned with the National Board for Professional Teaching Standards (NBPTS)'s Five Core Propositions
2. To develop teacher expertise in a content area of choice
3. To empower teachers to assume leadership roles within their schools and districts

This is a part-time program with its core courses offered in an online accelerated format. The degree requires the completion of 33 to 37 graduate semester hours (s.h.) or 11-12 courses in six consecutive semesters. The following three components make up the Master of Education in Teacher Leadership program: Core Courses in teaching and learning (18 semester hours, also offered as a separate Teaching and Learning COGS), Content Area (COGS) (15-18 semester hours), and the Program Exit (additional details below).

The six core courses for this program are offered completely online. The approved Content Area Certificates of Graduate Study (COGS) are offered in varying formats depending on the COGS (e.g., online, online and face-to-face, face-to-face Glassboro Campus, face-to-face Camden Campus).

Content Certificate of Graduate Study (COGS) Options
Following are the currently accepted Content area COGS for the Master of Education in Teacher Leadership program. Advisement for each of those COGS is managed by the department in which it is housed.

- Autism Spectrum Disorders (Interdisciplinary & Inclusive Education, Online)
- Educational Technology (STEAM Education, Online)
- ESL/Bilingual (Language, Literacy & Sociocultural Education, Online)
- Global History (History, Glassboro Campus)
- History (History, Glassboro Campus)
- Learning Disabilities (Interdisciplinary & Inclusive Education, Online)
- Middle School Mathematics (Mathematics, Glassboro Campus)
- Reading (Language, Literacy & Sociocultural Education, Glassboro Campus)
- Reading/ Writing (Language, Literacy & Sociocultural Education, Glassboro Campus)
- School Public Relations (Public Relations & Advertising, Glassboro Campus)
- Special Education (Interdisciplinary & Inclusive Education, Online and Glassboro Campus)

Program Requirements

ELEM 02602  Self-Study in Teacher Leadership  1

If students hold National Board certification, two courses in the Core/Teaching and Learning COGS will be waived.

**Required Content Area Courses**  
Choose one of the Content Area COGS options listed and follow the course requirements as listed in this catalog.

**Total Required Credits for the Program**  
31-37 s.h.

**Foundation Courses**  
None

**Graduation/Exit, Benchmark, and/or Thesis Requirements**  
Three mandatory, face-to-face meetings at Rowan University's Glassboro campus.

1. **Orientation**: Overview of the program; clarification of program requirements and expectations; discussion about the coaching process; information regarding program Exit Requirements.

2. **Exit Meeting** (Scheduled at the beginning of the last semester of coursework): Review of National Board Standards and Rowan Principles; discussion of Portfolio theme; clarification of expectations and requirements for the Synthesis Portfolio and Teacher Leadership Presentation; review of dates when the Presentations will take place; review of Portfolios submitted by program graduates.

3. **Teacher Leadership Presentation for Self Study in Teacher Leadership Course**

**Professional Synthesis Portfolio**: A reflection on the program’s core course assignments and the candidate’s content COGS assignments and how these have helped the candidate meet the program’s 8 standards for teacher leadership.  
*For additional details, please consult the Academic Advisor.*

**Master of Science in Teaching in Subject Matter Education (M.S.T.)**  
The Master of Science in Teaching (M.S.T.) in Subject-Matter (P-12) Education program offers the unique opportunity for students to pursue an initial New Jersey teaching certificate† and a Master’s degree simultaneously. The program is designed to prepare individuals who have undergraduate degrees to be certified as subject-matter (P-12) teachers. Students whose undergraduate degree is in a professional or technical area may need to take as many as 30 additional credits in the desired content discipline necessary to meet certification requirements before being accepted into the program. Questions about appropriate undergraduate majors, academic sequences or pre-requisites should be directed to the program advisor. The subject-matter program is designed for prospective social studies, English, or Spanish teachers. The Master of Science in Teaching program is a full-time program. The program cycle includes three consecutive terms beginning with a summer term and concluding after spring term.

**Subject Matter Focus Areas**  
The following focus areas are available in the Subject Matter Education program. (Candidates will officially declare their focus area at the time of application.):

- P-12 English
- P-12 Foreign Language
- P-12 Social Studies

There is also an option for Subject Matter Education – Theatre Education, which has its own catalog entry in this section.

## Master of Science in Teaching in Subject Matter Education - Theatre Education (M.S.T.)

The Master of Science in Teaching (M.S.T.) in Theatre Education program offers the unique opportunity for students to pursue an initial New Jersey teaching certificate† and a Master's degree simultaneously. The program is designed to prepare individuals who have undergraduate degrees to be certified P-12 Theatre teachers. Students whose undergraduate degree is in a professional or technical area may need to take as many as 30 additional credits in the desired content discipline necessary to meet certification requirements before being accepted into the program. Questions about appropriate undergraduate majors, academic sequences or pre-requisites should be directed to the program advisor. The Theatre Education program is designed for those with undergraduate theatre degrees who wish to teach theatre in P-12 classrooms. The Master of Science in Teaching program is a full-time program. The program cycle includes three consecutive terms beginning with a summer term and concluding after spring term.

### Program Requirements

The Rowan University Master of Science in Teaching (M.S.T.) Theatre Education program requires the completion of 36 semester hours (s.h.) on the Glassboro or Camden, NJ campus.

- Total semester hours required for program completion: 36 s.h.
• Thesis Requirement: No

**Certificates of Advanced Graduate Study (Non-degree)**

**Certificate of Advanced Graduate Study in Chief School Administrator Certificate (CAGS)**

The Certificate of Advanced Graduate Study (CAGS) in Chief School Administrator is designed to provide students with the course content and internship totaling 33 credit hours past the master's degree necessary for the certification from the State of New Jersey†. New Jersey requires 30 credit hours in advanced graduate study and a 150 hour internship (33 credits total) in addition to the master's degree as part of the certification process for candidates without a Master's Degree in Educational Leadership and 5 years experience as a principal. It also enables students interested in advanced competency coursework to engage with relevant coursework without matriculating into the Doctor of Education program. The CAGS also allows students who are unsuccessful in the doctoral program as a result of an inability to pass the Benchmark II (BMII) [the program's comprehensive exam] to be recognized for the successful completion of the program's core courses. A student who has made a B- or better, and earned no more than two B-, in the required courses may be eligible for the CAGS in Chief School Administrator Certification.

## Certificate of Advanced Graduate Study in Community College Leadership (CAGS)

The Certificate of Advanced Graduate Study (CAGS) in Community College Leadership enables students interested in advanced competency coursework to engage with relevant coursework without matriculating into the Doctor of Education program. Current and future community college leaders who have a master's degree and experience in other higher education sectors or industry will seek out the Certificate of Advanced Graduate Study in Community College Leadership to gain requisite understanding of the 2-year college sector. The CAGS in Community College Leadership also allows students who are unsuccessful in the doctoral program as a result of an inability to pass the Benchmark II (BMII) [the program's comprehensive exam] to be recognized for the successful completion of the program's core courses and the community college specific track courses. A student who has made a B- or better, and earned no more than two B-, in the required courses may be eligible for the CAGS in Community College Leadership.

The program focuses on the principles and techniques of administering community and junior colleges and related postsecondary systems, the study of community and junior colleges as objects of applied research, and that may prepare individuals to function as administrators in such settings; and includes instruction in community and junior college finance; policy and planning studies; curriculum; student services; research on community and junior colleges; and issues of evaluation and accountability.

*Rowan University Division Of Global Learning & Partnerships Catalog 2017-2018*
Certificate of Advanced Graduate Study in Educational Leadership (CAGS)

The Certificate of Advanced Graduate Study (CAGS) in Educational Leadership enables students interested in advanced leadership coursework to engage with foundational courses without matriculating into the Doctor of Education program. The program focuses on the general principles and techniques of administering a wide variety of schools and other educational organizations and facilities, supervising educational personnel at the school or staff level, and it may prepare individuals as general administrators and supervisors. These courses convey key concepts related to leadership, organizational development and change, research, and diversity. Students who complete these courses are familiar with foundational theories in Educational Leadership and the application of these theories to changing educational organizations into learning organizations committed to access, success, and educational equity for all stakeholders. A student who has made a B- or better in the four core courses (as a matriculated or non-matriculated student) may be eligible for the CAGS in Educational Leadership.

The Principal’s Certification Program comprises two different tracks. Applicants must select a track that best meets their needs (based on supervisory experience and NJ Certification code) at the time of admission.

**Track Information** There are two track options in this program. The total number of required credits varies from 21-24 depending upon the track selected during the application process.

- **Track I** is for those candidates with a master’s degree, supervisor’s certificate, and 5 years or more of supervisory experience. Track I students are required to complete 7 courses†.
- **Track II** is for those candidates with a master’s degree, supervisor’s certificate, 5 years of full-time teaching experience, and 0-5 years of supervisory experience. Track II students are required to complete 8 courses†.

**Program Requirements for Track I**

**Required Courses** 21 s.h.

Certificates of Graduate Study (Non-degree)

Certificate of Graduate Study in Autism Spectrum Disorders (COGS)
The Certificate of Graduate Study in Autism Spectrum Disorders program is designed to enable school professionals and behavior specialists to develop their knowledge about students on the autism spectrum and to learn about instructional strategies for this rapidly expanding population. Students will understand the definition and causes of the various syndromes within the broad category of Autism Spectrum Disorders (ASD). They will also learn how to design and modify instruction for individuals with ASD to address their learning, social, behavior, and communication needs.

## Certificate of Graduate Study in Educational Technology (COGS)

The Certificate of Graduate Study in Educational Technology aims to provide educators with the knowledge and proficiencies needed to incorporate existing and emerging educational technologies into their classroom. Individuals completing this program will not only be skilled in the use of computers in the classroom, they will be prepared to assume leadership roles in educational technology in preschool to twelfth grades.

## Program Requirements

The Educational Technology Certificate of Graduate Study is a part-time program offered in an accelerated online format. It requires the completion of 15 graduate semester hours (5 courses) in 2.5 consecutive semesters. The courses that make up the Educational Technology Certificate of Graduate Study also serve as content area courses for the Master of Education (M.Ed.) in Teacher Leadership program. Therefore, the semester hours earned in the Certificate of Graduate Study are applicable to the Master of Education Degree requirements. In order to be admitted to the Master of Education Degree program, students must submit a separate application.

Certificate of Graduate Study in English as a Second Language (COGS)

There is a critical need for highly qualified teachers trained to work with the growing numbers of English language learners in United States schools. This program is open to candidates who possess NJ standard or CEAS instructional certification in other areas, as well as to alternate route candidates who are eligible for NJ instructional certification and have already completed their clinical practicum. The program is approved by the New Jersey State Department of Education†.

Specific program objectives are to: (1) develop multifaceted understandings of the unique needs, challenges, and experiences of ELL students in order to advocate for their success; (2) develop curriculum, including lesson and unit plans, that integrates language and content for ELL students at various levels of English proficiency; and (3) instruct ELL students using cutting-edge, research-based teaching methods.

The ESL Certificate of Graduate Study also represents an opportunity for prospective teachers of ESL to continue their professional development in the Master of Education in Teacher Leadership and in the Master of Arts in Higher Education, Instructional Track.

Certificate of Graduate Study in Enhancing Instruct’l Practices in Health Professions Ed. (COGS)

Healthcare professions educators, in addition to content expertise in clinical areas, must attain pedagogical and curriculum development skills absent from standard medical education training. The Certificate of Graduate Study in Enhancing Instructional Practices in Health Professions Education develops medical school faculty members and other health professionals as master educators and academic leaders. These professionals learn an array of clinical teaching strategies, as well as adult learning or andragogy, written and clinical assessment, curriculum/program development and management, and teaching and communicative proficiency. The certificate develops students’ effectiveness in the field of health professions education, benefiting their students and, ultimately, patients and the healthcare system.

Certificate of Graduate Study in Interprofessional Health Organizations Leadership (COGS)

This Certificate of Graduate Study (COGS) has been developed within the existing Higher Education program with the goal of developing medical school faculty members and other health professionals as master educators and academic leaders. These professionals will learn about leadership, organizational change and development, as well as continuous improvement and professional development.

The Certificate of Graduate Study also emphasizes creating learning organizations as well as understanding and developing organizational cultures. These courses will help participants develop their effectiveness in the field of health professions educational leadership, benefiting their students and, ultimately, patients and the healthcare system. The Certificate of Graduate Study has been developed within the Higher Education program housed in the College of Education, with the help and input of Rowan medical faculty and administrators from both Camden Medical School of Rowan University and Rowan School of Osteopathic Medicine, to ensure that it addresses the needs of health professionals.

Program Requirements

The program consists of 4 graduate courses (12 semester hours). Two courses are currently offered in the Educational services and Leadership Department and Master of Arts in Higher Education Program. The two others are proposed as a component of this Certificate of Graduate Study.

### Certificate of Graduate Study in Learning Disabilities (COGS)

The Certificate of Graduate Study in Learning Disabilities Program (COGS in LD) is designed for teachers who are looking to broaden their knowledge and skills to better serve students with learning difficulties. The goals and objectives for the program include the further development of educational leaders in supporting students, parents, and colleagues in the field. Graduate students complete the Certificate of Graduate Study in Learning Disabilities with knowledge and skills in the current research on learning disabilities and methods so as to more effectively serve individuals with learning disabilities; and, in this program they are trained to be educational collaborators and leaders, to be change agents in their classrooms, and school districts.

Courses in this program may be used to satisfy some of the course requirements in Rowan University’s Master of Arts in Learning Disabilities program which can lead to certification as a Learning Disabilities Teach Consultant†, or the Master of Arts in Special Education program. For more information, please visit [www.rowanu.com/programs](http://www.rowanu.com/programs).

Certificate of Graduate Study in Reading (COGS)

This program meets the increasing need for highly qualified practitioners in the area of reading. This program benefits classroom teachers K-12 who wish to increase their knowledge of literacy instruction. It offers a strong pedagogical and theoretical core from the reading discipline that will enable teachers to pursue an advanced degree. The Certificate of Graduate Study in Reading does not lead to any state certification. All courses carry over to the Master of Arts in Reading as appropriate.

### Certificate of Graduate Study in Special Education (COGS)

The Certificate of Graduate Study (COGS) in Special Education is designed for general education teachers who wish to increase their knowledge of special education, as well as special education teachers who wish to pursue further coursework at the graduate level. The goal of this certificate is to provide teachers with an overview of the salient issues in special education, as well as opportunities to focus on the essential aspects of evidence-based practices.

The six course sequence and corresponding field experiences are aligned with the professional standards set forth by the Council for Exceptional Children, as well as the New Jersey Department of Education†; collectively they ensure program graduates acquire the essential knowledge, skills, and dispositions needed to best serve students with disabilities.

This Certificate of Graduate Study is offered in an online format and can be used to satisfy the Content Certificate of Graduate Study requirement in the Master of Education in Teacher Leadership program. Teachers who successfully complete the Certificate of Graduate Study coursework can also opt to continue pursuit of the Teacher of Students with Disabilities Graduate Endorsement Program (see a department representative for additional details).

Certificate of Graduate Study in Teaching and Learning (COGS)

The Certificate of Graduate Study in Teaching and Learning is designed for teachers who desire to develop and hone their leadership skills and who wish to remain in the classroom. The program approaches leadership from the perspectives of exemplary teaching, continuous learning for all, a need to balance change with stability and the importance of peaceful existence in a diverse community of learners. This Certificate of Graduate Study also serves as the Core of the Master of Education in Teacher Leadership and is offered in an online format.

The following Five Core Propositions of the National Board for Professional Teaching Standards (NBPTS) and three additional Principles identified by College of Education faculty provide the focus for the master's program:

**NBPTS Propositions**
1. Teachers are committed to students and their learning;
2. Teachers know the subjects they teach and how to teach those subjects to students;
3. Teachers are responsible for managing and monitoring student learning; and,
4. Teachers think systematically about their practice and learn from their experience.
5. Teachers are members of learning communities.

**Rowan Program Principles**
1. Teachers account for the needs of culturally, linguistically, and cognitively diverse learners;
2. Teachers are change agents, teacher leaders, and partners with colleagues; and,
3. Teachers use technology to facilitate student learning and their own professional development.

Certifications, Endorsements & Related Post-Baccalaureate Programs (Non-Degree)

Learning Disabilities Teacher-Consultant Certification (LDTC)

Learning Disabilities Teacher-Consultants work in collaboration with other members of a child study team to determine eligibility for special services. LDT-Cs also consult with parents, teachers, and other school personnel to provide research-based instructional strategies to assist pupils struggling academically.

Graduates of the Master of Arts in Learning Disabilities Program at Rowan University earn the Learning Disabilities Teacher-Consultants certificate (an Educational Services credential) concomitantly with the Master of Arts in Learning Disabilities degree. However, applicants who have earned a Master's degree in learning disabilities from another institution or a Master's degree in a related field (e.g., special education or reading) may apply to the Learning Disabilities Teacher-Consultant (LDT-C) certificate-only program.

This program meets all State of New Jersey requirements for the LDT-C certificate†. It also received national recognition for accreditation through CEC for educational diagnosticians.

Graduate Endorsement: Bilingual/Bicultural Education

This program responds to the need for highly qualified teachers prepared to teach content in both the student’s native language and in English to the growing numbers of English language learners in the schools. The program, approved by the New Jersey State Department of Education†, includes 12 credits hours of formal instruction in the following topics: linguistics, language acquisition, development of literacy skills for the second language learner, methods of teaching content in bilingual education, and theory and practice of bilingual education. Specific objectives emphasize the application of theory to practice, development of long-range and short-range plans that integrate language and content, design of appropriate authentic assessment instruments, and use of technology to research content and instructional techniques.

Graduate Endorsement: Teacher of Students with Disabilities

This program is designed for individuals who possess a standard instructional certificate, or possess/are eligible for CEAS and wish to obtain Teacher of Students with Disabilities certification in New Jersey†. The purpose of the program is to provide advanced studies focusing on educational, psychological and sociological needs of children and youth with disabilities. Each course in the program builds on the earlier knowledge and skills gained in the candidates initial certification programs.

The coursework and related field experiences are designed to foster an understanding of students with special learning needs, combined with pedagogical skills to accommodate these needs and provide appropriate curriculum modifications when necessary. Upon completing the program, candidates will be recommended for certification†.

Candidates who want to pursue a Master's degree may transfer 9 credit hours to the Master of Arts in Special Education program and must apply through Rowan Global Student Services.

Students who have completed the Certificate of Graduate Study in Special Education and want to pursue the certification of Teacher of Students with Disabilities need to reapply for this endorsement program.

Post-baccalaureate Certification: Teacher of Reading

The Post Baccalaureate Program in Teacher of Reading is an endorsement program that leads to certification as a Teacher of Reading†. It is available to students who have already been admitted to teacher certification programs or who already hold New Jersey teaching certificates. Reading certification is granted only when a student has fulfilled all requirements for a major teaching certificate. To matriculate, students must complete an introductory reading course and satisfy the requirements listed below.

The program requires students to successfully complete 30 semester hours of coursework in reading and reading-related areas to obtain Teacher of Reading Certification. Students may fulfill the requirement for the New Jersey Teacher of Reading Endorsement† with undergraduate coursework, graduate coursework, or a combination of the two.

Post-baccalaureate Certification: Teacher of Students with Disabilities

This program leads to the Endorsement in Teacher of Students with Disabilities and is available to students who have completed teacher certification programs and/or who already possess initial New Jersey teaching certification†. The program requires students to successfully complete 27 semester hours of coursework in Special Education and Special Education-related areas to obtain the Teacher of Students with Disabilities Endorsement from the NJ State DOE†. Please note that most classes require a 20-hour field placement component in an approved setting; several of the courses in the program are bundled and must be taken together. The Teacher of Students with Disabilities Endorsement will be granted by the NJ State DOE† only when a student has fulfilled all requirements for the program, including taking and passing the Praxis II exam for Special Education (5354) and the successful completion of Clinical Practice/Clinical Seminar.

* Taken after successful completion of all other Post-Baccalaureate: Teacher of Students with Disabilities courses.

Note: Students who are currently matriculated in the Bachelor of Arts. in Education Concentration: Early Childhood Education (P-3) program should consult with their Academic Advisor regarding specific requirements.

Total Required Credits for the Program

27 s.h.

Foundation Courses

Successful completion of READ 30280 Teaching Literacy, or equivalent course as determined by department.

Graduation/Exit, Benchmark, and/or Thesis Requirements

Benchmarks: Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks’ timing and assessments will be shared with the student throughout the program by the Academic Advisor.

Benchmark I:

• **Timing:** Occurs after the completion of 22 prescribed credits
• **Requirements:** Candidates must achieve passing scores on the Praxis I, Praxis II: Subject, and Praxis II: Special Education.
• **Options:** If the student does not successfully pass the benchmark, then the student is able to re-take Assessment Exam or any incomplete coursework, until such time as benchmark is passed or student is made inactive.

Minimum Required Grades and Cumulative GPA

The Post-Baccalaureate in Teacher of Students with Disabilities is a Category 2 program.

Post-baccalaureate Certification: School Nursing

The Post Baccalaureate School Nursing Certification Program is designed to build upon the baccalaureate prepared registered nurse’s varied educational and experiential foundation of previously acquired knowledge, skills, and attitudes for the enhancement of the nurse’s professional performance in the school setting. A dual preparation in health and education best qualifies school nurses for participation in the intraprofessional and interdisciplinary aspects of school health.

The Post-Baccalaureate School Nursing Certification Program reflects a curriculum that requires students to matriculate into the program, have a baccalaureate degree from an accredited college or university, a current New Jersey professional registered nurse (RN) license issued by the New Jersey Board of Nursing and current certificates in cardiopulmonary resuscitation (CPR) and automated external defibrillators (AED).

The curriculum permits students to become eligible for the New Jersey Standard Educational Services Certificate with a School Nurse Endorsement†. It is a non-degree post baccalaureate certification program designed to prepare registered nurses with the course requirements to meet the mandates of the New Jersey Administrative Code (NJAC 6A: 9-13.3) and with the NASN Standards of Professional School Nursing Practice and Standards of Care.

Undergraduate Endorsement: Teacher of Driver Education

This program is designed for those who possess a Standard New Jersey Instructional Certificate or CEAS (Teacher of Health and Physical Education) or are currently enrolled in a health/physical education teacher prep/certification program in the State of New Jersey, and who wish to earn New Jersey Driver Education Teacher Endorsement†. The content includes learning to teach motor vehicle operation and driving environments, and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.

Those who matriculate in and successfully complete the Driver Education Course and Endorsement Program will then be recommended by Rowan University to the State of New Jersey for certification as a Teacher of Driver Education†.

Henry M. Rowan College of Engineering

Mission
The mission of the Henry M. Rowan College of Engineering is to provide programs that are effectively responsive to regional aspirations and that address the needs and the changing characteristics of the leading-edge engineers of the future. The College aims to educate students to apply technology for the betterment of society and to serve as global change agents for the future. Rowan University also recognizes that the Henry M. Rowan College of Engineering will aid in the economic and cultural development of southern New Jersey, while generating opportunities for its diverse graduates in local, national, and international industries.

The College consists of programs in the areas of biomedical engineering, chemical engineering, civil engineering, environmental engineering, electrical & computer engineering, engineering entrepreneurship, engineering management, materials science, and mechanical engineering. At the core of the program are faculty who collaborate as a multidisciplinary team. The engineering program is designed to provide students with the tools needed to contribute to the technological and economic development of our global society.

The graduate program is tailored to provide students with opportunities to enhance the breadth of their education, or to specialize in a technical area. Industry partnerships provide an additional dimension to the graduate program through joint ventures in Engineering Clinic, research and development projects. The result is a new breed of engineer: professionals schooled in practical applications and theory, and agile engineers ready to improve existing processes and products, and create new systems.

Departments
The Henry M. Rowan College of Engineering houses the following academic departments: Biomedical Engineering, Chemical Engineering, Civil & Environmental Engineering, Electrical & Computer Engineering, Experiential Engineering Education, and Mechanical Engineering. (Not all departments offer programs through the Division of Global Learning & Partnerships.)

Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs.

Academic Program Policy Categories

For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
**Earn no grades lower than a “B-”**
**Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale**

**Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:**
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Policy Prior to Fall 2013 Matriculation**
The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

**Doctor of Philosophy in Engineering (Ph.D.)**

Rowan’s Doctor of Philosophy in Engineering is a terminal degree program that is specifically designed to meet the changing needs of researchers, scholars and engineers in academia, industry, and the government. The primary goal of this program is, therefore, to prepare students for careers in research and/or academia by providing an environment that closely reflects the realities and expectations encountered by today's academicians, professional scientists and research engineers. The program offers a highly flexible inter- and multi-disciplinary curricular structure, allowing concentration in any (or multiple) of the traditional or emerging engineering disciplines. The primary strength of the program is involving students in activities that they are most likely to encounter in a real-world academic or industrial settings.

The following concentrations are offered:
- Biomedical Engineering/P919
- Chemical Engineering/P921
- Civil & Environmental Engineering/P920
- Electrical & Computer Engineering/P912
- Materials Science and Engineering/P923
- Mechanical Engineering/P922

**Program Requirements**
- The Rowan University Doctor of Philosophy in Engineering program requires the completion of coursework, teaching assistantships, research requirements, dissertation, and dissertation defense.
- For a student who possesses a bachelor’s degree, a minimum of 72 semester hours of graduate-level work will be required.
- For a student who possesses a master’s degree in a related field, a minimum of 42 semester hours (credits) of graduate-level work beyond your master’s degree will be required. Up to 30 of the credits earned in pursuit of your master’s degree may be transferable.
- For specific curriculum requirements for each concentration, refer to their specific webpage and/or specific Graduate Program Coordinator.

ECE 09504 series constitute the Emerging Topics in Electrical and Computer Engineering sequence. These classes can be taken multiple times when approved by the advisor. Multiple sections of this course are offered during each semester with different content on emerging topics.

These four courses are also part of the Certificate of Graduate Studies in Combat Systems Engineering (CSE), as well as the MS in Engineering Management with concentration in Combat Systems Engineering. The CSE programs are designed and delivered in cooperation with Lockheed Martin Corporation.

**A student may request to take another Math or Math intensive class (offered at Rowan or elsewhere) if it is more suitable for his/her research; such a course may also be included as an "approved graduate level Math" class, subject to his/her advisor's and home department chair's approval.**

**Total Required Credits for the Program**  72 s.h.*

*Minimum of 72 credits of graduate-level work beyond a bachelor's degree, or 42 credits of graduate-level work beyond a master's degree in a related field are required. Of these 72 total credits, 42 must come from the following:

1. At least one approved (see below) graduate level Math class. Certain math intensive engineering courses may be used to satisfy this requirement (3 credits).
2. Effective Teaching in Academic & Corporate Environments (3 credits).
3. Strategic Technical Writing & Winning Grant Proposals (2 credits).

At least 18 course credits (not including Effective Teaching and Strategic Technical Writing courses) must be obtained from graduate only classes (600-level classes, or 500-level classes with no corresponding 400-level equivalent offered at the same time).

A minimum of 21 credits must come from "Research." Up to 9 Research credits may come from ENGR01.599. Students who complete their Master's degree elsewhere will be considered to have taken 9 credits of ENGR01.599. All remaining Research credits must come from ENGR01.699, the last 3 of which must be taken during the semester in which the Doctor of Philosophy in Engineering Candidate plans to taken during his/her Doctor of Philosophy in Engineering Dissertation Defense.

**Graduation/Exit/Thesis Requirements**

a. Complete minimum of 72 credits of graduate level work beyond bachelor's degree OR minimum of 42 credits of graduate level work beyond master's degree.

b. Completion of all of University's standard Ethical & Responsible Conduct of Research training (including human/animal subject training when applicable)

c. Regular attendance and participation in (0-credit) graduate seminars

d. Successful completion of a Ph.D. Qualifier examination*

e. Successful completion of a Ph.D. Candidacy (proposal) examination*

f. Successful completion of Career Preparation & Readiness Experience that consists of teaching, grant writing, publishing and service*

g. Successful completion of Ph.D. dissertation defense*

h. Successful completion of Ph.D. dissertation*

* The specific details, nature and scope of these examinations (e.g., format of the exam) and requirements (e.g. number of journal publications, conference publications, patents, number of teaching assignments) will be determined by the student's Doctor of Philosophy in Engineering committee and/or department policies for student's home department as aligned with the Henry M. Rowan College of Engineering policies.

**Minimum Required Grades and Cumulative GPA**
The Doctor of Philosophy in Engineering is a Category 2 program.

Master’s Degrees

Master of Engineering Management (M.E.M.)
The Master of Engineering Management program effectively prepares engineers for management level positions. Students in this program receive knowledge of organizational procedures such as budgeting, strategic decision making, and supervising. The combination of courses from The Henry M. Rowan College of Engineering and AACSB-accredited Rohrer College of Business equips students with the ideal balance of advanced technical knowledge and managerial skills required to advance as a manager. The Rowan University Master of Engineering Management (MEM) Degree is a part-time program offered in an accelerated online format. Two courses are scheduled per semester for five consecutive semesters resulting in possible degree completion in less than 24 months.

Program Requirements

Required Courses 30 s.h.

krone@rowan.edu
Master of Science in Engineering Overview (M.S.)

The Master of Science in Engineering program at Rowan University effectively prepares individuals to respond to the changing needs of engineers today. This program provides students with the necessary knowledge, skill set, and training to effectively contribute to the engineering workforce. Students have access to higher level courses leading to a graduate degree and are involved in professional development opportunities which increase the breadth of understanding and application of engineering principles.

Students can choose between a thesis track and a coursework track. Students may also work on a project, which may be counted toward a coursework track degree. Most full-time students work on funded research projects, leading to a thesis. Most part-time students select the coursework track. In order to be eligible for a Research Assistantship, students must select the thesis track.

Tracks
The program includes two tracks. Each has different course and graduation exit requirements which are outlined in the chart.

• Thesis Track: The thesis option requires the completion of 30 semester hours, 6-9 of which are in thesis research/engineering project.
• Non-Thesis Track: The non-thesis option requires the completion of 30 semester hours of coursework.

Programs
Students in the M.S. program may select from the following concentrations:

• Chemical Engineering
• Civil Engineering
• Electrical & Computer Engineering
• Engineering Management
• Mechanical Engineering

Note: Students may also choose to pursue a tailored Master of Science in Engineering program under the direction of a faculty advisor.

Master of Science in Chemical Engineering (M.S.)

The Chemical Engineering program emphasizes project management skills and industrially relevant research that prepares students and working engineers for successful careers in high-tech fields. This program also includes the following focus areas: Bioengineering; Signals, Systems and Computational Intelligence; and Sustainability.

## Master of Science in Civil Engineering (M.S.)

The Civil Engineering program allows students to develop an interdisciplinary focus through their coursework and thesis topic. Graduate students work with faculty with expertise in transportation, geo-technology, structures, water resources, and the environment. Interdisciplinary areas include mechanics and materials, and sustainability. This program also includes the following focus areas: Mechanics and Materials; Signals, Systems and Computational Intelligence; Sustainability; and Transportation Engineering.

Master of Science in Electrical and Computer Engineering (M.S.)

The Electrical Engineering program gives students an opportunity to expand their skill sets in advanced topics of interest. Concentration areas include signal & image processing, computational intelligence and pattern recognition, power systems and renewable energy, discrete event systems, and virtual reality systems. This program also includes the following focus areas: Bioengineering; Signals, Systems and Computational Intelligence; and Sustainability.

\textbf{Master of Science in Electrical and Computer Engineering (M.S.)}

The Master of Science in Electrical and Computer Engineering program is designed to provide students with advanced knowledge and skills in electrical and computer engineering. The program offers a comprehensive curriculum that includes courses in digital signal processing, digital image processing, digital speech processing, theory and engineering application of wavelets, advanced topics in pattern recognition and machine learning, advanced embedded software design, artificial neural networks, and advanced topics in systems, devices, and algorithms in bioinformatics.

Students can choose courses from a wide range of advanced topics in electrical and computer engineering. The program also offers courses in advanced smart grid, advanced smart sensors, memristors and nano electronic VLSI, advanced engineering cyber security, advanced portable platform development, advanced emerging topics in computer engineering, advanced emerging topics in comp. intelligence & machine learning, estimation and detection theory, advanced computational intelligence and machine learning, finite element analysis, and engineering optimization.

Students must complete a minimum of 30 s.h. of required courses, including the following:

- ENGR 01599 Masters Research

Students can also choose a thesis track or a coursework track degree. Most full-time students work on funded research projects, leading to a thesis. Most part-time students select the coursework track. In order to be eligible for a Research Assistantship students must select a thesis track.

Master of Science in Mechanical Engineering (M.S.)

The Mechanical Engineering program allows a student to develop a high level of competence in engineering design, and a deep understanding of current technology. The interdisciplinary nature of the program provides students with an opportunity to work on exciting research areas at the leading edge of technology. This program also includes the following focus areas: Bioengineering; Mechanics and Materials; Signals, Systems and Computational Intelligence; and Sustainability.

Program Requirements

Required Courses: 9 semester hours (s.h.)

Master's Degrees Continued

Master of Science in Engineering with Concentration in Biomedical Engineering (M.S.)

The Master of Science in Engineering program with a concentration in Biomedical Engineering at Rowan University effectively prepares individuals to respond to the changing needs of engineers today. This program provides students with the necessary knowledge, skill set, and training to effectively contribute to the engineering workforce. Students have access to higher level courses leading to a graduate degree and are involved in professional development opportunities which increase the breadth of understanding and application of engineering principles.

The Biomedical Engineering concentration gives students an opportunity to expand their skill set in advanced topics of interest. Advanced topics include Biomaterials Engineering, Tissue Engineering and Regenerative Medicine, Bioinstrumentation and Bio signal Processing, and Biomechanics and Mechanobiology.

Program Requirements

The Rowan University Master of Science in Engineering program with a concentration in Biomedical Engineering requires the completion of 30 hours of graduate level coursework and the successful completion and defense of a Master’s Thesis.

Coursework

The following courses make up the Master of Science in Engineering with Biomedical Concentration.

- **Required Courses:** Minimum of 9 S.H. (chosen in consult with advisor)
- **Concentration Electives:** 12-15 S.H. (chosen in consult with advisor)
- **Research Credits:** 6-9 S.H.

### Biomedical Engineering Core Courses

Students must choose 9 sh from the following bank of courses. An advanced mathematics course is required.

Certificate of Graduate Study (Non-degree)

COGS in Combat Systems Engineering

The immediate region surrounding Rowan University is home to a large number of companies and agencies that serve the defense industry. Collectively, this industry hires more of the graduating Rowan Electrical and Computer Engineering (ECE) students than any other industry. The representatives of this industry have expressed a desire to provide additional knowledge and skill sets — specifically as they relate to combat systems — that they would prefer their employees to have at the time of hiring.

The Certificate of Graduate Study (COGS) in Combat Systems Engineering is a program designed to meet this need and consists of four (4) three-credit graduate level courses. The program allows students to increase the breadth and depth of their knowledge of complex systems with particular applications to combat systems and defense technologies. Completion of this COGS will give students the necessary tools required by the defense industry in analysis, design, evaluation, and validation of combat systems. Students who complete this COGS will be marketable and ready to be imminently employed at graduation by the defense industry companies, not just in our immediate geographic area, but nationwide as well. This program is jointly developed by Rowan ECE and the defense industry representatives. All courses in this COGS are taught by highly qualified faculty, including subject matter experts from the defense industry who have significant industrial experience and hence bring unique industry perspective.

The primary audience of this COGS are:

- Students with Bachelor of Science Degree in Electrical Engineering, Computer Engineering, Systems Engineering, or related engineering fields, who would like to focus on the combat systems engineering for employment in the defense industry, but not necessarily interested in completing a separate, stand alone Master of Science degree program
- Current employees in the defense industry, possibly newly hired, who may need the additional knowledge and skills set in combat systems engineering.

The courses in this COGS are also available to students who would like to complete a M.S. in ECE degree.

Program Requirements

Required Courses

Course #  Course Title  S. H.
ECE 09523  Advanced Radar Systems  3
ECE 09524  Advanced War Gaming and C4ISR  3
ECE 09525  Advanced Command and Control  3
ECE 09526  Advanced Weapon Systems  3

Total Required Credits  12 s.h.
Foundation Courses
MATH 01230 Calculus III; ECE 09321 Systems and Control I (or similar / relevant work experience); ECE 09341 Signals & Systems (or similar / relevant work experience)

Graduation/Exit, Benchmark, and Thesis Requirements
None

Minimum Required Grades and Cumulative GPA
The COGS in Combat Systems Engineering is a Category 2 program.

COGS in Engineering for Educators
Certificate of Graduate Study in Engineering for Educators brings together courses from The Henry M. Rowan College of Engineering and the Department of Teacher Education at the College of Education. This program will promote the content and pedagogical development of teachers. The program aligns itself with state-based and national-based education standards that seek to develop future educators who have a strong background in science, math, and technology content through the field of applied engineering as well as developing the pedagogical skill of transitioning this content into their own classrooms. The certificate of Graduate Studies in Engineering for Educators, an interdisciplinary program with the College of Education and the College of Engineering will allow teachers to earn graduate credit when completing Project Lead the Way (PLTW) curriculum training programs offered by the College of Engineering alongside earning graduate credits from the College of Education.

The program goals of the Certificate of Graduate Study in Engineering for Educators are as follows:
• To provide a course of study that leads experienced and inexperienced teachers to obtain the content knowledge they may lack in science, technology, engineering, and math and the pedagogical tools to incorporate this content knowledge into their classroom.
• To prepare highly qualified teachers for STEM national initiatives and to promote their understanding of such initiatives. STEM national initiative seeks to remove the traditional barriers erected between the four disciplines (Science, Technology, Engineering, and Math), by integrating the four subjects into one cohesive means of teaching and learning. The engineering component puts emphasis on the process and design of solutions instead of the solutions themselves. This approach allows students to explore math and science in a more personalized context, while helping them to develop the critical thinking skills that can be applied to all facets of their work and academic lives. Engineering is the method that students utilize for discovery, exploration, and problem-solving

Undergraduate Degree-Completion Programs
(These programs lead to Bachelor's degrees. They are offered through the Division of Global Learning & Partnerships, but official course descriptions and more about the program as a whole are included in Rowan's Undergraduate Catalog: www.rowan.edu/catalogs.)

Bachelor of Arts in Construction Management
Rowan University’s Bachelor of Arts in Construction Management degree completion program provides those with an Associate’s degree or at least 60 credits with the remaining credits necessary to complete a bachelor’s degree in this growing field while taking classes online. Applicants with less than 60 credits may work with an enrollment counselor to explore available options. This program is ideal for journeypersons and seasoned professionals in the construction industry as well as apprentices who are looking to develop leadership skills and advance their careers. The Bachelor of Arts in Construction Management degree prepares individuals to supervise, manage, and inspect construction sites, buildings, and associated facilities. Rowan University’s program has received the endorsement of the North America’s Building Trades Unions.

Upon completion of the program students will be able to:

- Supplement construction experience with the managerial skills required to propose, plan, and implement a range of construction projects.
- Develop competence in integrating safe and ethical practices efficiently and profitably.
- Communicate effectively with construction teams and community members.
- Develop effective project management strategies and techniques.
- Manage construction projects with scheduling software.
- Estimate quantity take-offs and costs with computers.
- Address issues related to construction law and project management.
- Understand materials and methods listed in the construction specification institute's Master Format.
Program Requirements
The Bachelor of Arts in Construction Management will consist of 120 credits which include 36 credits of online construction management courses, 46 credits of general education, and 38 credits of electives (see breakout below). It is expected that admitted students will have either an Associate's degree or an equivalent number of credits. Since the major/core construction management courses will consist of twelve courses yielding 36 credits, the remaining credits will account for general education and free electives. One of the particular aspects of this program will be for students to be able to convert into credits part of their working experience through Prior Learning Assessment (PLA).

Required Courses 30 s.h.

History
The College of Performing Arts (formerly, the School of Fine and Performing Arts at Glassboro State College) was founded in 1971. In 1997, during the transition from Glassboro State College to Rowan University, the School became the College of Fine and Performing Arts. The College was renamed the College of Performing Arts in 2012. Today, the College is comprised of the Departments of Music (including the Maynard Ferguson Institute of Jazz Studies) and Theatre & Dance. The College offers baccalaureate degrees in the fields of Dance, Music, Music Industry, Theatre and graduate degrees in Music and Theatre: Arts Administration.

In addition to more than 250 performances on campus each year, the faculty, staff, and students collaborate in scholarly and artistic activities at the international, national, and regional levels.

Mission
The College of Performing Arts at Rowan University develops artists and audiences of the future and promotes the arts as vital to humanity. Through rigorous professional preparation and liberal arts programs, the College of Performing Arts educates students in the disciplines of dance, music, and theatre and challenges them to develop a conceptual, critical, and creative perspective within the contemporary world. The college creates, illuminates, and inspires audiences and community through public performances and artistic practice for the university and broader region.

Accreditation
Specialized, national arts accreditation has been granted by the following organizations:

- The National Association of Schools of Music
- The National Association of Schools of Theatre

Departments
The College of Performing Arts houses the academic departments of Music and Theatre & Dance. (Not all departments offer programs through the Division of Global Learning & Partnerships.)

Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs.

Academic Program Policy Categories
For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Policy Prior to Fall 2013 Matriculation
The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

Master’s Degrees
Master of Music Overview
The Master of Music program provides intensive experiences in performance, conducting, jazz studies, or composition as well as courses geared to enhance the student’s knowledge and understanding of the literature of their area of concentration, and a greater understanding of music in general. The Master of Music program at Rowan University is for the aspiring musician who wishes to make a career as a jazz musician, classical performer, conductor, or composer or will continue their studies at the Ph.D. or DMA level. Graduates of Rowan’s Master of Music program have gone on to major doctoral programs, performing careers, arts leadership positions, and careers as college professors and public school teachers.

Master of Music Concentrations
The Master of Music program offers the degree with four concentrations as detailed below:
- Composition
- Conducting (Instrumental or Choral)
- Performance (Instrumental or Vocal)
- Jazz Studies

Notes:
- Students will officially declare their concentration at the time of application during the audition.
- Concentration requirements may only be modified by permission of the program coordinator.

The Master of Music requires 32-40 semester hours depending upon the concentration selected at the time of application. The Master of Music degree at Rowan University is designed to be 4 semesters long.

Students will take Music Theory and Music History placement exams the first week of classes (not admission bearing).

Admissions
A performance audition or portfolio review is required for admission to the Master of Music program. Audition requirements for each instrument or area of concentration can be found at www.rowan.edu/music/auditions.

An appointment for audition will be scheduled once the candidate’s application is complete. The auditions are scheduled on an individual basis according to the following procedures:
- **Voice, Instrument, Jazz Studies:** This audition can be taken during the academic year (September through April) by appointment.
• **Conducting**: If a candidate is invited to Phase 2 of the audition process, this audition must be scheduled during the academic year (October through April).

• **Composition**: The composition portfolio and accompanying materials can be submitted year round.

An audition can be scheduled by contacting Professor Veda Zuponcic, Academic Advisor, at zuponcic@rowan.edu or 856-256-4500 ext. 3563.

For the most up-to-date information regarding admission requirements, entry points, and application deadlines, please visit www.rowanu.com/programs. Click on your program of interest to be connected to program and admission details.

**Group A**

Choose 12-16 s.h. from the following. Be sure to include at least one offering each of Composition I and one offering of Composition II.

<table>
<thead>
<tr>
<th>Course #</th>
<th>Course Title</th>
<th>S.H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS 10525</td>
<td>Graduate Music Composition I</td>
<td>4</td>
</tr>
<tr>
<td>MUS 10526</td>
<td>Graduate Music Composition II</td>
<td>4</td>
</tr>
<tr>
<td>MUS 10527</td>
<td>Graduate Music Composition I</td>
<td>6</td>
</tr>
<tr>
<td>MUS 10528</td>
<td>Graduate Music Composition I</td>
<td>6</td>
</tr>
</tbody>
</table>

**Group B**

Choose 2 s.h. from the following (Course numbers rotate each semester.)

<table>
<thead>
<tr>
<th>Course #</th>
<th>Course Title</th>
<th>S.H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS 10537 - MUS 10540</td>
<td>Graduate Ensemble: Concert Choir</td>
<td>1</td>
</tr>
<tr>
<td>MUS 10541 - MUS 10544</td>
<td>Graduate Ensemble: Jazz Band</td>
<td>1</td>
</tr>
<tr>
<td>MUS 10545 - MUS 10548</td>
<td>Graduate Ensemble: Lab Band</td>
<td>1</td>
</tr>
<tr>
<td>MUS 10549 - MUS 10552</td>
<td>Graduate Ensemble: Orchestra</td>
<td>1</td>
</tr>
<tr>
<td>MUS 10553 - MUS 10556</td>
<td>Graduate Ensemble: Wind Ensemble</td>
<td>1</td>
</tr>
<tr>
<td>MUS 10559 - MUS 10572</td>
<td>Graduate Ensemble: Chamber Music</td>
<td>1</td>
</tr>
<tr>
<td>MUS 10576 - MUS 10579</td>
<td>Graduate Ensemble: Contemporary Music</td>
<td>1</td>
</tr>
</tbody>
</table>

**Group C**

Choose 2 s.h. from the following.

<table>
<thead>
<tr>
<th>Course #</th>
<th>Course Title</th>
<th>S.H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS 10501</td>
<td>Graduate Secondary Applied Instrument I</td>
<td>2</td>
</tr>
<tr>
<td>MUS 10505</td>
<td>Graduate Secondary Applied Voice I</td>
<td>2</td>
</tr>
</tbody>
</table>

### Elective Courses 5-8 s.h.

Choose courses from the following to total 5-8 credit hours.

<table>
<thead>
<tr>
<th>Course #</th>
<th>Course Title</th>
<th>S.H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS 04541</td>
<td>Jazz Piano (non-keyboard students)</td>
<td>1</td>
</tr>
<tr>
<td>MUS 04551</td>
<td>Piano Accompanying</td>
<td>1</td>
</tr>
<tr>
<td>MUS 04555</td>
<td>Counterpoint</td>
<td>3</td>
</tr>
<tr>
<td>MUS 04557</td>
<td>Advanced Orchestration</td>
<td>3</td>
</tr>
<tr>
<td>MUS 04561</td>
<td>Score Reading I</td>
<td>1</td>
</tr>
<tr>
<td>MUS 04562</td>
<td>Score Reading II</td>
<td>1</td>

Master of Arts in Theatre: Arts Administration (M.A.)

The Master of Arts (M.A.) in Theatre: Arts Administration will provide students with the business, marketing, and administrative skills needed to initiate their own performing arts organizations or to secure stable administrative positions in regional or national arts venues or institutions. This program provides vital, up-to-date strategies taught by well-known working professionals representing disciplines of visual arts, music, theatre, dance, and business. Students who graduate from this program will be prepared to pursue careers in theatre management or other administrative roles such as gallery directors, music producers, and dance company managers or as arts/cultural entrepreneurs.

Mission
1. Empower students to create innovative academic pathways so that they may become successful and adaptable leaders and innovators with a lasting impact on society.
2. Faculty and students engage with local and global communities to conduct transformative research that mobilizes knowledge to benefit society.
3. Grow and develop mutually beneficial connections among students, faculty, and community partners to reimagine the future.

Vision

Departments
The departments in the College of Humanities and Social Sciences are: English, Foreign Languages and Literatures, History, Law and Justice Studies, Philosophy and Religion Studies, Political Science and Economics, and Sociology and Anthropology. (Not all departments offer programs through the Division of Global Learning & Partnerships.)

Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs .

Academic Program Policy Categories
For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Policy Prior to Fall 2013 Matriculation
The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.
Master's Degrees

Master of Arts in Criminal Justice (M.A.)

The Master of Arts in Criminal Justice prepares students for leadership positions in criminal justice agencies; for research positions in federal, state, county, city, non-profit and private research institutions; and for further study in doctoral programs. The program focuses on the growing emphasis in the criminal justice system on using research evidence to evaluate the effectiveness of programs and policies aimed at preventing and controlling crime.

Graduate faculty have earned doctoral degrees from the best Criminal Justice programs in the country, and have practical experience working in the system as well as diverse academic interests. Both the Thesis and Non-Thesis tracks prepare students for professional careers by providing an understanding of the causes of crime, the impact of law on society and contemporary issues in policing, courts and corrections.

Tracks

The Face-to-face program on the Glassboro campus includes two tracks. Each has different course and graduation exit requirements which are outlined in the chart. The Thesis Track is not available to Online or 4+1 students.

- **Thesis Track:** Students choosing the Thesis Track will complete 6 required courses, select two electives, and earn six credits for doing research and writing a thesis while working closely with experienced faculty.
- **Non-Thesis Track:** Students choosing the Non-Thesis Track will complete 6 required courses, select four electives, and take a comprehensive exam after completing their coursework. Online and 4+1 students follow the Non-Thesis track.

Rowan University undergraduates majoring in the Bachelor of Arts in Law and Justice Studies program can apply to the accelerated Bachelor of Arts/Master of Arts dual degree (4+1) program allowing them to earn both the Bachelor of Arts and Master of Arts degrees in five years.

Master of Arts in History (M.A.)

The Master of Arts in History at Rowan is designed mainly for students who desire increased competence in historical studies preparatory or supplementary for teaching in that field on the high school or community college level. It is also appropriate for students who seek qualification for admission to a doctoral program at another institution and for students who wish to pursue a liberal education at an advanced level for intellectual challenge and personal self-fulfillment.

Our program is set in the tradition of a Liberal Arts education. Courses offer an opportunity for students to extend their knowledge and enhance their competence in historical studies through direct, face-to-face interaction with Rowan's award-winning, full-time faculty members.

Total graduate semester hours required for program completion is 30. Students are encouraged to devote at least 12 credits of their electives to pursuing an area of concentration in American, European, or global history, but they must take at least one course in another area. Up to 6 credits may be taken as independent study, and students may take one elective graduate course outside of the History Program, chosen in consultation with the graduate advisor.

Tracks

The program includes two tracks. Each has different course and graduation exit requirements which are outlined in the chart.

- **Thesis Track:** The Master of Arts Thesis Track is designed for those who are interested in pursuing original research and is strongly recommended for those who are planning to do doctoral work in history. Students pursuing the thesis track will complete the 6 required credits, 18 elective graduate credits in history, and 6 credits of Master's Thesis.
- **Non-Thesis Track:** Students may choose to complete the degree by pursuing coursework without a thesis. This track may be appropriate for those seeking professional development or broader content knowledge. Students pursuing the non-thesis track will complete the 6 required credits and 24 elective graduate credits in history.

Rowan University undergraduates majoring in the Bachelor of Arts in History program can apply to the accelerated B.A./M.A. dual degree (4+1) program allowing them to earn both the Bachelor of Arts and Master of Arts degrees in five years.

Certificate of Graduate Study in Urban Health Disparities (COGS)

The Certificate of Graduate Study in Urban Health Disparities provides a sequence of courses for those who wish to work in a variety of settings geared toward community health advocacy and leadership or other positions in non-profit organizations, hospitals, business, community health organizations, governmental agencies, non-governmental organizations, research and advocacy groups, faith-based institutions, and educational institutions. The program’s focus on health care inequity, health care access, and social justice issues will enhance students’ marketability for leadership positions in organizations seeking individuals with social action and community-health knowledge. The Urban Health Research Studio experience can be an applied community-based field experience (whenever possible) or a pure research endeavor with Rowan University faculty members.

Undergraduate Degree-Completion Programs

(These programs lead to Bachelor’s degrees. They are offered through the Division of Global Learning & Partnerships, but official course descriptions and more about the program as a whole are included in Rowan's Undergraduate Catalog: www.rowan.edu/catalogs.)

Bachelor of Arts in Disaster Preparedness and Emergency Management (B.A.)

The Bachelor of Arts in Disaster Preparedness and Emergency Management is an interdisciplinary academic program designed to provide rigorous academic preparation for students interested in seeking advanced professional homeland security education and training or a career in international, national, state, and local disaster preparedness, emergency management, and safety areas with an emphasis on urban environments. The current focus areas include biomedical preparedness (in conjunction with the Cooper Medical School of Rowan University), public administration and civic leadership, and civil safety/justice administration, all of which lead to establishing core competencies in emergency preparedness. In addition to providing students with a broad understanding of safety and security issues, the Disaster Preparedness and Emergency Management degree program focuses on several vital components of the emergency management field:

- Critical Infrastructure Protection
- Disaster Preparedness and Response
- Intelligence Sharing and Analysis
Graduates will be prepared to work in a variety of settings and agencies that focus on emergency rescue and response, homeland security, hospitals, municipal emergency management, county emergency management, safety management, intelligence analysis, private security, airports, state and local law enforcement, federal law enforcement, customs investigators, special agents, military service and border security and patrol.

Program Requirements
The Disaster Preparedness and Emergency Management program consists of 121 S.H. of coursework, including 30 S.H. of core requirements coursework, and 9 S.H. of focus area courses. The 30 S.H. of core major requirements provide a common foundation for all majors with an emphasis on ethics to assist the student in developing complex thinking skills. As part of the 30 S.H. of core courses, each student will complete a 3 S.H. internship experience designed to provide an experiential learning opportunity and to give the student a more practical view of the intended career path. In addition to the core requirements, general education requirements, and electives, each student will choose a focus area:

- **Focus Area 1:** Public Administration and Policy for Crisis Decision Leadership - 9 additional S.H of Political Science/Public Administration, Disaster Leadership or Risk Analysis coursework
- **Focus Area 2:** Justice, Safety and Homeland Security Administration - 9 additional S.H. of Law & Justice coursework with focus on Homeland Security or Risk Analysis
- **Focus Area 3:** Emergency Health Preparedness and Biomedical Safety - 9 additional S.H. of Biomedical/Population Health and Epidemiology or Risk Analysis coursework

In addition to courses in Political Science, Law and Justice, Anthropology, Sociology and the Physical Sciences, students can also use the following Disaster Preparedness and Emergency Management courses to fulfill Focus Area requirements.

Bachelor of Arts in Human Services (B.A.)

The Bachelor of Arts in Human Services is an academic program, unique to the Camden Campus that will prepare individuals to serve as human services providers, health educators, social service professionals, and community service specialists. The curriculum is designed to combine theory and research with application in experiential learning settings in the urban community and social service agencies located in the City of Camden, New Jersey. The Human Services program is designed for students who are interested in studying and working with individuals of diverse populations in urban settings.

Program Requirements

The Human Services program consists of 120 S.H. of coursework, including 39 S.H. of core requirements, 9 S.H. of which involve direct field experience. In addition to the core requirements, general education requirements, and electives, students will choose one of the following three concentrations, each consisting of a single required 3 S.H. course and 6 S.H. of electives relevant to each concentration:

- Clinical Services Concentration- 9 S.H.
- Administrative Concentration- 9 S.H.
- Criminal Justice Concentration- 9 S.H.

Bachelor of Arts in Law & Justice Studies (B.A.)

The Bachelor of Arts in Law & Justice degree completion program is intended for students who have already completed their Associate's Degree (or a minimum of 24 overall credits) and want to pursue the Bachelor of Arts. The degree, offered through Rowan Global Learning & Partnerships and taking place both online and on the Rowan University Camden Campus, offers students solid academic preparation in the study of crime, law, and the criminal justice system with an interdisciplinary approach to coursework that enhances critical thinking, reasoning, writing, and logic skills. It prepares
students for professional careers in four major areas: law enforcement and security services, court services, corrections, and human services. Since many of the students who enter the program express an interest in preparation for graduate study and professional schools, the program also offers the rigorous preparation necessary to achieve such goals.

**Bachelor of Arts in Liberal Studies: Humanities/Social Science (B.A.)**

The B.A. in Liberal Studies: Humanities/Social Science program is designed for those who possess at least 24 college credits and want to complete a bachelor's degree in a convenient setting. This quality liberal studies program offers students solid academic preparation and is ideal for working adults who need a bachelor's degree in order to pursue a career or advance in their current position.

Rowan University requires the completion of 120 semester hours of approved general education and major coursework in order to graduate with a bachelor's degree. The Bachelor of Arts in Liberal Studies: Humanities/Social Science program is a part-time, accelerated program that provides students with 39 of the required semester hours in approximately eight consecutive semesters. Students will work with their academic advisor to evaluate eligible transfer credits, and determine their entire degree program and mode-of-delivery options.

**Focus Area Options**

Through Rowan Global, the following focus area option is possible:

- Philosophy & Religion and Public Relations (PR) in the Workplace
Program Requirements for the Focus Areas in Philosophy & Religion and PR in the Workplace

Bachelor of Arts in Sociology (B.A.)

The major in Sociology consists of 120 semester hours. Upon completing all requirements in their program, students majoring in sociology receive a Bachelor of Arts degree in Sociology. The major program aims to develop students' competence in understanding and analyzing the effects of social factors across all levels of society. The Bachelor of Arts in Sociology overall affords its majors a strong Liberal Arts undergraduate degree as well as a rich foundation for most graduate degree programs.

Students in the sociology major now have the option of taking the General Program or the Applied Concentration for the degree. The General Program (2208) allows students flexibility in choosing which lower and upper level electives will be part of their program. It consists of a total of 33 semester hours. The Concentration in Applied Sociology (2209) consists of 36 semester hours, with students taking fewer Free Electives than in the General Program. The concentration focuses specifically on the analysis and treatment of social problems, the assessment of community based needs and practices, and the development and evaluation of strategies for positive social change. It provides a sound foundation for pursuing careers in human and community service industries.

Rowan University requires the completion of 120 semester hours of approved general education, Rowan Experience, and major coursework in order to graduate with a bachelor's degree. The Bachelor of Arts in Sociology degree completion program is a full or part-time program that provides students with 33-36 of the required semester hours.

Bachelor of General Studies (BGS)
Rowan University is proud to offer students another option to complete a Bachelor's degree. The Bachelor of General Studies (BGS) degree completion program may be the best route to a degree for some students. BGS students:

- Achieve a well-rounded and rigorous liberal arts education in a degree program that is tailored to individual needs;
- Concentrate on a disciplinary or interdisciplinary academic focus area more flexible than a traditional major;
- Collaborate with the program coordinator and advisor to ensure achievement of program and individual goals;
- Actively prepare for a future career as part of the degree requirements.

Program Requirements
Rowan University requires the completion of 120 semester hours (30 s.h. must be at Rowan University) of approved general education and major coursework in order to graduate with a bachelor's degree.

The following courses make up the Bachelor of General Studies program:

Required Courses: 120–126 semester hours (s.h.)

- General Education & Rowan Experience Courses: 42 s.h.
- Focus Area Courses: 18–24 s.h. (9 s.h. must be at the 300–400 level)
- Elective Courses: 57 s.h. (9 s.h. must be at the 300–400 level)
- BGS Portfolio Requirement: 1 s.h.
- BGS Career Development Course: 2 s.h.

### Foundation Courses

Admission to the Bachelor of General Studies program is available to matriculated students who have earned a minimum of 75 credits who require a degree completion program. Successful applicants must be currently matriculated at Rowan; have 45 credits or fewer to complete toward a degree; be transferring from a declared major and provide evidence that they have attempted to make progress in the major; demonstrate that the BGS degree is the best option for them.

Mission
The College of Science and Mathematics builds on the foundation of a liberal education to provide graduate programs that prepare students for professional positions, enhance skills needed in current careers, and provide training needed for continuing study in doctoral programs. Committed to excellence in instruction and scholarship, its disciplines promote rigorous inquiry, analytical and integrative reasoning and decision making skills.
In addition to the programs listed below, the College supports graduate programs in the College of Education. The various curricula in the College combine the richness of science and mathematical theories and traditions with applications for the workplace in the new millennium.
The College of Science and Mathematics affirms the natural sciences, behavioral sciences, and mathematics as core components of liberal education and the foundation of professional preparation. The College is committed to excellence in instruction, research, and scholarship. Its disciplines promote extensive interaction between faculty and students, attention to individual development of critical and creative thinking, the building of interdisciplinary communities through partnerships both internal and external, and the development of new knowledge through research and creative activities. The College plays an essential role in Rowan’s mission: to educate students who remain lifelong learners and ethically responsible citizens, sensitive to cultural and ethnic diversity and engaged in advancing our global society.

Departments
The departments in the College are: Biological Sciences, Molecular & Cellular Biosciences, Chemistry & Biochemistry, Computer Science, Mathematics, Physics & Astronomy, and Psychology. (Not all departments offer programs through the Division of Global Learning & Partnerships.)
Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs.

Academic Program Policy Categories
For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Policy Prior to Fall 2013 Matriculation
The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

Doctoral Program
Doctor of Philosophy in Clinical Psychology (Ph.D.)
The Rowan University Doctor of Philosophy in Clinical Psychology follows a scientist-practitioner model featuring personalized guidance from faculty advisors in conducting high-quality original research projects. The program's emphasis on integrated primary care and health psychology prepares students for research and practice in health care settings.
Distinguishing features of the program include a focus on primary care and health psychology as well as highly valued empiricism and the use of evidence-based assessment/treatment techniques. Students in their second year of the program will complete clinical rotations in the Rowan University Wellness Center as part of both the mental and physical health programs. There is also the opportunity for interdisciplinary collaborations with Cooper Medical School of Rowan University, Rowan School of Osteopathic Medicine, and the M.D. Anderson Cancer Center. The Rowan University Department of Clinical Psychology is committed to bringing together students and faculty from diverse backgrounds and emphasizes individual differences as well as interconnectedness between biological, psychological, and sociocultural factors.

The Rowan University Doctor of Philosophy in Clinical Psychology is a full-time program that requires the completion of 107 semester hours over four years plus a one-year clinical internship. Classes are (primarily) held during the day. Students will be simultaneously admitted to both the Master of Arts and Doctor of Philosophy in Clinical Psychology programs and expected to complete requirements for both degrees. While this newly developed program is not currently eligible for APA Accreditation because APA accreditation requires that students be enrolled in each year of the program, the curriculum content is consistent with the American Psychological Association’s (APA) Accreditation Standards. Additionally, these standards are consistent with requirements for licensure as a Psychologist in NJ as well as nationwide.

Program Requirements

The coursework for the Rowan University Doctor of Philosophy in Clinical Psychology has been designed and sequenced in a way that will allow students to develop increasingly complex and cumulative knowledge over the course of their training. Additionally, practicum training will be sequenced in a way that allows students to attain increasingly complex clinical competencies. Students will receive individual and/or group supervision from faculty and/or external supervisors and will also be part of vertical supervision teams. The following courses make up the Doctor of Philosophy in Clinical Psychology program.

**Master's Degrees**

**Master of Arts in Applied Behavior Analysis (M.A.)**

Applied behavior analysis (ABA) is one of the most effective and frequently utilized treatment approaches for individuals with special needs, including those with developmental disabilities and autism. ABA involves the use of well-established and empirically supported principles to assess and treat problem behavior and to facilitate skill acquisition. In southern NJ, over 20,000 children in special education programs have been classified with conditions that behavior analysts regularly treat. The Master of Arts in Applied Behavior Analysis meets both the degree and coursework requirements for certification as a Board Certified Behavior Analyst (BCBA). To be eligible to become a BCBA, the BACB also requires 1500 hours of practice in ABA supervised by a BCBA. For more information, see the BACB standards at www.bacb.com.

Foundation Courses
None

Graduation/Exit, Benchmark, and/or Thesis Requirements

1. Successful completion of first two courses (PSY 01500 & PSY 01510)
2. Successful completion of oral and written comprehensive exams
3. Successful completion of written research proposal and verbal defense
4. Successful completion of written research study and verbal defense
5. Meet professional requirements each semester

Benchmarks: Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks' timing and assessments will be shared with the student throughout the program by the Academic Advisor.

Benchmark I:
• Timing: Occurs after the completion of 6 prescribed credits from PSY01.500 and PSY01.510 (Phase I)
• Requirements: Candidates must successfully complete all Phase I courses with a grade of B or better for full matriculation into the program.
• Options: If the student does not successfully pass the benchmark, then the student is invited to re-take the necessary coursework once more. If still unsuccessful, student will not be matriculated into the program.

Benchmark II:
• Timing: Occurs after the completion of 12 prescribed credits PSY 02500, PSY 02510, PSY 02610 and PSY 02620 (Phase II)
• Requirements: Candidates must successfully complete all Phase II courses by as evidenced by grades of B or better in courses and passing comprehensive written and oral examinations with a score of 70 or better in each section before taking any additional coursework.
• Options: If the student does not successfully pass the benchmark, then the student is invited to re-take any necessary coursework and/or the written/oral examination once more. If still unsuccessful, student will be dismissed from the program.

Benchmark III:
• Timing: Occurs after the completion of prescribed credits Phase II credits (PSY 02500, PSY 02510, PSY 02610 and PSY 02620) and the completion of PSY 01550 Clinical Research Practicum (Phase III)
• Requirements: Candidates must submit and verbally defend a written research proposal (PSY 02660) to the research advisor which includes a review of the relevant research literature, a statement of the research question and rationale for the proposed study, methods section including the experimental procedure and design to be used, hypothesized results section with related figure(s) and tables including how the data will be analyzed, discussion of the hypothesized data and potential implications, and reference section. This research proposal will be completed in the time frame of one semester. The research committee and advisor will evaluate the proposal regarding the scholarly contribution to the related literature, methodology, APA format, and grammar. The research advisor must approve the final research proposal.
• Options: If the student does not complete and defend the proposal within the one semester time-frame, the student will be required to re-enroll in PSY 02660 until the proposal is completed and defended. If the student does not successfully pass the benchmark, then the student may be provided an opportunity to re-take the research project course (PSY 02660), and complete a different research project or the student may be dismissed from the program.
Benchmark IV:

- **Timing**: Occurs after the completion of Benchmark III (Phase IV)
- **Requirements**: Candidates must submit and verbally defend manuscript of an original research study (PSY 02660), including Rowan University IRB approval, and original data collected by the student. The manuscript includes an appropriate introduction setting the current research project in the context of the existing literature, a comprehensive methods section including the experimental procedure and experimental design that was used, results section with related figure(s) and tables including how the data were analyzed and summarized, discussion of the data including limitations and areas for future research, and reference section. This manuscript will be completed within the time frame of one semester. The research committee and advisor will evaluate the final paper regarding the scholarly contribution to the related literature, methodology, APA format, and grammar. The research advisor must approve the final version of the manuscript.
- **Options**: If the student does not complete and defend the research study within the one semester time-frame, the student will be required to re-enroll in PSY 02660 until the research study is completed and defended. If the student does not successfully pass the benchmark, then the student may be provided an opportunity to re-take the research project course (PSY 02660) to collect additional data and/or make changes to the experimental design and/or methods/procedures, or to complete a different research project or the student may be dismissed from the program.

Benchmark V:

- **Timing**: Occurs at the conclusion of each semester
- **Requirements**: Candidates must meet all the requirements of the profession in terms of professional demeanor, client interaction, and ethical behavior as determined by the faculty members and off-site clinical supervisors.
- **Options**: If the student does not successfully pass the benchmark, then they may be provided a remediation plan for professional behavior by the faculty, or they may be dismissed from the program.

Minimum Required Grades and Cumulative GPA

The Master of Arts in Applied Behavior Analysis is a Category 1 program.

For details regarding satisfactory academic progress and graduation requirements, please visit [www.rowanu.com/policies](http://www.rowanu.com/policies).

**Master of Arts in Clinical Mental Health Counseling (M.A.)**

The focus of the Master of Arts in Clinical Mental Health Counseling program is on preparing students to become mental health counselors who are involved in the prevention and treatment of a wide variety of mental health problems. Many of our students apply for licensure as Licensed Associate Counselors (LAC), and then as Licensed Professional Counselors (LPC) in New Jersey and other states. With the master’s degree completion, some students choose to seek research positions or pursue doctoral degrees. As such, students will receive comprehensive background in counseling theories, empirical research findings, counseling skills, and treatment approaches necessary for the effective delivery of services in a variety of mental health settings. The program places a particular emphasis upon delivering strong skills in differential diagnosis, conceptualization, development of treatment plans, and the use of evidence-based practices, with strong studies in ethics and multicultural issues.

As part of their program, students are required to complete at least 600 hours of supervised practice in a mental health setting and complete the Counselor Preparation Comprehensive Examination (CPCE). Students may elect to substitute the CPCE with the National Counselor Examination (NCE). The master’s program consists of 60 credit hours of graduate work, which is the educational requirement for the LAC/LPC. Students may also become involved in faculty labs, on a volunteer basis. This is valuable in gaining research experience and in further connecting with faculty.

Total Required Credits for the Program  60 s.h.

Foundation Courses
Students must have successfully completed at least 12 credits of undergraduate-level Psychology courses at an accredited institution, including one course in Abnormal Psychology, one course in Statistics, and one course in Research Methods.

Graduation/Exit, Benchmark, and/or Thesis Requirements

- All students are required to take the Counselor Preparation Comprehensive Examination (CPCE) during their second year in the program (or the equivalent for students who are part-time). Students may replace this exam with the National Counselor Examination (NCE). Students are responsible for the cost of the selected exam.

Benchmarks: Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks' timing and assessments will be shared with the student throughout the program by the Program Coordinator.

Benchmark I:
- **Timing**: Occurs before, or at, the conclusion of each semester
- **Requirements**: Candidates must meet all of the requirements of the profession in terms of professional demeanor, client and faculty interaction, and ethical behavior, as determined by the Program Coordinator, Thesis Advisors (where indicated), Faculty Members and both on- and off-site Practicum Supervisors.
- **Options**: If a student does not successfully pass the benchmark, the student may be provided a remediation plan for professional behavior by the Program Coordinator, or may be dismissed from the program.

Benchmark II:
- **Timing**: Occurs after the completion of 28 prescribed credits (Year I-including Summer)
- **Requirements**: Candidates must successfully complete all Year I courses (including Summer) and secure a practicum location. In addition, students in the Thesis Track must also formulate a suitable thesis topic (with approval of their Thesis Advisors) by the end of the Summer term of their first year. Students need to discuss details with their Thesis Advisors and the Program Coordinator. As noted above, Thesis Track, if available, is only available on an extremely limited basis.
- **Options**: If a student does not successfully pass the benchmark, the student may be invited to re-take any necessary coursework, dependent upon review of overall academic achievement and personal conduct. The student may be advised on the possibility of extensions regarding timing of thesis formulation and practicum placement, dependent upon overall progress and movement toward these goals.

Benchmark III:
- **Timing**: Occurs after the completion of 60 prescribed credits (Year II)
- **Requirements**: Candidates in the Thesis Track must successfully defend their Master's Theses (including Master's Thesis II course). Candidates in the Advanced Clinical Track must successfully complete the additional coursework (6 credits of Advanced Clinical Seminar). Candidates in both tracks must complete 600 hours of practicum experience with satisfactory supervisory evaluations.
- **Options**: If a student does not successfully pass the benchmark, the student is invited to re-take any necessary coursework (including Practicum), and/or resubmit the Master's Thesis and defense. If remedial efforts are still unsuccessful, the student may be dismissed from the program.
Minimum Required Grades and Cumulative GPA
The Master of Arts in Clinical Mental Health Counseling is a Category 2 program.

Master of Arts in Mathematics (M.A.)
The Master of Arts in Mathematics program will provide an opportunity for individuals to pursue advanced study in mathematics and to develop skills that can lead to success in today’s technologically oriented society. Whether the goal involves applying mathematics to solve problems in business or industry, teaching in higher education or preparing for further graduate study in mathematics or related fields, this program enables each student to pursue a course of study that is appropriate for his or her interests.
The program includes two tracks.
  • General Mathematics
  • Biomathematics
Each has its own course and graduation exit requirements, as outlined in the chart below.

Rowan University undergraduates majoring in the Bachelor of Science in Mathematics can apply to the accelerated B.S./M.A. dual degree (4+1) program allowing them to earn both the Bachelor of Science and Master of Arts degrees in five years.

Program Requirements

Required CORE Courses for both General Math & Biomath Tracks  9 s.h.

### Master of Science in Bioinformatics (M.S.)

The Master of Science in Bioinformatics program produces highly trained students who are prepared to directly contribute to the pharmaceutical, biological and/or biomedical research fields. Bioinformatics is a multidisciplinary field that develops and uses computational tools to investigate and analyze complex biological, biomedical, and biochemical systems. The goal of the field is to analyze large biological data sets generated in the lab or clinic for ways to enhance our understanding of biology and to develop better diagnostic, prognostic and treatment methods. A major goal of our program is to provide hands-on experience so students use the skills they learn towards real-world research questions. This includes advanced
training in theory and laboratory settings to allow students to diversify into other biomedical research fields.

This program includes 3 concentration areas for students to choose from:

- **Biological Sciences**: Topics such as genomics, transcriptomics, evolutionary genetics, phylogenetics
- **Biochemistry**: Topics such as molecular dynamics, biophysics, structural prediction
- **Computer Science**: Including the practical and theoretical aspects of computational biology

**Tracks**

The program includes two tracks. Each has different course and graduation exit requirements which are outlined in the chart.

- **Thesis Track**: Students in the thesis track must take 12 additional credits of restricted electives and the 6-credit thesis sequence or 9 additional credits of restricted electives and the 9-credit thesis sequence.
- **Non-Thesis Track**: Students choosing the non-thesis track must take 18 additional credits of restricted electives, 6 credits of which must be classified as project intensive.

Rowan University undergraduates majoring in the Bachelor of Science in Bioinformatics program can apply to the accelerated Bachelor of Science/Master of Science dual degree (4+1) program, allowing them to earn both the Bachelor of Science and Master of Science degrees in five years.

Total Required Credits for the Program

Foundation Courses
Applicants must have successfully completed the following courses at an accredited institution: Calculus I, Statistics I, and at least two semesters of Chemistry, Physics, Biology, and/or Computer Science. To prepare students for focus area electives, students may be advised to take one or more undergraduate courses in their concentration area in consultation with the Program Advisor.

Graduation/Exit, Benchmark, and/or Thesis Requirements
All students must conduct a formal seminar presenting their research, or about a focus area topic. If thesis track is chosen, students must successfully complete and defend a Master’s Thesis based on work done in their coursework with a Research Advisor.

Minimum Required Grades and Cumulative GPA
The Master of Science in Bioinformatics is a Category 2 program.
For details regarding satisfactory academic progress and graduation requirements, please visit www.rowanu.com/policies.

Contact information
bioinformatics@rowan.edu

Master of Science in Computer Science (M.S.)
The Master of Science in Computer Science will provide individuals with the opportunity to acquire an excellent graduate level education in Computer Science that prepares them to work in a variety of computer related fields, including education, industry, research, business, and government.
The Master of Science in Computer Science is a 30 credit-hour program with an optional thesis track. All students must complete a 12-credit core of required courses.

Tracks
The program includes two tracks. Each has different course and graduation exit requirements which are outlined in the chart.

- **Thesis Track**: Students in the thesis track must take 12 additional credits of restricted electives and the 6-credit thesis sequence or 9 additional credits of restricted electives and the 9-credit thesis sequence.
- **Non-Thesis Track**: Students choosing the non-thesis track must take 18 additional credits of restricted electives, 6 credits of which must be classified as project intensive.

Rowan University undergraduates majoring in the Bachelor of Science in Computer Science program can apply to the accelerated B.S./M.S. dual degree (4+1) program allowing them to earn both the Bachelor of Science and Master of Science degrees in five years.

Master of Science in Data Analytics (M.S.)

The Master of Science in Data Analytics at Rowan University is designed for individuals with a Bachelor's degree in a STEM related field who are looking to expand their knowledge and opportunities in Data Science. The program has a strong background in Data Mining, Modeling, Statistical and Machine learning, but also includes a concentration in Health Data Analytics. The program is based on industry needs, as well as guidelines of the Commission on Accreditation for Health Informatics and information Management Education (CAHIIM) and of the Technology Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Students will be prepared to use algorithms, statistics, and technology to make informed decisions from massive amounts of data, to manage streamed data or data stored in massive data warehouses, and to visually analyze and present information. Courses are designed to provide expertise in the data sciences and train students to solve problems with complex sets of structured and unstructured data commonly found in any industry.

Program Requirements
The Master of Science in Data Analytics program consists of 11 courses and a total of 30 graduate semester hours (s.h.). Students may enroll in this program part-time or full-time.

Coursework
The following courses make up the Master of Science in Data Analytics program.

• Required Courses: 12 semester hours (s.h.)
• Core Courses: 12 semester hours (s.h.)
• Elective Courses: 6 semester hours (s.h.)

Required Courses

Total Required Credits for the Program

30 s.h.

Foundation Courses
Applicants must have successfully completed the following courses (or their equivalents) at an accredited institution: Calculus II, Probability and Statistical Inference for Computing Systems, Linear Algebra, Introduction to Object-Oriented Programming or Computer Science and Programming, and Data Structures and Algorithms or Data Structures for Engineers.

Graduation/Exit, Benchmark, and/or Thesis Requirements
A 4 credit Capstone Practicum is required as part of the coursework.

Minimum Required Grades and Cumulative GPA
The Master of Science in Data Analytics is a Category 3 program. 
For details regarding satisfactory academic progress and graduation requirements, please visit www.rowanu.com/policies.

Master's Degrees continued

Master of Science in Pharmaceutical Sciences (M.S.)
Pharmaceutical Sciences is a highly interdisciplinary field that involves the integration of concepts from organic chemistry, biochemistry, physiology, pharmacology, and molecular biology for the design and synthesis of drugs as well as for understanding the mechanism of drug action. Some of the primary goals of pharmaceutical sciences involve the discovery and development of novel drugs, efficient use of existing drugs, and lowering the cost of therapy employing cheaper protocols for manufacturing the drugs. The Master of Science (MS) in Pharmaceutical Sciences will provide the students with a solid foundation in basic chemistry and its applications in pharmaceutical sciences especially in the areas of research and development. Students will graduate with the necessary knowledge, skill sets, and training to effectively contribute to the development and characterization of new therapies for human disease and will be prepared for a career in pharmaceutical or biomedical research.

Tracks
The program includes two tracks. Each has different course and graduation exit requirements which are outlined in the chart.

• **Thesis Track**: The thesis track is for students who desire to perform research as part of their graduate education. Thesis Track students enroll in 25 core s.h. (including 9 s.h. of research) and 6 restricted elective s.h. These students must enroll full-time. This track is a Fellows-Eligible program and the students are considered for a Graduate Fellowship award.

• **Non-Thesis Track**: Non-thesis Track students enroll in 16 core s.h. and 15 restricted elective s.h. These students may enroll either part-time or full-time.

**Total Required Credits for the Program**

31 s.h.

**Foundation Courses**

Applicants must have successfully completed the following courses at an accredited institution prior to enrolling: 2 semesters of General Chemistry, and 2 semesters of Organic Chemistry. Additionally, it is recommended that students have taken as part of their undergraduate coursework: Physical Chemistry, Inorganic Chemistry, Analytical Chemistry, and Biochemistry.

**Graduation/Exit, Benchmark, and/or Thesis Requirements**

If thesis track is chosen, students must successfully complete and defend a Master's Thesis based on the original research performed under the guidance of their Graduate Research Advisor.

**Minimum Required Grades and Cumulative GPA**

The Master of Science in Pharmaceutical Sciences is a Category 2 program.

For details regarding satisfactory academic progress and graduation requirements, please visit www.rowanu.com/policies.

**Master of Arts in School Psychology (M.A.)**

Completion of the Master of Arts (M.A.) in School Psychology provides a background in the theories, major knowledge, and methodological procedures in school psychology. This program (or its equivalent) is required for admission into the Educational Specialist (Ed.S.) program. The Master of Arts and Educational Specialist in School Psychology combine to meet the requirements for NJ Department of Education certification in School Psychology.

**Program Requirements**

- Total semester hours required for program completion: 34 s.h.
- Thesis Requirement: No

**Required Courses**

Certificates of Advanced Graduate Study (Non-degree)

Certificate of Advanced Graduate Study in Applied Behavior Analysis (CAGS)

Applied behavior analysis is one of the most frequently utilized treatment approaches for children and adults with special needs, including autism and developmental disabilities. The scope of practice of behavior analysts is the use of behavioral principles for the assessment and treatment of problem behaviors.

The Certificate of Advanced Graduate Study in Applied Behavior Analysis meets the coursework requirements for The Behavior Analyst Certification Board certification as a Board Certified Behavior Analyst (BCBA) for individuals with a Master's degree in behavior analysis, education, or psychology. Students applying to this program must possess a minimum of a Master's degree from an accredited university conferred in behavior analysis, education, or psychology. To be eligible to become a BCBA, the BACB also requires 1500 hours of independent fieldwork in ABA supervised by a BCBA in good standing. The Certificate of Advanced Graduate Study in ABA program does not provide the fieldwork component of this requirement. For more information, please visit the Behavior Analyst Board Certification, Inc. standards at www.bacb.com.

Graduation/Exit, Benchmark, and/or Thesis Requirements

• Successful completion of oral and written comprehensive exams

Benchmarks: Successful completion of all benchmarks is required for continuation in and graduation from the program. Details regarding benchmarks' timing and assessments will be shared with the student throughout the program by the Academic Advisor.

Benchmark I:

• Timing: Occurs after the completion of 12 prescribed credits
• Requirements: Candidates must take and successfully pass the written and oral comprehensive exams with a score of 70 or better in each section.
• Options: If the student does not successfully pass the benchmark, then the student is able to re-take the exam once more. If still unsuccessful, student will be dismissed from the program.

Benchmark II:

• Timing: Occurs at the conclusion of each semester
• Requirements: Candidates must meet all the requirements of the profession in terms of professional demeanor, client interaction, and ethical behavior as determined by the faculty members and off-site clinical supervisors.
• Options: If the student does not successfully pass the benchmark, then the student may be provided a remediation plan for professional behavior by the faculty, or they may be dismissed from the program.

Minimum Required Grades and Cumulative GPA

The Certificate of Advanced Graduate Study in Applied Behavior Analysis is a Category 1 program. For details regarding satisfactory academic progress and graduation requirements, please visit www.rowanu.com/policies.

warda81@rowan.edu

Certificate of Advanced Graduate Study in Clinical Mental Health Counseling (CAGS)

The Certificate of Advanced Graduate Study (CAGS) in Clinical Mental Health Counseling is intended for individuals who have already completed a master's degree in counseling (or related field) and need additional graduate coursework in order to have the sixty credits required for state licensure as Licensed Associate Counselors (LAC), followed by licensure (after completing necessary clinical experience) as Licensed Professional Counselors (LPC). Additionally, the program is available for mental health professionals in the community seeking to enhance their professional development. The courses within the certificate program are intended to be advanced courses within the clinical mental health profession that will allow students to improve their practical knowledge and skills.

Candidates seeking licensure are advised to read the regulations and requirements of the state's board where they intend to practice. The NJ Board of Licensed Professional Counselor regulations can be found at: http://www.njconsumeraffairs.gov/pc/Pages/default.aspx

Students typically complete 12 semester hours of graduate credits in classes taught by the Clinical Mental Health Counseling Program within the Department of Psychology in order to bring their total credits to the state requirement of 60. (Note: Some states may require that the master's degree have the words "counseling" or "counselor" in the title and/or be from a CACREP-accredited institution.

The 12 semester hours may be completed by taking a combination of courses within the Certificate of Advanced Graduate Study program. However, individual courses may have prerequisites associated with them. Given that some degrees total more or less than 48 credits, we occasionally accept individuals who request more (or less) than 12 semester hours and/or specific courses that are normally part of our own master's degree program. Any exceptions should be discussed with the Program Coordinator.

Students who simply need particular coursework (e.g., to obtain the sixty credits required for state licensure (LAC/LPC) and/or national certification/personal growth, etc.) may register for up to 9 graduate credits as non-matriculated students to meet their own individual needs. If additional credits are needed, students should matriculate in the program. Please note: It is highly recommended that all Certificate of Advanced Graduate Study students seek to matriculate.

Please consult with the Program Coordinator to discuss your enrollment needs.

Program Requirements
Required Courses

Please meet with Certificate of Advanced Graduate Study Program Coordinator to develop a course sequence from the following potential courses (dependent on availability and prerequisites). Note: Some courses are offered on rotation, and additional elective courses may be added periodically.

Certificates of Graduate Study (Non-degree)

Certificate of Graduate Study in Computational Data Analytics (COGS)

The huge amount of data generated daily is too complex and voluminous to be processed and analyzed by existing professionals and traditional methods. Across all industries, McKinsey Global Institute predicts that, "by 2018, the United States alone could face a shortage of 140,000 to 190,000 people with deep analytic skills as well as 1.5 million managers and analysts with the know-how to use the analysis of big data to make effective decisions".

This certificate is intended for data-savvy analysts who wish to update their skills and make themselves more marketable in the workplace, for professionals with deep knowledge in their domain seeking to improve their productivity, as well as for others who desire to take advantage of Big Data opportunities. The students may be recent graduates from a wide range of disciplines such as Healthcare, Journalism, Bioinformatics, Astronomy, Computer Science, GIS, Law & Justice, Business, Biomedical Engineering, Biomedical Sciences, etc., or they may be more senior data-savvy professionals wishing to keep current in their field by learning the newest technologies.

Certificate of Graduate Study in Health Data Management (COGS)
The Certificate of Graduate Study (COGS) in Health Data Management is intended for researchers, statisticians, or data analysts who would like to play a part in the healthcare industry. As a result of this program, students will be able to understand how to handle health-related data and design and analyze experiments as they relate to health data. Courses in this program may count towards Rowan’s Master of Science in Data Analytics requirements.

Program Requirements
The Certificate of Graduate Study in Health Data Management consists of 12 s.h. of coursework

Coursework
The following courses are required to complete the COGS in Health Data Management

• Required Courses: 6 SH
• Electives: 6 SH

Post-Baccalaureate Programs (Non-degree)

Post-baccalaureate Certificate in Applied Behavior Analysis

Applied behavior analysis is one of the most frequently utilized treatment approaches for children and adults with special needs including autism and developmental disabilities. The scope of practice of behavior analysts is the use of behavioral principles for the assessment and treatment of problem behavior. The Post-Baccalaureate Certificate Program is designed to provide students with the necessary coursework required to apply for certification as a Board Certified assistant Behavior Analyst (BCaBA). In addition to coursework, the BCaBA certification requires a bachelor’s degree from an accredited university, and 1000 hours of supervised practice. For more information please see Behavior Analyst Board Certification,
A note about BCaBA Certification

While the Behavior Analyst Certification Board, Inc. has approved the courses in the Post-Baccalaureate in Applied Behavior Analysis as meeting the coursework requirements for the Board Certified assistant Behavior Analyst (BCaBA) certification, applicants will have to meet additional requirements to qualify for the BCaBA certification including:

- a bachelor’s degree from an accredited university
- 1000 hours of supervised practice in the field

The Behavior Analyst Certification Board has ultimate responsibility for determining eligibility for certification as a BCaBA. For more information please see Behavior Analyst Board Certification, Inc. standards at [www.bacb.com](http://www.bacb.com).

**Post-Baccalaureate Programs (Non-degree)**

**Post-baccalaureate Certificate in Pre-Health Studies**

This program is designed for individuals who are interested in a career in the health professions but have little or no background in science. The coursework focuses on medical and dental school prerequisites, the medical school entrance exam (MCAT), and the application process, but also can be tailored to other health-related professional schools. Students who complete the program will receive a Post-Baccalaureate Certificate in Pre-Health Studies from Rowan University and may be eligible to continue their education at the Rowan Graduate School of Biomedical Sciences (RowanGSBS) to receive a Certificate in Biomedical Sciences and/or a Master’s Degree. Upon completion of the Post-Baccalaureate Certificate in Pre-Health Studies, students will demonstrate knowledge of scientific foundations, including fundamentals of chemistry, biology, and physics, needed to succeed on the MCAT exam and in medical school or other health-related professional programs.

Students will complete the basic prerequisites for professional school within one calendar year, which will allow them to apply to professional school in a timely fashion. A sample course sequence is described below. Similar course sequence guides will be tailored specifically to each student’s desired health-related professional school. Additional recommended courses will be suggested after successful completion of prerequisite courses and in consultation with the program director/health professions advisor.

- Medical/Dental: Students will take CHEM 06100 and CHEM 06101 in the Summer; BIOL 01205, CHEM 07200, and PHYS 00210 in the Fall; and BIOL 01206, CHEM 07201, and PHYS 00210 in the Spring.
• Physical Therapy: Students will take CHEM 06100 and CHEM 06101 in the Summer; BIOL 01205, BIOL 10210, and PHYS 00210 in the Fall; and BIOL 01206, BIOL 10212, & PHYS 00211 in the Spring.

Program Requirements

• The program consists of four (4) required courses (those required by all known health professions programs), totaling 16 credits. These courses are marked “required” below. In addition to the core courses, additional electives would be required depending on which health profession is targeted and in consultation with the program director/health professions advisor. The total credits for the program is 32 credits.
• The number of credit hours is greater than the 30 maximum indicated in the University Senate’s curricular definitions guidelines because the courses within the program are 4 credits each.

Undergraduate Degree-Completion Programs

Overview
The following programs lead to a Bachelor's degree. These programs are offered through the Division of Global Learning & Partnerships, but official course descriptions and more about the program as a whole are included in Rowan's Undergraduate Catalog: www.rowan.edu/catalogs.

Bachelor of Arts in Psychology (B.A.)
Defined as the “scientific study of the mind and behavior” Rowan’s respected and popular Bachelor of Arts in Psychology program follows the American Psychological Association (APA) guidelines for the undergraduate Psychology Major, which strives to make students “psychologically-literate citizens.” This fully online degree-completion program is designed for the adult learner interested in furthering his or her knowledge in the field of psychology.

Rowan University requires the completion of 120 semester hours of approved general education, Rowan Experience, and major coursework in order to graduate with a bachelor’s degree. The Bachelor of Arts in Psychology degree completion program is a full- or part-time program that provides students with 33 of the required semester hours.

About the School
The School of Health Professions provides rigorous academic training, exceptional clinical and internship experiences, and interprofessional opportunities for students interested in careers in nursing and health-related careers. Our students learn from an accomplished faculty in a collaborative environment and gain hands-on training both on and off campus.

Departments
The School of Health Professions consists of two departments: Health & Exercise Science and Nursing. The Department of Health & Exercise Science offers master’s degrees in Athletic Training, Wellness & Lifestyle Management, Nutrition, and Health & Physical Education (non-certification). At the undergraduate level, the Department of Nursing offers an RN-BSN degree and MSN programs in Clinical Nurse Leader and Nurse Practitioner.

Programs Offered
All programs offered are listed below in order of degree/program type and then in alphabetical order by program name. Details about each program are then listed within the catalog in the same order. For the most up-to-date information regarding mode of delivery options for your program of interest, please visit www.rowanu.com/programs.

Academic Program Policy Categories
For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)
Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:

- Earn no more than two total “B-” grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:

- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:

- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Policy Prior to Fall 2013 Matriculation

The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

Master’s Degrees

Master of Arts in Health & Physical Education (M.A.)

The Master of Arts in Health & Physical Education is a non-degree program designed to prepare those currently teaching in the field, as well as others, to advance their competencies in the areas of curriculum development and models, instructional strategies and use of technology for teaching diverse students, teacher/program evaluation, and student assessment. Graduates of this master’s program will be well prepared for advanced professional work in the field, and for advancement within their profession. The requirements for this program consist of 30 credits of coursework, including a capstone project in which students conduct an in-depth project based on a health or physical area focus of their choice. This program is offered completely online.

The Master of Arts in Health & Physical Education program consists of 10 courses and a total of 30 graduate semester hours (S.H.). This is a part-time accelerated program with degree completion possible in 5 consecutive semesters.

Master of Arts in Wellness & Lifestyle Management (M.A.)
The Master of Arts in Wellness & Lifestyle Management (WLM) is a program for professionals from a variety of disciplines who want to work with clients or students to create and maintain lifestyle changes. The program is designed to serve the needs of professionals from a variety of educational backgrounds. The goal of this program is to prepare professionals in corporate, hospital and community health promotion settings to facilitate and lead wellness initiatives within their organizations. Graduates will be prepared to serve as facilitators, coordinators and managers of wellness programs in the following types of organizations:
- Corporate wellness/fitness facilities
- Hospital-based wellness/fitness facilities
- Clinical and rehabilitation centers
- Schools and Colleges/universities
- Community wellness/fitness facilities
- Non-profit health agencies
- State/county/ity Departments of Public Health

The Master of Arts in Wellness & Lifestyle Management program consists of 10 courses and a total of 30 graduate semester hours (S.H.). This is a part-time accelerated program with degree completion possible in 5 consecutive semesters.

Master of Science in Athletic Training (M.S.)

The Athletic Training Program at Rowan University is a rigorous and intense program designed to prepare students to take the Board of Certification, Inc., Exam and to become competent Athletic trainers. A major objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level certified athletic trainer, as well as meet the expectations for the Commission on Accreditation of Athletic Training Education (CAATE).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted into the program.

Compliance with the program’s technical standards does not guarantee a student’s eligibility for Athletic Training Program or the Board of Certification (BOC, Inc.) exam.

Candidates for selection to the Athletic Training Program must demonstrate:

1. The capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm
2. Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely and efficiently use equipment and materials during the assessment and treatment of patients
3. The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice
4. The ability to record the physical examination results and a treatment plan clearly and accurately
5. The capacity to maintain composure and continue to function well during periods of high stress
6. The perseverance, diligence and commitment to complete the athletic training education program as outlined and sequenced
7. Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations
8. Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care

General Education

All students must complete the University General Education requirements as described on page 14

Rowan Experience

All students must complete the Rowan Experience Requirements as described on page 16

Required Courses

To complete the program, students must have a minimum of 3.0 overall GPA and 3.0 GPA in the Athletic Training major. No grades less than a C in any Athletic Training major course will be counted toward graduation. Please see the following links for more information:

Pre-requisites for Application to the Athletic Training Program’s Professional Phase
Professional Phase Application Procedures
Final Acceptance Criteria for Professional Phase Application
Athletic Training Program’s Retention Criteria
Athletic Training Program’s Exit (Graduation) Requirements

Please follow Rowan University transfer policy when applying for acceptance to Rowan University. Once accepted into Rowan University, the Athletic Training Program has an additional transfer policy. Please refer to the following: Athletic Training Program’s Transfer Policy

**Master of Science in Nursing (M.S.N.)**

The Master of Science in Nursing (M.S.N.) program at Rowan University was established to provide Registered Nurses in the greater Philadelphia/tri-state area with the skills to assume leadership roles in their respective organizations.

**Concentrations**

The Master of Science in Nursing program requires students to select a concentration. Each has different course requirements which are outlined in the chart. All students must successfully complete the Master of Science in Nursing core prior to being approved by the department to continue on to their concentration track. Additional information/requirements regarding this can be found in the students Personalized Course Sequence and Department of Nursing Student Handbook.

- **Clinical Nurse Leader**: The Clinical Nurse Leader concentration will prepare RNs to become a Clinical Nurse Leader (CNL). “In practice, the CNL oversees the care coordination of a distinct group of patients and actively provides direct patient care in complex situations. This master's degree-prepared clinician puts evidence-based practice into action to ensure that patients benefit from the latest innovations in care delivery. The CNL evaluates patient outcomes, assesses cohort risk, and has the decision-making authority to change care plans when necessary. The CNL is a leader in the health care delivery system, and the implementation of this role will vary across settings” (accessed at www.aacn.nche.edu).

- **Nurse Practitioner-Adult Gerontology Acute Care**: The Nurse Practitioner program prepares Registered Nurses (RN) to sit for the concentration certification exam. The certifying agency determines eligibility for the exam.

- **Nurse Practitioner-Family**: The Nurse Practitioner program prepares Registered Nurses (RN) to sit for the specialty certification exam. The certifying agency determines eligibility for the exam.

**Program Requirements**

**Required Core Courses**

All applicants to the Master of Science in Nursing program who meet the admission requirements are first admitted to the Master of Science in Nursing CORE which consists of seven graduate level courses taken by all MSN students regardless of their specialty track. Students must maintain a cumulative GPA of 3.0 in all MSN CORE courses in order to apply and be approved by the Department of Nursing to apply to a concentration. Admission to the concentration will only occur after completion of the core track and faculty review/approval.

**Undergraduate Degree-Completion Programs**

**Overview**
The following programs lead to a Bachelor’s degree. These programs are offered through the Division of Global Learning & Partnerships, but official course descriptions and more about the program as a whole are included in Rowan’s Undergraduate Catalog: [www.rowan.edu/catalogs](http://www.rowan.edu/catalogs).

**Bachelor of Science in Nursing (B.S.N.)**
The Bachelor of Science Degree in Nursing is offered jointly by the Rowan University School of Health Professions and the Division of Global Learning & Partnerships. It is designed to give additional professional education at the baccalaureate level to practicing nurses. The Bachelor of Science in Nursing degree prepares registered nurses to work in the ever-expanding field of nursing. This degree allows nurses to augment their knowledge base and thus enhance their careers. The Bachelor of Science Degree also acts as a stepping stone for the nurse who wishes to pursue a Master of Science Degree in Nursing with six graduate nursing credits included in the program curriculum. The program is designed as a part-time program to accommodate professionals’ schedules while still completing the degree in a timely manner.
RN-to-BSN Curriculum
The complete curriculum includes 121 credits: 31 credits in the RN-to-BSN major and 90 credits of general education courses required by Rowan University for graduation from any bachelor’s degree program. Students graduating from an Accreditation Commission for Education in Nursing (ACEN) associate’s degree or diploma program are awarded 30 pre-licensure nursing credits upon matriculation into the program. Students transfer credits for coursework completed prior to admission to the program. Degree candidates are encouraged to plan a course of study that meets both the programmatic criteria as well as courses that meet their individual needs and interests.

- Students may transfer up to 90 credits in general education requirements.
- Students must fulfill the general education requirements of Rowan University, either through the transfer of credits or completion of courses at Rowan University.
- Additional coursework may be required, depending on the amount of credits transferred to Rowan University.
- Program must be completed on a part-time basis. There is not a full-time option available.

Course of Study
Rowan University requires 121 credits taken within approved general education and major coursework in order to graduate with a Bachelor’s degree. To obtain the BSN all students complete the following coursework:

- 31 credits (9 courses) in the major sequence
- 60 credits in general education requirements
- 30 credits awarded for pre-licensure nursing coursework

General Education
- 60 general education credits required/transfer credits and remaining coursework to be determined by the Nursing Department

* Matriculated students must submit a copy of their current personal malpractice insurance before the start of NURS 03401 Community Health Nursing.

Total Required Credits for the RN to BSN Major Courses 31 s.h.

RN to Bachelor of Science in Nursing Prerequisite Courses
Statistics and English Composition I & II are direct prerequisites for NURS 03404 Research, Applications in Nursing Practice and must be completed prior to being able to take the course (please note that a grade of C or better is needed in Statistics in order for it to meet the pre-requisite requirement).

Graduation/Exit, Benchmark, and/or Thesis Requirements
Program exit includes successful completion of all required coursework totaling 121 credits, including a "C-" or better in all major RN-to-BSN courses. Student will receive a Bachelor of Science in Nursing degree, awarded by Rowan University.

About the School

There is a great need for qualified professionals to address the most dramatic global challenges, including environmental sustainability, energy, and climate change. The School of Earth and Environment at Rowan University will play a role in developing solutions in these areas by cultivating faculty research and preparing students for careers in the geosciences and environmental sciences. Students graduating from the School of Earth and Environment enjoy unparalleled opportunities to integrate classroom learning with hands-on experiences and will be superbly prepared for careers in industry, government agencies, professional studies, or graduate studies in related disciplines.

The Rowan University Fossil Park, a unique world-class reservoir of ancient ecosystems near the Glassboro campus, is a living laboratory and resource for education, research, and outreach. The Fossil Park offers students unparalleled opportunities for hands-on learning experiences and prominent research in paleontology. Because of the appeal of the Fossil Park and the importance of geosciences and environmental sciences to STEM outreach, the School of Earth and Environment coordinates with the Rowan University STEM Center to provide K-12 STEM outreach for the region.

Departments

The School of Earth and Environment consists of the Department of Geography and the Environment and the Department of Geology. The Department of Environmental Science will be established in the near future.

Programs Offered

The School of Earth and Environment offers the following undergraduate degrees: Bachelor of Arts in Geography, Bachelor of Science in Geographic Information Systems (GIS), Bachelor of Science in Planning, Bachelor of Arts in Environmental Studies, Bachelor of Arts in Science and Geology, Bachelor of Arts in Geology, and a Post-baccalaureate Certificate in Cartography & GIS. Minors are offered in Geography, GIS, Planning, and Environmental Studies.
**Academic Program Policy Categories**

For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)

**Category 1:** To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:
- Earn no more than two total "B-" grades
- Earn no grades lower than a "B-"
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Category 2:** To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:
- Earn no grades lower than a "B-"
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Category 3:** To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:
- Earn no more than two total C grades of any combination of "C+" or "C". (C- grades are not acceptable.)
- Earn no grades lower than a "C"
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

**Policy Prior to Fall 2013 Matriculation**

The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

---

**Post-baccalaureate Certificate in Cartography & GIS**

This certificate program is designed to accommodate working professionals in planning, public health, engineering, business, and other areas who wish to gain expertise in cartography and GIS.

Mission Statement
Cooper Medical School of Rowan University is committed to providing humanistic education in the art and science of medicine within a scientific and scholarly community in which inclusivity, excellence in patient care, innovative teaching, research, and service to our community are valued. Our core values include a commitment to: diversity, personal mentorship, equity, professionalism, collaboration and mutual respect, civic responsibility, patient advocacy, and life-long learning.

Vision
Cooper Medical School of Rowan University will distinguish itself as an innovative leader in medical education and related research with emphasis on developing and validating comprehensive systems of healthcare for underserved populations as a model to address the challenges of accountable patient care in 21st century and beyond.

Departments
The departments at the medical school are: Biomedical Sciences, Medical Education, Student Affairs & Admissions, Research, Program & Business Development and Finance, Administration & Operations.

Academic Program Policy Categories
For the purposes of both the Minimum Satisfactory Academic Progress policy and the Minimum Graduation Requirements policy, post-baccalaureate/graduate academic programs administered by Rowan Global at Rowan University fall into one of three major categories which are identified by their grade requirements as outlined below. (See individual program descriptions for academic categories.)
Category 1: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 1 program students must:

- Earn no more than two total “B-“ grades
- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 2: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 2 program students must:

- Earn no grades lower than a “B-”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Category 3: To maintain Minimum Satisfactory Academic Progress in and to successfully graduate from a Category 3 program students must:

- Earn no more than two total C grades of any combination of “C+” or “C.” (C- grades are not acceptable.)
- Earn no grades lower than a “C”
- Earn an official cumulative GPA (according to matriculation level) of at least 3.000 on Rowan’s 4.000 scale

Policy Prior to Fall 2013 Matriculation

The academic review and minimum graduation requirements review policies will be applied to Rowan graduate and post-baccalaureate students who matriculate beginning Fall 2013 or later; however, current students (those matriculated and active before Fall 2013) will be grandfathered under the prior policy/practice, whose grade and GPA requirements are the same as Academic Review Category 3.

Post-Baccalaureate Programs (Non-degree)

Post-baccalaureate Certificate in Advanced Premedical Studies

The Post Baccalaureate in Advanced Premedical Studies at CMSRU is a flexible academic enhancement program offered through Cooper Medical School of Rowan University (CMSRU) and Rowan Global. Courses are led by expert faculty and build upon the knowledge base of the premedical core sequence from an undergraduate degree, incorporating high-level problem solving and teamwork. Students will engage in a fast-paced hybrid curriculum that combines online sessions with active learning modalities, augmenting the learning skills they will need in order to excel in medical school. MCAT preparation is included, with particular attention paid to the new competencies tested in MCAT 2015. Focused advising and professional development occur throughout the program, including the medical school application process. A certain percentage of students in the program may be eligible for acceptance into the upcoming class at CMSRU.

Program Requirements

Total credit hours required for program completion: 27 Semester Hours (S.H.) MCAT preparation courses incorporated at no additional charge.

### Department of Biomedical Engineering

- **Abednin-Nasab, Mohammad (2017)**  
  Assistant Professor  
  PhD, Sharif Iran  
- **Beachly, Vince (2014)**  
  Assistant Professor  
  B.S. Virginia Tech; Ph.D. Clemson University  
- **Byrne, Mark (2014)**  
  Professor and Department Head  
  B.S., Carnegie Mellon University; M.S., Ph.D., Purdue University  
- **Galie, Peter (2015)**  
  Assistant Professor  
  BSE - Princeton University; MS Rensselaer Polytechnic; PhD - University of Michigan  
- **Shim, Jiwook Shephen (2016)**  
  Assistant Professor  
  BS, Hankuk University of Foreign Studies, MS, Ph.D. University of Missouri  
- **Stachle, Mary M. (2010)**  
  Associate Professor  
  B.S., The Johns Hopkins University; Ph.D., University of Delaware  

### Department of Chemical Engineering

- **Dahm, Kevin D. (1999)**  
  Professor  
  B.S., Worcester Polytechnic; Ph.D., Massachusetts Institute of Technology  
- **Gephardt, Zenaida Otero (1980)**  
  Associate Professor  
  B.S., Northwestern University; M.S., Ph.D., University of Delaware  
- **Haase, Martin (2017)**  
  Assistant Professor  
  Diploma, Beuth University, Germany; Ph.D., Max Planck Institute of Colloids and Interfaces, Germany  
- **Heskeht, Robert P. (1996)**  
  Professor  
  B.S., University of Illinois, Champaign-Urbana; Ph.D., University of Delaware  
- **Moshadi, Iman (2017)**  
  Assistant Professor  
  PhD. U. Conn  
- **Newell, James (1998)**  
  Professor  
  B.S., Carnegie-Mellon University; M.S., Penn State University; Ph.D., Clemson University  
- **Noshadi, Iman (2017)**  
  Assistant Professor  
  B.S., Shiraz University, Iran; M.S., University Technology Malaysia; Ph.D., University of Connecticut  
- **Savelski, Mariano J. (1999)**  
  Professor and Department Head  
  B.S., University of Buenos Aires; M.S., University of Tulsa; Ph.D., University of Oklahoma  
- **Slater, C. Stewart (1995)**  
  Professor  
  B.S., M.S., M. Ph., Ph.D., Rutgers University  
- **Stanzione III, Joseph F. (2013)**  
  Assistant Professor  
  B.S., Drexel University, Ph.D., University of Delaware  
- **Thompson, Gary (2017)**  
  Assistant Professor  
  B.S., University of South Carolina; Ph.D., Clemson University  
- **Vernengo, Jennifer (2009)**  
  Associate Professor  
  B.S., Ph.D., Drexel University  
- **Yenkie, Kirti (2017)**  
  Assistant Professor  
  B. Tech, Laxminarayan Institute of Technology, India; M. Tech, Indian Institute of Technology; Ph.D., University of Illinois at Chicago  

### Department of Chemistry and Biochemistry

- **Caputo, Greg (2007)**  
  Professor  
  B.S., The Stevens Institute of Technology; Ph.D., Stony Brook University
Grinias, James (2016)  
B.S., Eastern Michigan University; Ph.D., University of North Carolina-Chapel Hill  
Assistant Professor

Jonnalagadda, Subhash (2008)  
B.Sc., Pondicherry University; M.Sc., University of Hyderabad; Ph.D., Purdue University  
Associate Professor

Keck, Thomas (2014)  
B.S., University of Southern California; Ph.D., Oregon Health & Science University  
Assistant Professor

Moura-Letts, Gustavo (2013)  
B.S., Universidad Peruana; Ph.D., University of Pittsburgh  
Assistant Professor

Mugweu, Amos (2006)  
B.S., Jomo Kenyatta University of Agriculture and Technology; Ph.D., University of Connecticut  
Professor

Perez, Lark (2012)  
B.S., Long Island University; Ph.D., Yale University  
Associate Professor

Ramanujachary, Kandalam V. (1994)  
B.S., Andhra University; M.S., Andhra University; Ph.D., Indian Institute of Technology  
Professor

Supplee, Carolyn (2014)  
B.A., Goucher College; M.S., Ph.D., The Ohio State University  
Instructor

Vaden, Timothy (2010)  
B.S., Midwestern State University; Ph.D., University of Illinois  
Associate Professor

Wu, Chun (2013)  
B.S., Xiamen University; Ph.D., University of Delaware  
Assistant Professor

Yang, Catherine (1995)  
B.S., Zhejiang University; M.S., Ph.D., Tufts University  
Professor

Yu, Lei (2008)  
B.S., M.S., Jilin University; Ph.D., Changchun Institute of Applied Chemistry  
Associate Professor

**Department of Civil and Environmental Engineering**

Bhavsar, Parth (2014)  
B.S., Center for Environmental Planning and Technology, India; M.S., Clemson University; Ph.D., Clemson University  
Assistant Professor

B.S., M.S., Ph.D., Purdue University  
Associate Professor

Dusseau, Ralph A. (1995)  
B.S., M.S., Ph.D., Michigan State University  
Professor

B.S., M.S., Ph.D., Duke University  
Professor

Jahan, Kauser (1996)  
B.S., Engineering University, Bangladesh; M.S., University of Arkansas; Ph.D., University of Minnesota  
Professor

Lomboy, Gilson (2016)  
BS - Mapua Institute of Technology; ME - Asian Institute; PhD AIT / Iowa State University  
Assistant Professor

Mehta, Yusuf A. (2001)  
B.S., University of Bombay, India; M.S., University of Oklahoma; Ph.D., Pennsylvania State University  
Professor

Nazari, Rouzbeh (2014)  
B.S., Isfahan University of Technology, Iran; M.S., City University of New York; Ph.D., City University of New York  
Assistant Professor

B.S., University of Massachusetts-Amherst; Ph.D., Cornell University  
Associate Professor

Sukumaran, Beena (1998)  
B.S., Trivandrum Engineering College, India; M.S., Auburn University; Ph.D. Purdue University  
Professor and Department Head

Rowan University Division Of Global Learning & Partnerships Catalog 2017-2018
Department of Communication Studies

Albone, Kenneth (1982)
B.S., Lake Superior State College; M.A., Miami University; Ph.D., Bowling Green State

Benavidez, Harriet (2000)
B.A., Purdue University; M.A., University of Hawaii

B.A., Loyola University, Chicago; M.A., Ph.D., Purdue University

Feaster, John (2010)
B.S., West Virginia University; M.A., Ph.D., Ohio State University

B.A., University of Richmond; M.A., Texas A&M University; Ph.D., Pennsylvania State University

Ikpah, Maccamas M. (1994)
B.A., Eastern Washington University; M.E., Gonzaga University; Ed.D., Oklahoma State University

Lockhart, Eleanor (2015)
B.A., Ripon College; M.A., Ph.D., Texas A&M University

Marshall, Pam (2010)
B.A., Montclair State University; M.A., Temple University

Popa, Clara (2004)
B.A., University of Bucharest; M.A., Ph.D., Kent State University

B.S., University of Wisconsin-Stevens Point; M.A., University of Arkansas; Ph.D., Indiana University

Simone, Maria (2004)
B.S., Richard Stockton College; M.S., University of North Texas; Ph.D., Temple University

Strasser, Daniel S. (2012)
B.A. College of Mount Saint Joseph; M.A. Northern Kentucky University; Ph.D., University of Denver

Department of Computer Science

B.Tech., M.Tech., Indian Institute of Technology, Bombay; M.S., Ph.D., University of Delaware

Bergmann, Seth D. (1980)
B.S., Rensselaer Polytechnic Institute; M.S.E., University of Pennsylvania.

Breitzman, Anthony (2016)
B.S., Stockton University; M.A., Temple University; M.S., Ph.D., Drexel University

Heydari, Vahid (2017)
Ph.D. Alabama

B.S., Widener University; M.S., Ph.D., University of Delaware

Ho, Shen-Shyang (2016)
B.S., National University of Singapore; M.S., Ph.D., George Mason University

Hristescu, Gabriela (2000)
B.S.E., Polytechnic Institute of Bucharest, Romania; M.S., Ph.D., Rutgers University.

Kay, Jennifer S. (1998)
B.A., B.S.E., University of Pennsylvania; M.S., Ph.D., Carnegie Mellon University

Assistant Professor  
B.S., M.S., University of Delaware; Ph.D., Drexel University

Whittinghill, Dexter C.(1996)  
Associate Professor  
B.A., Middlebury College; M.S., University of Wisconsin-Milwaukee; M.S., Ph.D., Purdue University

Wright, Marcus(1986)  
Assistant Professor  
A.B., Harvard University; M.S., Ph.D., Stanford University

Zeng, Xiaoming(1985)  
Professor  
B.M., Northeast Ind. College, China; M.M., Academy of Science, China; Doctor of Science, Washington University

**Department of Mechanical Engineering**

Bakrania, Smitesh(2008)  
Associate Professor  
B.S., M.S., Union College; Ph.D., University of Michigan

Bhatia, Krishan(2005)  
Associate Professor  
B.M.E., University of Delaware; M.S., Ph.D., Pennsylvania State University

Chandrupatla, Tirupathi R.(1999)  
Professor  
B.E., Osmania University, India; M. Tech. Design and Production, Indian Institute of Technology (India); Ph.D., University of Texas at Austin

Associate Professor  
B.S., University of Washington; M.S., Ph.D., Pennsylvania State University

Haas, Francis(2016)  
Assistant Professor  
B.S., MS Drexel University, Ph.D. Princeton University

Kadlowec, Jennifer A.(1999)  
Professor and Department Head  
B.S., Baldwin-Wallace College; M.S., Ph.D., University of Michigan

Mallouk, Kaitlin(2014)  
Instructor  
B.S., Cornell University, M.S., Ph.D. University of Illinois

Merrill, Thomas L.(2008)  
Associate Professor  
B.S., Bucknell University; M.S., University of Michigan; Ph.D., Pennsylvania State University

Ranganathan, Shivakumar(2015)  
Assistant Professor  
B.S., DBATU, India; M.S. IIT Delhi, India, Ph.D., University of Illinois

Xue, Wei(2015)  
Assistant Professor  
B.S., M.S., Shandong University, China, Ph.D., University of Minnesota

Zhang, Hong(2000)  
Associate Professor  
B.S., Tsinghua University, China; M.S., Ph.D., University of Pennsylvania

**Department of Molecular and Cellular Biosciences**

Alpaugh, Mary(2016)  
Associate Professor  
B.S., King's College; Ph.D., University of Houston

Bausch, Suzanne(2016)  
Professor  
B.A., Metropolitan State College; Ph.D., University of Washington

Carone, Benjamin(2016)  
Assistant Professor  
B.S., Ph.D., University of Connecticut

Hickman, Mark(2012)  
Associate Professor  
A.B., Bowdoin College; Ph.D. Harvard University

Rowan University Division Of Global Learning & Partnerships Catalog 2017-2018
Iftode, Cristina (2001)  
Associate Professor  
B.S., M.S., University of Bucharest; M.S., Ph.D., New York University-Medical Center  

Soto, Ileana (2015)  
Assistant Professor  
B.S., Ph.D., University of Puerto Rico  

**Department of Music**  

Appleby-Wineberg, Bryan K. (2001)  
Professor  
B.M., Oberlin College; M.M., Cleveland Institute; D.M.A., Rutgers University  

Barnes, Adrian (2016)  
Assistant Professor  
B.A., Bethune-Cookman University; M.M.E, Florida State University  

Ceriani, Davide (2013)  
Assistant Professor  
D., Conservatory of Bologna; L.L., University of Florence; Ph.D., Harvard University  

Christopher B. Thomas (2011)  
Associate Professor  
B.M., Millikin University, M.M., D.M.A. University of Arizona  

Professor  
B.M., Northwestern University; M.M., Ph.D., University of Illinois  

DiBlasio, Denis (1994)  
Professor  
B.A., Glassboro State College; M.M., University of Miami  

Gendreau, Mathieu (2013)  
Associate Professor  
D.E.C Colle ge de Musique de Saint-Laurent; M.A. University of Westminster  

Higgins, Joseph (2015)  
Assistant Professor  
B.M., University of Georgia; M.M., Northwestern University  

Kolek, Adam (2013)  
Instructor  
B.A., Skidmore College, M.A. Smith College, Ph.D., University of Massachusetts  

Mapp, Douglas (2001)  
Professor  
B.M. Philadelphia College of the Performing Arts; M.M., Temple University  

Mayes, Joseph (1993)  
Professor  
B.A., Edison College; M.M., Shenandoah University  

Plant, Lourin (1993)  
Assistant Professor  
B.M.E., Wittenberg University; M.M., D.M.A., College Conservatory of Music, University of Cincinnati  

Rawlins, Robert (1997)  
Professor  
B.A., Glassboro State College; M.A., California State University; M.A., Rowan University; M.A., Ph.D., Rutgers University  

Schwarz, Timothy (2015)  
Assistant Professor  
B.M., College Conservatory of Music, University of Cincinnati; M.M., Peabody Conservatory of Music, John Hopkins University; D.M.A, Temple University  

Stieber, Marian (1998)  
Professor  
B.M., M.M., Temple University  

Witten, Dean (1979)  
Professor  
B.M., Eastman School of Music; M.A., Trinity University  

Zuponcic, Veda (1971)  
Professor  
B.M., M.M., Indiana University  

**Department of Nursing**  

Nowak, Marian (2016)  
Assistant Professor  
B.S., Richard Stockton College; MSN Thomas Jefferson University  

O’Neal, Michelle (2015)  
Associate Professor  
B.S.N., La Salle University; M.S.N., Villanova University; Ed.D., Capella University

Course Descriptions

ACC 03210: Principles Of Accounting I 3 s.h.
This course includes accounting theory and practice in the analysis of business transactions and the recording of business data; complete accounting cycle; interpretation of financial data for sole proprietorship, partnerships, corporations and public agencies.

ACC 03211: Principles Of Accounting II 3 s.h.
Prerequisites: ACC 03210
This course includes accounting theory and practice applied to corporations and public agencies; budgeting and estimating; analysis and comparison of cost and financial data.

ACC 03500: Managerial Accounting 3 s.h.
This course takes a managerial approach with emphasis on decision-making. It includes financial statement analysis and topics on determination of cost behavior using regression analysis and learning curves, activity based costing, cost allocation, performance measurement, and the decision-making process.

ACC 03502: Advanced Managerial Accounting 3 s.h.
Taking a managerial approach, this course examines decision making by management. It includes topics on activity-based cost allocation, determination of cost behavior using regression analysis and learning curves, cost allocation, the decision-making process and decision models under uncertainty, performance measurement and executive compensation.

ACC 03503: Corporate and Partnership Taxes 3 s.h.
This course presents an overview of the Federal Tax System relating to various business forms including corporations, partnerships and exempt entities. Students will examine major tax legislation and judicial precedents with a focus on current and pending legislation. Topics will include corporate organization, accumulations and liquidation, partnership formation, S corporations, exempt organizations, estate and gift taxation, including trusts. Research and preparation software will be used throughout the course.

ACC 03504: Seminar In Auditing 3 s.h.
Students will develop an understanding of the judgmental issues faced in providing audit and assurance services. Further emphasis will be the application of underlying accounting concepts to solve these judgmental issues. In addition, an emphasis will be on the auditor's decision-making process and the nature and amount of evidence the auditor should accumulate given engagement circumstances.

ACC 03505: Seminar In Business Law 3 s.h.
In this course, students study the legal aspects of sales, liability, secured transactions, commercial paper and consumer credit. In addition, the course will emphasize legal analysis and research.

ACC 03506: Advanced Domestic & International Accounting 3 s.h.
This financial accounting course focuses on the accounting for corporate mergers and acquisitions, and the accounting and financial reporting requirements of corporations with both domestic and international subsidiaries. It includes coverage of international financial reporting comparability.

ACC 03507: Government And Non-For-Profit Accounting 3 s.h.
This financial accounting course focuses on the contemporary accounting issues of governmental and non-profit organizations. It includes: financial reporting, budgeting, forecasting and strategic planning in the environments of local, state, federal government, colleges and universities, hospitals, and voluntary health and welfare organizations.

ACC 03508: Seminar And Research In Accounting 3 s.h.
This seminar provides the opportunity for students to improve their professional research skills and advance their own scholarly development in the accounting field. Taken after five graduate accounting and business law courses, it provides a synthesis of prior learning. Students will work collaboratively with the professor and other enrolled students to develop and complete a major research project and other assignments. Topics may include financial, not-for-profit, managerial, auditing, or tax accounting.
ACC 03508: Seminar And Research In Accounting 3 s.h.
This seminar provides the opportunity for students to improve their professional research skills and advance their own scholarly development in the accounting field. Taken after five graduate accounting and business law courses, it provides a synthesis of prior learning. Students will work collaboratively with the professor and other enrolled students to develop and complete a major research project and other assignments. Topics may include financial, not-for-profit, managerial, auditing, or tax accounting.

ACC 03509: Intermediate Financial Accounting 3 s.h.
This course will include a review of the accounting process, the conceptual framework, the preparation of financial statements and specific principles related to the accounting for current assets, property, plant and equipment, liabilities, leases, income taxes, pensions, and shareholders' equity. Research and empirical evidence will be emphasized. This course is restricted to students who have not taken Intermediate Accounting I and II at the undergraduate level.

ACC 03510: Financial Statement Analysis 3 s.h.
Prerequisites: Intermediate Accounting I (ACC 03310) OR Managerial Accounting (ACC 03500) OR Permission of the Instructor AND Admission to the MBA, MS in Finance OR COGS in Accounting.
This course will take an expanded study of financial statement analysis from the point of view of the primary users of financial statements: equity and credit analysts. The analysis and use of financial statements will also emphasize the properties of numbers derived from these statements, and the features of the environment in which key decisions are made in using financial statement information. Research and empirical evidence will be emphasized.

ACC 03511: Introduction To Federal Taxation 3 s.h.
Prerequisite: Admission into MBA program or Admission into Certificate of Advanced Graduate Study in Accounting program.
Federal income tax concepts, including gross income, deductions, credits, gains and losses from dispositions of property, deferred and tax exempt transactions, assignment of income, tax accounting, and other special topics. Emphasis will be placed on interpreting the Internal Revenue Code and Regulations as well as case law. Students will be required to show evidence of scholarly research through a major writing assignment on an emerging tax issue.

ACC 03512: Advanced Accounting Information Systems and Business Process Controls 3 s.h.
Prerequisite(s): None
This course is designed to give the MBA student and introduction to the important concepts related to accounting information systems, with emphasis on enterprise risk management. An overview of internal control frameworks is used to discuss pervasive, business process and application controls. A methodology for evaluating the risks and controls within a defined business process is demonstrated and applied across the major business processes. Students will gain hands-on experience with a leading Enterprise Resource Planning system and commercial computerized accounting software.

ACC 03513: CPA Review 3 s.h.
Prerequisite(s): None
This course provides a review of accounting problems and concepts common on the CPA exam and prepares students to gain the skills and knowledge necessary to pass the CPA exam. Topics covered will include: Financial accounting and reporting, Auditing and attestation, Business environment and concepts, and Regulation.

ACC 03514: Accounting Legal Liability and Professional Responsibility 3 s.h.
Prerequisite(s): MGT 98242 or equivalent
This course is a study of the legal liability of accountants and ethical concepts. It will cover the following areas: the ethical role of the professional accountant, professional codes of conduct, ethical decision making, legal and regulatory obligations, and corporate governance and ethical management.

ACC 03515: Forensic Accounting 3 s.h.
Prerequisite(s): None
The course provides a broad overview of forensic accounting. It examines current issues of fraud, such as the nature of fraud, types of fraud, identification, detection, and prevention of fraud. The course provided students exposure to case study, analytics and critical thinking in order to confirm the financial information is presented fairly.
ACC 03515: Forensic Accounting 3 s.h.
Prerequisites: None
The course provides a broad overview of forensic accounting. It examines current issues of fraud, such as the nature of fraud, types of fraud, identification, detection, and prevention of fraud. The course provided students exposure to case study, analytics and critical thinking in order to confirm the financial information is presented fairly.

FIN 04300: Principles Of Finance 3 s.h.
Prerequisites: ACC 03211 and STAT 02260 and MATH 03125 or MATH 01130 and ECON 04101 and ECON 04102
This course includes the following topics: financial goals; depreciation, taxation and cashflows; financing the firm via short-term, intermediate and long-term debt, and preferred and common stock; capital budgeting and leasing; dividend policy; business growth and contraction.

FIN 04435: International Financial Management 3 s.h.
Prerequisites: FIN 04300
This course studies financial management in the international environment. Topics include foreign exchange risk management, multinational working capital management, international portfolio investment, foreign direct investment, capital budgeting for the multinational corporation, political risk, international financing and international financial markets.

FIN 04500: Financial Decision Making 3 s.h.
Prerequisites: ACC 03510 or ACC 03500 and Prerequisite or Corequisite: MGT 07500
Students in this course will learn valuation techniques including adjusted present value, equity cash flows, and real-option valuation. In addition to comparing alternative valuation techniques and the assumptions and limitations underlying each, students explore the technical difficulties and incentive effects caused by high leverage, the relation between capital structure and capital costs, the interaction between a firm’s financial structure and its business strategies, the conditions contributing to potential under or over-valuation of a firm’s prospects by the market, and the managerial consequences of such misvaluation.

FIN 04505: Advanced Financial Planning 3 s.h.
Prerequisite: Admissions to the MBA or MS in Finance program
Financial planning is the process of meeting life goals through the proper management of finances. Life goals can include buying a home, saving for your child’s education or planning for retirement. Through sound financial planning individuals can make decisions that will produce their desired results. In this course, students will learn foundations of financial planning, managing basic assets, managing credit, managing insurance needs, managing investments and preparing for retirement and estate planning.

FIN 04510: INDEPENDENT STUDY:FINANCE 1 to 6 s.h.
FIN 04511: Quantitative Methods in Finance 3 s.h.
Prerequisites: Admission to MBA or MS in Finance Program
The objective of this course is to teach students the fundamentals of quantitative finance. The topics covered in the course include asset returns and time value of money, probability and statistics in their applications to financial analysis, portfolio theory and asset pricing models, regression and econometrics for financial data analysis, structure and pricing of financial derivatives, risk quantification and management.
FIN 04512:  Capital Budgeting  
3 s.h.
This course includes the following topics: estimation of project cash flows, interest, annuity, and present value calculations, evaluation of projects under conditions of certainty and risk, strategic planning in capital budgeting, and leasing. This course may not be offered annually.

FIN 04516:  Issues In Finance  
Prerequisites: Financial Decision Making (FIN 04500) OR Permission of Instructor AND Admissions to MBA.  
3 s.h.
This course includes the following topics: mergers and acquisitions, financial structure analysis, cost of capital analysis, capital budgeting, portfolio management, financial institutions, money and capital markets, and international finance. This course may not be offered annually.

FIN 04518:  Derivative Securities and Financial Risk  
Prerequisite(s): Investments and Portfolio Analysis FIN 04600 OR Permission of Instructor AND Admission to MBA OR MS in Finance.  
3 s.h.
In this course, students will learn forward, future, option and swap contracts, and hedging, arbitrage, and derivatives-pricing models. In addition, securitization and risk management concepts will be covered. Students will learn how to model and evaluate derivative instruments and their applications to corporate strategy and risk management.

FIN 04520:  FINANCIAL MODELING  
Prerequisites: FIN 04500 Financial Decision Making OR Instructor's Permissions AND Admission to MBA OR MS in Finance program.  
3 s.h.
The objective of this course is to teach students the fundamentals and practice of building financial models by using Microsoft Excel. Students become familiar with the built-in-functions of Excel and learn how to use them in financial model building with a hands-on-approach. The topics covered in the course include financial statement modeling, cost of capital, capital budgeting modeling, leasing, valuation analysis, portfolio modeling, capital-asset pricing models, option-pricing models, real options modeling, bonds, and term structure modeling.

FIN 04530:  Multinational Financial Management  
Prerequisite: FIN 04500 Financial Decision Making OR Instructor's Permission AND Admission to MBA OR MS in Finance program.  
3 s.h.
The objective of this course is to examine the managerial implications pertaining to the financial operations of the multinational firms of the investments in the international arena. The standard topics in international finance, such as exchange rate determination, foreign exchange risk (exposure), hedging techniques (using derivatives), international corporate valuation and capital budgeting, and sources of funds and the cost of capital in the international bond, stock, and money markets, are examined from a managerial point of view.

FIN 04540:  Financial Institutions Management  
Prerequisites: Admissions to MBA or MS in Finance program OR Instructor permission.  
3 s.h.
In the course, students will learn about the many roles financial service-providers play in the economy today. Students will examine how and why the financial services marketplace as a whole is rapidly changing, becoming new and different as we move forward into the future. Students will also learn the techniques how to measure and manage various financial risks the modern financial institutions face in today's globally competitive financial environment, such as interest rate, market, credit, liquidity, off balance sheet, foreign exchange, sovereign, technology and other operational risks.

FIN 04560:  FIXED INCOME SECURITIES  
Prerequisites: FIN 04500 Financial Decision Making OR Instructor's Permissions AND Admission to MBA OR MS in Finance program.  
3 s.h.
The objective of this course is to teach students the fundamentals of fixed income markets, covering different fixed income security types, and the mathematics of their evaluation and risk management. The topics covered in the course include fixed income security valuation, term structure of interest rates and the yield curve, fixed income risk quantification and management, securities with embedded options, credit derivatives, interest rate derivatives, and portfolio management.
FIN 04600: Investment Analysis and Portfolio Management 3 s.h.
Prerequisites: Completion of Managerial Decision Making Tools (MGT 07500) OR Quantitative Methods in Finance (FIN 04511) OR Permissions of Instructor AND Admission to the MBA OR MS in Finance.

Students will analyze and develop an ability to deal with the following topics: investment values and market price with regard to risk, return, portfolio diversification, taxes and inflation. They will also examine the role of fixed income securities versus common stock prices, yields, returns and valuations; warrants, options and future contracts, U.S. and foreign securities markets, and the rapidly developing science of portfolio management as it applies to both the firm and the individual. This course may not be offered annually.

ARHS 03520: Art Since 1945 3 s.h.
ART 02523: Graduate Painting I 3 s.h.
Advanced graduate work in concepts, techniques and media appropriate to contemporary painting and individual expression.

ART 02524: Graduate Painting II 3 s.h.
Further advanced work in painting.

ART 02532: Graduate Printmaking I 3 s.h.
Advanced graduate work in concepts, techniques and media appropriate to contemporary printmaking and individual expression. Permission of the instructor is strongly advised.

ART 02533: Graduate Printmaking II 3 s.h.
Further advanced work in printmaking.

ART 02535: Advanced Graduate Problems In Art 2 to 6 s.h.
Extensive in-depth work at the third or fourth graduate course level in a studies, art education or art history area arranged with permission of the appropriate professor, the graduate advisor and department chairperson.

ART 02560: INDEPENDENT STUDY-Art 3 to 6 s.h.

ART 09200: Theory and Analysis of Art Education 3 s.h.
This course provides students with an historical knowledge base of the theories, philosophies and persons that have impacted the teaching of art in public schools. Assignments will actively engage learners in developing their own teaching philosophies as they examine current theoretical and pedagogical research, and the national and state curriculum standards for teachers and students of the visual arts.

ART 09520: Jewelry I 3 s.h.
Emphasis is on original metal design and construction, involving techniques and processes in the designing, forming and finishing of utilitarian and decorative hand-wrought products.

ART 09521: Jewelry II 3 s.h.
Further advanced work. This course may not be offered annually.

ART 09529: CERAMICS I 3 s.h.

ART 09530: CERAMICS II 3 s.h.

SMED 31507: GRADUATE PROBLEMS 3 s.h.

BIOL 01100: Biology I 4 s.h.
This course studies the chemical properties of protoplasm; cell structure and cell division; metabolic processes in organisms, including photosynthesis and respiration; principles of genetics including Mendelian laws; evolution and ecological relationships of organisms.

BIOL 01104: Introduction to Evolution and Scientific Inquiry 4 s.h.
This laboratory course is designed for freshman Biology majors and is the first of a four-course introductory sequence. This course introduces students to organismal diversity and its evolutionary origins, covers the fundamental concepts of evolutionary theory, and surveys many of the ways that organisms have become adapted to their environments. In addition, students in this course will learn some of the basic skills necessary for scientific inquiry, including the scientific method, critical thinking, experimental design, and the gathering, analysis, and presentation of quantitative data. Credit will not be given for both Introduction to Evolution and Scientific Inquiry (BIOL 01104) and Biology I (BIOL 01100). Priority for enrollment will be given to students declared as Biology majors, Biology minors, Bioinformatics majors, Computer Science
majors, Biochemistry majors, Environmental Studies majors, Environmental Studies minors, or Pre-Medical concentration.

BIOL 01104: Introduction to Evolution and Scientific Inquiry 4 s.h.
This laboratory course is designed for freshman Biology majors and is the first of a four-course introductory sequence. This course introduces students to organismal diversity and its evolutionary origins, covers the fundamental concepts of evolutionary theory, and surveys many of the ways that organisms have become adapted to their environments. In addition, students in this course will learn some of the basic skills necessary for scientific inquiry, including the scientific method, critical thinking, experimental design, and the gathering, analysis, and presentation of quantitative data. Credit will not be given for both Biology I (BIOL 01104) and Biology I (BIOL 01100). Priority for enrollment will be given to students declared as Biology majors, Biology minors, Computer Science majors, Biochemistry majors, Environmental Studies majors, Environmental Studies minors, or Pre-Medical concentration.

BIOL 01106: Introduction to Genetics 4 s.h.
Prerequisites: BIOL 01104 with C- or better
This course is designed for first year biology majors and builds on skills and knowledge gained by the students from Introduction to Evolution and Scientific Inquiry. The course focuses on the study of genetic factors in bacteria, viruses, higher plants and animals. The principles of Mendelian, molecular and population genetics will be introduced. Discussion of genetic applications in agriculture, biotechnology, and medicine will be an integral part of the course. The laboratory projects will provide the students with the opportunity to gain hands-on experience with the most common classical and molecular genetics methods. Credit will not be given for both Introduction to Genetics (BIOL 01106) and Biology II (BIOL 01100).

BIOL 01113: General Biology: Human Focus 4 s.h.
This one-semester laboratory course provides an introduction to the basic concepts of the biological sciences, including, but not limited to, cell biology, the body plan and organ systems of vertebrate animals, genetics and heredity, and vertebrate evolution. Emphasis will be placed on how these topics relate to the human organism. Laboratory exercises enable the student to visualize many of the concepts discussed in class. No credit toward biology major.

BIOL 01202: Biological Skills for Transfer Students 4 s.h.
Prerequisites: BIOL 01100 and BIOL 01101
This laboratory course is designed for students transferring into the Biology major after having completed Biology I and Biology II at another institution. This course will review key topics covered in Introduction to Evolution and Scientific Inquiry, Introduction to Genetics, and Introduction to Cell Biology (BIOL 01104, BIOL 01106, and BIOL 01203) while introducing students to a variety of scientific skills covered in those courses. Examples of skills include critical thinking, experimental design, reading of primary literature, data collection, analysis, and interpretation, and oral and written scientific presentations. Credit will not be given for both Introduction to Cell Biology (BIOL 01203) and Biological Skills for Transfer Students (BIOL 01202).

BIOL 01203: Introduction to Cell Biology 4 s.h.
Prerequisites: BIOL 01106 with C- or better
This laboratory course introduces students to the fundamentals of cell biology, including the cellular basis of life, cell evolution, cellular organization, cell metabolism, cell diversity, cell-cell communication, intracellular signaling and the cellular basis of disease.
Course Descriptions

BIOL 01205: Foundations in Biology for Biomedical Sciences I 4 s.h.  
Prerequisite(s): CHEM 06101 or CHEM 06106
This laboratory course is the first of the two semester sequence designed for students not majoring in Biology but interested in pursuing studies in biomedical areas through advanced Biology courses. This sequence serves as an introductions to fundamental biological concepts and the foundation for upper-level biology courses for such students. Both courses of the sequence focus on genetics, cell biology, and evolution and theor relation to human health. This course focuses more specifically on the molecular basis of variation and heredity and its evolutionary context.

BIOL 01206: Foundations in Biology for Biomedical Sciences II 4 s.h.  
Prerequisite(s): BIOL 01205
This laboratory course is the second of the two semester sequence designed for students not majoring in Biology but interested in pursuing studies in biomedical areas through advanced Biology courses. This sequence serves as an introduction to fundamental biological concepts and the foundation for upper-level biology courses for such students. Both courses of the sequence focus on genetics, cell biology, and evolution and their relation to human health. This course focuses on molecular and cellular mechanisms of life and their evolutionary context.

BIOL 01599: INDEP STUDY 1 to 3 s.h.

BIOL 05555: Bioinformatics: Advanced Biological Applications 3 s.h.  
Prerequisites: Graduate Student Status
This course in bioinformatics covers the application of modern computational and functional genomics methods to current questions in biological and biomedical sciences. Bioinformatics approaches and philosophy will be highlighted through exploration of research problems in cell and developmental biology, and ecology. Collaborative learning and problem solving using computational, statistical and genomics methods will be emphasized. Students will design and carry out collaborative research projects.

BIOL 10210: Human Anatomy And Physiology I 4 s.h.
This course offers a molecular, cellular and systematic approach to the structure and function of the component units and organizational systems of humans. Emphasis is placed on membrane physiology and the skeletal, molecular, digestive and circulatory systems.

BIOL 10212: Human Anatomy And Physiology II 4 s.h.
This laboratory course focuses on the gross and microscopic structure of the body. The course is the second semester of a two-semester sequence that covers all of the functional systems of the human organism. In this course, the systems of the body to be studied in detail include the endocrine, cardiovascular, respiratory, excretory, digestive, and reproductive systems. Whole body metabolism and fluid balance will also be studied.

BIOL 11330: Microbiology 4 s.h.  
Prerequisites: BIOL 01204 with C- or better or BIOL 01206 with C- or better
This course deals with the morphology and physiology of unicellular organisms, with emphasis upon bacteria. It studies culture methods, growth parameters, isolation, identification and characterization, and metabolism of microorganisms in the laboratory.

BIOL 14440: Introduction To Biochemistry - Lecture Only 3 s.h.  
Prerequisites: BIOL 01204 with C- or better OR BIOL 01206 with C- or better and CHEM 07201
This course investigates chemical compounds and chemical reactions which are of paramount importance to the functioning of biological systems. It also examines the major metabolic pathways for energy production and biosynthesis.

BIOL 14540: Introduction To Biochemistry I 3 s.h.
This course is concerned with the chemical compounds and chemical reactions which are of paramount importance to the functioning of biological systems. The major metabolic pathways for energy production and biosynthesis are examined. The requirements include a research paper or individual project. Admission to the course is at the discretion of the Graduate Advisor. This course may not be offered annually.

BIOL 22335: Advanced Genetics 4 s.h.  
Prerequisites: BIOL 01204 with C- or better or BIOL 01206 with C- or better
The course will provide an in-depth background in all areas of Mendelian, molecular, population and evolutionary genetics. The students will learn how to use genetic tools in dissecting complex biological pathways, developmental processes and regulatory systems. Discussion of landmark genetic experiments will constitute the basis of an inquiry-based approach that will delineate the dynamic nature of modern genetics. The laboratory exercises are designed to put special emphasis on molecular biology techniques and the use of bioinformatics.
The course will discuss the application of genetics principles to the human species. All major areas of genetics such as transmission genetics, cytogenetics, biochemical genetics, molecular genetics and population genetics will be covered. The emphasis will be placed on fundamental concepts and technological advances in the study of human genetics as they pertain to medical practice. The principles of human genetics applied to counseling, screening, ethics, law, and the evaluation of their social implications will also be addressed. The laboratory sessions will focus on the practical analysis of various case studies related to different human genetic disorders. Oral presentation of primary literature articles by the students is expected.

This course considers the principal concepts in biochemical genetics including gene function and regulation, DNA replication, and mutation. Laboratories focus on fundamental biotechnology concepts and techniques.

This graduate laboratory course focuses on the morphological and physiologic processes involved in embryogenesis of animals. The course includes the development of echinoderms, amphibians, birds, and mammals. Considerable emphasis will be placed on organogenesis and the development of organ systems.

This course is aimed at understanding the physics of biological systems. The goal of the course is to quantitatively define biological systems and their functions. Key emphasis will be placed on (1) understanding theories, laws, and axioms that govern systems and their behavior and (2) the use of physics to determine quantitative information about systems and their behaviors. For each topic, the basic laws of physics will be reviewed followed by their application to specific biomolecular or biological system examples. The laboratory component is aimed at giving students hands-on experience in measurement and observation for biological systems.

This course aims at preparing students for health professions and biomedical research by exploring host-pathogens interactions. Infectious agents among viruses, bacteria, parasites and/or fungi will be selected to examine life cycles, interaction with hosts and pathogenicity. Translational use of pathogens in disease prevention and therapies will also be explored. In this course, students will also develop research proposals on selected infectious agents.

This course provides timely coverage of specific advanced topics in Biomedical Engineering, and it is intended for graduate students. Special topics courses may be traditional classroom-based courses as well as research-related courses supervised by specific advisors. This class may be taken multiple times when offered with a different special topics content.

This course is aimed at understanding the physics of biological systems. The goal of the course is to quantitatively define biological systems and their functions. Key emphasis will be placed on (1) understanding theories, laws, and axioms that govern systems and their behavior and (2) the use of physics to determine quantitative information about systems and their behaviors. For each topic, the basic laws of physics will be reviewed followed by their application to specific biomolecular or biological system examples. The laboratory component is aimed at giving students hands-on experience in measurement and observation for biological systems.

This course is intended to introduce graduate students to fundamental biochemical principles relating to disease states. This will include structure and function of biomolecules, biochemical pathways in cells, and cellular processed relevant to diseases and medical disorders. Special emphasis will be placed on reviewing and evaluating peer-reviewed medical literature. Students in this course should have taken at least one previous course in biochemistry.
Course Descriptions

PMED 0120: Applied Medical Ethics
Pre-requisites: Admission to Advanced Premedical Studies Post-baccalaureate Program
This is the second humanities course in the postbaccalaureate program. This course provides an overview of current approaches to resolving ethical issues facing clinicians in private office and hospital practices and academic medical settings. This course will serve to enhance the professional development of premedical students as well as provide the academic framework needed for medical school preparation. This course will serve as a valuable resource for students interested in pursuing a career in biomedical sciences. This course is a hybrid course with online content enhanced through and the integration of case studies in active learning environment sessions.

PMED 0130: Medical Biochemistry, A Clinical Approach
Pre-requisites: Admission to Advanced Premedical Studies Post-baccalaureate Program
PMED 0130 Medical Biochemistry, a clinical approach (3 credits) (Pre-requisites: Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University) Course Description: Biochemistry is the study of the myriad of chemical processes that occur within living organisms. This course will introduce the major macromolecules of life, including nucleic acids, proteins, carbohydrates and lipids, as interacting partners that provide structure and function to cells. The course will provide the student with a rigorous foundation for application of metabolic principles to other course selections in the Post-Bac program and will be critical to the student's performance in the first and second years of medical school. A firm foundation in the basic science of health and disease processes at the biochemical level will ensure that the student is able to apply these principles to their clinical performance as medical students and as practicing physicians. It will be a hybrid course with online lectures and the use of clinical case studies in an active learning environment. Upon completion of the course, it is expected that students will understand the basic structure and function of the major cellular macromolecules and the processes in which they participate, as well as an understanding of the types of diseases that may develop when cellular chemical processes go awry.

PMED 0140: Cellular Basis of Molecular & Regenerative Medicine
Pre-requisites: PMED 01.310 and Admission to Advanced Premedical Studies Post-baccalaureate Program
PMED 0140 Cellular Basis of Molecular and Regenerative Medicine (3 Credits) (Pre-requisites: Medical Biochemistry, a clinical approach PMED 01.310 and Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University) Course Description: This course involves the study of the individual eukaryotic cell and tissues and will begin with an introduction to cell theory. Topics that will be discussed are: the structure and functions of the plasma membrane, nucleus, mitochondria, lysosomes, endoplasmic reticulum and the golgi apparatus. The course will then progress to provide the student with a strong understanding of the fundamental concepts of regenerative medicine and stem cell biology and their potential to alter current medical treatment. It will be a hybrid course with online lectures and the use of clinical case studies in an active learning environment. The students will acquire a rigorous foundation for application of cell biology and physiology principles to other course selections in the Post-Bac program which will be critical to the student’s performance in the first and second years of medical school. A firm foundation in the basic science of health and disease processes at the cellular level including regenerative medicine will ensure that the student is able to apply these principles to their clinical performance as medical students and as practicing physicians. This course will also serve as a valuable resource for students interested in pursuing a career in biomedical sciences. : Medical Biochemistry, a clinical approach PMED 01.310 and Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University) Course Description: This course involves the study of the individual eukaryotic cell and tissues and will begin with an introduction to cell theory. PMED 0140: Medical Genetics
Pre-requisites: PMED 01.310 Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University
PMED 0140 Medical Genetics (3 Credits) (Pre-requisites: Medical Biochemistry, a clinical approach PMED 01.310 and Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University) Course Description: Over the last several years, there has been a massive increase in our understanding of the human genome and the implication of genetic changes as they relate to not only genetic disorders but also to cancer and even our responses to pharmacological agents. These advances have ushered in a new age of personalized medicine where it is no longer good enough to diagnose a patient’s disorder, but it is now sometimes necessary to identify the nuances of a patient’s genetic make-up using molecular diagnostic techniques in order to better tailor therapy. Because medical genetics and
molecular diagnostics are quickly becoming an essential part of medical care in many medical fields, it is imperative that students who wish to pursue careers in the biomedical sciences also receive an adequate familiarity with these fields. This course is designed to provide an overview of human genetic concepts and clinical disorders that have a genetic component and will be a hybrid course with online lectures and the use of clinical case studies in an active learning environment. After completing this course, students will have an understanding of the general principles of human genetics and its relevance to modern clinical medicine.

PMED 01420: Human Physiology
(Pre-requisites: Medical Biochemistry, a clinical approach PMED 01.310 and Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University)
This course will provide a comprehensive overview of human physiology at the molecular, cellular and systems levels. The curriculum will begin with studies of basic cell physiology and extend through complete organ systems. Topics will include basic membrane biology, muscle contraction, cardiovascular, respiratory, renal, gastrointestinal, endocrine, and peripheral nervous systems. The activities of these organ systems are highly integrated and coordinated activity is essential for maintaining a constant physiological environment. Homeostatic mechanisms that regulate these multi organs systems and compensate for perturbations of baseline physiology will be discussed. An important component of this curriculum will be to describe the physiology changes encountered in routine clinical medicine and disease states. Therapeutic treatment options for conditions will be discussed. This curriculum is designed to meet the needs of students interested in pursuing a career in medicine or the biomedical sciences.

PMED 01430: Medical Microbiology
(Pre-requisites: Medical Biochemistry, a clinical approach PMED 01.310 and Admission to Advanced Premedical Studies Post-baccalaureate Program at Cooper Medical School of Rowan University)
This course introduces basic concepts of general microbiology and host-microbe interactions. The course will begin with a discussion of the structure, metabolism, genetics, growth and control of bacteria and fungi; the structure and mechanisms of replication of bacteriophages and animal viruses; the mechanism of defenses of vertebrates against infectious diseases; the mechanism of transmission of microbes; the strategies for detection of microbes and viruses in clinical specimens; the mechanism of action of antibiotics and antiviral and current and experimental vaccines against infectious diseases. It will be a hybrid course with online lectures and it will use clinical case studies in an active learning environment to increase student’s critical thinking skills in medical microbiology. Upon completion of this course the students will have a comprehensive overview and high level of understanding of the diversity of human pathogens, the different types of disease mechanisms or processes that will be considered include: tissue inflammatory and repair responses, immune dysfunction, neoplasia, developmental and genetic disorders, hemodynamic derangements, and environmental and nutritional pathology. The course will provide the student with an understanding of basic disease mechanisms that will enhance their performance in the first and second years of medical school. A firm foundation general Pathology is essential for medical students and practicing physicians. The course will utilize a hybrid model with online lectures and the use of clinical case studies in an active learning environment. Upon completion of the course, it is expected that students will have developed a foundation that can then be further advanced and applied to specific diseases involving the various organ system of the body.

PMED 01440: Mechanisms of Disease
Prereq: Admission to the Advanced Premedical Studies Post-Bac Program and Course: PMED 01310
This course presents chemical engineering topics related to recent developments in industrial practice or research. May be repeated.
CHE 06506: Process Heat Transfer
3 s.h.
Application of heat transfer to the process industries. Mechanisms of heat transfer; conduction, convection and radiation; Selection and design of heat exchanging equipment, e.g., double-pipe, shell and tube, plate and frame, extended fin heat exchangers. Design parameters for heat transfer with phase change.

CHE 06508: Membrane Process Technology
3 s.h.
Principles of membrane processes: reverse osmosis, ultrafiltration, microfiltration, electrodialysis, pervaporation, gas permeation, and their application to traditional and emerging fields. Membrane materials and structure. Mass transfer and design aspects for both liquid and gas separation systems.

CHE 06510: Biochemical Engineering
3 s.h.
The fundamentals and engineering of bioprocess engineering with emphasis on applying biotechnology to industrial processes. Essential aspects of biochemistry, microbiology and kinetics. Discussion of bioreactor engineering, and recovery and purification processes. Processing applications of engineering kinetics and enzyme technology. Laboratory experiments and demonstrations will be integrated throughout the course.

CHE 06512: Safety In The Process Industries
3 s.h.
This course presents the basic principles, guidelines, and calculations necessary for the safe design and operation of chemical plants and related manufacturing facilities. Topics include: toxics and human exposure, fires and explosions, vessel relief systems, hazard identification and risk assessment, source and dispersion models. Accident investigation is discussed along with a review of actual case histories.

CHE 06514: Transport Phenomena For Engineers
3 s.h.
This course will present the analogies among heat, mass, and momentum transfer. Governing differential equations and their uses in steady-state and unsteady-state systems will be described. Applications will be discussed for mass transfer coupled with heat transfer and/or chemical reaction. Numerical methods and computer applications will be integrated throughout the course.

CHE 06515: Advanced Reactor Design
3 s.h.
Overview of chemical reaction types and ideal reactors. Catalysis and catalytic reactors; analogies for real reactors; fluid flow and heat and mass transfer effects on chemical reactions and reactor design; numerical analyses and simulation of reacting systems; applications in the chemical industry.

CHE 06516: Advanced Separation Process Technology
3 s.h.
This course describes advanced separation processes such as: crystallization and precipitation; adsorption, chromatography and ion exchange; reverse osmosis, ultrafiltration, gas permeation and pervaporation. Commercial system design parameters and laboratory demonstrations will be included. An overview of other novel separation processes will be done.

CHE 06518: Polymer Engineering
3 s.h.
This course provides an introduction to the various aspects of polymer engineering starting with basic polymer properties, structure and function. The major topics covered are the formation of polymer systems and manufacturing techniques. Fabrication processes topics include coating, extrusion and foams. The production of thin-films and membranes will focus on stretching, phase inversion, and hollow fiber spinning. Students will study application of polymeric materials engineering to various industries.

CHE 06520: Green Engineering Design In The Chemical Industry
3 s.h.
This course evaluates process design techniques to minimize waste and by-products in the processing and manufacturing industries. Topics include: mass and heat recycling processes; technologies for process steam renovation, material reuse and recycling methods. Case studies of industrial applications are utilized.

CHE 06528: Fluid Flow Applications In Processing And Manufacturing
3 s.h.
This course will cover the foundation principles of applied fluid mechanics with an emphasis on industrial applications. Topics in mixing, multi-phase fluid flow and processing, and fluidization will be covered. Key technologies from chemical, civil, and mechanical engineering applications will be used to illustrate concepts. The course will provide a strong background in the application of fluid mechanics principles to industrial processing and manufacturing operations.

CHE 06568: Electrochemical Engineering
3 s.h.
This course will focus on the fundamental principles of process electrochemistry. Basic principles of thermodynamics, kinetics and mass transfer as applied to electrochemical systems will be presented. Modeling of electrochemical systems and application of electrochemical principles to corroding systems will be conducted by the students. Engineering case studies of commercial applications in energy conversion and storage and electrolytic processes will be presented.
CHE 06570: Air Pollution Control  
This course introduces students to air pollution control theory. Students design air pollution control processes and specify equipment related to the control of particulate, gaseous, and toxic air emissions. The chemistry required for pollution control process design is presented. The environmental impacts due both to controlling and not controlling emissions are considered. Students design control equipment, specify and troubleshoot control systems and predict the impacts for each major type of control system.

CHE 06571: Biomedical Control Systems
Prerequisite(s): Graduate standing and approval of Graduate Advisor
This course is an extension of Process Dynamics and Control focusing on the identification and study of biomedical control systems. Students will learn to identify components of physiological control systems and examine the origin of diseases at a systems level. Additional topics include the incorporation of artificial organs into existing physiological control systems, mathematical modeling of biological processes, designing therapeutic strategies, and integrating the results of primary literature into quantitative explanations of diseases.

CHE 06572: Biomedical Process Engineering
This course introduces students to applications of chemical engineering fundamentals to biomedical systems. Students analyze and design biomedical processes. The basic biochemistry and physiology required for understanding of biomedical systems are presented. Advanced principles of mass transfer, heat transfer, fluid flow and chemical reaction are used to analyze or design drug delivery systems, pharmacokinetic models, the circulatory system, transport across cell membranes, and human and artificial organs. Laboratory experiments and demonstrations will be integrated throughout the course.

CHE 06573: Biomaterials Engineering
The goal of studying biomaterials is to understand how the body’s natural tissues are organized on a compositional, structural, and properties basis. We also seek to understand how the body recognizes and responds to foreign materials, and combine this knowledge in order to successfully design implants that can be used to treat debilitating diseases. The graduate level course emphasizes research literature, including landmark papers and emerging topics, and also includes additional advanced topics in biomaterial design.

CHE 06574: Advances In Particle Technology
This course introduces students to application of chemical engineering fundamentals in the particle processing industry. Processes involving particles are an important part of the chemical process industry. These processes range from fluidized catalytic cracking of oils to coating processes in the pharmaceutical industry. Students will use advanced principles in fluid flow, heat and mass transport, and kinetics to analyze and design particle manufacturing processes and chemical industry processes involving particles. Novel processes will also be discussed and analyzed.

CHE 06575: Biopharmaceutical and Industrial Fluid Mixing
Prerequisite(s): Graduate standing and approval of Graduate Advisor
Students in this course will demonstrate the importance mixing of both in biotechnology and the pharmaceutical industries. The design project in this class will include a product that requires multiple process steps involving multiple phases and complex liquids and chemical reactions. Students will apply single and multi-phase fluid dynamics to the design of an industrial process that includes equipment design. A major objective of the class is to develop equipment designs for the biotechnology and pharmaceutical industry.

CHE 06576: Bioseparation Processes
This course will focus on the fundamental principles of bioseparation processes. The characteristics of bioseparations will be presented as applied to downstream processing in the pharmaceutical/biotechnology and related industries. Theory and design of filtration, microfiltration, centrifugation, cell disruption, extraction, adsorption, chromatography, precipitation, ultratillation, crystallization, and drying will be presented as applied to biosystems. Commercial design considerations, such as sanitary design/sterilization, water quality, solvent recovery, waste disposal and biosafety, will be reviewed.
CHE 06577: Advanced Engineering Process Analysis And Experimental Design 3 s.h.
This course exposes students to advanced engineering applications of process analysis and experimental design. The course includes a multidisciplinary approach with theoretical background to support the course applications. Students will use advanced statistical and optimization techniques for process analysis and experimental design, process monitoring and quality control presently used in industry. The analysis and experimental design techniques presented in this course serve to optimize complex industrially relevant processes and make engineering design and calculations more effective. Applications from a wide range of industries will be presented including pharmaceutical, food, bulk and specialty chemicals, and petroleum industry applications.

CHE 06578: Tissue Engineering 3 s.h.
Prerequisite(s): Graduate standing and approval of Graduate Advisor
Tissue engineering is an expanding field that integrates principles of biology and engineering for the development of tissue substitutes and artificial organs. This course, which utilizes a combined lecture-laboratory approach, will review embryology, cell culture techniques, stem cell biology, cell signaling, cell development and differentiation, biocompatibility, tissue organization and function, biomaterial synthesis/characterization, and structure-function relationships in tissue engineering scaffolds.

CHE 06579: Industrial Process Pathways 3 s.h.
This course will study chemical reaction mechanisms that play crucial roles in the chemical industry. Fundamentals of reaction thermochemistry and reaction kinetics will be discussed. Students will learn to construct mechanistic models of complex, multi-reaction systems, and to apply these models to the solution of practical problems such as yield optimization.

CHE 06580: Optimization Of Engineering Projects 3 s.h.
This course will overview strategies for planning and directing long-term engineering projects. Topics will include project organization, project scheduling, allocation of resources, project optimization and financial analyses.

CHE 06581: Advanced Process Analysis 3 s.h.
This course will examine advanced topics in process analysis including: process consistency, identification of optimal process based on economic analysis, process documentation including flowsheets and budgets, replacement analysis for processing equipment, and rationing limited resources between competing projects.

CHE 06582: Food Engineering Systems 3 s.h.
This course introduces students to the application of fundamental and advanced chemical engineering fundamentals applied to food processing systems. Students analyze and design food engineering processes. The basic and advanced chemistry and biochemistry required for an in-depth understanding of food systems is presented. Basic principles of mass transfer, heat transfer, fluid flow, chemical reaction, process control, and mixing are used to analyze or design food production systems. Computer simulations will be used for the design of food processing systems. Laboratory experiments and demonstrations will be integrated throughout the course.

CHE 06584: Controlled Release Theory, Technology And Applications 3 s.h.
Controlled release systems are designed to provide delivery of an agent at a pre-determined rate for an extended period of time. Controlled release offers several advantages over traditional methods of formulation and administration: maintenance of effective concentrations for a sustained period, less total agent required, cost effectiveness, convenience and compliance. This course investigates controlled release technologies through the application of chemical engineering principles. Knowledge of materials, mass transfer, heat transfer, fluid flow and chemical reactions are used to analyze and design controlled release systems. Applications to pharmaceutical, agricultural, and food industries will be explored. Laboratory experiments and demonstrations will be integrated throughout the course. A project will focus on the development of an original design and fabrication for a controlled release application.

CHE 06585: Engineering Quality Control 3 s.h.
This course exposes students to the state of the art process and product control techniques. This course includes a strong foundation in the fundamentals of engineering quality control and its relevance to process optimization. Students will learn the theory and practical applications of control charting techniques used in industry. Process capability analysis, controller design and control systems architecture will also be included. Students will also be exposed to experimental design and process optimization techniques. The relevance of engineering process control in the safety and profitability of processes and products will be emphasized. Concepts introduced throughout the course will be illustrated with practical examples from a wide range of industries.
CHE 06586: Advanced Engineering Thermodynamics. 3 s.h.
Prerequisites: Graduate standing and approval of Graduate Advisor.
Applications of classical and molecular thermodynamics to industrial problems in chemical and phase equilibrium. Topics include non-ideal solutions, high pressure systems, complex reaction equilibria, generalized correlations, and equations of state.

CHE 06641: Engineering Statistical Process Control 3 s.h.
Prerequisite(s): CHE 06640
This course will introduce students to the industrial tools for engineering process monitoring for safety, quality and profitability. Students will be able to design, construct and implement control charts for a wide range of applications and make decisions regarding the safety, quality and profitability associated with engineering processes. In addition, students will learn the tools to assess process stability and capability. Examples from a variety of engineering processes covering a wide range of engineering applications will be used.

CHE 06642: Quality Control Methods and Metrics 3 s.h.
Prerequisite(s): CHE 06641 and CHE 06640 or equivalent
This course will introduce students to industrial quality control methods and the most current techniques for process and product continuous improvement. Students will learn how to quantitatively assess quality and design and implement a quality audit. They will use the engineering statistical tools acquired in pre-requisite courses and learn additional techniques to analyze process quality measures. In addition, students will learn inspection, test and measurement methodologies and acceptance sampling techniques. Examples from a variety of engineering processes covering a wide range of engineering applications will be used.

CHEM 05501: PRINC OF CHEMISTRY 3 s.h.
CHEM 05530: Special Topics In Chemistry 3 s.h.
Selected topics in individual areas of chemistry (analytical, organic, inorganic or physical). Consent of the instructor is necessary. Prerequisites are determined by the nature of the topic. The requirements of this course include a graduate laboratory project and/or research paper. This course may not be offered annually.

CHEM 05544: INTRO TO RESEARCH 3 s.h.
CHEM 05550: Advanced Seminar 1 s.h.
Oral presentation of scientific studies and data at the graduate level. The talks are accompanied by 35 mm slides prepared by the student. Attendance at South Jersey American Chemical Society meetings is required. This course may not be offered annually.

CHEM 06100: Chemistry I (Lecture And Lab) 4 s.h.
This course presents the basic principles involved in the study of chemistry. It emphasizes modern theories and laws used in the understanding of the structures and reactions of the elements and compounds and also includes gas laws, stoichiometry, and solution theory.

CHEM 06101: Chemistry II (Lecture And Lab) 4 s.h.
Prerequisites: CHEM 06100 or CHEM 06105
This course is a continuation of CHEM 06100. It covers these topics: equilibria, including acids and bases, complexes, and sparingly soluble compounds, thermodynamics, kinetics, electrochemistry, and solution theory. Descriptive inorganic chemistry is also covered.

CHEM 06400: Advanced Inorganic Chemistry Lecture 3 s.h.
Prerequisite: CHEM 06400
This course covers concepts and models of inorganic chemistry. It encompasses molecular geometries and other physical and chemical properties on the basis of the several chemical bonding theories and with reference to the periodic table. Students study the chemistry of both main group and d-block transition elements.
CHEM 06401: Advanced Inorganic Chemistry Laboratory 2 s.h.
Prerequisite: CHEM 06400 with concurrency allowed.
This course covers concepts and models of inorganic chemistry in the laboratory setting. Students study both main group and transition element chemistries. The laboratory component emphasizes the synthesis and characterization of inorganic compounds.

CHEM 07200: Organic Chemistry I (Lecture And Lab) 4 s.h.
Prerequisites: CHEM 06101 or CHEM 06106
This course studies the chemistry of carbon compounds and their properties, structures and reactions. It emphasizes the study of the principle classes of aliphatic and aromatic compounds, which in conjunction with selected experiments, gives an understanding of the mechanisms of organic reactions. Required for science majors.

CHEM 07201: Organic Chemistry II (Lecture And Lab) 4 s.h.
Prerequisites: CHEM 07200
This course is a continuation of CHEM 07200. Required for science majors.

CHEM 07348: Biochemistry (Lecture And Lab) 4 s.h.
Prerequisites: CHEM 07201 or CHEM 07202
This course deals with chemical compounds and reactions important to the functioning of biological systems and includes a discussion of the metabolic pathways for energy production and biosynthesis.

CHEM 07557: Chemical Biology 3 s.h.
The goal of this course is to describe how chemistry is applied to biochemical and biological systems to answer specific questions. It examines the use of small, synthetic molecules that are used as probes of biochemical function as well as how to design experiments using these molecules. The course also encompasses the use of purely synthetic compounds as functional or structural mimics of biological molecules. The methods and techniques used to measure designed interactions will also be discussed.

CHEM 07560: Advanced Biochemistry 3 s.h.
Prerequisites: CHEM 07348 or CHEM 07548
This lecture course deals with complex biochemical processes involving the interaction of numerous classes of biomolecules. Specifically the course focuses on the interplay of proteins, lipids, carbohydrates, and nucleic acids in the cellular response and adaptation to the environment, both locally in the cell and of the organism as a whole. The course relies on both traditional descriptions of biochemical processes and the inclusion of primary literature sources to analyze experimental data, explain methodology, and introduce cutting edge concepts.

CHEM 07561: Advanced Biochemistry Laboratory 2 s.h.
Prerequisite: CHEM 07560 (may be taken concurrently)
This laboratory course deals with isolation and characterization of molecules from biochemical systems. The fundamentals and applications of chromatographic, electrophoretic, and spectroscopy techniques applied to biological molecules are taught through laboratory projects.

This course will provide and in-depth overview of several synthetically useful chemical methodologies, reagents, and reactions that are essential in synthesis of organic pharmaceuticals. Some of the general categories of reactions to be discussed in this course include reduction, oxidation, protecting groups, and carbon-carbon bond forming reactions. This course will survey a broad and diverse range of enantioselective, diastereoselective, chemoselective, and/or regioselective chemical transformations critical for the preparation of medicinal compounds. This course would suit the needs of graduate and senior undergraduate students who intend to pursue careers in the field of pharmaceutical sciences.

An advanced presentation of the major classes of organic chemical reactions, with the major emphasis being placed upon the detailed mechanisms of such reactions. Modern organic theory is included. The requirements of this course include a research paper or individual project. Admission to the course will be at the discretion of the graduate adviser. This course may not be offered annually.

This course describes various topics related to the biochemical principles and metabolic pathways with particular emphasis on pharmaceutical applications and biotechnology. This course will focus on the molecular mechanisms of drug action and chemical basis for drug therapy. Current methods used to study medicinal chemistry including recombinant DNA, combinatorial chemistry and bioinformatics, will be reviewed. A 3-D molecular modeling of drug targets and drug design will be integrated throughout the course. Clinical trials of drug case study are included. A term project is incorporated into this course. Students are required to conduct an in-depth review of the literature regarding a topic.

This course covers the chemistry of organometallic compounds and their applications in organic synthesis, and pharmaceutical industry. Some of the topics discussed in this course include the study of physical and chemical properties, characterization, analysis, and preparation of organometallic compounds, along with advanced organometallic reaction mechanisms such as substitution, addition, elimination, and insertion, etc. The course is designed for pharmaceutical sciences students and includes submission of a written report on original research literature in organometallic chemistry.

This course attempts to provide an understanding of the basic principles and mechanism in pharmacology. Some of the topics discussed include pharmacodynamics and pharmacokinetics of drugs, and their interactions with the living tissues. It also provides a fundamental knowledge about the mechanism of action, structure-activity relationships, and interaction of therapeutics with physiological system and metabolism of drugs.

This introductory course in bioinformatics covers the application of modern computational methods to the fundamentals of molecular biology (protein and DNA structure, transcription and translation). The biochemical tools of molecular biology will be discussed. Methods of aligning DNA sequences will be studied in relation to mutations, phylogenetic tree analysis, forensic science, and genetic diseases. Algorithms for protein structure prediction, microarray technology and gene expression will be explored. Computer based lab exercises will support the topics presented. Students will be required to do a literature based research project.
CHEM 08400:  Physical Chemistry I (Lecture)  3 s.h.  
Prerequisite(s): (CHEM 07201 or CHEM 07202) and (MATH 01131 or MATH 01141) and (PHYS 02201 or PHYS 00222 or PHYS 02203 or PHYS 00211 or CHE 06302)  
This course deals with the problems of the fundamental principles underlying physical chemistry. It gives major emphasis to thermodynamics, kinetics and quantum mechanics. It also includes spectroscopy, group theory and statistical mechanics. MATH 01.230 recommended.

CHEM 08401:  Physical Chemistry II (Lecture)  3 s.h.  
Prerequisites: PHYS 08400 or CHEM 08400  
This is a continuation of CHEM 08400.

CHEM 08505: Advanced Biophysical Chemistry  3 s.h.  
Prerequisites: (CHEM 07201 OR CHEM 07202) AND (MATH 01130 OR MATH 01140)  
This is a graduate-level Biophysical Chemistry course, which focuses on applications of physical chemistry concepts and methods to biological systems. Topics cover the basic concepts of thermodynamics, reactions kinetics and spectroscopy, etc. Additionally, various specific biophysical chemistry topics and experimental techniques are to be discussed. The course will equip students with a strong theoretical background to understand advanced topics covered in other courses. Students will be additionally required to complete an independent literature report as directed by the instructor.

CHEM 08510: Advanced Survey Of Molecular Modeling Methods  3 s.h.  
Prerequisites: (CHEM 07201 OR CHEM 07202) AND (MATH 01130 OR MATH 01140)  
This survey course emphasizes the applications of molecular modeling theory and simulations in chemistry and biochemistry. The course will present to students a broad and in-depth knowledge of different modeling concepts and methodologies, and provide students opportunities to apply modern computational software to investigate molecular structures, chemical reactions, and biomolecular processes such as enzyme catalysis and protein conformational changes, etc. The topics will include quantum chemistry calculations, molecular mechanics, molecular dynamics simulations, in silico drug design, etc. This course is ideal for Chemistry, Biochemistry, Bioinformatics, and Pharmaceutical Science students.

CHEM 09250:  Quantitative Analysis (Lecture And Lab)  4 s.h.  
Prerequisites: CHEM 06101 or CHEM 06106  
This course provides lecture and laboratory experience in classical methods of gravimetric and volumetric analyses as well as electrical and spectroscopic analyses.

CHEM 09510: Instrumental Analysis  4 s.h.  
The theoretical basis, construction, and data interpretation of most instruments used by chemist are studied. Among the instruments considered are visible, UV, IR, NMR, AA, fluorescence, flame emission, and mass spectrometers. Electroanalytical, potentiometric, conductometric, electrogravimetric, and voltammetric methods of analysis are used. Laboratory experiments allow "hands-on" use of representative instruments. The requirements of this course include a graduate laboratory project. Admission to the course will be at the discretion of the graduate adviser. This course may not be offered annually.

CHEM 09522:  Advanced Bioanalytical Chemistry  3 s.h.  
Prerequisites: CHEM 09250 AND CHEM 07348  
This course will focus on the details of analysis of biomolecules using a variety of analytical techniques including liquid chromatography, electrophoresis and capillary electrophoresis. A thorough discussion of mass spectrometry technique, as applied to biomolecules, will be conducted. This course will also introduce students to different DNA analysis techniques and electrochemical biosensors in biology and medicine. This also includes the analytical centrifugation methods as used in determination of molecular weight of biomolecules. This course prepares students for graduate school, careers in pharmacy,
medical, and forensic among others.

CHEM 09522: Advanced Bioanalytical Chemistry 3 s.h.
Prerequisites: CHEM 0950 AND CHEM 0748
This course will focus on the details of analysis of biomolecules using a variety of analytical techniques including liquid chromatography, electrophoresis and capillary electrophoresis. A thorough discussion of mass spectometry technique, as applied to biomolecules, will be conducted. This course will also introduce students to different DNA analysis techniques and electrochemical biosensors in biology and medicine. This also includes the analytical centrifugation methods as used in determination of molecular weight of biomolecules. This course prepares students for graduate school, careers in pharmacy, medical, and forensic among others.

CHEM 09592: Pharmaceutical Techniques I 3 s.h.
Prerequisite(s): CHEM 07201 OR CHEM 07202
This course is intended to provide dedicated training for students in the design of research projects and their implementation in a laboratory setting. The course will offer students the opportunity to focus on the preliminary aspects of research design and implementation in one or more sub-disciplines of chemistry relating to the pharmaceutical sciences. Students will be expected to (a) retrieve, understand and evaluate prior contributions in the identified area of study and (b) design and implement hypothesis-driven studies within this area of study.

CHEM 09593: Pharmaceutical Techniques II 3 s.h.
Prerequisite(s): CHEM 07201 OR CHEM 07202
This course is intended to provide dedicated training for students in the chemical, biochemical and computational analysis of the chemical entities with relevance to the pharmaceutical sciences via spectroscopic and other characterization techniques. The course will offer students the opportunity to focus on the preliminary aspects of research design and implementation in one or more sub-disciplines of chemistry relating to the pharmaceutical sciences. Students will be expected to (a) understand, evaluate and discuss scientific information from the primary literature and (b) design and implement research or computational experiments and (c) analyze project outcomes and research data.

CHEM 09594: Pharmaceutical Techniques III 3 s.h.
Prerequisite(s): CHEM 07201 OR CHEM 07202
This course is intended to provide dedicated training for students in the development of professional, environmental and ethical best practices in the context of pharmaceutical research. The course will offer students the opportunity to focus on managing professional, environmental and ethical challenges in one or more sub-disciplines of chemistry relating to the pharmaceutical sciences. Students will be expected to retrieve, understand and evaluate prior examples of professional, environmental and/or ethical challenges the identified area of study.

CHEM 09594: Pharmaceutical Techniques III 3 s.h.
Prerequisite(s): CHEM 07201 OR CHEM 07202
This course is intended to provide dedicated training for students in the development of professional, environmental and ethical best practices in the context of pharmaceutical research. The course will offer students the opportunity to focus on managing professional, environmental and ethical challenges in one or more sub-disciplines of chemistry relating to the pharmaceutical sciences. Students will be expected to retrieve, understand and evaluate prior examples of professional, environmental and/or ethical challenges the identified area of study.

CHEM 09596: MS Thesis Research I 3 s.h.
Prerequisite: CHEM 07201 OR CHEM 07202
This course provides individual laboratory research exploration of a topic beyond the scope of the existing courses. The research performed would be instructor/Advisor specific and is based on the current research being performed in the department. The students would be expected to (a) conduct basic and applied research in pharmaceutical sciences, (b) retrieve and review research literature, (c) provide periodic updates and project reports, and (d) write manuscripts for publication in scientific journals or presentations at conferences and meetings.
CHEM 09597: MS Thesis Research II  
Prerequisite: CHEM 09596
This is a continuation course for MS Thesis Research I. The students in this course would either expand upon existing research projects from their earlier course, or start newer research projects, which will be determined on an individual case by case basis. The students would be expected to (a) conduct basic and applied research in pharmaceutical sciences, (b) retrieve and review research literature, (c) provide periodic updates and scientific project reports, and (d) write manuscripts for publication in journals or scientific presentations at conferences and meetings.

CHEM 09597: MS Thesis Research II  
Prerequisite: CHEM 09596
This is a continuation course for MS Thesis Research I. The students in this course would either expand upon existing research projects from their earlier course, or start newer research projects, which will be determined on an individual case by case basis. The students would be expected to (a) conduct basic and applied research in pharmaceutical sciences, (b) retrieve and review research literature, (c) provide periodic updates and scientific project reports, and (d) write manuscripts for publication in journals or scientific presentations at conferences and meetings.

CHEM 09598: MS Thesis Research III  
Prerequisite: CHEM 09597
This is a continuation course for MS Thesis Research II. The students in this course would either expand upon existing research projects from their earlier course, or start newer research projects, which will be determined on an individual case by case basis. The students would be expected to (a) conduct basic and applied research in pharmaceutical sciences, (b) retrieve and review research literature, (c) provide periodic updates and scientific project reports, and (d) write manuscripts for publication in journals or scientific presentations at conferences and meetings.

CHEM 09599: MS Thesis Research IV  
Prerequisite: CHEM 09598
This is a continuation course for MS Thesis Research III. The students in this course would either expand upon existing research projects from their earlier course, or start newer research projects, which will be determined on an individual case by case basis. The students would be expected to (a) conduct basic and applied research in pharmaceutical sciences, (b) retrieve and review research literature, (c) provide periodic updates and scientific project reports, and (d) write manuscripts for publication in journals or scientific presentations at conferences and meetings.

CEE 08503: Special Topics Civil Engineering  
Civil engineering topics related to recent developments in industrial practice or engineering research. May be repeated.

CEE 08504: Engineering Estimating  
The course deals with the development of engineering estimates for civil engineering projects and project components including labor, materials and equipment. Total project costs including direct and indirect costs, field and home-office costs, and contingency are covered. Also covered are the various types of civil engineering estimates including piles and cofferdams, wellpoints and earthdrilling, water and sewer systems, road and highway pavements, concrete buildings and bridges, and steel buildings and bridges. The course includes appropriate computer applications.

CEE 08507: Prestressed Concrete  
3 s.h.

CEE 08512: Advanced Environmental Treatment Process Principles  
Topics in Fundamentals of Physicochemical Processes in Environmental Engineering such as Adsorption, Coagulation/Flocculation, Filtration, Sedimentation, Disinfection, Ion Exchange, Chemical Oxidation, Corrosion and Membranes.

CEE 08513: Environmental Management  
This course deals with integrated environmental management issues and methodologies with a global perspective. Topics include environmental decision-making from a socio-economic and environmental standpoint, environmental data collection, analysis, and management techniques for environmental assessment and feasibility case studies. The course is intended to give students an understanding of current environmental issues and tools for analysis of data for environmental management. The issues are examined from the worldwide perspectives of science, engineering, business and society. The course will culminate in an original research project and presentation.

CEE 08522: Site Remediation Engineering  
Topics in site remediation engineering, including site characterization, site safety, modeling site conditions, conducting feasibility studies, and designing remediation systems, such as pump and treat, stabilization, containment, treatment walls, natural attenuation, enhanced bioremediation, phyto remediation, oxidation, soil flushing, and soil vapor extraction.
Course Descriptions

CEE 08531:  Solid And Hazardous Waste Management  3 s.h.
The course deals with solid and hazardous waste sources, regulations and management; engineering principles, treatment
and disposal methods; design of landfills; recycling; toxicology principles; and risk assessment. The course includes
appropriate laboratory experiments and computer applications.

CEE 08532:  Pollutant Fate And Transport  3 s.h.
Topics include Characteristics and Properties of Organic Pollutants, Aquatic Chemistry, Transport Mechanisms for
Pollutants (Adsorption, Retardation, Attenuation, Volatilization, Biodegradation), Groundwater (Properties, Flow
Equations, Transport in Porous Media) and Mathematical Modeling.

CEE 08533:  Integrated Solid Waste Management  3 s.h.
The course deals with the theories and principles of integrated solid waste management as applied to real-world analysis
and design problems. The course covers the design of facilities and programs, such as landfills, composting facilities, transfer
stations, collection programs, and drop-off centers, and planning of integrated systems for municipalities and counties.
Computer applications are included.

CEE 08541:  Advanced Surface Hydrology  3 s.h.
This course is to increase knowledge on the application of advanced hydrologic methods to water resources problems.
Specifics include the use of probabilistic techniques to characterize hydrologic processes. Such analyses are characterized by
data collection, analysis and interpretation, simulation, and forecasting. The level of understanding should, upon completion
of the course, be sufficient to understand and appreciate the important issues in the current literature where statistical and
optimization methods are used in prediction and interpretation of hydrologic processes. Synergy between hydrological
processes and environmental quality, hydrometeorology, global warming, informatics, and ecology and conservation will be
discussed.

CEE 08542:  Advanced Hydrometeorology  3 s.h.
This course introduces advanced topics in hydrometeorology to the students and latest technologies used by water
resources engineers for understanding, modeling and simulating the global water issues. This course will investigate the
relationship between hydrology and meteorology and focus on key processes including precipitation, stream and ground
water flow, flooding, water chemistry and contamination, and water resource management. A large component of the course
will include collecting and analyzing data, estimating stream flow, and using spreadsheet and graphic programs to monitor
water levels following precipitation events. Students in the class will use state of the art software to analyze the collected
datasets. Topics included in this course are intended for students engaged in environmental and water resources
engineering. The course is designed for students that are familiar with key concepts from courses in mathematics,
hydrology, and water monitoring.

CEE 08543:  Advanced Water Resources Engineering  3 s.h.
This course covers advanced topics in water resources engineering including the analysis and design of advanced hydraulic
structures, hydraulic similitude and modeling, wave action, and advanced hydrology.

CEE 08544:  Hydraulic Design  3 s.h.
The course focuses on the design and analysis of structures for controlling and conveying water in both the built and
natural environment. Topics covered vary from year to year based upon instructor and student interests. Past topics have
included open channel flow design, dams and spillways, sanitary and storm sewers, culverts, pumping stations,
turbomachinery, and hydraulic similitude and modeling.

CEE 08545:  Water and Environmental Monitoring  3 s.h.
The course focuses on the engineering study of fluid flow in the environment. Advanced topics in water resources
engineering are explored, with content varying based upon instructor and student interests. Past topics have included open
channel flow, hydrology, fish passage at hydraulic structures, sediment transport, mixing in natural water bodies, and water
quality modeling.

CEE 08546:  River Engineering  3 s.h.
This course presents the theory and analytical techniques for the design and analysis of engineering projects that control or
convey water in open channel systems. Topics include sediment transport, design of hydraulic structures, river restoration,
and computer modeling. The course will culminate in an original research project and presentation.

CEE 08547:  Watershed Engineering  3 s.h.
This course presents the theory and analytical techniques for the design and analysis of stormwater management projects.
Topics include environmental law, stormwater mitigation structures, rainfall-runoff analysis, limnology, and computer
modeling. The course will culminate in an original research project and presentation.
Course Descriptions

CEE 08548: Water and Environmental Monitoring  
Prerequisite: Graduate Standing or Instructor Permission  
3 s.h.
Introduces the latest and techniques used by water resources and environmental engineers for mapping, modeling and monitoring. The applied goal of this class is to develop an understanding of water and environmental spaces and how maps represent them. This course will provide an overview of the application of advance geographic information system, remote sensing and complex mapping in water resources and environmental engineering. Students will use satellite images to extract data and produce viable information. Students will become familiar with state of the art software in remote sensing and mapping.

CEE 08552: Foundation Engineering  
3 s.h.
The fundamental theme of the course is the analysis and design of structural building and bridge foundations based on advanced principles of soil mechanics. These advanced principles of soil mechanics include compressibility, shear strength, and bearing capacity. The types of foundations analyzed and designed include spread footings and pile foundations. The course includes appropriate computer applications.

CEE 08553: Earth Retaining Systems  
3 s.h.
The fundamental theme of the course is earth retaining systems including advanced principles of soil mechanics and analysis and design of earth retaining systems. The advanced principles of soil mechanics include lateral soil pressure and slope stability. The analysis and design of earth retaining systems includes slopes, embankments, retaining walls and other systems. The course includes appropriate laboratory experiments and computer applications.

CEE 08562: Advanced Transportation Engineering  
3 s.h.
The fundamental theme of the course is the study of advanced topics in transportation engineering including advanced highway engineering and advanced mass transit systems. These advanced topics include the impact and interaction of sociological, economic, geographic and environmental factors on transportation systems. The course includes appropriate field measurements and computer applications.

CEE 08564: Advanced Design Of Elements Of Transportation Engineering  
3 s.h.
The fundamental theme of the course is the study of advanced topics in highway design and analysis, signalized and un-signalized intersection design, forecast travel demand modeling and transportation planning. Topics covered vary from year to year based upon instructor and student interests. This course also includes field measurements and computer applications.

CEE 08565: Advanced Pavement Analysis and Evaluation  
Prerequisite(s): CEE 08561  
3 s.h.
The fundamental theme of the course is the engineering study of pavement response. The topics covered include non-linear behavior of pavement materials and interaction between tires and pavements. Modeling and analysis of pavement behavior will also be taught, with content varying based upon instructor and student interests. The course includes field experiments and computer applications.

CEE 08566: Transportation Systems Modeling  
Prerequisite: Graduate Standing or permission of the instructor  
3 s.h.
Introduces latest technologies and techniques used by transportation planners and engineers to study current travel characteristics and estimate future travel demand and supply. This course focuses on urban travel characteristics and activity analysis, travel demand and supply analysis, transportation system and project evaluation, and program and project implementation strategies. The course will (1) introduce concepts, procedures and methods associated with transportation planning; (2) provide basic knowledge of travel demand forecasting models; and (3) provide basic knowledge of relevant travel demand modeling software. The proposed course is designed for both undergraduate and graduate students who want to develop their career in transportation engineering and planning. Students in this class will deliver research papers/reports beyond those expected for students in CEE 08466, Introduction to Urban Transportation Planning.
CEE 08568: Intelligent Transportation System 3 s.h.
The course will focus on systems engineering & Intelligent Transportation System (ITS) fundamentals and design of regional ITS fundamentals. The course will introduce selected tools required to plan, design, implement and evaluate ITS projects. Students will work on projects that require data collection, simulation and analysis using various tools. The course is designed to investigate multidisciplinary aspects of ITS design and plan solutions for current and future transportation systems.

CEE 08773: Advanced Structural Analysis 3 s.h.
The course deals with the matrix method of structural analysis. The topics covered include structural members, member joints, member end conditions, local and global coordinate systems, coordinate transformation, member structural matrices, global structural matrices, condensation of global structural matrices, static structural analysis, and dynamic structural analysis. The course will include appropriate computer applications.

CEE 08774: ADV STRUCTURAL MECHANICS 3 s.h.

CEE 08775: Advanced Fatigue And Fracture 3 s.h.
This course presents the theory and analytical techniques to design structural components for cyclic loading. Topics include linear elastic fracture mechanics; S-N fatigue; fatigue crack growth; and algorithms for simulating three-dimensional crack propagation. The course culminates with an original research project, resulting in both oral and written reports.

CEE 08783: Advanced Steel Design 3 s.h.
Prerequisite: CEE 08583
This course addresses advanced topics not covered in a first course in steel design including topics such as design of plate girders, connections, and structural frames bracing. Historic and current research that is the foundation of code requirements will be discussed.

CEE 08784: Prestressed Concrete 3 s.h.
The course focuses on analysis and design of prestressed concrete members for highway bridges, parking structures, office buildings and industrial buildings. Topics covered include prestressed construction applications and materials, flexural analysis of pretensioned and post-tensioning beams, bending and shear design, loss of prestress, deflection and composite beams. The course includes appropriate computer applications.

CEE 08785: Advanced Reinforced Concrete 3 s.h.
The emphasis is the design of advanced reinforced concrete structures and structural components not covered in an introductory reinforced concrete design course. Topics include columns in bending, slender columns, slab systems, and other advanced topics in reinforced concrete.

CEE 08786: Bridge Engineering 3 s.h.
The analysis and design of modern steel highway bridges utilizing the bridge code of the American Association of State Highway and Transportation Officials is emphasized. The topics covered include bridge loads, load combinations, design methods, reinforced concrete deck slabs, steel wide-flange stringer bridges, steel composite wide-flange stringer bridges, continuous bridge spans, steel composite plate-girder bridges, elastomeric bearing connections, steel fixed bridge connections, and steel roller bridge connections. The course includes appropriate computer applications.

CEE 08603: Special Topics for Doctoral Students in Civil Engineering 3 s.h.
This course presents timely coverage of specific advanced and emerging topics in civil engineering, and it is intended for doctoral students. Special topics courses may be traditional classroom-based courses as well as research-related courses supervised by specific advisers. This class may be taken multiple times when offered with different special topics content.

CEE 08675: Fracture Mechanics 3 s.h.
This course covers the behavior of cracks in bodies, and has a wide range of applications. Discussion focuses on the treatment of the singular stress and strain fields that occur near crack tips, with particular emphasis on fracture mechanics parameters such as K, G and J. Course material will include both elastic and plastic behavior. Both approximate and exact approaches will be considered. Numerical and analytical solutions and solution techniques will be presented. This course might not be offered annually.

CM 01301: Fundamentals of the Construction Industry I 3 s.h.
Corequisite: CM 01302
This course provides a general overview of the planning, administration, management, and cost of construction projects and an introduction to the methodology used in executing specific designs. Emphasis is placed on the organization of construction firms, use and types of primary construction equipment, estimating and quantity take-offs, contractual and management systems, scheduling, project administration, and inspection of construction operations.
CM 01302: Fundamentals of the Construction Industry II 3 s.h.
Prerequisite: CM 01301
This course introduces the design process and development of construction documents. It covers the standard design phases: programming, conceptual design, schematic design, design development, construction documents and construction administration, and the format and utilization of project manuals including contract specifications, the interpretation and analysis of engineering plans and specifications, and the new technologies being used in the design including Building Informational Modeling (BIM) and sustainable (green) practices. The course also explores the various common project delivery methods.

CM 01303: PROJECT BUILDING SYSTEMS 3 s.h.
Prerequisites: CM 01301, CM 01302
Students will learn the description and identification of the equipment and materials used in mechanical systems for heating, ventilating and air conditioning, electrical, plumbing, fire protection, piping, gas, lighting, water and waste water, conveyance, life safety systems, environmental, security, audio/visual, and building system controls. The course also provides and introduction to building structural and envelopes systems.

CM 01304: PROJECT ADMINISTRATION 3 s.h.
Prerequisites: CM 01304 (Fundamentals of the Construction Industry II)
This course provides exposure to and use of various types of projects control systems for project efficiency and documentation. Students will learn how the submittal process operates and is monitored. They will also be shown a variety of tools used in tracking project documentation, and essential elements related to contract law and administration.

CM 01305: CONSTRUCTION COST ESTIMATING 3 s.h.
Prerequisites: CM 01302 (Fundamentals of the Construction Industry II)
Introduction to various costs of construction including direct and indirect project costs, comparison of hard and soft costs, job cost analysis and forecasting of cost to completion, labor, material and equipment expenses, cash flow, overhead, profitability, and general conditions costs. Students will learn research techniques used to create accurate estimating and bidding procedures.

CM 01306: Construction Project Planning and Scheduling 3 s.h.
Prerequisites: CM 01301, CM 01302
Students will learn procedures used in project planning and scheduling that employ float methods of scheduling logic. They will examine the critical path series of activities of project completion, including the use of computer software applications for problem solving, and related tools, spreadsheets, and information management. Also covered are work breakdown structures, activity durations, status reports, resource allocation, re-planning, monitoring, and updating of projects. Students will develop projects site logistics plans.

CM 01407: Advanced Leadership and Communication 3 s.h.
Prerequisites: CM 01302 (Fundamentals of the Construction Industry II)
The course is designed to teach students to become more effective leaders and communicators in the construction industry. Drawing on various case studies, students will examine ethical practices in the industry. They will define and role-play effective communications strategies that simulate situations they may encounter within the industry such as general-to-subcontractor, corporate, and labor relations. Students in this course will also examine principles of negotiation and dispute resolution in the construction industry.

CM 01408: Industrial Relations in the Construction Industry 3 s.h.
Prerequisites: CM 01302 (Fundamentals of the Construction Industry II).
This course examines various perspectives (union, management, government) on the collective bargaining system in place in the construction industry. Topics include the legal and regulatory environment, problem solving, and the roles of labor and corporations.

CM 01409: Building Energy Systems for Construction Managers 3 s.h.
Prerequisites: CM 01302 (Fundamentals of the Construction Industry II) AND CM 01303 (Project Building Systems).
The Building Energy Systems for Construction Managers course provides a conceptual understanding of functions and performances of energy systems including mechanical, electrical, electronic, and plumbing and transport systems in residential and commercial buildings. The course also provides information on integration between energy systems and other building components. While introducing the concepts of alternative energy sources, energy efficiency, structural implications of mechanical systems, indoor air quality, and environmental control strategies, the course familiarizes students with more recent and current efforts in sustainability and green building ideas. The course also introduces codes and standards relevant to energy devices used in building construction, such as National Fire Protection Association (NFPA), American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE), and National Electrical Code (NEC).
Course Descriptions

CM 01410: BUILD CONSTRUCTION SYS & CODES 3 s.h.
Prerequisites: CM 01302 (Fundamentals of the Construction Industry II).
This course provides a conceptual understanding of functions and performance of structural building systems. The primary purpose of this course is to provide familiarity with use of construction code with reference to International Building Codes (IBC) 2012. For anyone in the field of construction or construction management it is necessary to know about the concepts and fundamental aspects of the code. As a result, the course is intended to provide an understanding of how the code was developed, how it is to be interpreted, and how it is applied to design and construction of buildings, the goal of the course is to make implementation of the code easier, and clearer to understand. Other than discussions on structural elements and their construction methods, the course covers issues such as use and occupancy, types of construction, fire-resistive constructions, interior finishes, building material, inspections, and tests.

CM 01411: Construction Safety and Loss Prevention 3 s.h.
Prerequisites: CM 01302 (Fundamentals of the Construction Industry II).
This course offers a practical guide for eliminating safety and health hazards from construction worksites. The Handbook of OSHA Construction Safety and Health addressed the occupational safety and health issues faced by those working in the construction industry. The course covers a vast range of issues including program development, safety and health program implementation, intervention, and prevention of construction incidents, regulatory hazards faced by those working in the construction industry and sources of information. The course also features updates for construction regulations, construction job audit, training requirements, and OSHA regulations. It includes new record keeping guidelines and forms with additional material on focused inspections. Containing updated contact information for the newest agencies, the course also presents a model safety and health program, examples of accident analysis and prevention approaches.

CM 01412: CAPSTONE PROJECT 3 s.h.
Prerequisites: CM 01410 (Building Construction Systems and Codes).
In the course, students will build on what they have learned in the major, integrating the theory and knowledge that they gained in class with practical experience in the construction industry. Capstone projects are developed through a series of project meetings between the student and program faculty.

EM 01501: ENGINEERING ECONOMICS 3 s.h.
This course covers a variety of topics in engineering economics including the following: making economics decisions, equivalence and the time value of money, spreadsheets and economic analysis, present worth and equivalent annual worth, internal rate of return, benefit cost ratios and breakeven analysis, replacement analysis, depreciation and income taxes, inflation, value engineering, and decision-making tools.

EM 01502: ENGINEERING ECONOMICS 3 s.h.
This course covers a variety of topics in engineering economics including the following: making economics decisions, equivalence and the time value of money, spreadsheets and economic analysis, present worth and equivalent annual worth, internal rate of return, benefit cost ratios and breakeven analysis, replacement analysis, depreciation and income taxes, inflation, value engineering, and decision-making tools.

EM 01511: Strategic Risk Management 3 s.h.
This course deals with a range of topics related to risk management including the following: risk terminology, tools for quantitative analysis of environmental and technological risks, social risk issues, risk in modern life, statistical analysis, data presentation, dose-response models for carcinogens, model limitations, models of risk aversion, psychological and community perceptions of risk, risk communication, environmental and health risk issues in the media, and case studies of accidents and incidents.

EM 01512: Quality In Engineering Management 3 s.h.
This course covers a range of topics related to quality in engineering management including the following: concepts and philosophy of engineering quality management, leading engineers, data analysis, engineering quality assurance and results, engineering quality methods and tools, continuous process improvement, total quality management within engineering, six-sigma, quality costs, customer satisfaction in relation to engineering design and quality, vendor relationships and quality, benchmarking engineering practices and products, statistical process control, quality function development, and case studies of quality in engineering management.

EM 01513: Engineering Decision Making 3 s.h.
This course covers the following topics related to engineering decision making: mathematical decision tree equations, mathematical programing for optimization of engineering problems, the theory behind methods and models, advanced statistical models for engineering analysis, advanced linear and non-linear models for engineering analysis, practical applications of decision methods and models to engineering problems, and identifying and balancing risk associated with technology development. Case studies dealing with real engineering projects and problems are included.
Course Descriptions

**EM 01521:** Construction Management 3 s.h.
This course covers the following topics related to construction management: project managers, developers, designers, contractors, and subcontractors; project startup, construction, and closeout; project financing; control of costs and schedule; construction contract types, bidding, delivery methods, and changes; bonds and insurance; inspection of work; claims, disputes, and arbitration; and case studies in construction management.

**EM 01522:** Construction Scheduling 3 s.h.
This course deals with the following topics in construction scheduling: scheduling terminology and history; time and duration of activities; relationships between project activities; critical path method (CPM); program evaluation and review technique (PERT); delays and other constraints; schedule development, analysis, and updating; and case studies of project construction schedules.

**EM 01523:** Cost Engineering 3 s.h.
This course covers a wide variety of topics related to cost engineering including the following: measuring work progress using costs, man hours, and schedule; earned value; cost and schedule performance; productivity; quantity adjusted budgets; budget and schedule baselines; control account baselines; cost control versus financial control; analysis, trending, and forecasting; cost and schedule performance curves; index and other tracking; elements of complete cost; and case studies in cost engineering.

**EM 01541:** Engineering Law And Ethics 3 s.h.
This course introduces students to law and ethics as it applies to engineering and engineering management. Topics covered in the area of law include the following: legal responsibilities of owners, designers, and contractors: risk management via insurance, surety bonds, and contracts; legal implications of the common activities of design professionals; liens; expert testimony; and patent law. Topics covered in the area of ethics include the following: ethical codes of professionals; derivation of ethical structures; and the role of the engineer in assuring public safety, health, and welfare. Case studies dealing with law and ethics are included.

**EM 01542:** Facilities Management 3 s.h.
*Prerequisite: Enrollment in Master of Engineering Management Program or Master of Science in Engineering Management Program*
The topics covered in this course include the general characteristics and types of facilities: management functions within a facility and their differences compared with general management; inventory, procurement, operations, and real estate management; maintenance management and planning, preventive and schedule maintenance, and contract management; energy management and energy devices, electricity, lighting, water, heating, HVAC, and efficient and intelligent buildings; safety and environmental management, OSHA, RCRA, air quality, clean air act, and other EPA requirements; emission control and fleet management; and transport equipment, elevators, escalators, moving walkways, and device operation and maintenance. In this course, all aspects of managerial and planning concepts are covered, as well as maintenance and engineering knowhow that are relevant to and needed for the study of facilities management.

**EM 01543:** Systems for Engineering Management 3 s.h.
*Prerequisite: Enrollment in Master of Engineering Management Program or Master of Science in Engineering Management Program*
This course teaches engineering management students the art of systems engineering. Engineering management students will learn systems engineering processes and skills to integrate user needs, manage requirements, conduct technological evaluation, and build elaborate system architectures. Engineering management students will also learn to assess risk and establish financial and schedule constraints. The course devotes particular attention to knowledge, skills, mindset, and leadership qualities needed for an engineering manager to operate effectively in the area of systems engineering.
Course Descriptions

EM 01543: Systems for Engineering Management 3 s.h.
Prerequisite: Enrollment in Master of Engineering Management Program or Master of Science in Engineering Management Program
This course teaches engineering management students the art of systems engineering. Engineering management students will learn systems engineering processes and skills to integrate user needs, manage requirements, conduct technological evaluation, and build elaborate system architectures. Engineering management students will also learn to assess risk and establish financial and schedule constraints. The course devotes particular attention to knowledge, skills, mindset, and leadership qualities needed for an engineering manager to operate effectively in the area of systems engineering.

ENGR 01569: Introduction to Connected Vehicle Technology 3 s.h.
Connected Vehicle Technology (CVT) has potential to transform the existing surface transportation system into next generation sustainable transportation system by improving safety, operational efficiency, and reducing environmental impacts. The success of connected mobility relies on efficient integration of traffic flow principles, advanced sensors, computing tools & electronics, communications technologies, and management strategies. However, the transportation professionals will be required to master complexity of connected mobility systems and its components to evaluate, operate, and maintain future surface transportation systems. This course will introduce characteristics of the future mobility systems and overview of planning, designing, deploying and operating of future connected mobility systems. The course is designed for students that are familiar with intelligent transportation system.

ENGR 01580: Advanced Viscoelasticity 3 s.h.
This course covers the fundamentals of linear and non-linear viscoelastic behavior of materials: constitutive modeling, experimental development of material properties, and solution of classic problems. Non-linear viscoelasticity and the effect of temperature on non-linear viscoelastic properties are presented. Standard experimental methods to characterize viscoelastic properties are discussed. Classic solutions, and the use of time-temperature superposition of solutions, are presented. In addition, the doctoral students will conduct testing and analysis of viscoelastic material to validate existing viscoelastic models. This course might not be offered annually.

STEM 01540: STEM: Automotive & Robotics for Middle School Teachers 1.5 s.h.
Prerequisite: completed Bachelor's degree in any of the sciences, math, elementary education, secondary education or engineering. Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
This course uses solid modeling to introduce students to the design process. Utilizing this design approach, students understand how solid modeling has influenced their lives. Students also learn sketching techniques, and use descriptive geometry as a component of design, measurement, and computer modeling. Using design briefs or abstracts, students create models and documentation to solve problems. This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training in Design and Modeling for teachers. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course.

STEM 01541: STEM: Design & Solid Modeling Middle School 1.5 s.h.
Prerequisite: completed Bachelor's degree in any of the sciences, math, elementary education, secondary education or engineering. Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
This course uses solid modeling to introduce students to the design process. Utilizing this design approach, students understand how solid modeling has influenced their lives. Students also learn sketching techniques, and use descriptive geometry as a component of design, measurement, and computer modeling. Using design briefs or abstracts, students create models and documentation to solve problems. This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training in Design and Modeling for teachers. Teachers interested in enrolling in this class must be...
currently enrolled in the PLTW course.

STEM 01541: STEM: Design & Solid Modeling Middle School 1.5 s.h.
Prerequisites: completed Bachelor’s degree in any of the sciences, math, elementary education, secondary education or engineering.
Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
This course uses solid modeling to introduce students to the design process. Utilizing this design approach, students understand how solid modeling has influenced their lives. Students also learn sketching techniques, and use descriptive geometry as a component of design, measurement, and computer modeling. Using design briefs or abstracts, students create models and documentation to solve problems. This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training in Design and Modeling for teachers. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course. Faculty Workload Hours: TBD This course will be taught by adjuncts selected from a pool of Project Lead the Way master teachers at the mutual agreement of Rowan and PLTW at a rate established nationally by PLTW and its University Affiliates.

STEM 01550: STEM: Engineering Designs & Solid Modeling 3 s.h.
Prerequisites: completed Bachelor’s degree in any of the sciences, math, elementary education, secondary education or engineering.
Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
This course introduces content that high school teachers would find appropriate for 9th or 10th grade students who are interested in design and engineering. The major focus of the course is to expose students to design process, research and analysis, teamwork, communication methods, global and human impacts, engineering standards, and technical documentation. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology. The course of study includes: Design Process; Modeling; Sketching; Measurement; Statistics; Applied Geometry; Presentation Design and Delivery; Engineering Drawing Standards; CAD Solid Modeling; and Reverse Engineering. This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training called Introduction to Engineering Design for teachers. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course.

STEM 01550: Principles of Engineering for High School Teachers 3 s.h.
Prerequisites: completed Bachelor’s degree in any of the sciences, math, elementary education, secondary education or engineering.
Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training called Principles of Engineering. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course.

STEM 01551: Principles of Engineering for High School Teachers 3 s.h.
Prerequisites: completed Bachelor’s degree in any of the sciences, math, elementary education, secondary education or engineering.
Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training called Principles of Engineering. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course. Faculty Workload Hours: TBD This course will be taught by adjuncts selected from a pool of Project Lead the Way master teachers at the mutual agreement of Rowan and PLTW at a rate established nationally by PLTW and its University Affiliates.

STEM 01552: STEM: Digital Electronics for High School Teachers 3 s.h.
Prerequisites: completed Bachelor’s degree in any of the sciences, math, elementary education, secondary education or engineering.
Currently teaching high school level science/math/technology (or hired to teach in the fall term) in a school using the PLTW curriculum.
Digital Electronics for High School Teachers is the study of electronic circuits that are used to process and control digital signals. The major focus of this course is to expose students to the process of combinational and sequential logic design, teamwork, communication methods, engineering standards, and technical documentation. Utilizing the activity-project/problem-based (APPB) teaching and learning pedagogy, students will analyze, design and build digital electronic circuits. This course introduces educators to content that is appropriate for 10th or 11th grade students interested in electronics. This course assumes no previous electronics knowledge however proficiency in college preparatory math is needed. This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training in
Digital Electronics for teachers. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course.

STEM 01533: **STEM: Civil Engineering and Architecture for High School Teachers** 3 s.h.
Prerequisites: completed Bachelor’s degree in any of the sciences, math, elementary education, secondary education or engineering. Currently teaching high school level science / math /technology (or hired to teach in the fall term) in a school using the PLTW curriculum. As students learn about various aspects of civil engineering and architecture, they apply what they learn to the design and development of this property. The course of study includes the roles of civil engineers and architects, project planning, site planning, building design, and project documentation and presentation. This course is a credit-bearing companion to the Project Lead the Way (PLTW) non-credit training in Civil Engineering and Architecture for teachers. Teachers interested in enrolling in this class must be currently enrolled in the PLTW course.

CEE 08563: **Advanced Pavement Analysis And Evaluation** 3 s.h.
The fundamental theme of the course is the engineering study of pavement response. The topics covered include non-linear behavior of pavement materials and interaction between tires and pavements. Modeling and analysis of pavement behavior will also be taught, with content varying based upon instructor and student interests. The course includes field experiments and computer applications.

CMS 04210: **Mass Media And Their Influences** 3 s.h.
Prerequisites: ENGL 05105 or COMP 01112 or ENGR 01201 or permission of instructor
This course studies the impact on our daily lives of television, radio, films, magazines and newspapers. Students examine how the media influence politics, purchases, and entertainment, and how the media affect the culture in shaping beliefs and attitudes. It discusses how each of the media operates and what each accomplishes. This course examines the gap between real life and "mediated" reality.

CMS 04215: **Fiction To Film** 3 s.h.
Prerequisite: 30 credits required
This course provides comparative study of film and literature. Students learn the critical vocabulary of literature and film and enhance their understanding of both art forms. The course covers American and foreign works.

CMS 04225: **Semantics** 3 s.h.
Prerequisites: 30 credits required
This course makes students aware of the relationship between language and human behavior and of the use and abuse of verbal and non-verbal language. It emphasizes meaning, the classification and abstraction processes and the application of semantic principles to the language of literature, politics, advertising and prejudice.

CMS 04250: **Communication Theory** 3 s.h.
Prerequisites: COMP 01112 or ENGR 01201 or permission of instructor
This sophomore-level course acquaints students with current theories as they apply to a variety of communication environments. Drawing upon a wealth of timely research, students study theories relating to interpersonal, small group, organizational, public and mass communication. The course presents theories through readings as well as extensive class discussion.

CMS 04290: **Rhetorical Theory** 3 s.h.
Prerequisites: COMP 01112 or ENGR 01201
Rhetorical Theory introduces students to the concept of rhetoric and how it has been theorized from antiquity to the present. The course provides students with a systematic history of rhetorical theory and spotlights significant theorists such as Plato, Aristotle, Cicero, Blair and Burke. Students will explore how both ancient and contemporary theories of rhetoric apply to contemporary society.

CMS 04315: **Participatory Media** 3 s.h.
Prerequisites: COMP 01112
This course examines the social, economic and political implications of the use of participatory media, which enable audience participation in the production of mediated messages. Students taking this course will study network theory, the historical roots of the participatory culture, collective action and social networking, convergence, and the changing modes of media production. Students will also study legal and social justice issues related to these evolving trends in media use.
Course Descriptions

CMS 04325: Linguistics 3 s.h.
Students study the nature of human language by examining four major components: phonology, semantics, syntax, and morpholgy. Linguistics principally emphasizes linguistic universals, characteristics which all human languages share. Students discuss dialect formation, first-language acquisition in children, and animal communication systems. Students also compare modern linguistic theories.

CMS 04575: Advanced Special Topics In Communication Studies 3 s.h.
Advanced Special Topics in Communication Studies allows students the opportunity to study a specific area of the field of communication studies with great depth. Course topics change as new trends develop and as student interest necessitates scheduling. Topics are selected on the basis of timeliness and the availability of expert staff. General topics are announced as the course is scheduled. Permission of instructor is required for undergraduate enrollment so that adequate preparation for course topic can be ascertained. This course is not offered annually.

CS 01102: Introduction To Programming 3 s.h.
This course acquaints students with the logical structure of a computer, the algorithmic formulation of problems, and a modern high-level programming language. Extensive programming experience is included in the course. Proficiency equivalent to Basic Algebra II (MATH01.199) is expected for this course.

CS 01104: Introduction To Scientific Programming 3 s.h.
This course emphasizes algorithmic solutions of problems. The syntax of the programming language is also studied, as well as the writing of structured code. Proficiency equivalent to Basic Algebra II.

CS 01501: Essentials of Computer Science 3 s.h.
Prerequisite(s): None
In this course the students will be exposed to a broad-scope review of essential topics in the area of computer science. The students learn main principles of programming and software development, key data structures and algorithms and will be exposed to selected topics in such areas of computer science as theory of computation, formal methods, artificial intelligence, databases and data management, computer architecture, operating systems, data communications, and others.

CS 01541: Bioinformatics - Advanced Computational Aspects 3 s.h.
Prerequisite(s): graduate student status
This course introduces the advanced student to the computer hardware, software, algorithms and statistical packages that are used in computational aspects of bioinformatics. Hardware topics include multiprocessor clusters, high performance computing, and parallelism. Software topics include message passing and shared memory styles of parallel/concurrent programming languages, databases, available software packages, and visualization techniques for large data sets. Algorithms and statistical packages include those for the study of molecular biology, evolution, structural biology, and biological networks. Students will design and carry out an independent research project using and developing appropriate bioinformatics algorithms, software and/or hardware. Undergraduate preparation in Calculus, Statistics (preferably Biostatistics), and Introduction to Computer Programming is strongly suggested.

CS 01541: Bioinformatics - Advanced Computational Aspects 3 s.h.
Prerequisite(s): graduate student status
This course introduces the advanced student to the computer hardware, software, algorithms and statistical packages that are used in computational aspects of bioinformatics. Hardware topics include multiprocessor clusters, high performance computing, and parallelism. Software topics include message passing and shared memory styles of parallel/concurrent programming languages, databases, available software packages, and visualization techniques for large data sets. Algorithms and statistical packages include those for the study of molecular biology, evolution, structural biology, and biological networks. Students will design and carry out an independent research project using and developing appropriate bioinformatics algorithms, software and/or hardware. Undergraduate preparation in Calculus, Statistics (preferably Biostatistics), and Introduction to Computer Programming is strongly suggested.

CS 04103: Computer Science And Programming 4 s.h.
This course emphasizes programming methodology, algorithms and simple data structures. A programming language rich enough to allow easy implementation of data structures is studied. Prior programming experience in any programming language is expected for this course.

CS 04113: Introduction To Object Oriented Programming 4 s.h.
Prerequisites: MATH 01122 or MATH 01123 or MATH 01130
This course introduces the fundamental concepts of programming from an object-oriented perspective. Topics are drawn from classes and objects, abstraction, encapsulation, data types, calling methods and passing parameters decisions, loops, arrays and collections, documentation, testing and debugging, exceptions, design issues, inheritance and polymorphic variables and methods. The course emphasizes modern software engineering and design. Proficiency equivalent to Basic Algebra (MATH 01.199) expected for the course.
Course Descriptions

CS 0414: Object Oriented Programming And Data Abstraction 4 s.h.
Prerequisites: CS 04113 or (CS 04103 and CS 04112)
Objects and data abstraction continues from Introduction to Object-Oriented Programming to the methodology of programming from an object-oriented perspective. Through the study of object design, this course also introduces the basics of human-computer interfaces, graphics, with an emphasis on software engineering. A second operating system/programming platform is introduced.

CS 0422: Data Structures And Algorithms 4 s.h.
Prerequisite(s): CS 04114 (C- or better) and MATH 03.160 or MATH 03.150
This course features programs of realistic complexity. The programs utilize data structures (string, lists, graphs, stacks, trees) and algorithms (searching, sorting, etc.) for manipulating these data structures. The course emphasizes interactive design and includes the use of microcomputer systems and direct access data files.

CS 0425: Principles of Data Structures 3 s.h.
Prerequisites: (CS 04103) or (CS 04113).
The course features programs of realistic complexity. The programs utilize data structures (strings, lists, graphs, stacks) and algorithms (searching, sorting, etc.) for manipulating these data structures. The course emphasizes interactive design and includes the use of microcomputer systems and direct access data files.

CS 04315: Programming Languages 3 s.h.
Prerequisites: (CS 04222 or CS 04225) and (CS 06205 or/and CS 06.205)
A study of the fundamental principles underlying the design of programming languages. Students will study two or more languages from contrasting programming paradigms such as Functional, Object-Oriented, Logical, or Concurrent.

CS 04390: Operating Systems 3 s.h.
Prerequisites: CS 04222 and CS 06205
The course concentrates on the design and functions of the operating systems of multi-user computers. Its topics include time sharing methods of memory allocation and protection, files, CPU scheduling, input-output management, interrupt handling, deadlock and recovery and design principles. The course discusses one or more operating systems for small computers, such as UNIX.

CS 04400: Computer Science - Senior Project 3 s.h.
Prerequisites: CS 04315 and CS 07340
This is an advanced programming course in which students work on large-scale individual or team programming projects and make a formal presentation on their work. The course discusses program development, methodologies and strategies.

CS 04505: ADVANCED WEB PROGRAMMING 3 s.h.
Prerequisites: CS 04530 or CS 04430
This course teaches students to create and modify sophisticated data-driven web pages using client-server architecture. Topics covered include non-text information such as video, images, sound, custom web applications, asynchronous communication, accessibility, searching, security, and web server configuration.

CS 04530: Advanced Database Systems: Theory And Programming 3 s.h.
This course focuses on the design of DBMS and their use to create databases. The course covers both the theoretical concepts and the implementation aspects of database systems with a special emphasis on relational database systems, SQL, programming (in a modern programming language such as C++ or Java) using a real database Application Programming Interface (such as JDBC or ODBC).

CS 04548: Programming Languages: Theory, Implementation And Application 3 s.h.
An intermediate course to acquaint the student with the major categories of programming languages and to familiarize the student with one or two languages in each category. The student will complete programming projects in the languages studied. In addition, the student will learn formal mechanisms for specifying the syntax and semantics of languages and techniques for implementing data and control structures.

CS 04560: DESGN/IMPLEMENT OPER SYSTEMS 3 s.h.
Design choices and implementation (algorithms and data structures) of the capabilities of a modern operating system, including processes, concurrency, multithreading, synchronization, multiprocessors, CPU scheduling, interrupt handling, deadlocks, memory management, secondary storage management, file systems, I/O, protection and security. Issues include simplicity, efficiency, abstraction, microkernel, monolithic, client-server, mechanism vs. policy, caching.

<td>3 s.h.</td>
</tr>
<tr>
<td></td>
<td>Prerequisite(s): CS 04422 and CS 04471</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Students will explore advanced topics in mobile application development. This course explores mobile application genres and the various development tools, languages and environments which are used to create them. The subject starts by requiring students to investigate the mobile application landscape and study some general purpose software development issues and techniques. It then requires each students to choose on of three implementation platforms: iOS (for Apple iPhone), .NET (for Windows Phone 7) or Java (for Android) and to study application development for that platform, implementing a modest application as a core requirement of their study. The subject concludes by looking, in theory, at the different deployment and distribution mechanisms used by mobile application vendors.</td>

<td></td>
<td>Students will explore advanced topics in mobile application development. This course explores mobile application genres and the various development tools, languages and environments which are used to create them. The subject starts by requiring students to investigate the mobile application landscape and study some general purpose software development issues and techniques. It then requires each students to choose on of three implementation platforms: iOS (for Apple iPhone), .NET (for Windows Phone 7) or Java (for Android) and to study application development for that platform, implementing a modest application as a core requirement of their study. The subject concludes by looking, in theory, at the different deployment and distribution mechanisms used by mobile application vendors.</td>

Course Descriptions

CS 06311: Digital Computer Laboratory 1 s.h.
Corequisites: CS 06310 Prerequisites: CS 06205
This lab course provides the student with hands-on experience in the design and implementation of digital components. State-of-the-art systems are used to design, test, and implement digital circuits: Combinational circuits, sequential circuits, registers, counters, datapath, arithmetic/logic units, control units, and CPU design. This course is taken concurrently with Principles of Digital Computers.

CS 06505: Wireless Networks And Systems 3 s.h.
Prerequisites: Acceptance into the Computer Science MS or BS/MS program
This course prepares students to understand wireless networks and systems, and the underlying communications technologies that make them possible. The course covers descriptive material on wireless communications technologies, and important deployed and proposed networks and systems. Wireless system performance and Quality of Service capabilities are addressed. Students will prepare and deliver technical presentations on state-of-the-art topics in wireless networks and systems.

CS 06510: Computer Networks 3 s.h.
Prerequisites: Acceptance into the Computer Science MS or BS/MS program
Students in this course study how computer networks work and why they have been designed as we know them. The course covers descriptive material on network architectures and protocols, as well as network performance evaluation and protocol implementation. The course topics include important examples of local, metropolitan and wide area networks; telephone, cellular and wireless networks; the Internet; network security; and design tradeoffs in network systems and their implementations.

CS 06512: Network Security 3 s.h.
This is a graduate level course that covers the fundamentals of network security and cryptology. The course will cover such topics as cryptographic systems necessary for security, public key infrastructure, principles of data integrity, authentication, and key management, Internet architecture and TCP/IP protocol suite, application layer security, secure sockets layer and transport layer security protocols, IPSec and distributed denial of service attacks. Students will prepare and deliver technical presentations on state-of-the-art research topics in network security.

CS 06515: Embedded Systems Programming 3 s.h.
Embedded software is used in almost every electronic device. This course deals with software issues that arise in embedded systems programming. Important concepts covered in this course will include device programming interfaces, device drivers, multi-tasking with real-time constraints, task synchronization, device testing and debugging, and embedded software development tools such as emulators and debuggers. These concepts will be applied to design and implement embedded software for one or more modest-sized embedded systems.

CS 06520: Topics In Computer Architecture 3 s.h.
Students in this course will study the various performance enhancement techniques and more advanced architectural features of modern computer systems. The topics include DMA, I/O processor, RAID, cache memory, virtual memory, pipelining, RISC, superscalar processors and various advanced parallel architectures such as array processors, vector processors, shared-memory multiprocessors, and message-passing multicomputers. Students will complete independent research projects that may include detailed examination of one or two contemporary computers.

CS 07210: Foundations Of Computer Science 3 s.h.
Prerequisite(s): C- or better in (MATH 03160 or MATH 03150) and one of the following: CS 01102, CS 04103, CS 01104 or CS 04113
This course provides an introduction to the theoretical foundations of computer science, including finite automata, context-free grammars, Turing machines, and formal logic.

CS 07321: Software Engineering I-Writing Intensive 3 s.h.
Prerequisites: (CS 04.222 or CS 04.225) and (COMP 01.112 or ENGR 01.201) and (CMS 06.202 or ENGR 01.202)
An introduction to the discipline of Software Engineering. Students will explore the major phases of the Software Lifecycle, including analysis, specification, design, implementation, and testing. Techniques for creating documentation and using software development tools will be presented. Students will gain experience in these areas by working in teams to develop a software system. Proficiency in programming is expected of the students entering this course.

CS 07340: Design And Analysis Of Algorithms 3 s.h.
Prerequisites: CS 04.222 and CS 07210
In this course, students will learn to design and analyze efficient algorithms for sorting, searching, graphs, sets, matrices, and other applications. Students will also learn to recognize and prove NP-Completeness.
CS 07422: Theory Of Computing 3 s.h.
Prerequisites: CS 04222 and MATH 01131 and CS 07210
This is an advanced course in the theoretical foundations of computer science, building on the introduction provided in the Foundations of Computer Science course. It studies models of computers, such as finite automata and Turing machines, formal languages, and computability, as well as the fundamentals of complexity theory and NP-completeness.

CS 07522: Advanced Theory Of Computing 3 s.h.
This course builds on the introduction to the theory of computing provided in the course Foundations of Computer Science. It discusses finite automata, formal languages, Turing Machines, and computability theory at an advanced level.

CS 07523: ADV SOFTWARE ENGINEERING 3 s.h.
Prerequisites: Acceptance into the Computer Science MS or BS/MS program
Students will apply their knowledge from Software Engineering to develop an advanced software system, working in teams. The project will be taken through each of the major software development phases, and student teams will create appropriate deliverables for each phase. Advanced modern software engineering topics such as critical systems, real-time systems, formal specification and validation, and project management will be covered. Students will be required to complete in-depth assignments involving conference or journal papers from the software engineering literature.

CS 07524: Agiles Software Engineering 3 s.h.
Prerequisites: Computer Science graduate standing.
In this course students apply in-depth techniques and experience various roles incorporated into the agile software engineering methodology. An overview of each of the major software engineering phases is provided and then applied towards the development of faster and more adaptable software. Proficiency in programming is expected of the students entering this course. Students are required to complete in-depth assignments, read, summarize, and present recent journal papers from the agile software engineering literature, and prepare term papers with regard to an agile software engineering research topic.

CS 07530: Computer Science Thesis I 3 s.h.
In consultation with the instructor, students will identify and research a specific area of computer science or computer science education. Students will define a thesis project and develop a formal specification of their intended project for completion in Computer Science Thesis II.

CS 07531: Computer Science Thesis II 3 s.h.
Students will follow their formal project specification developed in Computer Science Thesis I to research a specific area of computer science or computer science education and produce a written thesis.

CS 07532: Computer Science Thesis III 3 s.h.
Prerequisite: CS 07330 AND CS 07531
Students will continue scholarly research that was being done in Computer Science Thesis II and produce a written thesis.

CS 07540: Advanced Design And Analysis Of Algorithms 3 s.h.
Students in this course will study efficient algorithms for sorting, searching, graphs, sets, matrices, and other applications, and will learn to design and analyze new algorithms. Students will also learn to recognize and prove NP-Completeness.

CS 07545: Advanced Robotics 3 s.h.
This course provides an introduction to the fundamentals of robotics. Students study robot manipulators and mobile robots, robot sensors and robot cognition. Students will also gain experience programming in small groups, and programming in a domain where noisy and imprecise data is commonplace. Familiarity with matrix multiplication and inversion is expected for this course.

CS 07550: Concepts In Artificial Intelligence 3 s.h.
Prerequisites: Acceptance into the Computer Science MS or MS/MS program
This course surveys methods for programming computers to behave intelligently. Topics include knowledge representation methods, heuristic search, theorem-proving, puzzle-solving, game-playing, natural language processing, and expert systems.

CS 07551: Advanced Cyber Security: Principles and Applications 3 s.h.
Prerequisite(s): None
This graduate course examines the principles of cyber security and will introduce students to a wide range of security activities, methodologies, and procedures. The topics covered in the course include fundamental concepts of computer security: threats, attacks, and assets; principles of cryptography: encryption, decryption, authentication, and non-repudiation; software security and trusted systems: developing secure software, buffer overflow attacks, operating system issues, trusted systems; network security: intrusion detection, firewalls and intrusion prevention systems, distributed denial-of-service attacks, malicious software, protocols for network security; as well as other topics.
CS 07551: Advanced Cyber Security: Principles and Applications 3 s.h.
Prerequisite(s): None
This graduate course examines the principles of cyber security and will introduce students to a wide range of security activities, methodologies, and procedures. The topics covered in the course include fundamental concepts of computer security: threats, attacks, and assets; principles of cryptography: encryption, decryption, authentication, and non-repudiation; software security and trusted systems: developing secure software, buffer overflow attacks, operating system security, trusted systems; network security: intrusion detection, firewalls and intrusion prevention systems, distributed denial-of-service attacks, malicious software, protocols for network security; as well as other topics.

CS 07552: Cryptographic Algorithms 3 s.h.
Prerequisite(s): None
This graduate course examines the advanced topics in the field of cryptography. The course will introduce students to a wide range of topics ranging from mathematical foundations to designing cryptographic algorithms. The topics covered in the course will include the Data Encryption Standard (DES), Advanced Encryption Standard (AES), RSA cryptosystem, ElGamal cryptosystem, elliptic curve cryptosystem, integrity, authentication, and key management, cryptographic has functions, digital signatures, entity authentication, key management, Kerberos, and others.

CS 07555: Natural Language Processing 3 s.h.
This course presents methods for allowing computers to understand and generate sentences in human languages (such as English) and prepares the student to do research in natural language processing. Topics include syntax, semantics, pragmatics, and knowledge representation.

CS 07556: Machine Learning 3 s.h.
This course presents problems and solution methods for machine learning in a variety of contexts, such as inductive inference, statistical learning, explanation-based learning, genetic algorithms, and neural networks, and prepares the student to do research in this field.

CS 07560: Computer Graphics 3 s.h.
Prerequisites: Acceptance into the Computer Science MS or BS/MS program
This is a graduate level course in Computer Graphics. Students will study the use and implementation of graphics packages. Techniques and algorithms for implementing graphics systems will be covered. They include drawing of 2-D primitives, 2- and 3-D transformation and viewing; representing curves and surfaces; hidden line and surface removal; illumination and shading. Substantial programming projects on writing graphics applications and implementing graphics algorithms will be assigned. Students are encouraged to devise new techniques, implement them, and determine their effectiveness. Students will be required to complete in-depth assignments involving conference or journal papers from the computer graphics literature.

CS 07565: Computer Vision 3 s.h.
This course examines the fundamental issues in computer vision and major approaches that address them. The topics include image formation, image filtering and transforms, image features, mathematical morphology, segmentation, and object recognition. More advanced topics such as camera calibration, stereopsis, dynamic vision, and computer architectures for vision will also be covered. Independent projects on these advanced topics will be required.

CS 07570: INFORMATION VISUALIZATION 3 s.h.
This is a graduate level course in Information Visualization. Topics covered include graphics programming, information visualization general principles, visualization techniques for 1-dimensional, 2-dimensional, and N-dimensional information, graph visualization, visualization techniques for image and digital libraries, as well as for the World Wide Web, interactivity, theories behind information visualization, and focus+context techniques. This course also includes the implementation of techniques presented in lecture. Students are encouraged to devise new techniques, implement them, and determine their effectiveness. Students will be required to complete in-depth assignments, read, summarize, and present recent journal papers from the information visualization literature, and prepare term papers with regard to an information visualization research topic. Students will also be required to specify, design, implement, and document a semester-long software project related to information visualization.
This course is intended to provide information for students aspiring to academic positions and to consider issues of access, success, and equity. The readings, discussions, and assignments will provide students with relevant skills and understanding of current research, models, and perspectives. This course will also include selected topics on network security and network management. Students will prepare and deliver technical presentations on state-of-the-art research topics in the field.

---

**Course Descriptions**

**CS 07575:** Advanced Tcp/Ip And Internet Protocols And Technologies 3 s.h.

*Prerequisites: Acceptance into the Computer Science MS or BS/MS program*

This is an advanced computer networking course that will expand students' knowledge in the Data Communications and Networking course. This course will examine operation of the TCP/IP protocol as well as design and architecture of the Internet. This course will cover such topics as: medium access protocols, address resolution protocols, Internet routing, Internet Protocol (IP), Quality of Service, Transport Protocol, and congestion control mechanisms. This course will also include selected topics on network security and network management. Students will prepare and deliver technical presentations on state-of-the-art research topics in the Internet.

**CS 07580:** COMPUTER ANIMATION 3 s.h.

*Prerequisites: Acceptance into the Computer Science MS or BS/MS program*

This is a graduate level course in Computer Animation that takes a look at Computer Animation from a programmer's perspective. It will investigate the theory, algorithms, and techniques for describing and programming motion for virtual 3D worlds. Approaches that will be explored include keyframing systems, kinematics, motion of articulated figures, and procedural and behavioral systems. Students will be required to complete in-depth assignments, read, summarize, and present recent journal papers from the computer animation literature, and prepare term papers with regard to a computer animation research topic. Students will also be required to specify, design, implement, and document a semester-long software project related to computer animation.

**CS 07590:** Computer Game Design And Development 3 s.h.

*Prerequisites: Acceptance into the Computer Science MS or BS/MS program*

This is a graduate level course that investigates advances in technology, science, art, and culture involved in the creation of computer games. Games will be examined in a systems context to understand gaming and game design fundamentals. Students will be required to complete in-depth assignments and present recent conference or journal papers from the computer gaming and game design fundamentals. Students will be required to complete in-depth assignments and present recent conference or journal papers from the computer gaming literature. Extensive study of past and current games will be used to illustrate course concepts. Students will also be required to specify, design, implement, and document a semester-long software project related to computer animation.

**CS 07595:** Advanced Topics In Computer Science 1 to 4 s.h.

This course enables the faculty to offer courses in advanced topics which are not offered on a regular basis. Prerequisites will vary according to the specific topic being studied.

**INTR 01265:** Computers and Society 3 s.h.

*Prerequisite(s): COMP 01112 or HONR 01112 or ENGR 01201*

This interdisciplinary course focuses on the effects of computer systems on individuals and institutions. How computer systems are developed and operated will be related to an analysis of current trends in society. Ethical, legal, security, and social issues stemming from the use of computers in society will be discussed in the context of philosophical frameworks and professional codes of ethics including those of the Association for Computing Machinery. Students are expected to compose reflective papers on such topics.

**CASE 90800:** Current Issues & Research in Access, Success, & Equity in Education 3 s.h.

The purpose of this course is to provide students with an in-depth exploration of the current issues and research surrounding access, success, and equity in P-20 contexts. Students will gain a broad understanding of issues related to the current context of schools through an equity lens, understanding and operationalizing access, success, and equity; understanding diverse populations, systemic inequities, reform efforts, and theoretical frameworks appropriate for studying educational disparities. This course will provide students with relevant skills and understanding of current research, models, and considerations for working with issues of access, success, and equity. The readings, discussions, and assignments are intended to provide information for students aspiring to academic positions.
Course Descriptions

CASE 90801: Research Seminar in Access, Success, & Equity  3 s.h.
Prerequisites: CASE 90800
The purpose of this class is for students to develop as educational researchers. This course will facilitate the development
of doctoral students’ research ideas and build community among students and faculty. Under supervision, students will
engage in various stages of research activities and will learn how to effectively design, conduct, and disseminate results.

CASE 90802: Internship in the Academic Profession and Professoriate for Promoting Student Success  3 s.h.
Prerequisites: CASE 90800
The purpose of this course is for students to develop as reflective and effective post-secondary educators. Under
supervision, students will teach discipline specific courses while simultaneously reflecting on their experiences of teaching
adult students for equitable outcomes. Students will learn how to effectively design and implement curricula, use effective
instructional and technological strategies, use assessment to improve teaching, and formulate their own personal philosophy
of teaching.

CASE 90803: Equity, Success, and Access Educational Research  3 s.h.
Prerequisite: CASE 90801, CASE 90802.
This seminar is designed to support students approaching their third year in the preparation of dissertation proposal and to
facilitate the transition from coursework to dissertation. Students will learn about the dissertation process and develop a
plan for completing their dissertation. Each student will prepare a concept paper that frames their dissertation ideas, with
emphasis placed on the logical relations between elements. Course must be repeated.

CASE 90810: Quantitative Research Methods in Education  3 s.h.
Prerequisites: CASE 90800
This course provides an introduction to the examination of appropriate quantitative methods in applied educational
contexts. Students will learn data analysis strategies for education data with an emphasis on identification and interpretation
of findings.

CASE 90811: Multivariate Research Methods in Education  3 s.h.
Prerequisite: CASE 90810
The purpose of this course is to advance students’ statistical knowledge with multivariate statistical methods. The course
will highlight the implementation and interpretation of these methods. An emphasis will be placed on using statistical
methods that simultaneously analyze multiple measurements under investigation in an educational context.

CASE 90812: Qualitative Research Methods in Education  3 s.h.
Prerequisite: CASE 90800
This course introduces students to qualitative research as an approach to exploring and understanding problems of access,
success, and equity. This course is required of all PhD students because it lays the foundation to rigorous qualitative
empirical research. Beginning with questions of epistemology and an interrogation of competing paradigms, it supports the
goals of the program, college, and university by requiring students examine their stance as they undertake research in key
areas of access, success, and equity. At the completion of this course students will have fully conceptualized and carried out a
qualitative study and written a research paper that can be submitted to a conference.

CASE 90813: Survey Methods in Education  3 s.h.
Prerequisite: CASE 90811
The purpose of this course is for students to examine the major elements involved in planning, conducting, and reporting
survey research. An emphasis will be placed on the design, instrumentation, data analysis, and interpretation of survey
research.

CASE 90814: Advanced Qualitative Research Methods in Education  3 s.h.
Prerequisite: CASE 90812
This course emphasizes a critical interpretivist approach to qualitative inquiry. It examines critical approaches to research
by focusing on contemporary educational problems related to access, equity, and success. This course builds upon
Qualitative Research 1 through the exploration of strategies of inquiry, using qualitative data analysis software, and
presenting qualitative research.

CASE 90815: Single Subject Study Design in Education  3 s.h.
Prerequisite: CASE 90811
This course provides the students with a basic knowledge of the theoretical bases and methodological procedures of single
subject experimental designs. In this course, content includes variety of single subject research designs, procedures in single
subject research, and evaluation of single subject research findings applied in an educational context.
CASE 90816: Mixed Methods Research Methods in Education 3 s.h.
Prerequisite: CASE 90810, CASE 90812
This course is an advanced research seminar on approaches to integrating qualitative and quantitative approaches, methods, and data in a single study. The course covers the assumptions and “mental models” that inform both approaches, and the ways in which qualitative and quantitative goals, questions, methods, analysis strategies, and presentation styles can be productively integrated.

CASE 90817: Experimental Design Research Methods in Education 3 s.h.
Prerequisite: CASE 90811
This course provides the students with a basic knowledge of the theoretical bases and methodological procedures of experimental and quasi-experimental designs applied to educational problems involving access, equity, and success. Course content includes experiments and generalizability, causal inference, statistical conclusions, validity & internal validity, introduction to statistical power/design sensitivity, construct validity, and external validity, quasi-experimental designs, interrupted time series designs, regression discontinuity designs, randomized experiments, and generalized causal inference from single and multiple studies.

CASE 90820: Advocacy, Leadership, and Professional Issues in Counselor Education 3 s.h.
The purpose of this course is to provide advanced graduate student an orientation to counselor education with an understanding of a variety of professional development issues (e.g., research, teaching, consultation, and service). Students will acquire an in-depth understanding of ethical standards of the counseling profession and its application to counselor practice and counselor education. Students will also acquire leadership theory, leadership practice, and advocacy knowledge and skills to help further students, clients, and the counseling profession.

CASE 90821: Advanced Practicum in Counseling for Equitable Career & College Readiness 3 s.h.
Prerequisite: CASE 90820
This course provides advanced graduate students an opportunity to advance to demonstrate and develop counseling skills specifically related to college and career readiness utilizing ethical and culturally relevant counseling practices.

CASE 90822: Advanced Theories of Indiv & Group Coun for Academic, Soc/Emot, & Career Development 3 s.h.
Prerequisite: CASE 90820
This course specifically provides students the opportunity to advance their individual and group counseling skills specifically in the areas of academic, social/emotional, and career development. Students will increase their knowledge based of theories, skills, evidence-based practices, and methods of evaluation counseling effectiveness in both individual and group counseling.

CASE 90823: Supervision in Counselor Education 3 s.h.
Prerequisite: CASE 90821
The purpose of this course is to familiarize students with conceptual, ethical, and methodological issues regarding the supervisory process in the counseling profession. Students will be able to develop and synthesize an ethical and culturally relevant personal approach of implementing counselor supervision that can be applied to a present and/or future setting.

CASE 90824: Adv Theories in Family & Systems Coun, Consul, & Comm Engagement for Ed Access 3 s.h.
This course specifically provides students the opportunity to advance their counseling knowledge, skills, and evidence-based practices specifically in the areas of family and systems counseling, consultation, and community engagement through the lens of educational access for all K-20 students.

CASE 90825: Practicum in Supervision for Counselor Education 3 s.h.
Prerequisite: CASE 90823
This course is intended to assist counselor education doctoral students to apply current supervision facts, concepts, and research in a counseling practicum setting. Furthermore, the course will provide opportunities for experiential learning and skill development in an applied supervisory setting and will enable students to synthesize a personal approach to counselor supervision. This approach will develop out of an integration of knowledge (based on theory) and experience, which can then be applied to a future work setting as a facilitating reflective practitioner.

CASE 90826: Advanced Assessment & Program Evaluation Procedures in Counseling for Access, Equity & Success 3 s.h.
This course extends students’ knowledge of the theoretical basis for assessments and assessment techniques used in different counseling settings through a social justice lens. Students will also take an in-depth look at methods of evaluating counseling effectiveness, including the assessment methods used in course development and learn how to conduct program evaluations of counselor education programs.
Introduction to Postsecondary Education
3 s.h.
The purpose of this course is to provide students with an introduction to the research, theoretical, and practical issues surrounding access to college and equity in postsecondary education institutions. Specifically, it aims to teach students to think critically about access and equity issues related to racial/ethnic minority groups and socioeconomic status. Major themes include: affirmative action, college choice, community colleges, financial aid.

Organizational Analysis & Administration of Postsecondary Education
3 s.h.
Prerequisite: CASE 90830
This course introduces students to colleges and universities as large, complex organizational systems. Conceptual models for understanding their structures, contexts, and interactions with the broader environment are explored. Major themes include: organizational theory and analysis; the organizational and governance structures in postsecondary education; different models in postsecondary education including two-year and four-year college, public and private colleges, and new developments in the for-profit sector.

International & Comparative Higher Education
3 s.h.
This course explores key constructs, theories, and issues in international higher education, using comparative techniques. Students will explore contemporary educational problems related to access, equity, and success. Students will also consider the complexities of globalization and international policy flows for the reform, practice, and organization of higher education.

Public Policy & Analysis in Postsecondary Education
3 s.h.
Prerequisite: CASE 90830
This course introduces students to the policy process affecting American postsecondary education. This course will explore current policies that influence colleges and universities and their students. Specific policy topics including access, equity, finance, and accountability policies in the postsecondary context.

Student Learning & Development: Impact of Postsecondary Education
3 s.h.
Prerequisite: CASE 90830
The purpose of this course is to provide students with an in-depth exploration of the current theory and conceptual frameworks utilized in research focused on students' learning and development while in college and the impact of college on learning and development. The course foci include: the methodology of studying college impact; conceptual models of student development and the impact of college; learning and cognitive development; moral development; and conducting research on educational attainment, career and economic benefits, and quality of post college life.

Assessment & Evaluation in Postsecondary Education
3 s.h.
Prerequisite: CASE 90830
This course introduces students to the process of program development, change, improvement and evaluation for postsecondary education. It furthers’ students' knowledge of the theoretical basis for assessment and evaluation. Students will learn how to cultivate a culture of inquiry that uses data as an opportunity for exploring equity in programs and broader organizational contexts and developing solutions to improve performance.

Theoretical Perspectives in the Study of Literacy
3 s.h.
Prerequisites: Admittance to the PhD program (D800)
This course examines influential theories and research that address the broad and continually evolving knowledge-base in literacy. Candidates analyze foundational and cutting edge studies in the field of literacy and consider how leading and often competing reading theories developed over time as well as how seminal research studies were conducted and considered by scholars, practitioners and policy makers. The course emphasizes the ways in which a personal belief system impacts a theoretical orientation to practice and/or research. In addition, the course will focus on research propelling current conversations in the literacy field. Topics explore how the definitions, purposes and practices of literacy often depend on characteristics having to do with language, class, gender, print verses electronic text, and contextual considerations such as in-school verses out-of-school settings or local verses federal policy.

Transliteracy and Translingualism
3 s.h.
Prerequisites: CASE 90840
This course focuses on transliterate and translingual theories, pedagogies, and policies in K-12 classrooms. Candidates will understand the history of literacy, and the inter-relationship of literacy, context, and culture. It explores how many languages and the power of multiple languages comes into use to communicate and to gain access in a more global world. The course also emphasizes research on current conversations in the field of printed literacy. Finally, students will be able to define what it means to be trans-literate in the 21st century.
CASE 90842: Multicultural & Multilingual Issues in Literacy Education 3 s.h.
Prerequisites: CASE 90840
This course explores multicultural and multilingual issues in local and global educational and societal contexts. Being more common than not, multilingualism exists across the globe in a variety of contexts; students will explore studies in both local and global instances that demonstrate how people negotiate their multilingualism to achieve access and success. Students will draw connections between local to global language issues, and how, at times, the issue is resolved in one context but not the other. Finally, the course focuses on what research in multilingualism means for schools, classrooms, teachers, and teacher educators.

CASE 90843: Literacy as Practice In & Outside of School 3 s.h.
Prerequisites: CASE 90840
This course investigates literacy practices that occur in a range of institutions and social spaces with an interest in expanding conceptions of what counts as literacy. This course introduces students to an array of theoretical frameworks within which contemporary scholars define, study, and explain literate actions as simultaneously individual and collective. These traditions include but are not limited to: critical literacy; socio-cultural theories; activity theory; ethnography of communication; technologically mediated literacies; narrative theories. Tensions between school curriculums and students' out-of-school literacy practices are discussed with emphasis on research as a means to transform school spaces, creating greater success and equity.

CASE 90844: First & Second Language Acquisition 3 s.h.
Prerequisite: CASE 90840
This course examines the theoretical bases and research perspectives on second language acquisition and linguistic diversity in the United States. This course will prepare doctoral students to be able to critically review theories and research on first and second language acquisition and linguistic diversity, select appropriate assessments when conducting research in the field, understand the unique features of second language acquisition that influence language and literacy development, and identify the social and cultural contexts that influence language and literacy development and the success and equity of school learning in general and how to account for this variance in research design.

CASE 90845: The Pedagogy of Literature for Children & Adolescents 3 s.h.
Prerequisite: CASE 90840
This course is an introduction that examines literature used in schools through literacy theories, children's literature, and empirical research that address current theoretical discussions. Candidates will be able to define what is children's literature. In addition, they will examine how literacy theory helps to understand children's literature. They will also look at empirical research on reader response and discover ways it informs pedagogy and creates greater equity in P-12 classrooms.

CASE 90846: Sociolinguistics & Discourse Analysis in Literacy Studies 3 s.h.
Prerequisite: CASE 90840
This is an in-depth study of language and literacy practices in its social context, especially educational contexts. The courses emphasize how language and literacy practices produce an inequitable world, but also how language and literacy can be used to change this inequity. The course will survey various research approaches in literacy studies, including linguistic ethnography and discourse analysis. We will consider the underlying theories guiding these approaches and apply these to data analysis in literacy contexts.

CASE 90850: Access, Success & Equity in Special Education 3 s.h.
This course focuses on historical and contemporary issues of access, success and equity in the field of special education. Students will examine evolving changes in perceptions toward and services for individuals with exceptional learning needs. In addition to investigating multiple contemporary issues in the field of special education, students will prepare an extensive analysis of one current issue affecting individuals with exceptional learning needs and articulate implications that support improved access, success and equity for all persons.

CASE 90851: Research to Practice in Special Education 3 s.h.
Prerequisite: CASE 90850
This course focuses on contemporary research methods and practices in special education. Students will examine how research can change practice and what is needed in order to implement research-based findings in education settings. Students will identify an area of research and prepare an extensive review of the literature that illustrate the development of this research and its impact on special educational practices as well as the impact on access, success, and equality for all persons.
CASE 90851: Research to Practice in Special Education  3 s.h.
Prerequisite: CASE 90850
This course focuses on contemporary research methods and practices in special education. Students will examine how research can change practice and what is needed in order to implement research-based findings in education settings. Students will identify an area of research and prepare an extensive review of the literature that illustrate the development of this research and its impact on special educational practices as well as the impact on access, success, and equality for all persons.

CASE 90852: Program Evaluation & Planning in Special Education  3 s.h.
Prerequisite: CASE 90850
This course will enable students to identify and develop effective models for evaluating the success of special education programs, including their success in meeting the goal of access, success, and equity for all individuals. Students will study evaluation approaches and formative and summative assessment models that contribute to program evaluation, with a focus on developing a management/decision-oriented evaluation plan. A field experience is a mandatory component of this course. The major course assignment will require students to develop an evaluation plan, complete the program evaluation in their field placement, and report evaluation findings to stakeholders. This course serves as a practicum for the conceptualization and development of a doctoral research study that employs a program evaluation model.

CASE 90853: Leadership, Policy, & Ethics in Special Education  3 s.h.
Prerequisite: CASE 90850
This course will focus on contemporary issues related to leadership, policy, and ethics in special education with a focus on access, success, and equity for students with exceptional learning needs. This course will enhance students’ knowledge of the laws and policies that govern special education. In addition, students will study the role that leaders can play in implementing and supporting effective programs through collaboration and professional learning communities. Case studies will be used for students to analyze and evaluate the decisions of educational leaders in the context of ethical practice, the law, and the best practice literature on leadership and collaboration.

CASE 90854: Personnel Preparation & Effective Teaching in Special Education  3 s.h.
Prerequisite: CASE 90850
In this course, students will explore current issues and research in personnel preparation for special education, including issues of access, success, and equity, to prepare them to become educational researchers, competent in turning research into practice across a range of education settings. Effective school-based models and relevant theoretical perspective that support diverse learners will be addressed. As the major course assignment, candidates will develop and present a college-level course proposal on a relevant contemporary issue and evaluate/offer constructive feedback to others on the extent to which each course proposal supports instructional needs of students with exceptionalities.

CASE 90855: Evidence Based Practices in Special Education  3 s.h.
Prerequisite: CASE 90850
The use of evidence-based practices is at the core of successful practice in special education. In this course, students will examine the concept of evidence-based practice as it has evolved in fields such as medicine. They will also examine the challenge of developing and using evidence-based practices in special education. Emerging technology-based practices will be a focus of this course. Students will be challenged to apply their knowledge of cognitive and behavioral science, learning theory, and instructional technologies to improve programs, services, and supports to ensure access, success, and equity for all students.

CASE 90856: Current Issues in Special Education  3 s.h.
Prerequisite: CASE 90850
This course focuses on contemporary issues in the field of special education. Students will select one or two important topics to study through research review, and lead discussions of the study with peers. Students are required to develop a conference proposal and submit for a presentation. A grant application collaborating with the course instructor and other students is also required.

CASE 90890: Dissertation Research  3 s.h.
Prerequisite: CASE 90803
This course is designed for students in the PhD in Education program who are completed with coursework. Students who are working on the dissertation must enroll in this course. Students will take up to 21 credits total.

COUN 26501: Introduction To Counseling And Guidance  3 s.h.
This course provides a comprehensive, introductory overview of the profession of school counseling. It provides students with the philosophical and historical perspectives that serve as a foundation for the school counseling profession. The course also addresses current professional issues such as legislation, associations, certification, licensure, and accreditation. In addition, information will be provided as to the diversity of roles, job outlook, and specializations within the counseling field.

COUN 26601: Internship In Counseling In Educational Settings 3 s.h.
Prerequisites: COUN 26520 and COUN 26509 and COUN 26526 and COUN 26501 and COUN 26527 and COUN 26582
Internship I in Counseling/Student Personnel Services is one of the culminating field-based experiences for matriculated students taken during the final Fall semester of one's program. Students spend a minimum of 300 clock hours throughout each semester at their selected internship site for a maximum of 600 clock hours in one academic year. Emphasis is placed upon gaining direct experiences and actually participating in all phases of student services. Internship students work under the direction of an on-site mentor, and a college-faculty supervisor. Internship students attend topical seminars on campus.

COUN 26603: Research And Evaluation Procedures In Counseling In Educational Settings 3 s.h.
Prerequisites: COUN 26520 and COUN 26509 and COUN 26526 and COUN 26501 and COUN 26527 and COUN 26582
Research and Evaluation Procedures in Educational Settings will provide opportunities for students to conduct focused inquiry and to generate knowledge around those factors germane to the field of counseling. During this course, students will begin an action research thesis project focusing on school-counseling program reform, with emphasis on systems change processes, needs assessment, goal setting, and data gathering processes.

COUN 26605: Special Topics in Counseling in Educational Settings 1 to 3 s.h.
This course is a series of three 1 Semester Hour seminars designed to explore and discuss current issues in counseling. Selected topics include adventure learning, (ropes course), loss and bereavement, communicating for intimacy, and existential thought and spirituality.

CURR 29503: Teaching Adult Learners 3 s.h.
The general purpose of the course is to help participants become better instructors of adults. The course focuses on proven methods and techniques for teaching adults in a variety of settings. Special attention will be paid to the individualizing instruction process. Course participants will strengthen both theoretical and practical understandings of the adult learning process, study methods and techniques for teaching adults, and critically reflect on their own instructional efforts.

CURR 29504: Understanding Adult Learning And Development 3 s.h.
The general purpose of the course is to introduce participants to the processes of adult development and learning. The course examines the social, psychological, economic, and cultural dimensions of learning in adulthood as well as the application of theory and research findings to adult learning situations. Special attention will be paid to the concept of learning how to learn. Course participants will be invited to undergo a series of thinking style and learning style profile tests and then analyze the results in an effort to improve learning performance.

EDAM 27505: Selected Topics In Educational Leadership 1 to 6 s.h.
This course explores one or more topics of importance in the field of educational leadership. The focus will be different each time that the course is offered.

EDAM 27510: Change For School Improvement 3 s.h.
This advanced course in school leadership enables students to better understand the change process, further developing their analytic skills for improving the teaching and learning process. This course is offered annually and includes a field experience component.

EDAM 27521: Introduction To The Principalship 3 s.h.
The essence of school administration is the ability to supervise and manage the school organization, including its personnel, resources, and operations. In this course, students learn and demonstrate the supervisory and management skills necessary to use data-driven decision-making strategies to create an effective school culture and climate, supervise and manage school personnel and plant, supervise the application of instructional and informational technology, supervise scheduling and business procedures, and advocate for school resources among community and service agencies in ways that give priority to student learning, safety and security, and curriculum and instruction. Effective communications skills are emphasized.

EDAM 27525: INDEP STUDY-ED LEADERSHIP 1 to 6 s.h.

EDAM 27535: School Finance And Records 3 s.h.
Students learn and demonstrate the ability to develop budgets, apply principles of financial management, budget management. Students study how schools are supported financially. This course includes a field experience component.
EDAM 27536: Financial Accounting For School Systems 3 s.h.
This course will provide students with the knowledge and skills required to initiate and maintain a school district accounting program. The course will emphasize--but not be restricted to--the laws and procedures relative to New Jersey school accounting. This course includes a field experience component.

EDAM 27538: School Business Management 3 s.h.
This course is designed to provide graduate students with an introduction to the skills, concepts, and insights necessary for the school business administrators to manage, as members of the administrative team, increasingly complex schools to obtain the greatest educational return for each tax dollar expended. This course includes a field experience component.

EDAM 27559: Law And Ethics For School Leadership 3 s.h.
Students study and understand and demonstrate the ability to identify legal issues involved in personnel administration, school district government and operation, state aid, handicapped children and student rights. Includes a study of the legal structure of the New Jersey school system.

EDAM 27600: Practicum/Seminar In Administration/Supervision I 3 s.h.
An administrative internship to reinforce and practice administrative and supervisory competencies, in cooperation with a school district, is required. Students apply human relations skills, apply decision-making skills, articulate ethical beliefs and values and apply various leadership theories. Students also demonstrate group process abilities such as shared decision-making, group motivation, conflict resolution, and planning and conducting effective meetings. A project report is required integrating research findings with selected field projects. Written and oral communication and community relations skills are emphasized.

EDAM 27601: Practicum/Seminar In Administration/Supervision II 3 s.h.
An administrative internship to reinforce and practice administrative and supervisory competencies, in cooperation with a school district, is required. Students apply human relations skills, apply decision-making skills, articulate ethical beliefs and values and apply various leadership theories. Students also demonstrate group process abilities such as shared decision-making, group motivation, conflict resolution, and planning and conducting effective meetings. A project report is required integrating research findings with selected field projects. Written and oral communication and community relations skills are emphasized.

EDAM 27610: Human Resources For School Systems 3 s.h.
Analyzes the legal developments and trends in collective negotiations in the public sector. Topics to be developed are the process of effective negotiations, organization rivalries, grievance procedures, the impasse and the comprehensive agreement. This course may not be offered annually. It includes a field experience component.

EDAM 27620: Legal Issues In Higher Education 3 s.h.
This course examines the legal principles that guide the administration of higher education. Students will study current and emerging legal issues in higher education, focusing primarily on student rights, student life, and general administration legal concepts.

EDAM 27621: Student Services In Higher Education 3 s.h.
This course traces the historical development of student services and examines the philosophy and rationale for current student services. Reflecting upon the demographic trends affecting higher education, students consider the extent to which the nature, scope, and delivery of services should be changed to meet emerging needs.

EDAM 27622: Planning And Resource Allocation In Higher Education 3 s.h.
This course will teach students practical approaches to strategic and operational planning in higher education, as well as how to develop budgets that are driven by institutional mission and that support the institutional plan.

EDAM 27623: Diversity In Higher Education 3 s.h.
The purpose of this course is to provide students with an in-depth exploration of diverse populations on college campuses. Students will utilize a broad view of diversity, including race, ethnicity, gender, religious and spiritual values, sexual orientation, socioeconomic status, disability status, and age, as well as unique characteristics of various ethnic and cultural groups that affect college students and campuses. This course will provide students with relevant skills and understanding of current theories, models, and issues within diverse populations and community building on diverse campuses. The readings, discussions, and assignments are intended to provide information for student affairs professionals, administrators, or faculty members.
EDAM 27623: Diversity In Higher Education 3 s.h.
The purpose of this course is to provide students with an in-depth exploration of diverse populations on college campuses. Students will utilize a broad view of diversity, including race, ethnicity, gender, religious and spiritual values, sexual orientation, socioeconomic status, disability status, and age, as well as unique characteristics of various ethnic and cultural groups that affect college students and campuses. This course will provide students with relevant skills and understanding of current theories, models, and issues within diverse populations and community building on diverse campuses. The readings, discussions, and assignments are intended to provide information for student affairs professionals, administrators, or faculty members.

EDAM 27624: College Admission And Transition 3 s.h.
Prerequisites: HIED 06605 or EDAM 27737 or COUN 26526 or COUN 26520
This course provides an overview of admissions processes in higher education in the United States and incorporates service learning to assist high school students' college search/application processes. Through the service learning experience, students completing the course will have a fuller understanding of issues in admissions, including diversity and equity issues, and how these issues affect students applying to colleges. The topics covered include the admission process, stratification in postsecondary attendance patterns, college counseling, service learning, establishing and maintaining appropriate relationships, as well as the role of reflection in service learning. Particular attention is paid to issues of campus diversity and equitable access to postsecondary education. The readings, discussions, and assignments are intended to provide information for student affairs professionals, school counselors, administrators, or faculty members. All students will be required to complete a fingerprinting and background check process.

EDAM 27625: Change In Higher Education 3 s.h.
This course will focus on the change process both theoretically and practically. Each student will undertake an action research project that will serve as the basis for the thesis. A complete first draft of the thesis will be required by the end of this course.

EDAM 27628: Seminar/Internship In Higher Education Administration I 3 s.h.
This course is the first of a two course sequence which is intended to serve as the capstone experience for the M.A. program in higher education. Students will utilize a workplace in a higher education setting as a laboratory to study the application of higher education administrative theory to practice and to begin work on a major capstone research project.

EDAM 27629: Seminar/Internship In Higher Education Administration II 3 s.h.
This course is the second of a two course sequence which is intended to serve as the capstone experience for the M.A. program in higher education. Students will utilize a workplace in a higher education setting as a laboratory to study the application of higher education administrative theory to practice and to complete work on a major capstone research project.

EDAM 27630: Academic Advising in Higher Education 3 s.h.
Prerequisite(s): None
This purpose of this course is to provide students with an in-depth exploration of academic advising on college campuses. Students will gain a broad view of the role and function of academic advising, including its essential role in student development, engagement, retention, and success. Specifically, students will learn about the historical development of academic advising; its current role in student development, success, and retention; the role of academic advising in the multiple academic setting (community colleges, four year universities, special mission institutions); and hot to assist students in planning their academic processes. This course will provide students with relevant skills and understanding of current research, models, and considerations for working with diverse and special populations. The readings, discussions, and assignments are intended to provide information for student affairs professionals, administrators, or faculty members.
Course Descriptions

EDAM 27630: Academic Advising in Higher Education 3 s.h.
Prerequisite(s): None
This purpose of this course is to provide students with an in-depth exploration of academic advising on college campuses. Students will gain a broad view of the role and function of academic advising, including its essential role in student development, engagement, retention, and success. Specifically, students will learn about the historical development of academic advising; its current role in student development, success, and retention; the role of academic advising in the multiple academic setting (community colleges, four year universities, special mission institutions); and hot to assist students in planning their academic processes. This course will provide students with relevant skills and understanding of current research, models, and considerations for working with diverse and special populations. The readings, discussions, and assignments are intended to provide information for student affairs professionals, administrators, or faculty members.

EDAM 27637: Higher Education Administration 3 s.h.
This course introduces students to the fundamentals of administration in the higher education setting. Topics include authority and power, implementation of institutional policy, decision-making in higher education, conflict resolution, staff supervision, and program assessment.

EDAM 27704: Changing Organizations 3 s.h.
This course focuses on the development of leadership skills that will provide students with the ability to implement change in schools and colleges. Specific topics will involve students in the study of organizational and social change, intervention theory, organizational design, group dynamics, interpersonal communication, and the use of self in leadership.

EDAM 27714: Planning And Negotiating 3 s.h.
This course teaches students to set organizational direction with specific goals and objectives to produce an integrated system of decisions regarding strategies, sub-strategies, programs and budgets that will accomplish the goals of the objectives. The course also focuses on the leadership role of creating mutual understanding and agreement among people and groups who may have fundamental differences of opinion.

EDAM 27719: Dissertation Seminar I 3 s.h.

EDAM 27720: Dissertation Seminar II 3 s.h.
Prerequisite: EDAM 27719
This course is intended to assist students as they develop their dissertation proposal and prepare for the Benchmark II, the dissertation proposal defense. Students will draft Chapters 1, 2, and 3 under the guidance of Educational Leadership Faculty members.

EDAM 27733: The Policy Environment 3 s.h.
Educational leaders must understand the policy environment within which they operate in order to equip them to resolve goal conflicts between education and its environment. This course teaches the skills to develop alternative choices to advance education. Topics include economic, political/legal, social, and science/technology policy, as well as cross-cutting issues such as entitlements, privatization, decentralization, deregulation, use of incentives, and funding of mandates.

EDAM 27735: Promoting Effective Learning 3 s.h.
In this course, students apply leadership skills through examination and analysis of learning and instruction in their school contexts. The course focuses on examining learning theories, identifying the ways in which certain patterns of activity and interaction promote learning, and applying theories to analyze learning environments. Students also use theoretical perspectives to consider the impact of educational reform and to understand how other social, political, economic, legal, and cultural factors can impact learning.

EDAM 27737: The College Student: Issues And Support Programs 3 s.h.
This course includes the study of student development and academic support in different types of institutions of higher education. Emphasizing the role of the leader, the course studies the rationale, goals, objectives, policies and organizations of selected programs of student services, as well as models for program development and assessment.

EDAM 27741: Current Issues In Higher Education 3 s.h.
This course will have a changing focus that will permit faculty to offer specialized seminars focusing on new developments in the field, on issues of significance where advanced specialization would be helpful to educational leaders, on areas of faculty research and scholarship, or in response to student requests. Multiple sections of this course, each focused on a different topic, may be offered during a semester. Students may take this course for elective credit more than once, as long as the theme of the course is different each time that the student enrolls.
EDAM 27742: The Curriculum Of Higher Education  
This course will examine differences of mission and resulting curricular offerings between types of higher education institutions, external and internal influences that influence the curriculum, the components of curriculum, the curriculum development process, appropriate strategies for curriculum assessment, and contemporary curricular issues.

EDAM 27746: Higher Education Governance  
This course will examine the layered approach to institutional governance, focusing on existing federal higher education policy, the various models of state-level higher education coordination, the function of boards of trustees, and the process of campus decision-making. Students will analyze the role of federal, state, county (if applicable), and campus policy-makers on a specific campus program.

EDAM 27748: Human Resource Development  
This course focuses on improving the performance of the organization through a proactive human resource development effort. It will stress the responsibility of leaders to assist staff through coaching, appraising performance, providing advice, and eliminating barriers to development.

EDAM 27749: Issues In School Governance  
This course identifies current issues in school governance and provides students with the understanding of how the issue develops, those instrumental in promoting the issue, and the ramifications that issue could have for the educational systems and its leader. It will focus in part on the relationships among the educational leader, the school, and state-level authorities. The course will help students to develop their understanding of the role of the educational leader as spokesperson seeking to influence the resolution of issues of school governance.

EDAM 27750: Applied Ethics Of Educational Leadership  
This course will enable students to examine multiple ethical paradigms, to understand the Professional Code of Ethics for educators, to determine one’s own code of ethics, and to develop a model for ethical decision-making.

EDAM 27752: Advanced Leadership  
Prerequisite: minimum grade of B in EDST 24720  
This course provides students enrolled in the doctoral program with a capstone seminar experience that is designed to synthesize the various facets of leadership, organizations and change in a way that will enable students to view issues related to these topics at a critical/deeper level of analysis while working on the dissertation. Specifically, students will be able to formulate, articulate and design a method to study their personal theory of leadership in action. The course will place special emphasis on issues of contemporary leadership in times of organizational and social turbulence.

EDAM 27780: Community College Leadership And Governance  
This course further develops topics taught in the overview course, The American Community College. It explores topics introduced in the first course such as community college governance and leadership in greater depth, paying particular attention to the governance activities that are the priority of community college presidents such as accountability, accreditation, the role of the federal government, the State and the relationship with the county and the board of trustees.

EDAM 27781: Community College Budgeting And Finance  
Prerequisites: EDAM 27782 and EDAM 27780  
This course will provide an overview of community college budgeting and finance. It will review the budgeting process in New Jersey and the economic and policy context of budgeting decisions for New Jersey community colleges. There will be a focus on recognizing the fiscal constraints in which community colleges function and the various sources of funding. Students will also gain an understanding of how planning and budgeting processes are related. This course will be applied in nature, drawing upon current community college budgets.

EDAM 27782: The American Community College  
This course provides an overview of the history of the American Community College movement and then examines current issues in light of that history. In addition, the course explores the mission and work of community colleges including current organizational, social, economic, educational, and political challenges and opportunities facing these uniquely American institutions.

EDAM 27783: Student Development And Adult Learning Theory  
Students enrolled in this course will trace the historical foundations of student development theory and adult learning and development theory in higher education with a focus on traditional student and non-traditional student populations. The course will also provide students with models and techniques that guide the practice of student services administration.

EDAM 27784: Introduction to the Community Colleges
This course is designed to introduce those new to the community college to its history and mission. In particular, it will serve as an introduction to American community colleges and their leadership needs. Students will develop a basic understanding of community colleges role in the postsecondary education sector, their organizational and governance structures, and the current issues facing community colleges.

EDAM 27790: Instructional Leadership And The Curriculum
This course provides students enrolled in the doctoral program with learning experiences related to Instructional Leadership. Examining in depth the current "best practices," candidates will analyze the role of Instructional Leadership and curriculum. Specifically, candidates will be able to align curriculum to standards, examine potential best practices, and use assessment data to improve learning. The course will place special emphasis on how instructional leadership contributes to student learning.

EDST 24501: Procedures And Evaluation In Research
The course helps students develop an understanding of research and statistics sufficient to enable them to read and evaluate research, and develop and carry out full scale research projects.

EDST 24503: Quantitative Analysis In Educational Research
This introductory course is designed to assist educators in the design and implementation of research projects using quantitative methods of analysis. Using a decidedly applied approach, educators will learn how to use computerized statistical analysis programs in conducting quantitative data analyses. Further, they will learn how to compute and interpret statistics of varying types, including t-tests, F tests, r tests, chi-square and other assorted parametric and non-parametric tests of significance.

EDST 24504: Action Research In Education
This introductory course introduces students to the cyclical and recursive approaches to action research. Student will engage in reflective practice and will complete an action research project in an appropriate educational setting.

EDST 24707: Applied Analysis For Educational Leadership
This is an intermediate course in quantitative (statistical) analysis with emphasis upon three broad areas: applying correct statistical procedures for data analysis; using automated approaches to hypothetical testing and quantitative analysis, and using intermediate-level statistical procedures in educational inquiry. The course is expected to provide practical knowledge for use by educational leaders to support administrative decisions.

EDST 24709: Issues In Survey Research
This course teaches methods for designing and implementing survey research, including how to choose a valid sample, handcraft survey instrumentation, avoid non-response bias and other threats to the validity of the survey, and analyze and communicate survey results validly and effectively.

EDST 24721: Action Research In Educational Leadership
Prerequisite: Matriculation into the Educational Leadership Doctoral Program
This course introduces doctoral students to the action research design. Students will identify a problem in practice, research the problem, and then develop and implement an action research design methodology to address the problem.

EDST 24722: Research Literature Analysis And Writing In Educational Leadership
This course is designed to assist students in reading, interpreting, understanding and digesting research literature as well as to assist students in basic academic writing skills and APA style. Students will learn the function of a literature review in the research process and will learn to synthesize a body of research and write a cohesive literature review.

EDST 24724: Issues In Qualitative Analysis In Educational Research
This course assists the student in preparing an acceptable dissertation proposal. Topics include alternative approaches to conducting dissertation research, designing an effective study, and recognizing and avoiding common difficulties encountered in dissertation research.

EDST 24724: Issues In Qualitative Analysis In Educational Research
This course assists the student in preparing an acceptable dissertation proposal. Topics include alternative approaches to conducting dissertation research, designing an effective study, and recognizing and avoiding common difficulties encountered in dissertation research.
Course Descriptions

EDST 24725: Mixed Methods Research In Educational Leadership 3 s.h.
Prerequisite: EDST 24721 and EDST 24724
This course introduces students to mixed methods research approaches in education, a contemporary approach to the complex problems in the field of education today. Students will explore qualitative and quantitative methods and develop an understanding of how to read, design, conduct, and synthesize mixed methods research. Students will also practice understanding and evaluating data and research to support their decisions.

EDST 24795: Dissertation Research 1 to 12 s.h.
This is a 12 credit independent research project to be conducted in conformity with the student's dissertation proposal that has been approved by the student's doctoral committee. Students may register for all 12 credits at once or may register in four credit increments for three consecutive semesters including summer. Dissertations must be completed within three years of passage of the second benchmark.

EDSU 28510: Curriculum Design & Development for Instructional Leaders 3 s.h.
This course provides instructional leaders with an understanding of curriculum design and development from the perspective of Instructional leadership. Particular attention is focused on understanding various curriculum models, the process of curricular articulation and coherence, the relationship between curriculum and Instructional leadership and student outcomes as well as aligning curriculum with learning goals.

EDSU 28522: Instructional Leadership And Supervision 3 s.h.
In this course, students focus on the knowledge, skills, and dispositions essential for instructional leadership and the supervision of educational activities and programs. Topics include program planning, staff selection and mentoring, curriculum development and evaluation, analyzing teaching and interpersonal supervisory strategies, collaborative program development, practicing value-added leadership and supervision, reflective practice, understanding the need for diversity in teaching and learning, and communication. This course also includes a field experience component of approximately 25 clock hours in which students apply theory to practice.

EDSU 28523: Building Organizational Capacity Through Leadership And Supervision 3 s.h.
This advanced course in school leadership enables students to practice the cyclical and recursive approach to action research. Student will engage in reflective practice and will complete an action research project in an appropriate educational setting related to the teaching and learning process. This course is offered annually and includes a field experience component.

EDSU 28546: Educational Organizations And Leadership 3 s.h.
In this course, students will demonstrate an understanding of organizational theory that underlies effective leadership and supervisory behaviors in P-12 environments. Students will further demonstrate that they can analyze and supervise school and programmatic activities, nurture and supervise a vision for improvement in teaching and learning, lead and supervise change, support staff development, and use effective supervisory skills. Other topics include the history and philosophy of school leadership and supervision, effective schools, effective teaching, and the future of school leadership and supervision.

EDSU 28602: Field Service In Supervision: District Internship 1 to 6 s.h.
This course is designed to respond to the needs of school administrators and supervisors for developing effective supervisory skills. The content for each course offering will be determined after a local analysis of needs has been conducted. Semester hour credit will be assigned prior to registration.

EDSU 28706: Diversity And Educational Leadership 3 s.h.
This course deals with diversity both among the student body and the workforce. It addresses the ways that people are alike and explores issues of difference. It focuses on the power that valuing difference can have in establishing quality interpersonal relations, in taking advantage of the cultural richness that can result from diversity, and in creating mutual respect among groups. It examines how the educational leader might overcome resistance to change in this regard.

EDSU 28715: Leadership Theory 3 s.h.
This course is the foundation course for the Doctoral Program in Educational Leadership. Leadership will be defined, demystified, and distinguished from management and administration. The roles and expectations of leaders will be explored, and the competencies required for leadership will be identified. Issues of power, authority, and ethics are studied.

HIED 06603: Seminar/Internship In Higher Education Instruction 4 s.h.
The goal of this seminar is to prepare students to teach in a higher education setting in selected areas by engaging them in a comprehensive instructional internship in a cooperating institution of higher education. The seminar will provide the opportunity to explore best practices in instruction and to reflect on the internship experience.
HIED 06605:  Higher Education In America  
This course focuses on issues and trends within higher education regarding institutional mission, the student body, curriculum, faculty, student services, governance, administration, finance, and community service (including economic development). The course will examine the challenges and opportunities confronting higher education.

HIED 06606:  Selected Topics In Higher Education  
This course explores a topic of importance in the field of higher education. The focus will be different each time that the course is offered. Examples of courses that might be offered include: New Directions in Financial Aid; Outcomes Assessment; Distance Learning; State Higher Education Systems; Federal Policy and Higher Education; Student Activism.

HIED 06609:  Effective Teaching in Academic, Corporate, and Government Settings (3 S.H.)  
Co-listed as ENGR 01.601 Effective Teaching in Academic, Corporate, and Government Settings.
Effective Teaching in Academic, Corporate, and Government Settings (3 S.H.)
This purpose of this course is to provide students with an in-depth exploration of effective teaching practices in academic, corporate, and government settings. Students gain a broad view of the role and function of teaching and oral presentation, as well as how to communicate effectively in these settings. Specifically, the course introduces instructional methods and strategies, adult learning theory and implications for effective teaching, documenting and assessing student learning, and how to improve instruction in academic, corporate, and government settings. Several real-world scenarios are discussed and simulated, including preparing academic courses and corporate training packages, assessing audience background and setting appropriate technical rigor and level, building classroom/meeting room/presentation room management skills, conflict avoidance and resolution in such settings, effective strategies for delivering technical content at meetings and conferences, and answering audience questions that may be adversarial in nature. The course provides readings, discussions, assignments, and most importantly ample opportunities for practice teaching, including a semester-long apprenticeship with experienced faculty, allowing students to experience all aspects of teaching and classroom management.
Co-listed as ENGR 01.601 Effective Teaching in Academic, Corporate, and Government Settings (3 S.H.)

HIED 06610:  Assessment and Evaluation in Health Professions Education  
Prerequisite(s): CURR 29503 and EDAM 27742
This course introduces medical school faculty members and other health professionals to assessment and evaluation in health profession education, including a focus on student learning outcomes and program evaluation to enhance the curriculum. The ability to utilize data to make decisions on students' progress, on curricular alignment, on course and program learning goals, and on improving student and programmatic outcomes are critical to the success of health professions educators. Students will learn multiple approaches for assessment and evaluation, how to utilize multiple assessment tools and approaches, how to develop assessment and evaluation plans, and how to utilize assessment and evaluation data in decision-making.

HIED 06611:  Applied Instructional Techniques and Practices  
Prerequisite(s): HIED 06610
This course provides an opportunity for medical school faculty members and other health professionals to develop their skills as master teachers by engaging in project-based demonstrations of their ability to create learning experiences for diverse learners in multiple contexts, including large and small group sessions, clinical settings, and simulations. This course synthesizes previous coursework from Teaching Adult Learners, The Curriculum of Higher Education, and Assessment and Evaluation in Health Professions Education and provides opportunities to apply this knowledge.

| HIED 06612  | Organizational Development: Understanding the Structure/Function/Cultures of Health Organizations | 3 s.h. |
|             | Prerequisite: EDSU 28715                                                       |         |
|             | This course provides an opportunity for medical school faculty members and other health professionals to develop their skills in organizational development as pertaining to health professions organizations. The course focuses on understanding different models and functions of organizational structures. Additionally, the course includes a focus on understanding how organizational cultures develop, and developing the ability to apply various models to promote organizational development. |

| HIED 06613  | Professional Development: Promoting a Culture of Continuous Improvement in Hlth Organizations | 3 s.h. |
|             | Prerequisites: EDAM 28715, HIED 06612, EDAM 27625                             |         |
|             | This course introduces medical school faculty members and other health professionals to continuous improvements in organization through mentorship and professional development in health professions education. The course builds on earlier courses in leadership, change, and organizational development and engages students in understanding how leaders promote continuous improvement through mentorship and professional development. |

| PSY 06628   | Individual Psychodiagnostics II                                               | 3 s.h. |
|             | This course will focus on cognitive and educational assessment based on the Cattell-Horn-Carroll (CHC) theory of intelligence. Administration and interpretation of the Stanford-Binet: Fifth Edition and the Woodcock-Johnson Assessment Battery: Third Edition will be the course competencies. Special assessment issues covered will include nondiscriminatory assessment, preschool assessment and the assessment of academic achievement, with particular emphasis on the assessment process as a link to classroom cognitive and instructional intervention. |

| PSY 06632   | School Psychology: Consultation And Intervention                            | 3 s.h. |
|             | The course is designed to help students become familiar with alternative frameworks for educational delivery systems including emerging skills in instructional and collaborative consultation, teaming strategies, curriculum based assessment and measurement, and intervention strategies in the academic, behavior and social areas. Emphasis is placed in viewing the problems children experience in schools from a systems or ecological perspective as opposed to residing within the child. The role of the school psychologist will be enlarged to permit their effective participation in transdisciplinary school based terms. |

| SNUR 92407  | School And Family Issues For Children With Ongoing Health Care Needs        | 3 s.h. |
|             | This course explores various health care needs of the chronically ill school age child. There is an emphasis on the importance of collaboration between home and health care providers. Family dynamics and legal issues are discussed and resources are identified. The teacher's role in meeting both the educational and health care needs of children is stressed. |

| SNUR 92430  | Methods And Materials In Health Teaching For School Nurses                  | 3 s.h. |
|             | This course emphasizes the school nurse’s expanding role as a classroom health teacher as well as a resource person to the school staff. Discussions and experiences will center on theories of teaching and learning, planning for teaching, curriculum development, the New Jersey Core Curriculum Content Standards (NJCCCS), teaching strategies, educational resources, classroom management, assessment, and the integration of health teaching into varied school subjects. A K-12 classroom experience is included to facilitate the integration of theory into the clinical practice. |

| SNUR 92444  | Practicum In School Nursing                                                  | 3 s.h. |
|             | Prerequisites: SNUR 92466                                                   |         |
|             | The purpose of this field experience is to provide an opportunity for the student to engage in a mentoring relationship with an experienced, New Jersey certified school nurse in a diverse learning community. The student will have the opportunity to observe and participate in the various roles, functions, and activities of the school nurse. The course requires 50 hours of clinical experience with the school nurse mentor. A University supervisor will visit the student in the field placement situation. Meetings of all students enrolled in the Practicum are held periodically at the University's Glassboro campus. |
SNUR 92444: Practicum In School Nursing 3 s.h.
Prerequisites: SNUR 92466
The purpose of this field experience is to provide an opportunity for the student to engage in a mentoring relationship with an experienced, certified school nurse. The student will have the opportunity to observe and participate in the various roles, functions, and activities of the school nurse. A college supervisor will visit the student in the field placement situation. Meetings of all students enrolled in the Practicum are held periodically at the college. *Pre-registration consultation with instructor is required.

SNUR 92445: Internship In Health Teaching For School Nursing 3 s.h.
Corequisites: SNUR 92448 Prerequisites: SNUR 92430 and SNUR 92466
The purpose of this field experience is to provide an opportunity for the student to utilize INTASC principles, the NJ Comprehensive Health Education and Physical Education Curriculum Framework and the NJ Core Curriculum Content Standards to teach health classes in a classroom setting. A college supervisor will visit the student in the employed or field placement situation. This course is taken concurrently with SNUR 92448. Pre-registration consultation with program advisor is required one semester prior.

SNUR 92466: School Health Services 3 s.h.
The framework for School Health Services and Policies within the functions of the school nurse will be discussed, as well as specific functions and roles to include that of the school nurse within the comprehensive school counseling program and the interface between health services and nationally utilized school guidance counseling standards and indicators. Particular emphasis will be placed on school and community activities relating to students, their families and other educational personnel.

SNUR 92751: Instructional Design & Curriculum Development In Nursing Education 3 s.h.
Prerequisite: EDAM 27783
This course explores the developing role of the nurse as an educator and Instructional leader. The process from institutional design, curriculum development, methodologies, strategies and outcomes will be emphasized to facilitate the learning process.

SNUR 92752: Nursing Program Evaluation & Information Resources 3 s.h.
Prerequisites: EDAM 27783 and SNUR 92751
This course will explore how information technology and resources are transforming nursing education. The methodology of evaluating comprehensive nursing programs within the context of core competencies, technology, standards, and accreditation for quality management are reviewed.

SNUR 92753: Practicum In Nursing Education 3 s.h.
Prerequisites: EDAM 27783 and SNUR 92751 and SNUR 92752
This practicum will provide the student with the opportunity to synthesize and apply acquired knowledge and skills in a planned and guided teaching-learning environment through the mentorship process.

SPSY 06627: Cognitive Assessment And Data-Based Decision Making 3 s.h.
Prerequisite(s): Matriculation in the Educational Specialist Program in School Psychology or by permission of the Program Coordinator or Course Instructor
This course will focus on an overview of theories of intelligence as well as the use, organization and interpretation of individual standardized tests. Specifically, administration and interpretation of the Wechsler Scales will be expected outcomes of the course. This includes training on the WPPSI-III, the WISC-IV, the WAIS-III and the WIAT-II, with particular emphasis on the assessment process as a link to classroom cognitive and instructional interventions.

SPSY 06628: Psychoeducational Assessment And Data-Based Decision Making 3 s.h.
This course will focus on cognitive and educational assessment based on the Cattell-Horn-Carroll (CHC) theory of intelligence. Administration and interpretation of the Stanford-Binet: Fifth Edition and the Woodcock-Johnson Assessment Battery: Third Edition will be the course competencies. Special assessment issues covered will include nondiscriminatory assessment, preschool assessment and the assessment of academic achievement, with particular emphasis on the assessment process as a link to classroom cognitive and instructional intervention.

SPSY 06629: Behavioral-Social Assessment And Data-Based Decision Making 3 s.h.
Prerequisites: SPSY 06628
This course will focus on an overview of personality and behavioral assessment. This will include instruments and techniques (standardized and clinical) for obtaining information regarding emotion, behavior, motivation, self-concept, and interpersonal and attitude characteristics as distinguished from cognitive abilities. There will be an emphasis on interpreting data from multiple sources to achieve the goal of describing the personality and behavior.
Course Descriptions

**SPSY 06629: Behavioral-Social Assessment And Data-Based Decision Making** 3 s.h.
*Prerequisite: SPSY 06628*
This course will focus on an overview of personality and behavioral assessment. This will include instruments and techniques (standardized and clinical) for obtaining information regarding emotion, behavior, motivation, self concept, and interpersonal and attitude characteristics as distinguished from cognitive abilities. There will be an emphasis on interpreting data from multiple sources to achieve the goal of describing the personality and behavior.

**SPSY 06632: School Psychology: Consultation, Collaboration And Intervention** 3 s.h.
*Prerequisite: SPSY 06629*
The course is designed to help students become familiar with alternative frameworks for educational delivery systems including emerging skills in instructional and collaborative consultation, teaming strategies, curriculum based assessment and measurement, and intervention strategies in the academic, behavior and social areas. Emphasis is placed in viewing the problems children experience in schools from a systems or ecological perspective as opposed to residing within the child. The role of the school psychologist will be enlarged to permit their effective participation in transdisciplinary school based terms.

**SPSY 08545: Home/School/Community Collaboration** 3 s.h.
This course is designed to promote students' knowledge, skills and dispositions regarding positive home-school and community collaborations. Topics include the study of families and schools as separate systems, ways in which family systems, theory, diversity, and disabilities affect both a student’s learning and behavior, and the families' relationships with schools. The role of educational helping professionals and methods of collaboration between home, school, and community that will facilitate effective comprehensive services will be examined.

**SPSY 08547: Professional School Psychology** 3 s.h.
The purpose of this course is to introduce students to current theory, research, practices and issues in school psychology and to the code of ethics that guides the field. Particular emphases are conceptual, professional, legislative, legal and ethical issues, and emerging problems in school psychology. Students will apply these issues to their own training and professional development. The student will be introduced to the conceptualization of the school psychologist as a problem-solver who links assessment to intervention and provides both direct and indirect psychological services.

**SPSY 22600: Applied Research Seminar I: School Psychology** 3 s.h.
This course will concentrate on the latest developments in the field of school psychology, emphasizing evidence-based practice and research findings. Students will be expected to design an applied research project in the field of school psychology. In addition, students will participate in a school-based field experience to directly observe the role of the school psychology practitioner.

**SPSY 22601: Applied Research Seminar II: School Psychology** 3 s.h.
*Prerequisite: SPSY 22600*
This course will concentrate on the latest developments in the field of school psychology, emphasizing evidence-based practice and research findings. Students will conduct an applied research project in the field of school psychology. In addition, students will demonstrate their knowledge in school psychology through a comprehensive assessment.

**SPSY 22623: Internship In School Psychology** 3 s.h.
*Prerequisite: SPSY 22630*
The 3-credit course entitled 'Internship in School Psychology' is a 300-hour experience completed on a half-time school week basis over four consecutive semesters in a school setting. Students are placed in approved sites for their internship experience where they are supervised by an appropriately credentialed school psychologist. Interns receive at least one hour of field-based supervision per week from a practicing school psychologist, who is responsible for no more than two interns at any given time. Interns are expected to attend scheduled Internship classes on the Rowan University campus. To complete the EdS in School Psychology and to be eligible for NJ Department of Education certification as a School Psychologist, students must complete 12 credits of Internship in School Psychology totaling 1200 hours of field experience.

**SPSY 22630: Practicum In School Psychology** 3 s.h.
This course emphasizes psychoeducational assessment, intervention, and strategies for the student with special needs. Practical experiences in psychoeducational assessment and consultation strategies with students are provided, as well as, with staff and parents. The practical experiences are provided within the Special Educational Services Clinic or other educational/mental health service programs. Instruction as well as supervision is provided as part of this pre-externship experience.
Course Descriptions

SPSY 22634: Internship In School Psychology 6 s.h.
This is a full school year internship in School Psychology with placement in a public school. Monthly meetings will focus on discussion of psychological diagnosis, educational remediations and research based upon consideration of case materials related to externship experiences; review of current theoretical and experimental developments in school psychology.

SPSY 25516: Applied Tests And Measurements 3 s.h.
Emphasis is placed upon data-gathering, the evaluation of data and the use of data in educational measurement. Standardized tests, both group and individual, will be studied.

ECE 09504: Special Topics in Electrical and Computer Engineering 1 to 3 s.h.
This course covers timely topics in electrical and computer engineering related to engineering practice and/or research.

ECE 09509: Virtual Reality Systems 3 s.h.
Virtual Reality (VR) Systems covers the architecture and design of current generation systems for creating 3D VR environments. Topics included are application/hardware architecture, pipeline development, geometric transformations in a 3D coordinate system, geometry and pixel shading, lighting systems, texturing and VR development. Students will be exposed to current VR technologies and next generation algorithms. As a graduate level course, students are expected to gain a solid foundation in SL/SLSL shader theory, advanced object oriented design techniques, pathfinding algorithms, and apply these techniques to independent research experience to a problem of their choosing.

ECE 09509: Virtual Reality Systems 3 s.h.
Virtual Reality (VR) Systems covers the architecture and design of current generation systems for creating 3D VR environments. Topics included are application/hardware architecture, pipeline development, geometric transformations in a 3D coordinate system, geometry and pixel shading, lighting systems, texturing and VR development. Students will be exposed to current VR technologies and next generation algorithms. As a graduate level course, students are expected to gain a solid foundation in GLSL shader theory, advanced object oriented design techniques, pathfinding algorithms, and apply these techniques to independent research experience to a problem of their choosing.

ECE 09521: Fundamentals of Systems Engineering 3 s.h.
Prerequisite: ECE 09321
Systems Engineering is the interdisciplinary approach and means to enable the realization of today's complex, dynamic products and systems. Individual products such as Cell phones, aircraft, automobiles, computers and even household appliances are made up of parts developed by many people with varied skill sets, often working for different companies and from remote locations. Other systems such as transportation, energy generation and distribution, medical, communications, emergency response and similar are very complex as they are composed of many varieties of products and systems. Systems Engineering is an integrating function that addresses all the disciplines and specialty groups resulting in a structured development process that proceeds from concept to production to operation including maintenance & support, and eventual disposal. Systems Engineering considers both the business and the technical needs, including environmental and safety, of all customers with the goal of providing a quality product that meets the user needs. It focuses on defining customer needs and required functionality early in the development cycle, documenting requirements, proceeding with design synthesis and system validation while considering the complete problem that includes - operations, cost & schedule, performance, training & support, sustainment, test, disposal, and manufacturing. The course is designed to expose the student to the system engineering process to complement their technical skill set and to cover topics that are often not covered in other classes. The course will include frequent guest lecturers who are practicing experts in the systems engineering domain. The course will utilize the latest in processes and software tools from industry such as SysML modeling and architectural documentation tools. Students will participate in a semester long project to gain hands-on experience with the course concepts. This graduate level course will also provide opportunities for team management and cultivation of leadership and communication skills.

ECE 09521: Fundamentals of Systems Engineering 3 s.h.
Prerequisite: ECE 09321

ECE 09523: Advanced Radar Systems 3 s.h.
This course will provide an introduction to radar systems, range equation and radar signal processing techniques as well as the nature of physical observables and propagators, the effects of the propagation medium on sensor performance, the relationship between signals and noise, and the characteristics of critical sensor functions (including detection and tracking). Radar subsystems will be studied, including antennas, transmitters, receivers, and signal processors. This will also feature a project component for students to identify, research and present open problems that are relevant to radar systems.

ECE 09524: Advanced War Gaming and C4ISR 3 s.h.
This course will expose students to a comprehensive range of technologies that govern the effectiveness of our nation's ability to effectively conduct military operations. It focuses on material drawn from a working group of distinguished thought leaders in critical technology and operations areas, thereby exposing students to the state-of-the-art thinking and philosophies. The class material will be enhanced by the study of patents that relate to the subject which were issued to the courses instructor. This course will also include advanced topics such as C4ISR algorithms, and graduate students taking this class will be expected to work on a course project involving implementation of important C4ISR algorithms.

ECE 09525: Advanced Command and Control 3 s.h.
Command and Control (C2) is defined as the exercise of authority and direction over assigned forces in order to accomplish a mission. This course will embark on a study of C2 information processing and decision making in the context of adaptive combat systems, as well as civilian and business examples. The course topics include the following: the history of military C2, C2 decision processes (Observe-Orient-Decide-Act loops), problem sense making (Identification) and solution finding and implementation processes, operational architectures, information fusion, control theory, mission success and organizational fitness. The course will also feature a project component for which the students will identify research, execute and present a solution to a problem that is relevant to course content.

ECE 09526: Advanced Weapon Systems 3 s.h.
This course will study system engineering principles in the weapon system components and will relate the principles used in components such as prelaunch decision processing and missile in-flight control functionality to the robustness of the overall combat system. Missile systems will be studies, including basic aerodynamics and propulsion. The engineering principles discussed will be used to develop missile guidance laws and track filters to support a robust combat system design. In addition to these, advanced topics such as track fusion and advanced guidance laws will be discussed, and graduate students taking this class will be expected to complete a project which shows competence and understanding of these advanced topics in addition to course requirements of the undergraduate version of this class.

ECE 09551: Advanced Digital Signal Processing 3 s.h.
Prerequisites: ECE 09551
This is a graduate level course in digital signal processing (DSP), whose applications include analysis, compression, recognition and processing of all telecommunications, audio – visual, biomedical, financial, energy demand and consumption, seismic/tectonic/oceanographic data, among many other countless systems possible. The primary goal of this class is to introduce advanced topics in signal processing and filter design approaches that allow analysis of real-world signals that cannot be easily analyzed by the basic approaches discussed in the undergraduate level DSP course. Such signals include non-stationary signals with time-varying spectra as well as those scenarios where signal and noise spectra overlap. The specific topics that will be discussed in this class include advanced filter design and implementation approaches, filter banks, analysis of random signals and spectral estimation, analysis of non-stationary signals using short-time Fourier transforms and wavelet transforms, optimal and adaptive filters, and signal separation techniques such as independent components analysis. This is an applied class and will feature several real-world projects.

ECE 09552: Digital Image Processing 3 s.h.
Digital image processing covers the analysis and contemporaneous applications of the enhancement, restoration, compression and recognition of monochromatic images. Both classical and state-of-the-art algorithms will be employed in conjunction with appropriate software for analyzing real-world images.

ECE 09553: Digital Speech Processing 3 s.h.
This course covers the fundamentals of digital speech signals and processing and simultaneously stresses real-life engineering aspects from a systems perspective. An overview of the different branches of speech processing are covered, namely, speech production, vocal tract modeling, speech coding, speech recognition, speaker recognition and speech synthesis. The building blocks of such applications, namely, linear predictive analysis and quantization (scalar and vector) are taught.
Theory and Engineering Applications of Wavelets 3 s.h.
The theory of wavelets gave rise to a substantial number of applications in many areas including various fields of engineering, making it one of the most popular research areas of all times. In this class, the theory of wavelets will be carefully developed from the ground up, with an emphasis on engineering applications. Starting with a review of Fourier based signal analysis methods, short time Fourier transform, continuous wavelet transform, discrete wavelet transform, fast wavelet algorithms, wavelet packets, wavelet networks will be discussed. Applications of wavelets such as image and audio compression, biological signal analysis, feature detection, signal denoising as well as also be explored.

Advanced Topics in Pattern Recognition 3 s.h.
This course will introduce a broad spectrum of pattern recognition algorithms along with various statistical data analysis and optimization procedures that are commonly used in such algorithms. Although mathematically intensive, pattern recognition is nevertheless a very application driven field. This class will therefore cover both theoretical and practical aspects of pattern recognition. The topics discussed will include Bayes decision theory for optimum classifiers, parametric and nonparametric density estimation techniques, discriminant analysis, basic optimization techniques, introduction to basic neural network structures, decision tree methods, and unsupervised clustering techniques. As a graduate level course, several advanced and contemporary topics will be covered, including fuzzy inference systems, support vector machines, adaptive resonance theory, incremental learning and online learning and particle swarm optimization. Students will be expected to conduct independent research for possible publications, as part of the class project.

Advanced Embedded Software Design 3 s.h.
Prerequisites: ECE 09342
Embedded systems dramatically enhance our lives and are prolific in our everyday life. It is not uncommon for Americans to come in contact with over one hundred embedded systems each day. With billions of embedded systems, being produced each year there is a huge need for engineers who can create good embedded software. This course focuses on embedded software for applications running directly on an embedded processor without an operating system. A brief survey of microcontroller technologies will be covered but the class will focus on ARM microcontrollers and the embedded peripherals available on such devices. Advanced embedded communications technologies (CAN, WiFi, Bluetooth, ZigBee, etc.) will be surveyed and at least one implemented during the course. A great emphasis will be put on good programming practices and design patterns which support working in larger groups. Additionally, students will learn project management skills and will be required to manage a team of undergraduate engineers to accomplish a real world embedded system project.

Advanced Biometric Systems 3 s.h.
Biometrics is the science of recognizing and authenticating people using their physiological and/or behavioral characteristics. By using biometrics, it is possible to establish an identity based on “who you are”, rather than by “what you possess” (e.g., an ID card) or “what you remember” (e.g., a password). Interest in biometrics has increased significantly with a global market that is experiencing very rapid growth. Border and immigration control, restricted access to facilities and information systems, cybersecurity, crime investigations and forensic analysis are just a few of the primary application areas of biometrics used by commercial, government, and law enforcement agencies. There is much research interest in different biometric systems with the main issues being high performance, ease of use and implementation, low cost and high user acceptance. This course involves the study of various biometric systems (fingerprints, voice, face, iris and other modalities). Multibiometric systems are also covered. This includes feature fusion, classifier fusion and systems that use two or more biometric modalities. Biometric system performance and issues related to the security, ethics and privacy aspects of these systems will also be addressed. Course principles are reinforced by a significant project or research experience.

Artificial Neural Networks 3 s.h.
Artificial Neural Networks covers the design of a variety of popular neural network architectures and their contemporary engineering applications. Neural network architectures that will be studied in detail include the multilayer perceptron, radial basis function, and the Hopfield networks. State-of-the-art software will be used for network design. VLSI implementations of neural networks will be discussed.
ECE 09566: Advanced Topics in Systems, Devices, and Algorithms in Bioinformatics

**Prerequisites:**
Bioinformatics is the field of applying computational techniques, from mathematics, statistics, and machine learning, to the vast amounts of biological - but most specifically genomic - data. While some refer to bioinformatics only in the context of collection, storage, organization and access of such biological data within large databases, this course's view of bioinformatics will include - in fact focus on - systems and devices that generate such data, and development of methodologies and models to analyze the vast quantities of data generated by such systems and devices. The course will provide basic biological background of genomics, will introduce the students to commonly used bioinformatics databases and computational tools (such as search, alignment, and protein visualization tools) used to analyze genomic data from such databases. The focus of the course will be on basic bioinformatics systems and devices, such as high throughput next generation sequencers and gene chips, followed by an in-depth discussion on the theory of basic genomic signal processing and computational intelligence techniques used in bioinformatics, including hidden Markov models and optimization algorithms for sequence alignment and gene prediction, clustering and classification algorithms. This course will also provide students with a mechanism to conduct independent research to advance the field through development of novel algorithms and approaches.

Prerequisites: ECE Majors: ECE 09243 Non ECE Majors: Permission of Instructor

This course introduces fundamentals of discrete event system models and their applications in modeling, control, analysis, validation, simulation, and performance evaluation of computer systems, hardware/software co-design, manufacturing/de-manufacturing processes, communication networks, and transportation, etc. The mathematical and graphical models include graphs, finite state machine, Petri Nets, timed models, stochastic timed models, and Markov chains, etc. As a graduate level course, it also provides students with a mechanism (a) to conduct independent research on advanced and contemporary DES topics, including higher-level Petri Nets, finite automata based supervisory control, and Petri Nets in job shop scheduling, etc; and (b) to develop novel models and algorithms for DES.

Prerequisites: ECE Majors: ECE 09243 Non ECE Majors: Permission of Instructor

This course introduces fundamentals of discrete event system models and their applications in modeling, control, analysis, validation, simulation, and performance evaluation of computer systems, hardware/software co-design, manufacturing/de-manufacturing processes, communication networks, and transportation, etc. The mathematical and graphical models include graphs, finite state machine, Petri Nets, timed models, stochastic timed models, and Markov chains, etc. As a graduate level course, it also provides students with a mechanism (a) to conduct independent research on advanced and contemporary DES topics, including higher-level Petri Nets, finite automata based supervisory control, and Petri Nets in job shop scheduling, etc; and (b) to develop novel models and algorithms for DES.

Prerequisites: ECE Majors: ECE 09243 Non ECE Majors: Permission of Instructor

This course introduces students to a variety of state-of-the-art hardware design verification methods, including traditional functional simulation, assertion-based verification and a subset of formal verification techniques. Topics covered include functional simulation, coverage metrics, test bench design and automation, assertion-based verification, and property specification language (PSL). As a graduate level course, students are expected to gain a solid foundation in current, practical chip verification techniques, underlying theory, and significant independent research experience applying the techniques, particularly formal verification methods, to a real problem of their own choice.
Course Descriptions

ECE 09569: System-On-Chip Verification 3 s.h.
Prerequisite(s): ECE Majors: ECE 09243 Non ECE majors: Permission of Instructor
This course introduces students to a variety of state-of-the-art hardware design verification methods, including traditional functional simulation, assertion-based verification and a subset of formal verification techniques. Topics covered include functional simulation, coverage metrics, testbench design and automation, assertion-based verification, and property specification language (PSL). As a graduate level course, students are expected to gain a solid foundation in current, practical chip verification techniques, underlying theory, and significant independent research experience applying the techniques, particularly formal verification methods, to a real problem of their own choice.

ECE 09571: Instrumentation 3 s.h.
Elements of instrumentation systems are treated including transducers, signal conditioning, and signal processing. Elements of modern instrumentation systems including standards (IEEE-488, SCPI) and smart sensors are considered.

ECE 09572: Advanced Smart Grid 3 s.h.
Prerequisites: ECE 09342 and ECE 09321
The ways in which electricity is generated, transmitted, distributed, stored, and used, are the subject of revolutionary and evolutionary changes compared to the electricity grid we have today. Smart Grid goals include the improvement of grid reliability, reduction in outages, faster return on service, ability to integrate a broad range of renewable energy sources, and to include customers in the ability to effect load decisions based on grid demand and energy pricing. This course will address grid fundamentals, tools and technologies, and then address major Smart Grid subsystems including conventional and alternative generation, storage technologies, transmission and distribution systems, standards, demand management, real-time pricing, grid stability, control technologies, measurement including Smart Sensors and Advanced Metering Infrastructure. Physical and cyber vulnerabilities will also be addressed. The course will include a project to reinforce Smart Grid elements.

ECE 09573: Advanced Smart Sensors 3 s.h.
Prerequisites: ECE 09342 AND ECE 09311 AND ECE 09321
Elements of Smart Sensors and Smart Sensor systems are treated. Instrumentation fundamentals covered include transducers, signal conditioning, and data acquisition, communication, along with important considerations and associated standards. Relationship of smart sensors to integrated system health monitoring (ISHM) and similar Intelligent Sensor applications are addressed. The course will include a project to reinforce Smart Sensor elements and provide opportunities for research in the field.

ECE 09582: Advanced Memristors and Nanoelectronic VLSI 3 s.h.
This course is an advanced course in the extension of analog/digital electronic systems, dealing with CMOS devices and emerging nanoelectronic devices and technologies. Since the importance of emerging nano systems goes beyond traditional circuit theory and EE in general, this course aims to provide students with an opportunity of understanding the fundamental concepts of a set of emerging nanodevices, with particular emphases on memristors and memristive systems, and their potential applications and impacts on the next generation VLSI systems. The course will also emphasize hands-on programming and application to examples as an important means to understand and benefit from the material. Software tools such as Matlab/SPICE/Cadence will be extensively used throughout the learning and design experiments.

ECE 09585: Advanced Engineering Cyber Security 3 s.h.
Prerequisite(s): Graduate standing
This course addresses the need to better prepare students for the expansion in the Internet of Things (IoT) by imparting fundamental concepts and capabilities in the management of cyber security. Cyber security is key to developing large-scale, wide-area systems, which can provide the degree of security required to further implementation of highly-vulnerable, highly-visible systems such as the Smart Grid. To gain this understanding, the course addresses a number of key components: standards including network and encryption techniques (RSA, etc.) and security processes, methods of cyber attach, and some methods of software and hardware security enhancement. Course principles are reinforced by a significant project or research experience.
ECE 09585: Advanced Engineering Cyber Security 3 s.h.

Cyber security is key to developing large-scale, wide-area systems, which can provide the degree of security required to further implementation of highly-vulnerable, highly-visible systems such as the Smart Grid. To gain this understanding, the course addresses a number of key components: standards including network and encryption techniques (RSA, etc.) and security processes, methods of cyber attach, and some methods of software and hardware security enhancement. Course principles are reinforced by a significant project or research experience.

ECE 09586: Advanced Portable Platform Development 3 s.h.

Prerequisite(s): ECE 09443

The total number of Android and iOS devices is estimated to be over 1.6 billion devices (2013) and continues to grow. The ubiquitous nature of these devices means they are now the default choice of platforms for hardware and software developers. This course details the ARM core architectures, which underpin the majority of mobile devices, along with the basic operating system and application software environments. Principles of effective app development using available SDK tools and project management techniques are presented. Methodologies for performance analysis are treated. The hardware vs. software trade space will also be considered. The course content is reinforced with a significant development project.

ECE 09590: Advanced Emerging Topics in Computer Engineering 1 to 3 s.h.

Prerequisite(s): Specific prerequisites are determined by the nature of the course content when it is announced.

This course covers special topics in emerging areas of Computer Engineering such as Computer Networks, Mobile Robotics, and Embedded Systems.

ECE 09595: Advanced Emerging Topics in Computational Intelligence, Machine Learning and Data Mining 1 to 3 s.h.

Prerequisite(s): Specific prerequisites are determined by the nature of the course content when it is announced.

As the amount of data we generate grow astronomically, so does the need for approaches, algorithms, techniques and the hardware that can be used for effective processing, storing, and analyzing such massive volumes of data. Computational intelligence, machine learning and data mining all deal with automated analysis of large volumes of data in search of known or hidden structures, patterns and information. While well-established approaches that now form the foundations of these topics are discussed in other specifically named courses, this graduate level course will provide an advanced treatment of emerging topics - fueled by rapid growth of research and development in these areas - but that have not yet reached the mainstream textbooks. Hence, due to its very nature, the specific content of this class will be different every time it is offered, focusing on the most recent developments in these areas. Graduate students taking this class will be expected to complete a project on a class related emerging topic of their interest.

ECE 09604: Special Topics for Doctoral Students in Electrical Engineering 1 to 6 s.h.

This class provides timely coverage of specific advanced and emerging topics in Electrical and Computer Engineering, and it is intended for doctoral students. Special topics courses may be traditional classroom-based courses as well as research-related courses supervised by specific advisers. This class may be taken multiple times when offered with a different special topics content.

ECE 09611: Estimation and Detection Theory 3 s.h.

Prerequisite(s): ECE 09430

Modern estimation and detection theories can be found at the heart of many engineering systems including radar, sonar, speech, image analysis, biomedicine, communications, control and seismology. All these systems share the common problem of needing to estimate the values of a group of parameters or being able to decide when an event of interest occurs and then to determine more information about that event. In radar, we are interested in determining the position of an aircraft, as for example, in airport surveillance radar. The task of information extraction is the subject of estimation theory; and the task of decision making is the subject of detection theory. The course will showcase numerous examples that illustrate and apply...
the theory to current problems of interest in engineering.

ECE 09655: Advanced Computational Intelligence and Machine Learning 3 s.h.
Prerequisites: ECE 09.455 or ECE 09.355 or ECE 09.454 or ECE 09.560 or CS 07.556
Computational Intelligence and Machine Learning deal with automated classification, identification, and/or characterizations of unknown systems based on data, typically – and increasingly – large volumes of data. This course is an advanced research-intensive graduate level course that explores the more advanced and emerging topics of computational intelligence, as such as but not limited to graphical models, Monte Carlo approaches, incremental and online learning, learning in nonstationary environments, deep belief networks, and other topics that are emerging at the time of offering. In fact, the exact content of the course is likely to evolve over the years due to the rapid development of the field. As an advanced research intensive course, this class will involve a thorough literature search and review, followed by proposing, executing and presenting results on a novel real-world computational intelligence problem that is of research interest to the student. Students will be encouraged to publish the outcomes of their research project.

ENGR 01600: ToughTalk: Graduate Seminar in Engineering 0 s.h.
Prerequisite(s): Graduate or Ph.D. student standing
One of the primary goals of the Ph.D. in Engineering program is to teach the candidate how to identify unsolved problems in engineering, formulate a hypothesis for a feasible solution, design experiments or analysis methodologies to implement the proposed solution, analyze results and draw conclusions, all of which require critical and analytical thinking and problem solving skills, command of the general body of knowledge as well as state-of-the-art in the area of interest. This is seminar course where every week on graduate student or guest speaker will present the state-of-the-art in his/her area of research interest. This course will allow the presenter to describe an unsolved problem of interest, complete a thorough literature review about related work, and/or present his/her work in that area, and receive comments, suggestions and critical feedback from the audience. The course will also allow audience members to learn a new topic, provide feedback to their peers, and be familiar with the breadth of research taking place in the college, while providing a forum for general exchange of ideas within the college, bringing research active college community together for lively discussions.

ENGR 01600: ToughTalk: Graduate Seminar in Engineering 0 s.h.

ENGR 01601: Effective Teaching in Academic, Corporate and Government Settings 3 s.h.
Prerequisite(s): Ph.D. student status
This unique course, team-taught by faculty and professionals in education, engineering and industry, provides students with an in-depth exploration of effective teaching practices in academic, corporate, and government settings. Students will gain a broad view of the role and function of teaching and oral presentation, as well as how to communicate effectively in these settings. Specifically, this course will introduce instructional methods and strategies, adult learning theory and implications for effective teaching, documenting and assessing student learning, and how to improve instruction in academic, corporate, and government settings. Several real-world scenarios will be discussed and simulated, including preparing academic courses and corporate training packages, assessing audience background and setting appropriate technical rigor and level, building classroom/meeting room/presentation room management skills, conflict avoidance and resolution in such settings; effective strategies for delivering technical content at meetings and conferences, and answering audience questions that may be adversarial in nature. The course will provide readings, discussions, assignments, and most importantly ample opportunities for practice teaching, including a semester-long apprenticeship with Engineering faculty, allowing the student to experience all aspects of teaching and classroom management. The course will also feature guest speakers from industry and government agencies providing unique perspectives for effective teaching and presentation at such settings.
Course Descriptions

ENGR 01601: Effective Teaching in Academic, Corporate and Government Settings  3 s.h.
*Prerequisite(s): Ph.D. student status*
This unique course, team-taught by faculty and professionals in education, engineering and industry, provides students with an in-depth exploration of effective teaching practices in academic, corporate, and government settings. Students will gain a broad view of the role and function of teaching and oral presentation, as well as how to communicate effectively in these settings. Specifically, this course will introduce instructional methods and strategies, adult learning theory and implications for effective teaching, documenting and assessing student learning, and how to improve instruction in academic, corporate, and government settings. Several real-world scenarios will be discussed and simulated, including preparing academic courses and corporate training packages, assessing audience background and setting appropriate technical rigor and level, building classroom / meeting room / presentation room management skills, conflict avoidance and resolution in such settings; effective strategies for delivering technical content at meetings and conferences, and answering audience questions that may be adversarial in nature. The course will provide readings, discussions, assignments, and most importantly ample opportunities for practice teaching, including a semester-long apprenticeship with Engineering faculty, allowing the student to experience all aspects of teaching and classroom management. The course will also feature guest speakers from industry and government agencies providing unique perspectives for effective teaching and presentation at such settings.

ENGR 01602: Strategic Technical Writing and Winning Grant Proposals  2 s.h.
*Prerequisite(s): Successful completion of the Ph.D. Qualifier Examination*
Effective technical writing is perhaps one of the most critical skills a Ph.D. engineering graduate needs to have regardless of the career path chosen upon graduation. Whether writing research papers, technical reports, or grant proposals, the ability to convey technical engineering knowledge in an effective, understandable, elegant and concise manner is an important skill. This class will provide the general guidelines, best practices, and most importantly specific strategies for technical writing for some of the most common venues and audiences, namely writing technical papers for engineering conferences and journals - including writing rebuttals to reviewers - technical reports and grant proposals. The latter includes specific strategies for a variety of different sponsors that fund engineering related research, including industrial sponsors, government and military agencies, foundations as well as intra-company funding sources. The deliverables of this class includes an actual conference or journal paper and a small scale grant proposal-ready to be submitted - based on student's area of research.

ENGR 01510: Finite Element Analysis  3 s.h.
Fundamental concepts for the development of finite element analysis are introduced. The element stiffness matrices are developed using shape functions defined on the elements. Aspects of global stiffness formation, consideration of boundary conditions, and nodal load calculations are presented. Mesh division and problem modeling considerations are discussed in detail. Topics of scalar field problems and natural frequency analysis are covered. Computer applications are included.

ENGR 01511: Engineering Optimization  3 s.h.
The formulation and modeling aspects of engineering optimization problems are presented. These steps involve setting up of the objective function to be minimized and the resource and system constraints to be satisfied. Solution techniques using gradient based methods, zero order methods, and penalty techniques are discussed.

Prerequisite(s): Successful completion of the Ph.D. Qualifier Examination / Ph.D. student status

One of the primary goals of the Ph.D. in Engineering program is to teach the candidate how to identify unsolved problems in engineering, formulate a hypothesis for a feasible solution, design experiments or analysis methodologies to implement the proposed solution, analyze results and draw conclusions, all of which require critical and analytical thinking and problem solving skills. Achieving such a goal requires methodical and persistent effort over a long period of time for obtaining command of the general body of knowledge as well as the state-of-the-art in the area of interest, followed by identifying an unsolved problem that is worth solving, followed by developing and verifying solution(s) and finally disseminating the new knowledge created by this process. Since this is a long term process, it can only be achieved by dedicating significant time and effort to this process. Doctoral Research and Dissertation is a variable-credit independent study based research course that is designed to provide the student necessary time and guidance to help him/her achieve the aforementioned goals. Students are expected to take appropriate number of credits of this class each semester they are materially involved with doctoral research, culminating with preparation, execution, and defense of the Dissertation. Each section of this course is associated with a faculty member, and each student will take that section of this course that is associated with his/her Ph.D. Advisor, who will be guiding the student's doctoral research. Students will be required to take no fewer than 12 credits of this class, with the last 3 credits taken during the student’s last semester in which he/she is planning to defend his/her dissertation.

</tbody>
</table>

This course will introduce students to a range of literature written for, read by, and/or taught to adolescents. Students will analyze the literary works from a variety of theoretical perspectives (including ecological, feminist, formalist, Marxist, post colonial, psychoanalytical and queer) to think about the cultural construction of adolescence and adolescents' relationship to power. This course may not be offered annually.
ENGL 02617: Teaching Shakespeare  3 s.h.
This course begins by examining representative plays by Shakespeare by using the approaches of "Understanding by Design." Next, it considers how to teach the plays with those approaches, especially "essential questions" and "backward design." This course may not be offered annually.

ENGL 02638: Teaching World Literature  3 s.h.
This course will mix theory and non-Western literature in order to provide the students with a critical vocabulary they can then employ in their own pedagogy. The course will explore a number of questions about nation, individual, community, time, space, language, and other topics through poetry, novels, drama, and short stories from Africa, Asia, and South America.

ENGL 05501: American English Grammar  3 s.h.
This course emphasizes traditional grammar and seeks to give the student a practical understanding of the structure of contemporary American English grammar. Procedures include lecture, class discussion, and solving grammatical problems, including sentence diagramming.

AFRI 16540: Special Topics In Foreign Languages And Literatures  3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

ARAB 12540: Special Topics In Foreign Languages And Literatures  3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

CHIN 07540: Special Topics In Foreign Languages And Literatures  3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.
Course Descriptions

FREN 02540: Special Topics in Foreign Languages and Literatures 3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

GERM 03540: Special Topics in Foreign Languages and Literatures 3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

ITAL 04540: Special Topics in Foreign Languages and Literatures 3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

LAT 09540: Special Topics in Foreign Languages and Literatures 3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

RUSS 06540: Special Topics in Foreign Languages and Literatures 3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.

SPAN 05540: Special Topics in Foreign Languages and Literatures 3 s.h.
This course brings new perspectives and themes to the established Foreign Languages and Literatures curriculum. Each semester the instruction of this course rotates among faculty members who select topics according to their current scholarly interests. In this way, the course expands options for upper-level electives.
Course Descriptions

GEOG 06501: INDEP STUDY GEOG 3 s.h.

GEOG 06553: Workshop In Geography 1 to 3 s.h.
This course is designed for in-service teachers who wish to further develop their competencies in new teaching techniques and technologies in geography, including computer-assisted instruction and computer cartography. Contemporary geographic topics will be explored within a regional context of each major world region. Students will actively participate in applying new concepts, current data, and innovative techniques in geography by designing and presenting sample lessons at their grade level. (Summer only)

GEOG 16100: Earth, People, And The Environment 3 s.h.
This course provides a broad survey of the geographic approach to knowledge about the world and the field of geography. The course introduces the natural order of the physical environment, human modification of environments, organization of society, and regional studies. The course places particular emphasis on contemporary environmental problems and the role of geography in helping to understand and address local, regional, and global issues.

GEOG 16110: Cultural Geography 3 s.h.
This course focuses upon the varied and changing cultural environments of the world. Through a synthesis of data from many disciplines (i.e., anthropology, ecology, earth sciences, history, etc.), major cultural differences and areal patterns are identified and analyzed.

GEOG 16140: World Regional Geography 3 s.h.
A survey of the entire world that uses the regional approach to geographical analysis, this course provides students with a basic foundation of geographic knowledge and concepts applicable to the contemporary world. It stresses resource distribution, environmental characteristics, population problems, food and water supplies, cultural variations and developmental strategies.

GEOG 16160: Intro To Mapping And Geographic Information Sciences 3 s.h.
This course provides the student with the conceptual tools required for intelligent and critical use interpretation and analysis of maps. In addition, the course furnishes the student with an introduction to and overview of the mapping sciences. Students learn the concepts, methods, and techniques common to the several branches of the mapping sciences and are introduced to cartography, satellite remote sensing, computer-assisted cartography, and geographical information systems. Because of its increasing importance, special emphasis is placed on geographical information systems.

GEOG 16260: Fundamentals of Geographic Information Systems (GIS) 4 s.h.
Prerequisites: GEOG 16160
Fundamentals of Geographic Information Systems introduces students to the concepts and applications associated with creating, maintaining, analyzing, displaying, and interpreting geospatial data. Through the completion of activities and assignments, students gain experience with the fundamental tools for geospatial analysis, coupled with the knowledge of how best to apply them to real-world issues in the natural and human landscapes.

GEOG 16261: Cartography 3 s.h.
Prerequisite: GEOG 16160
This course studies the elements of cartography with emphasis on the map as a basic form of communication. It explores contemporary design concepts and various graphic techniques. Students create cartographic compositions using the latest in geographical information system and cartographic software using the facilities of the department's computer teaching laboratory.

GEOG 16307: Geography Of Transportation 3 s.h.
This course examines the major environmental features of Asia, stressing problems of population pressure and land utilization. The course studies individual culture realms and selected countries intensively. This course may not be offered annually.

GEOG 16334: The Geography of Natural Disasters 3 s.h.
There are thousands of examples in which the forces of nature have suddenly claimed human lives and destroyed the built environment on a large scale. This course will focus on the geospatial distribution, societal impact, mitigation strategies, and public policy associated with natural disasters such as earthquakes, volcanic eruptions, landslides, subsidence, global climate change, severe weather, coastal erosion, floods, mass extinctions, and asteroid (or meteor) impacts. Case histories of natural disasters and human responses will be highlighted. The causes, risks, effects, and prediction of natural disasters will also be introduced.
GEOG 16334: The Geography of Natural Disasters

There are thousands of examples in which the forces of nature have suddenly claimed human lives and destroyed manmade constructions on a large scale. This course will introduce the nature, causes, risks, effects, and prediction of natural disasters including earthquakes, volcanic eruptions, landslides, subsidence, global climate change, severe weather, coastal erosion, floods, mass extinctions, and meteorite impacts. It will cover geologic principles and case histories of natural disasters and human responses (societal impact, mitigation strategies, and public policy).

GEOG 16350: Quantitative Methods

This course examines the application of inferential statistical methods to geographic research. It also offers an introduction to techniques designed especially for analysis of spatial patterns and distribution. This course may not be offered annually.

GEOG 16360: Applications of Geographic Information Systems

Prerequisite(s): GEOG 16260

Applications of Geographic Information Systems builds upon the foundational concepts introduced in pre-requisite courses to examine the concepts and techniques of advanced geospatial analysis. Building upon series of techniques, coupled with real-world applications, students employ geospatial data and methods to compile, analyze, visualize, and interpret results, as well as examine critical issues related to data management and maintenance. The course is intended to prepare the student for both the professional GIS workforce and advanced research with GIS.

GEOG 16361: Geovisualization

Prerequisite: GEOG 16160

This course explores geographic visualization (Geovisualization) and related cartographic and graphic design techniques. The course content is primarily focused on GIS-based spatial planning, design, analysis, and 2D/3D visualization techniques. Students are exposed to the basic knowledge of using GIS and Geovisualization in site analysis, site design, public participatory GIS (PPGIS), and design charrettes. The concepts of qualitative Geovisualization and other emerging tools and techniques are also introduced.

GEOG 16370: Drones, Planes, and Satellites

Prerequisite: GEOG 16160

This course introduces students to techniques of spatial analysis using satellite imagery and aerial photography. It intersperses practical exercises in photo interpretation and digital image processing with demonstrations that include a wide range of photographic and non-photographic source material, including infra-red thermal and micro-wave images, digital orthographic photos as well as LANDSAT and other satellite platforms.

GEOG 16391: Directed Geographic Field Experiences

This course offers an introduction to geographic field research methods, class field trips to places chosen by instructor and students. Students will complete a field research project taken on a topic chosen in consultation with the instructor. This course may not be offered annually.

GEOG 16553: Workshop In Geography

This course is designed for in-service teachers who wish to further develop their competencies in new teaching techniques and technologies in geography, including computer-assisted instruction and computer cartography. Contemporary geographic topics will be explored within a regional context of each major world region. Students will actively participate in applying new concepts, current data, and innovative techniques in geography by designing and presenting sample lessons at their grade level. (Summer only)
GEOG 16565: Geographic Information Systems (GIS) Topics and Applications 3 s.h.
Geographic Information Systems (GIS) Topics and Applications provides an extended exploration into Geospatial science and analysis at the graduate level. Students develop advanced GIS skills through a project-based approach culminating in a final project and presentation. The course deepens the understanding of raster and vector data structures as well as the ability to work with computational algorithms used in GIS analysis. Students learn through lectures, demonstrations, computer laboratory sessions and a project paper and presentation.

GEOG 16591: INDEP STUDY GEOG 3 s.h.

GEOG 16661: Geovisualization 3 s.h.
Prerequisite: GEOG 31660
This course explores geographic visualization (Geovisualization) and related cartographic and graphic design techniques. The course content is primarily focused on GIS-based spatial planning, design, analysis, and 2D/3D visualization techniques. Students are exposed to the basic knowledge of using GIS and Geovisualization in site analysis, site design, public participatory GIS (PPGIS), and design charrettes. The concepts of qualitative Geovisualization and other emerging tools and techniques are also introduced.

GEOG 31660: Fundamentals of Geographic Information Systems 4 s.h.
This course introduces students to the concepts and applications associated with creating, maintaining, analyzing, displaying, and interpreting geospatial data. Through the completion of activities and assignments, students gain experience with the fundamental tools for geospatial analysis, coupled with the knowledge of how best to apply them to real-world issues in the natural and human landscapes. This course is suitable for planners, geographers, and relevant professionals.

PLAN 31383: Metropolitan/Regional Planning 3 s.h.
Prerequisite: PLAN 31280
This course studies the philosophy, history, techniques, and problems of metropolitan and regional planning. Although it focuses on large scale-planning in the United States, the course makes some comparative analysis of planning in other countries. It emphasizes geographic techniques in regional analysis, as well as the roles of federal, state, and local agencies in planning. Students learn and use simulation and gaming techniques in the preparation of regional plans. This course may not be offered annually.

PLAN 31386: Land Use And Conservation 3 s.h.
Prerequisite: PLAN 31280
This course examines people’s changing perceptions of the economic use potential of land focusing on how land is a combination of physical, economic, political and cultural interactions. The course explores the basics of land use law, property rights, land use conflicts and the various avenues for land conservation and open space preservation.

PLAN 31580: Introduction to Planning: Past, Present, and Future 3 s.h.
This course focuses on the comprehension, representation, and use of ideas and information in the planning field, including appropriate perspectives from history, social science, and the design professions. Course content offers the primary reasons planning is undertaken by communities, cities, regions, and nations, and the impact planning is expected to have. Specific topics include history of human settlements, planning history, planning theory, global dimensions of planning, and planning processes to influence the future.

PLAN 31589: Environment and Sustainability Planning 3 s.h.
Prerequisite: PLAN 31580
This course offers a broad understanding of sustainability and environmental factors in planning from a local to global perspective. It explores environmental, economic, and social/political factors that contribute to sustainable communities, and investigates the role of planning processes in the creation of sustainable futures. The course examines planning’s implications on individual and community health within the built environment. Course materials also discusses key issues in equity, diversity, and social justice that emphasize planners’ role in expanding choice and opportunity for all.

PLAN 31590: Research Methods in Planning 3 s.h.
This course introduces quantitative and qualitative methods and modeling tools, and their applications to planning research and planning practice, including forecasting, policy analysis, and design of projects and plans. Students learn how to pose clear and researchable questions relevant to urban and regional planning, collect and process data, analyze data using quantitative or qualitative research tools, and present results using clear, accurate, and compelling text, graphics, and maps to a variety of audiences, including other planners, citizens, and public or elected officials. They also learn tools for assembling and analyzing ideas and information from prior practice and scholarship.
PLAN 31593: Planning Communication 3 s.h.
The aim of this course is to prepare students for planning and relevant professions by ensuring that they are aware of and trained in proper professional communications standards. Students recognize the need for appropriate outreach strategies for communicating with the public and gain knowledge to develop and utilize tools for effective in-person or virtual stakeholder engagement. In addition to basic written, oral, and graphical communication skills, this course introduces skills related to leadership, team building, facilitation, mediation, community motivation development, and strategic decision making.

PLAN 31685: Planning Practice, Law, and Ethics 3 s.h.
Prerequisite: PLAN 31580
This three-module course prepares students for the professional planning field by introducing topics related to planning practice, planning law, and planning ethics. The first module is focused on the roles of officials, stakeholders, and community members in planned change. It also introduces economic, infrastructure, social, and cultural factors to urban and regional growth and change. The second module provides legal and institutional contexts within which planning occurs. The final module presents key issues of planning ethics and related questions of the ethics of public decision-making, research, and client representation.

PLAN 31686: Community Planning and Site Design 3 s.h.
Prerequisites: PLAN 31580 and PLAN 31589
This course focuses on the design, arrangement, appearance, and functionality of building sites, neighborhoods, towns and cities, as well as the shaping and uses of safe public spaces. It explores sustainable design principles, techniques, and practices related to physical or spatial planning and urban design. Students explore design elements at both macro and micro scales that make up public and private realms of the built environment and learn to incorporate those elements in workable urban design projects and community plans.

PLAN 31695: PLANNING STUDIO 6 s.h.
Prerequisites: PLAN 31580 and PLAN 31590 and PLAN 31593 and GEOG 31660 and PLAN 31589 and PLAN 31685 and PLAN 31686
Graduate planning students produce their capstone projects in this studio. Under direct supervision of planning faculty, students undertake a planning project in cooperation with a local, regional, national, or international client. Students apply their relevant knowledge and skills gained from all required as well as elective courses in this project. They work in small groups focusing on different aspects of planning. Whenever appropriate, students get engaged with community stakeholders and assess their interests. The final product of this studio is a professional-level plan or a policy report.

MBS 00501: Biochemistry and Molecular Biology 3 s.h.
This course will focus on basic and advanced topics in Biochemistry and Molecular Biology. The course is designed to give the students a solid foundation in these subject areas. It is a course for both the basic scientist who seeks general principles about cellular function, and students preparing for health-related careers who wish to apply knowledge of the mechanisms of normal cellular function to the understanding of molecular dysfunction in human diseases. *MEDICAL BIOCHEMISTRY CAN SUBSTITUTE FOR FUNDAMENTALS I.* Cross-listed in the MPI program as MPI 00501 as a core course as well.

MBS 00502: Cell Biology 3 s.h.
This course will focus on the biology and physiology of the cell and is organized around the central theme of homeostasis – how the cell meets changing demands while maintaining the internal constancy necessary for all cells and organs to function. It is a course for both the basic scientist who seeks general principles about cellular function, and students preparing for health-related careers who wish to apply knowledge of the mechanisms of normal cellular function to the understanding of cellular dysfunction in human disease. Cross-listed in the MPI program as MPI 00502 as a core course as well.

MBS 00614: Molecular Mechanisms of Aging 2 s.h.
Prerequisites: MBS 00501, MBS 00502, MBS 0050
The major goal of this course is to acquaint second-year Master’s students with fundamental information regarding the aging-associated molecular pathways and to update them on the most recent advancements in the studies of molecular mechanisms of aging. The emphasis will be given to the discussion of the most popular aging theories, experimental attempts to improve longevity in animal models, and their critical analysis from the scientific standpoint. During the course, the students will be provided a solid understanding of the most popular subject in translational science that attracts billions of research dollars but is seldom taught as a conceptual course. It is a course for both the basic biomedical scientists who seek to understand the nature of aging and aging-associated processes, and the students preparing for health-related careers who are eager to expand their knowledge on "diseases and conditions associated with growing older, in order to extend the healthy, active years of life" (from the National Institute of Aging Mission Statement).
MBS 00615: Case Studies in Biology & Medicine 3 s.h.
Prerequisites: MBS 00501, MBS 00502, MBS 00503
This course is intended to help the student advance in the learning process. We will analyze topics of biological and medical interest and attempt to recognize and apply thought processes to understanding the biological phenomena or the clinical situation. The goal of this course is to go through case studies of biological and clinical significance and develop an appreciation for the levels of thought that are required to understand the underlying mechanisms and pathways and communicate about the topic under consideration.

MBS 00659: GSBS Maintaining Matriculation 0 to 9 s.h.
A Master of Biomedical Science program student who requires an additional semester to complete a course, especially a RowanSOM course that begins in the fall and ends in the spring, may register for GSBS Maintaining Matriculation during the subsequent semester. This course will carry a variable credit weight of 0-9 credits (5 credits are part-time status; 9 credits are full-time status). The GSBS office will be responsible for certifying that a student is completing a course in progress on a part-time or full-time basis commensurate with the number of credits they are registered for in the previous semester. The student will not be charged tuition or a fee for continuation regardless of the number of credits for which they are registered. A student can only register for GSBS Maintaining Matriculation for one (1) semester. This course is not graded.

MPI 00504: Topics in Molecular Pathology & Immunology 4 s.h.
This course provides the student with a factual understanding of key host/pathogen elements related to the development of human disease, in an introductory manner. The course will cover major human bacterial, viral and fungal pathogens and their disease-causing mechanisms. In addition, the human immune system is presented in the context of host-defense against infectious and malignant disease. Mechanisms of tumorigenesis and metastasis are explored, as are the strategies and approaches used to develop new therapeutic compounds. Finally, two shorter elements describe the creation, validation and standardization of new molecular diagnostic tools, and the critical evaluation of experimental data. Upon completion of the course, students will have gained a broad overview of the theoretic and practical aspects of the subjects that underlie the laboratory courses they will take in the future.

ATR 00105: Introduction to Athletic Training 3 s.h.
This course is designed as an initial experience for students considering a career in athletic training. Students will be introduced to various domains, competencies, and proficiencies related to athletic training. An in-depth look at the field of athletic training and the requirements of the athletic training program will be discussed.

ATR 00218: Prevention Care Orthopedic Injuries 3 s.h.
Prerequisite(s): (HES 00241 or PHED 35241) or (HES 00242 or PHED 35242) or (BIOL 10210 or BIOL 10212)
An examination of current practices and procedures in the basic pathology, prevention and care of athletic injuries. The laboratory experience exposes students to wound care, padding, and the art and science of athletic injury taping. An observational clinical field experience will be required.

ATR 00219: Pathology and Evaluation of Orthopedic Injuries I 3 s.h.
Prerequisite(s): (ATR 00218 or PHED 35218) Corequisite(s): (ATR 00238 or PHED 35238)
This course provides an examination of the etiology, epidemiology, pathology, and assessment of injuries and illnesses to the lower extremity and lumbar spine. Structural, functional, and surface anatomy will be reviewed. In addition, the application of special and ligamentous testing associated with lower extremity orthopedic and lumbar spine injuries will be examined.

ATR 00219: Pathology and Evaluation of Orthopedic Injuries I 3 s.h.
Prerequisite(s): (ATR 00218 or PHED 35218) Corequisite(s): (ATR 00238 or PHED 35238)
This course provides an examination of the etiology, epidemiology, pathology, and assessment of injuries and illnesses to the lower extremity. Structural, functional, and surface anatomy will be reviewed. In addition to didactic classroom time, students are also instructed, given time to practice and evaluated on pertinent athletic training psychomotor competencies and clinical proficiencies within a practical laboratory experience. There is an observational field experience associated with this class.
Course Descriptions

ATR 00220: Pathology and Evaluation of Orthopedic Injuries II 3 s.h.
Prerequisite(s): (ATR 00219 or PHED 35219) Corequisite: ATR 00239
This course provides an examination of the etiology, epidemiology, pathology and assessment of injuries and illnesses to
the upper extremity, head, cervical spine, chest, abdomen, and thorax. Structural, functional, and surface anatomy will be
reviewed. In addition, the application of special and ligamentous testing associated within the upper extremity, head,
cervical spine, chest, abdomen, and thorax areas will be examined.

ATR 00220: Pathology and Evaluation of Orthopedic Injuries II 3 s.h.
Prerequisite(s): (ATR 00219 or PHED 35219) Corequisite: ATR 00239
This course provides an examination of the etiology, epidemiology, pathology and assessment of injuries and illnesses to
the upper extremity, head, axial skeleton, chest, and thorax. Structural, functional and surface anatomy will be reviewed. In
addition to didactic classroom time, students are also instructed, given time to practice and evaluated on pertinent athletic
training psychomotor competencies and clinical proficiencies within a practical laboratory experience. There is an
observational field experience associated with this class.

ATR 00238: Pathology and Evaluation of Orthopedic Injuries I (Lab) 2 s.h.
Prerequisite(s): (ATR 00218 or PHED 35218) Corequisite(s): ATR 00219
This laboratory course is designed to teach the psychomotor and clinical proficiency skills necessary to perform a
competent evaluation of the lower extremity and low back region. It must be taken and successfully completed in
conjunction with Pathology and Evaluation of Orthopedic Injuries I before a student may continue matriculating through
the Athletic Training Education Program.

ATR 00239: Pathology and Evaluation of Orthopedic Injuries II (Lab) 2 s.h.
Prerequisite(s): ATR 00219 and ATR 00238 Corequisite(s): ATR 00220
This laboratory course is designed to teach the psychomotor and clinical proficiency skills necessary to perform a
competent evaluation of the upper extremity, head, cervical and thoracic regions. It must be taken and successfully
completed in conjunction with Pathology and Evaluation of Orthopedic Injuries II before a student may continue
matriculating through the Athletic Training Education Program.

ATR 00314: Advanced Emergency Care 3 s.h.
This course is designed for those individuals pursuing a career in Athletic Training. Students are trained in CPR for the
Professional Rescuer and Health Care Providers, First Aid, as well as other advanced emergency skills. In addition to other
emergency related skills, the care for individuals with a spinal cord injury, fracture, and/or life threatening injuries will be
discussed.

ATR 00334: Advanced Emergency Care 3 s.h.
This is a sophomore level course designed primarily for athletic training majors and other allied health professionals.
Students are trained in CPR for the professional rescuer as well as other advanced emergency skills. An additional
observation experience in a local emergency room is required. There also is an optional lifeguarding component available in
this class.

ATR 00338: Clinical Techniques in Athletic Training 2 s.h.
Prerequisite(s): (ATR 00220 or PHED 35220) Corequisite(s): ATR 00338
This course will review and evaluate psychomotor competencies and clinical proficiencies discussed in previously taught
Athletic Training coursework. Students meet in the Athletic Training Laboratory to practice their skills and be evaluated on
their psychomotor and clinical proficiency skills using scenario based assessments. Opportunities are also provided to
discuss topics pertinent to the student’s clinical residency assignment.

ATR 00338: Clinical Techniques in Athletic Training 2 s.h.
Prerequisite(s): (ATR 00220 or PHED 35220) Corequisite(s): ATR 00338
This course, designed for first semester juniors, will review and evaluate psychomotor competencies and clinical proficiencies
previously discussed in pre-professional course work. Students meet once per week in the Athletic Training Laboratory to practice
and be evaluated on their psychomotor and clinical proficiency skills. Opportunities are also provided to discuss topics pertinent to
the student’s clinical residency assignment.

ATR 00339: Clinical Techniques in Athletic Training II 2 s.h.
Prerequisite(s): (ATR 00338 or PHED 35338) Corequisite(s): ATR 00339
This course will review and evaluate psychomotor competencies and clinical proficiencies previously discussed in
therapeutic modalities and topics relevant to previous Athletic Training course work. Students meet in the Athletic
Training Laboratory to practice their skills and be evaluated on their psychomotor and clinical proficiency skills using
scenario based assessments. Opportunities are also provided to discuss topics pertinent to the student’s clinical residency
assignment.
ATR 00339: Clinical Techniques in Athletic Training II 2 s.h.
Prerequisite(s): (ATR 00338 or PHED 35338) Corequisite(s): ATR 00359
This course, designed for second semester juniors, will review and evaluate psychomotor competencies and clinical proficiencies previously discussed in Therapeutic Modalities and topics relevant to previous course work. Students meet once per week in the Athletic Training Laboratory to practice and be evaluated on their psychomotor and clinical proficiency skills. Opportunities are also provided to discuss topics pertinent to the student’s clinical residency assignment.

ATR 00340: Clinical Techniques in Athletic Training III 2 s.h.
Prerequisite(s): (ATR 00339 or PHED 35339) Corequisite(s): ATR 00360
This course will review and evaluate psychomotor competencies and clinical proficiencies previously discussed in Therapeutic Exercise and topics relevant to previous Athletic Training course work. Students meet in the Athletic Training Laboratory to practice their skills and be evaluated on their psychomotor and clinical proficiency skills using scenario based assessments. Opportunities are also provided to discuss topics pertinent to the student’s clinical residency assignment.

ATR 00341: Clinical Techniques in Athletic Training IV 2 s.h.
Prerequisite(s): (ATR 00340 or PHED 35340) Corequisite(s): ATR 00361
This course will review and evaluate clinical proficiencies previously discussed in the General Medical Conditions and Pharmacology course and related topics relevant to previous course work. Students meet within the Athletic Training Laboratory to practice and discuss topics pertinent to general medicine and pharmacology. An evidence-based and outcomes-based approach is taken to further develop knowledge in the area of medicine and pharmacology. Students will be evaluated on their psychomotor and clinical proficiency skills using scenario based assessments. Opportunities are also provided to discuss topics pertinent to the student’s clinical residency assignment.

ATR 00347: Applied Biomechanics 3 s.h.
Prerequisite(s): (ATR 00219 or PHED 35219) and (ATR 00220 or PHED 35220) or (HES 00243 and HES 00344)
This course is designed to acquaint students with the fundamental principles involved with biomechanics and human movements. This course will discuss the kinetic and kinematics concepts and how they are applied to balance, posture, locomotion and functional activity.

ATR 00358: Residency in Athletic Training I 3 s.h.
Prerequisite(s): (ATR 00220 or PHED 35220) and acceptance in the Professional Phase of the Athletic Training Education program
Corequisite(s): ATR 00338
This clinical education course will review and evaluate, within an approved clinical assignment, those clinical proficiencies discussed in previous and concurrent course. The clinical assignment enables students to develop and assimilate patient care skills under the direct supervision of an Athletic Trainer and/or other Health Care Professional. During this course, students will begin to develop autonomy, under supervision, to practice Athletic Training based on their knowledge, skills and abilities within the Athletic Training program. Students will be evaluated formally by their assigned Preceptors. This course must be taken and successfully completed in conjunction with ATR 00338 Clinical Techniques in Athletic Training I before continuing to matriculate through the Athletic Training Education Program.

ATR 00359: Residency in Athletic Training II 3 s.h.
Prerequisite(s): (ATR 00220 or PHED 35220) and acceptance in the Professional Phase of the Athletic Training Education program
Corequisite(s): ATR 00338
This clinical education course, designed for first semester juniors, will review and evaluate, within a clinical assignment, those clinical proficiencies discussed in previous and concurrent course work using a learning-over-time model. The clinical assignment enables students to develop and assimilate patient care skills under the direct supervision of a certified athletic trainer and/or approved clinical instructor within the athletic training room, exposure to intercollegiate athletics and/or at approved affiliated sites. During this course, the student will be formally evaluated by an Approved Clinical Instructor only.
This course must be taken and successfully completed in conjunction with ATR 00338 Clinical Techniques in Athletic Training I before a student may continue to matriculate through the Athletic Training Education Program.

ATR 00339:  Residency in Athletic Training II  
Prerequisite(s): (ATR 00338 or PHED 35338) and (ATR 00358 or PHED 35358)  
Corequisite(s): ATR 00359
This clinical education course will review and evaluate, within an approved clinical setting, those clinical proficiencies discussed in previous and concurrent course work. The clinical assignment enables students to develop and assimilate patient care skills under the direct supervision of an Athletic Trainer and/or other Health Care Professional. During this course, students will also develop autonomy, under supervision, to practice Athletic Training based on their knowledge, skills and abilities within the Athletic Training Program. Students will be evaluated formally by their assigned Preceptors. This course must be taken and successfully completed in conjunction with ATR 00339 Clinical Techniques in Athletic Training II before students may continue matriculating through the Athletic Training Education Program.

ATR 00360:  Residency in Athletic Training III  
Prerequisite(s): (ATR 00339 or PHED 35339) and (ATR 00359 or PHED 35359)  
Corequisite(s): ATR 00340
This clinical education course, designed for second semester juniors, will review and evaluate, within a clinical setting, those clinical proficiencies discussed in previous and concurrent course work. The clinical assignment enables students to develop and assimilate patient care skills under the direct supervision of an Athletic Trainer and/or other Health Care Professional. During this course, students will also develop autonomy, under supervision, to practice Athletic Training based on their knowledge, skills and abilities within the Athletic Training Program. Students will be evaluated formally by their assigned Preceptors. This course must be taken and successfully completed in conjunction with ATR 00340 Clinical Techniques in Athletic Training III before students may continue matriculating through the Athletic Training Education Program.

ATR 00361:  Residency in Athletic Training IV  
Prerequisite(s): (ATR 00340 or PHED 35340) and (ATR 00360 or PHED 35360)  
Corequisite(s): ATR 00341
This clinical education course will review and evaluate, within an approved clinical setting, those clinical proficiencies discussed in previous and concurrent course work. The clinical assignment enables students to develop and assimilate patient care skills under the direct supervision of an Athletic Trainer and/or other Health Care Professional. During this course, students will also develop autonomy, under supervision, to practice Athletic Training based on their knowledge, skills and abilities within the Athletic Training Program. Students will be evaluated formally by their assigned Preceptors. This course must be taken and successfully completed in conjunction with ATR 00341 Clinical Techniques in Athletic Training IV before students can continue matriculating through the Athletic Training Education Program.
Course Descriptions

ATR 00405: Organization & Administration in Athletic Training 3 s.h.
Prerequisite(s): (ATR 00339 or PHED 35339)
This lecture/laboratory course is designed to meet the entry level competencies for the athletic training student in the area of organization and administration of athletic training. It covers liability, budgeting, athletic training facility design, insurance, administration of medical record keeping systems, data tabulation and interpretation, emergency transportation systems, athletic training facility management, impact of state and national governing body regulations, athletic injury insurance administration and communication, conflict resolution and mediation.
The senior level course is designed to meet educational competencies in pharmacology and general medicine for the undergraduate athletic training student. This course will focus on issues in pharmacology and general medicine pertinent to the allied health profession of athletic training. Issues such as the drug approval process, side effects of medications, general medical evaluation will be explored during this course. There is a general medical clinical field experience with the athletic training programs medical director associated with this course.

ATR 00447: Therapeutic Modalities in Athletic Training - Laboratory Experiences 2 s.h.
Prerequisite(s): (ATR 00220 or PHED 35220) Corequisite(s): ATR 00475
This laboratory course is designed to teach the psychomotor and clinical proficiency skills necessary to develop psychomotor skills relevant to the use of Therapeutic Modalities. This laboratory course must be taken and successfully completed in conjunction with Therapeutic Modalities in Athletic Training before a student may continue matriculating through the Athletic Training Education Program.

ATR 00475: Therapeutic Modalities for Athletic Training 3 s.h.
Prerequisite(s): (ATR 00220 or PHED 35220) and (ATR 00329 or PHED 35239)Corequisite(s): ATR 00447
This course focuses on the cognitive, affective and psychomotor competencies involved in developing appropriate therapeutic modality programs for the injured person. This course uses current research to discuss the theory and clinical applications of all potential modalities used in the athletic training room. This course implements a problem-solving approach for the return of functional integrity to the injured person through the use of therapeutic modalities. A laboratory experience is part of this class.

ATR 00476: Therapeutic Exercises in Athletic Training - Laboratory Experiences 2 s.h.
Prerequisite(s): (ATR 00475 or PHED 35475) Corequisite(s): ATR 00478
This laboratory course is designed to teach the psychomotor and clinical proficiency skills necessary to develop psychomotor skills relevant to the use of Therapeutic Exercises. This laboratory course must be taken and successfully completed in conjunction with Therapeutic Exercises in Athletic Training before a student may continue matriculating through the Athletic Training Education Program.

ATR 00477: Psychosocial Aspects of Physical Activity 3 s.h.
Prerequisite(s): PSY 01107 and (ATR 00479 or PHED 35479)
This course, designed for seniors in Athletic Training, addresses several CAATE proficiencies related to the psychosocial aspect of physical activity and injury. Topics include but are not limited to theories related to the psychological and emotional aspects of trauma and forced inactivity, the use of motivational activities towards rehabilitation, basic principles of mental preparation, relaxation, and visualization, as well as theories and techniques of interpersonal and cross-cultural communication among athletic trainers, their patients, and others involved in the health care of the patient.

ATR 00478: Therapeutic Exercises in Athletic Training 3 s.h.
Prerequisite(s): (ATR 00475 or PHED 35475) and (ATR 00447 or PHED 35447) Corequisite(s): ATR 00476
This course covers the cognitive, affective and psychomotor competencies involved in developing appropriate rehabilitation exercise protocols for the injured person. This course uses current research to discuss the physiological and biomechanical concepts involved in the clinical practice of rehabilitation. This course implements a holistic and problem-solving approach for the return of functional integrity to the injured person. A laboratory experience is part of this class.

ATR 00479: Pharmacology and General Medicine in Athletic Training 3 s.h.
Prerequisite(s): (ATR 00478 or PHED 35478)
This senior level course is designed to meet educational competencies in pharmacology and general medicine for the undergraduate athletic training student. The course will focus on issues in pharmacology and general medicine pertinent to the allied health profession of athletic training. Issues such as the drug approval process, side effects of medications, general medical evaluation will be explored during this course. There is a general medical clinical field experience with the athletic training program's medical director associated with this course.
Course Descriptions

ATR 00505: Research Methods in Athletic Training 3 s.h.
This graduate level course familiarizes students with research concepts and their application in developing quality-driven research within the Athletic Training Profession. The emphasis of this course is for the student to learn how to assess the literature, develop a relevant research question, be familiar with different methodological and basic statistical designs, interpretations of results, writing a discussion and publication procedures.

ATR 00510: Advanced Topics in Clinical Evaluation through Cadaver Anatomy 3 s.h.
This graduate level course offers students the opportunity to dissect the upper and lower extremity of the human body. In addition students will dissect the head, neck and trunk. Students will identify various structures on the cadaver that are related to musculoskeletal pathology and evaluation. A pre-lab will be done related to the pathology associated with each dissection. A lab fee will be required for participation in this course.

ATR 00520: Advanced Rehabilitation Techniques: An Evidence-Based Approach to Rehabilitation 3 s.h.
This is a graduate level course that familiarizes students with advanced rehabilitation techniques. This course will take an evidence-based approach to the treatment and management of musculoskeletal pathologies. The student will develop clinical and practical skills in the rehabilitation of the trunk, head, neck, extremities and spine. An evidence based approach will allow the student to utilize the current literature in the rehabilitation of patients from an injured state to full participation in sport and activities of daily living.

ATR 00540: Fellowship in Athletic Training I 5 s.h.
Prerequisites: ATR 00341 and ATR 00361
This course will review and evaluate, within a clinical experience setting, those clinical integrated proficiencies discussed in all previous course work within the Athletic Training Program. Students will be assigned to a Preceptor in order to develop and assimilate patient healthcare skills under the direct supervision of an Athletic Trainer or other Allied Health Care Provider practicing in their respective profession. Students will gain hands-on patient care experience within Athletic Training Clinics, Intercollegiate Athletics and/or at Approved Affiliated Sites. During this course, the student will be formally evaluated by an assigned Preceptor throughout the semester on both clinical skills and professional dispositions.

ATR 00541: Fellowship in Athletic Training II 5 s.h.
Prerequisite: ATR 00540
This course is the culmination of all clinical integrated proficiencies throughout the Athletic Training Program. Students will be assigned to a Preceptor in order to develop and assimilate patient healthcare skills under the direct supervision of an Athletic Trainer or Allied Health Care Provider practicing in their respective profession. Students will gain hands-on patient care experience within Athletic Training Clinics, Intercollegiate Athletics and/or at Approved Affiliated Sites. During this course, the student will be formally evaluated by an assigned Preceptor throughout the semester on both clinical skills and professional dispositions.

ATR 00560: Thesis I 4 s.h.
Prerequisite: ATR 00561
This course will provide the student with the opportunity to produce quality driven research under the direction of their Master’s Thesis advisor. A research topic will be chosen through the collaboration of the student and the student’s advisor. The student, under the guidance of their advisor, will be expected to develop a research question, literature review, data collection and analysis, and interpretation of results. The student will be expected to defend and publish their results.

ATR 00561: Thesis II 4 s.h.
Prerequisite: ATR 00560
This course is a continuation of ATR 00560 Thesis I. The student will prepare their results for defense in front of their thesis committee. The final product will be in manuscript format that is ready for publication.

HES 00100: Teaching Concepts of Driver Education 3 s.h.
Prerequisites: (ATR 00235 or PHED 35235) and (HPE 00325 or HLTH 37325) or (ATR 00235 or PHED 35235) and (HPE 00326 or HLTH 37326)
The course is designed for individuals seeking New Jersey Driver Education teacher endorsement. The content includes learning to teach motor vehicle operation, driving environment and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.
Course Descriptions

HES 00100: Teaching Concepts of Driver Education 3 s.h.
Prerequisite(s): (ATR 00235 or PHED 35235) and (HPE 00325 or HLTH 37325) or (ATR 00235 or PHED 35235) and (HPE 00326 or HLTH 37326)
The course is designed for individuals seeking New Jersey Driver Education teacher endorsement. The content includes learning to teach motor vehicle operation, driving environment and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.

HES 00345: Exercise Physiology (with lab) 4 s.h.
Prerequisite(s): (HES 00241 or PHED 35241) and (HES 00242 or PHED 35242) or (BIOL 10210 and BIOL 10212), all with a grade of C- or higher.
A course in applied anatomy and physiology, this course studies the interrelationship of exercise and physiology. This course also covers the functions of the human body under the stress of physical activity.

HES 00401: Exercise Prescription 3 s.h.
Prerequisite(s): (BIOL 10210 and BIOL 10212) or (HES 00344 or PHED 35344 or HES 00345 or PHED 35345) or (HES 00241 or PHED 35241 and HES 00242 or PHED 35242) and (ATR 00334 or PHED 35344 or HES 00345 or PHED 35345), all with grade C- or higher.
This course provides students with the knowledge and practical experience in exercise testing and prescription. The information enables students to establish scientific foundations of exercise testing and prescription, to identify the risk factors for disease development and to prescribe an exercise program based on exercise test results and personal limitations. Practical experience is provided for testing subjects in the laboratory.

HES 00512: Understanding and Applying the Professional Literature in HES 3 s.h.
This course provides an overview of the research methods used in the health and exercise science field with an emphasis on reading, interpreting and applying the research findings in practical settings. The course will include an overview of both quantitative and qualitative research methods, as well as the steps of the research process. Students will learn how to perform a literature review, conduct a program evaluation and other practical applications of the research process.

HES 00515: Driver Education Concepts and Theory 3 s.h.
The course is designed for currently certified teachers seeking New Jersey Driver Education teacher endorsement. The content includes learning to teach motor vehicle operation, driving environment and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.

HES 00520: Exercise and Epidemiology 3 s.h.
This course examines the etiology and pathophysiology of certain diseases and specifically includes the role of exercise as a preventative measure in the onset of these diseases. Disease processes investigated are coronary artery and coronary heart disease, hypertension, Type 2 diabetes mellitus, obesity, osteoporosis, selected cancers and low back pain syndrome.

HES 00525: Curriculum Strategies In Substance Awareness Education 3 s.h.
Prerequisite: PST 05502
This course provides students with the knowledge, resources and skills needed to plan and organize curricula in chemical health education which meet the needs of students in school and non-school based settings. Students evaluate the nature and scope of the substance abuse problem in order to make informed decisions in the development, organization, implementation and evaluation of substance abuse programs. Special attention is given to program and policy development, instructional strategies, program evaluation, staff development, and the dynamics of school culture.

HES 00550: Capstone Project 3 s.h.
Prerequisite: This course must be taken in the last semester of the program.
In this independent study course, students will work individually with a faculty advisor to complete a major project relevant to health promotion. Projects may include the development of curriculum, program development, program evaluation, a research thesis, or other project with the approval of the Wellness and Lifestyle Management faculty coordinator.

HES 00555: Individual Study in Health and Physical Education 3 to 6 s.h.
This course is designed to give the student the opportunity to pursue an in-depth inquiry into a selected topic in health and physical education on an individualized basis. It provides flexibility for the student in increasing specialization in a selected area of interest. Offered in summer session only for matriculated students with a minimum of 25 S.H. completed. Students must submit a written proposal for individual study to the program advisor by March 15 prior to the summer session desired.
HES 00590: Integrating Wellness Into School Settings 3 s.h.
This course addresses the growing demand for wellness initiatives for students, their families and staff in P through 12 school settings. Teachers, school nurses, school administrators and community health promotion professionals will understand how to build wellness programming into the school community.

HES 00590: Integrating Wellness Into School Settings 3 s.h.
This course addresses the growing demand for wellness initiatives for students, their families and staff in P through 12 school settings. Teachers, school nurses, school administrators and community health promotion professionals will understand how to build wellness programming into the school community.

HLT 00103: Health and Wellness 3 s.h.
This course stresses the concepts of lifetime health and physical fitness. It examines the positive effects of exercise upon the heart and blood vessels, obesity and proper diet, body mechanics, and how the body handles stress. The course also examines the negative effects of disease, including socially transmitted diseases, substance abuse including narcotics, alcohol and tobacco, and other contemporary health-related problems. Students learn to analyze their strengths and limitations while planning a personal wellness profile which best fits their needs and interest.

HLTH 37512: Understanding And Applying The Professional Literature In Hes 3 s.h.
This course provides an overview of the research methods used in the health and exercise science field with an emphasis on reading, interpreting and applying the research findings in practical settings. The course will include an overview of both quantitative and qualitative research methods, as well as the steps of the research process. Students will learn how to perform a literature review, conduct a program evaluation and other practical applications of the research process.

HLTH 37515: Driver Education Concepts And Theory 3 s.h.
The course is designed for currently certified teachers seeking New Jersey Driver Education teacher endorsement. The content includes learning to teach motor vehicle operation, driving environment and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.

HLTH 37518: Nutrition And Epidemiology 3 s.h.
This course is designed to explore nutrition’s role in the prevention and rehabilitation of a variety of diseases including: hypertension, hypercholesterolemia, cardiovascular disease, diabetes, obesity, arthritis, osteoporosis, and cancer. The course will explore the etiology and progression of these diseases and facilitate an understanding of how nutrition may be prescribed for the care of individuals with these diseases. A portion of the course will be devoted to analyzing case studies and guiding the student through the process of nutritional management. Students will be required to perform a review of literature on a specific disease, which they will then present to the class.

HLTH 37520: Exercise And Epidemiology 3 s.h.
This course examines the etiology and pathophysiology of certain diseases and specifically includes the role of exercise as a preventative measure in the onset of these diseases. Disease processes investigated are coronary artery and coronary heart disease, hypertension, Type 2 diabetes mellitus, obesity, osteoporosis, selected cancers and low back pain syndrome.

HLTH 37525: Curriculum Strategies In Substance Awareness Education 3 s.h.
This course provides students with the knowledge, resources and skills needed to plan and organize curricula in chemical health education which meet the needs of students in school and non-school based settings. Students evaluate the nature and scope of the substance abuse problem in order to make informed decisions in the development, organization, implementation and evaluation of substance abuse programs. Special attention is given to program and policy development, instructional strategies, program evaluation, staff development, and the dynamics of school culture.

HLTH 37530: Leadership And Management In Health Promotion Programs 3 s.h.

HLTH 37541: Wellness Coaching And Behavior Change 3 s.h.
This course will provide practitioners with the theoretical background and tools needed to effect positive lifestyle changes in individual clients and population groups. Students will learn to use a wellness coaching delivery model that is based on empirically-supported health behavior theories, such as Social Cognitive Theory and the Transtheoretical Model, to support and motivate lasting behavior change.
HLTH 37542: Program Planning In Health Promotion 3 s.h.
This course provides an overview of leading health program planning theories, including PRECEDE/PROCEED and Intervention Mapping, and the application of these theories in the most common health promotion settings. The program planning process will be discussed in detail and case studies will be used to demonstrate the successful application of this process.

HLTH 37550: Capstone Project 3 s.h.
Prerequisite: This course must be taken in the last semester of the program.
In this independent study course, students will work individually with a faculty advisor to complete a major project relevant to health promotion. Projects may include the development of curriculum, program development, program evaluation, a research thesis, or other project with the approval of the Wellness and Lifestyle Management faculty coordinator.

HLTH 37580: Obesity And Diabetes Prevention And Management 3 s.h.
Prerequisites: INAR 06200 and (BIOL 10211 or BIOL 10212)
The purpose of this course is to examine the most common diseases afflicting Americans which have exercise as one of its primary modes for prevention and rehabilitation. The course will thoroughly review the underlying causes for each disease and provide the student with a complete understanding of how exercise can be used in combating these diseases. The primary areas of focus will be cardiovascular, pulmonary and metabolic disorders.

HLTH 37590: Integrating Wellness Into School Settings 3 s.h.
This course addresses the growing demand for wellness initiatives for students, their families and staff in P through 12 school settings. Teachers, school nurses, school administrators and community health promotion professionals will understand how to build wellness programming into the school community.

HLTH 37600: Wellness Through The Lifecycle 3 s.h.
This course is an overview of critical health and wellness issues specific to the lifecycle stages from birth to old age. Designed for health promotion practitioners, this course will provide a review of intervention guidelines, resources and program examples of wellness programs to meet the needs of clients and populations in each stage of life.

HLTH 37610: Positive Perceptions, Performance and Wellness 3 s.h.
This course is designed to provide students with knowledge of core concepts from positive psychology and the strengths movement from the perspective of wellness philosophy. Students will explore ways in which positive perceptions can be used to help target populations achieve personal and work life satisfaction. Students will develop competency in applied interventions in workplace, school, clinical and community settings to enhance wellness, productivity and performance. This course addresses work and life satisfaction, important drivers of health, by incorporating the fields of positive psychology and wellness.

HPW 00360: Facility & Program Management in Wellness 3 s.h.
Prerequisite(s): HLTH 00310
This course examines the skills necessary to effectively manage a health promotion facility and program through the study of the health and fitness facility management industry. Topics include training and managing staff, marketing programs and services, customer service, financial management, legal concerns, equipment selection and health and safety issues.

NUT 00200: Basic Nutrition 3 s.h.
Students study human nutrition through the basic knowledge of nutrients and the physiological processes involved in the utilization of food. They also develop an understanding of the ways in which age, health, social, and economic factors and other variables affect nutritional needs and food practices. A computerized dietary analysis may be one of the course requirements.

NUT 00415: Nutrition for Fitness 3 s.h.
Prerequisite(s): (NUT 00200 or INAR 06200) and (BIOL 10210 and BIOL 10212) or (NUT 00200 or INAR 06200) and (HES 00241 or PHED 35241) and (HES 00242 or PHED 35242), all with a grade of C- or higher.
This advanced nutrition course explores the relationship between nutrition, physical fitness, performance and disease prevention. Specific topics include nutrition fraud, supplementation, ergogenic aids, diet planning for athletes and the relationship between nutrition and chronic diseases such as cancer and heart disease. In addition, students continue to develop their skills as nutrition counselors and educators.
NUT 00518: Nutrition and Epidemiology 3 s.h.
This course is designed to explore nutrition’s role in the prevention and rehabilitation of a variety of diseases including: hypertension, hypercholesterolemia, cardiovascular disease, diabetes, obesity, arthritis, osteoporosis, and cancer. The course will explore the etiology and progression of these diseases and facilitate an understanding of how nutrition may be prescribed for the care of individuals with these diseases. A portion of the course will be devoted to analyzing case studies and guiding the student through the process of nutritional management. Students will be required to perform a review of literature on a specific disease, which they will then present to the class.

NUT 00520: Supervised Practice in Nutrition and Dietetics 1 6 s.h.
Prerequisite: Must be enrolled in the M.S. Nutrition & Dietetics program and approved to enter the internship phase of the program
This course provides the first half of the required 1200-hour supervised practice experience in partial fulfillment of the requirements for the Registered Dietitian credential. Students will be assigned to an ACEND-approved site and will complete 600 hours of clinical service in a hospital, community and/or school setting, and a food service facility. (Note: upon completion of the 1200-hour experience, the student must successfully complete a 600 hour rotation in a hospital setting and in a community/school setting.)

NUT 00530: Supervised Practice in Nutrition and Dietetics 2 6 s.h.
Prerequisite: NUT 00520 and must be enrolled in the M.S. in Nutrition and Dietetics program.
This course provides the second half of the required 1200-hour supervised practice experience in partial fulfillment of the requirements for the Registered Dietitian credential. Students will be assigned to an ACEND-approved site and will complete 600 house of clinical service in a hospital, community and/or school setting, and a food service facility. ) Note: upon completion of the 1200-hour experience, the student must successfully complete a 600-hour rotation in a hospital setting and a community/school setting.)

PHED 35103: Health And Wellness 3 s.h.
This course stresses the concepts of lifetime health and physical fitness. It examines the positive effects of exercise upon the heart and blood vessels, obesity and proper diet, body mechanics, and how the body handles stress. The course also examines the negative effects of disease, including socially transmitted diseases, substance abuse including narcotics, alcohol and tobacco, and other contemporary health-related problems. Students learn to analyze their strengths and limitations while planning a personal wellness profile which best fits their needs and interest.

PHED 35555: Individual Study In Health And Physical Education 3 to 6 s.h.
This course is designed to give the student the opportunity to pursue an in-depth inquiry into a selected topic in health and physical education on an individualized basis. It provides flexibility for the student in increasing specialization in a selected area of interest. Offered in summer session only for matriculated students with a minimum of 25 S.H. completed. Students must submit a written proposal for individual study to the program advisor by March 15 prior to the summer session desired.

PHED 36100: Teaching Concepts Of Driver Education 3 s.h.
The course is designed for individuals seeking New Jersey Driver Education teacher endorsement. The content includes learning to teach motor vehicle operation, driving environment and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.

WLM 00530: Leadership and Management in Health Promotion Programs 3 s.h.
This course covers a variety of leadership issues necessary for ascending from a clinical position to an administrative or management position in a health profession. The general principle are applicable regardless of whether the goal is to ascend into a formal large institution(e.g., hospital), smaller institutional practice, healthcare corporation, private practice, or educational institution setting; basically any healthcare setting where one may have employees to work with or manage. Students are expected to: Participate actively by sharing their own personal experiences in the healthcare setting, provide analysis or critique of various situations presented, and integrate the material learned to answer a comprehensive question at the end of the semester as if they are the leader in an appropriate organizational setting.

WLM 00541: Wellness Coaching and Behavior Change 3 s.h.
This course will provide practitioners with the theoretical background and tools needed to effect positive lifestyle changes in individual clients and population groups. Students will learn to use a wellness coaching delivery model that is based on empirically-supported health behavior theories, such as Social Cognitive Theory and the Transtheoretical Model, to support and motivate lasting behavior change.
Course Descriptions

WLM 00542: Program Planning in Health Promotion 3 s.h.
This course provides an overview of leading health program planning theories, including PRECEDE/PROCEED and Intervention Mapping, and the application of these theories in the most common health promotion settings. The program planning process will be discussed in detail and case studies will be used to demonstrate the successful application of this process.

WLM 00575: Seminar in Wellness Management 3 s.h.
Seminar in Wellness Management examines overall management of wellness programs and facilities, with an emphasis on human resource management. In this case, wellness professionals will enhance their knowledge and application of how these elements that can be applied to wellness management settings. Topics include organizational structure, training, and managing staff, financial management, legal and ethical concerns and customer service relations.

WLM 00580: Obesity and Diabetes Prevention and Management 3 s.h.
**Prerequisite(s):** (NUT 00200 or INAR 06200) and (BIOL 10211 or BIOL 10212)
The purpose of this course is to examine the most common diseases afflicting Americans which have exercise as one of its primary modes for prevention and rehabilitation. The course will thoroughly review the underlying causes for each disease and provide the student with a complete understanding of how exercise can be used in combating these diseases. The primary areas of focus will be cardiovascular, pulmonary and metabolic disorders.

WLM 00600: Wellness Through the Lifecycle 3 s.h.
This course is an overview of critical health and wellness issues specific to the lifecycle stages from birth to old age. Designed for health promotion practitioners, this course will provide a review of intervention guidelines, resources and program examples of wellness programs to meet the needs of clients and populations in each stage of life.

WLM 00610: Positive Perceptions & Performance Wellness 3 s.h.
This course is designed to provide students with knowledge of core concepts from positive psychology and the strengths movement from the perspective of wellness philosophy. Students will explore ways in which positive perceptions can be used to help target populations achieve personal and work life satisfaction. Students will develop competency in applied interventions in workplace, school, clinical and community settings to enhance wellness, productivity and performance. This course addresses work and life satisfaction, important drivers of health, by incorporating the fields of positive psychology and wellness.

WLM 00620: Internship in Wellness and Lifestyle Management 3 s.h.
**Prerequisite:** Students must have completed 27 semester hours in the program.
The goal of this course is to provide graduate students in Wellness and Lifestyle Management with an opportunity to apply the professional knowledge they have gained in their coursework to a professional setting. In addition to participating in the daily operation of the site, the student will complete a major project which incorporated two or more of the professional skills s/he has learned in the coursework of the program.

HIST 05100: Western Civilization To 1660 3 s.h.
This course covers the evolution of Western Culture from the Stone Age to the end of the Thirty Years War, emphasizing the medieval and early modern periods. Students study the ancient period to learn of its contribution to western culture. The course introduces students to the principles and methodology of history.

HIST 05101: Western Civilization Since 1660 3 s.h.
**Prerequisite:** Admitted to the Bantivoglio Honors Concentration
This course examines expansion of European culture to other world areas and the consequent changes for European life. It emphasizes the impact of the Industrial Revolution on all aspects of Western culture and introduces students to the principles and methodology of history.

HIST 05120: World History Since 1500 3 s.h.
This course studies the key changes in the patterns of interaction among the major cultures of the earth from the beginnings of European Expansion in the 1500’s. The course covers the roots of European Expansion, the response of the Confucian, modern, and non-Eurasian cultures, and the emergence of a non-Western Third World Block since 1914.

HIST 05150: United States To 1865 3 s.h.
This course examines the historical roots of the American democratic traditions, with the emphasis on understanding the political, social and cultural forces developed in the new physical setting of North America and finally welded into a unified nation.
**HIST 05151: United States Since 1865**
3 s.h.
This course analyzes the principal political, social and cultural factors conditioning the life of the nation since the Civil War. It emphasizes the issues facing modern America with the impact of industrialization and the problems of world leadership.

**HIST 05151: United States Since 1865**
3 s.h.
This course analyzes the principal political, social and cultural factors conditioning the life of the nation since the Civil War. It emphasizes the issues facing modern America by the impact of industrialization and the problems of world leadership.

**HIST 05306: Historical Methods-WI**
3 s.h.
*Prerequisites: COMP 01112*
This course offers intensive training in the techniques of historical research and analysis of historical writing. Required of History majors as prerequisite for other upper-level courses.

**HIST 05492: Seminar**
3 s.h.
*Prerequisites: Senior Status and HIST 05306 w/C- or better, at least 9 credits in 300-400 level history courses.*
This course concentrates on a research paper of substantial length based upon primary as well as secondary sources. The course also requires critical analysis and discussion of the papers by seminar participants. Required of History majors during their senior year.

**HIST 05500: Colloquium In American History**
3 s.h.
This course introduces students to in-depth historical analysis of a selected theme in American history, including work with historical sources, critical reading of historians’ accounts, intensive research and writing, and class discussion. Proposed topics include American Immigration History, Colonial North America (1500-1775), The American Revolution and Early Republic (1763-1820), Comparative History of the Americas, and Modern American and European Women in Historical Perspective.

**HIST 05510: Readings And Research In History I**
3 s.h.
This course is one of two courses, along with Readings and Research in History II, designed to strengthen the skills of students in historical research, writing, and analysis. It will expose students to key recent theoretical influences on professional historians, cover key developments in historiography from ancient times through the beginning of the twentieth century, and provide students with brief surveys of the major issues, including both classic and contemporary debates, within regionalized subfields of European and Global history. The course will provide students with opportunities for peer presentations, discussion, and leadership not necessarily available in other graduate courses. This course is required for all students enrolled in the Master’s program in History and is a prerequisite for 600 level graduate courses but not for other 500 level graduate courses, including Readings and Research in History II. This course is usually offered once a year.

**HIST 05510: Readings And Research In History I**
3 s.h.
This course is on of two courses, along with Readings and Research in History II, designed to strengthen the skills of students in historical research, writing, and analysis. It will expose students to key recent theoretical influences on professional historians, cover key developments in historiography from ancient times through the beginning of the twentieth century, and provide students with brief surveys of the major issues, including both classic and contemporary debates, within regionalized subfields of European and Global history. The course will provide students with opportunities for peer presentations, discussion, and leadership not necessarily available in other graduate courses. This course is required for all students enrolled in the Master’s program in History and is a prerequisite for 600 level graduate courses but not for other 500 level graduate courses, including Readings and Research in History II. This course is usually offered once a year.

**HIST 05511: Colloquium In American History I**
3 s.h.
This course is the first graduate colloquium on the topic of American history that students in this program will take. The course focuses on the in-depth historical analysis of a selected theme in American history, including work with historical sources, critical reading of historians’ accounts, intensive research and writing, and class discussion. Proposed topics include American Immigration History, Colonial North America, 1500-1775, the American Revolution and Early Republic, 1775-1820, Comparative History of the Americas, and Modern American and European Women in Historical Perspective.

**HIST 05512: Readings And Research In History II**
3 s.h.
*Prerequisite: Admission to BA/MA or M.A. program in History*
This course is one of two courses, along with Readings and Research in History I (HIST 05510), designed to strengthen the skills of students in historical research, writing, and analysis. It will expose students to key recent theoretical influences on professional historians, cover key developments in historiography during the twentieth century, and provide students with brief surveys of the major issues, including both classic and contemporary debates, within the regionalized subfields of United States history. The course will provide students with opportunities for peer presentations, discussion, and leadership not necessarily available in other graduate courses. This course is required for all students enrolled in the Master’s program in History and is a prerequisite for 600 level graduate courses but not for other 500 level graduate courses, including...
Readings and Research in History I (HIST 05.510). This course is usually offered once a year.

HIST 05514: Colloquium In American History II 3 s.h.
Prerequisites: HIST 05511
This course is the second graduate colloquium on the topic of American history that students in this program will take. Otherwise the course is identical to Colloquium in American History I.

HIST 05516: Colloquium In American History III 3 s.h.
Prerequisites: HIST 05511 and HIST 05514
This course is the third graduate colloquium on the topic of American history that students in this program will take. Otherwise, the course is identical to Colloquium in American History I.

HIST 05522: Colloquium In European History I 3 s.h.
This course is the first graduate colloquium on the topic of European history that students in this program will take. The course focuses on in-depth historical analysis of a selected theme in European history that students in this program will take. The course focuses on in-depth historical analysis of a selected theme in European history, including work with historical sources, critical reading of historians' accounts, intensive research and writing, and class discussion. Proposed topics include Ancient Historians, The French Revolution, The Holocaust in Europe, Popular Culture in Early Modern Europe, Social History of Early Modern Europe, 20th Century War and Society, Women in Early Modern Europe, and Modern American and European Women in Historical Perspective.

HIST 05523: Colloquium In European History II 3 s.h.
Prerequisites: HIST 05522
This course is the second graduate colloquium on the topic of European history that students in this program will take. Otherwise, it is identical to Colloquium in European History I.

HIST 05524: Colloquium In European History III 3 s.h.
Prerequisites: HIST 05523
This course is the third graduate colloquium on the topic of European history that students in this program will take. Otherwise, the course is identical to Colloquium in European History I.

HIST 05531: Colloquium In Global History I 3 s.h.
This course is the first graduate colloquium on the topic of global history that students in this program will take. The course focuses on in-depth historical analysis of a selected theme in global history, including work with historical sources, critical reading of historians' accounts, intensive research and writing, and class discussion. Proposed areas of specialization include Africa, Asia, Eastern Europe, and the Middle East.

HIST 05533: Colloquium In Global History II 3 s.h.
Prerequisites: HIST 05531
This course is the second graduate colloquium on the topic of global history students in this program will take. Otherwise, the course is identical to Colloquium in Global History I.

HIST 05535: Colloquium In Global History III 3 s.h.
Prerequisites: HIST 05533
This course is the third graduate colloquium on the topic of global history students in this program will take. Otherwise, the course is identical to Colloquium in Global History I.

HIST 05545: History of Crime 3 s.h.
Prerequisite(s): Graduate or senior status
This course examines crime in historical perspective, as a window into both social history and shifting approaches to historical study. Graduate students will work in-depth with analysis of both primary and secondary source materials.

HIST 05551: Graduate Independent Study 3 s.h.
Prerequisite: matriculation in the Master of Arts in History program
Students may complete up to 6 elective credits through the independent study option if they wish to pursue specialized knowledge not available through regular coursework. Students must take at least one colloquium related to the topic before engaging in independent study, then develop an individual study proposal with a full time professor in the History Department. The proposal must be approved by the graduate coordinator prior to enrollment in the course.

This course requires students to design and begin implementing their own research project to be used to satisfy the program's thesis requirement. Under the guidance of a member of the History Department faculty who agrees to serve as thesis advisor, the student will develop a research prospectus for their thesis that will consist of an introduction and statement of the problem, a literature review, and a brief summary of the proposed research. The student will defend the prospectus before at least two History Department faculty. Prerequisites are two courses in historiography and research methods, Readings and Research in History I (HIST 05.501) and Readings and Research in History II (HIST 05.502). The student will begin implementing the research after obtaining the Committee's approval.

| HIST 05602  | Master's Thesis in History II                    | 3 s.h.       |
| Prerequisite: HIST 05510 and HIST 05512 and HIST 05601 |              |

In Master's Thesis in History II, the student will write and complete a Master's Thesis. In Master's Thesis in History I (HIST 05.601), the student will have designed and begun implementing their own research project. In this course, under the guidance of a member of the History Department faculty who has agreed to serve as thesis advisor, the student will complete the writing of the thesis. The thesis should, like other graduate courses, engage students in critical reading of historical accounts and provide them with opportunities to reconstruct historical events from original documents, conduct research that is based on primary sources and applies historical methodologies, and write coherent historical analysis. Prerequisites are two courses in historiography and research methods, Readings and Research in History I (HIST 05.510) and Readings and Research in History II (HIST 05.502); and Master's Thesis in History I (HIST 05.601).

| CURR 29515 | Introduction to Planning and Teaching            | 4 s.h.       |

Students will begin their development of the skills necessary to enhance the planning, teaching, and learning processes. Students will be expected to ground their future classroom practice in a strong research base through a study of planning and teaching models and the latest literature on effective teaching.

| CURR 29550 | Public School Curriculum K-12                    | 3 s.h.       |

A course that deals with a critical appraisal of current public school curriculum practices. Emphasis will be placed on the following aspects of the K-12 curriculum: the subject matter curriculum, the humanistic curriculum, role of subject matter specialist, the nature of the disciplines, and the taxonomies of educational objectives (affective, cognitive, psychomotor). This is a basic course which is a prerequisite for any further study in curriculum. This course may not be offered annually.

| CURR 29550 | Public School Curriculum K-12                    | 3 s.h.       |

A course that deals with a critical appraisal of current public school curriculum practices. Emphasis will be placed on the following aspects of the K-12 curriculum: the subject matter curriculum, the humanistic curriculum, role of subject matter specialist, the nature of the disciplines, the taxonomies of educational objectives (affective, cognitive, psychomotor). This is a basic course which is a prerequisite for any further study in curriculum. This course may not be offered annually.

| CURR 29580 | Fundamentals of Curriculum Development           | 3 s.h.       |

This course provides background in goals, objectives, assumptions, values, issues, and theory related to modern curriculum. Topics include learning and curriculum, the nature and structure of knowledge and curriculum design, criteria for staff, lay advisers, committees, and consultants for the purpose of curriculum planning. This is a basic course which is a prerequisite for further study in curriculum.

| CURR 29590 | Curriculum Evaluation                            | 3 s.h.       |

Emphasis will be on identification, organization, and practical applications of selected curriculum evaluation models. This course is designed to enable a student, or a team of students, to determine what and when to evaluate, whom to evaluate, and how to evaluate. Students will be expected to demonstrate a knowledge base in curriculum theory and development. A curriculum evaluation project is required. This course may not be offered annually.
### Course Descriptions

**CURR 29600: Specialization Seminar And Investigation I**  
3 s.h.  
The student must complete a special project in the field of specialization which demonstrates his ability to apply theory and research. Focuses upon applying general and specialized knowledge to the examination of proposals and research on the processes of change and innovation.

**CURR 29601: Specialization Seminar And Investigation II**  
3 s.h.  
The student must complete a special project in the field of specialization which demonstrates his ability to apply theory and research. Focuses upon applying general and specialized knowledge to the examination of proposals and research on the processes of change and innovation.

**ECED 23510: Curriculum Development In Early Childhood Programs**  
4 s.h.  
This course is focused on the content and characteristics of developmentally appropriate curriculum to support growth, development, and learning of young children. Factors that influence early childhood curriculum development, the important role of family and culture, the integration of play, literacy, and assessment are studied. Students learn to apply the recommended standards for developmentally appropriate practices and curriculum. This course also includes a field experience with visitations to early childhood classes/programs.

**ECED 23511: Understanding Child Development And Behavior In The Classroom**  
3 s.h.  
This course has two main components: Understanding child development and supporting young children’s social emotional development in inclusive early childhood settings. Teacher candidates will utilize research in child development including theories and perspectives from neuroscience and psychology to achieve a holistic understanding of development in the first five years in order to guide young children’s social emotional development. Teacher candidates will work with children in diverse settings and actively support young children with emerging social-emotional competencies. Completing field based assignments is required.

**ECED 23512: Exploring the World: Literacy, Social Studies, and Creative Experiences in Early Childhood**  
3 s.h.  
Prerequisites: ECED 23511  
This course provides candidates with knowledge, skills, and dispositions necessary to create authentic learning experiences for young children through the integration of literacy, social studies, and creative experiences. Candidates will explore various curriculum models and heavily use project approach and other play based and developmentally appropriate methods to teach these subject areas in inclusive early childhood settings. Course content will emphasize diversity, family and community as the foundation of curriculum with young children. Candidates will be required to develop and teach lessons in the preschool classrooms and to develop a theme based unit plan built on the students data collected from the preschool classroom.

**ECED 23513: Assessment In Early Childhood Education**  
3 s.h.  
Prerequisites: ECED 23512, ECED 23514 and Corequisite: ECED 23515  
This course focuses on analyzing assessment methods in early childhood education. Candidates will examine different methods and tools of assessment, explore the concept of assessment driven instruction, and learn to develop differentiated instructional strategies based on student assessment data. They will also learn to share the data with families and other professionals in the field. In addition to assessing students, candidates will explore early childhood program assessment tools such as the Early Childhood Environment Rating Scale-Revised (ECERS-R), the Classroom Assessment Scoring System (CLASS), and the Assessment of Practice in Early Elementary Classrooms (APEEC), in order to ensure comprehensive quality of the education. Conducting a case on one child in preschool level will be required for this course.

**ECED 23514: Assessment In Early Childhood Education**  
3 s.h.  
Prerequisites: ECED 23512, ECED 23514 and Corequisite: ECED 23515  
This course focuses on analyzing assessment methods in early childhood education. Candidates will examine different methods and tools of assessment, explore the concept of assessment driven instruction, and learn to develop differentiated instructional strategies based on student assessment data. They will also learn to share the data with families and other professionals in the field. In addition to assessing students, candidates will explore early childhood program assessment tools such as the Early Childhood Environment Rating Scale-Revised (ECERS-R), the Classroom Assessment Scoring System (CLASS), and the Assessment of Practice in Early Elementary Classrooms (APEEC), in order to ensure comprehensive quality of the education. Conducting a case on one child in preschool level will be required for this course.

**ECED 23515: Family, Community, And Professional Ethics**  
3 s.h.  
Prerequisite: ECED 23511  
This course focuses on parent-child relationships and partnerships between parents and their schools and communities. The course examines the role of the parent and the development of young children (P-3). Issues related to P-3 children will be studied along with topics such as family dynamics, curriculum, parental roles, and cultural diversity. Professional ethics will be integrated throughout this course in relation to working with young children and their families both in individual and group settings. Techniques for involving parents and families in school environments will be examined through discussion and lecture. Developing a plan for collaborating with diverse families will be required for this course.

This course provides candidates with knowledge, skills, and dispositions necessary to create authentic learning experiences for young children through the integration of science, technology, engineering, and math (STEM). Candidates will modify the learning environment and materials, utilize project approach and use other play based and developmentally appropriate methods in teaching STEM subject areas in inclusive early childhood settings. Course content will emphasize intellectual and cognitive growth of young children and the ways to engage children in higher level thinking skills such as inquiry, collaboration, critical thinking, and creativity. Candidates will teach children to complete field-based assignments.

This course will provide an overview of early childhood quality improvement initiatives and efforts for continuous quality improvement (CQI). Students will examine the current landscape of research, policy and practice as it relates to quality improvement efforts (including the role of technical assistance) and CQI, as well as frameworks and theories of change. Students will also engage in a critical analysis of the definition of quality using theoretical frameworks as reference.

This course focuses on the practices coaches and mentors utilize in early childhood settings. The course will provide a thorough overview of different frameworks and theories of adult learning along with additional fundamental critical perspectives examining the ways in which people learn and know. Students will investigate models for reflective practices and apply them to their own work and experiences in the field through the lens of mentor/coach and mentee/coachee.

This course will build on the literature on culturally responsive competencies and practices to provide a framework for the early childhood technical assistance process. Students will examine critical issues such as gender, language, age, context, sexuality, class, and culture and investigate the ways that leaders can be culturally responsive to the programs in the cultural and community contexts they are situated as they provide technical assistance.

This course will focus on building an understanding of implementation science as a framework for helping translate research to practice in early childhood education. Students will integrate implementation science components to help implement evidence-based practices in quality improvement initiatives as a self-study. Students will draw on their past and current field experience to develop a case study that involves a quality improvement plan for a program.

This course will examine the early childhood professional’s role as an agent of change by analyzing literature on equity, access, policy, system, community building, family engagement and advocacy as it relates to early childhood education. Students will integrate multidisciplinary literature to build their knowledge, skills, and dispositions as leaders. Students will apply their knowledge by engaging in an advocacy project that will serve educational and academic communities of early childhood care and education in multiple ways.

This course provides the knowledge and skills necessary to be effective professionals in providing early intervention services for families, infants, and toddlers with disabilities, and those at-risk for development delays. Emphasis is placed on parent-professional collaboration and interagency/interdisciplinary planning, assessment, and design of family-focused, culturally sensitive Individualized Family Service Plans (IFSP). The course includes an overview of a variety of curriculum models, assessments, and instructional strategies for intervention practice (includes field experience).

This course provides foundation content for educators to better understand the field of Early Childhood Special Education (3-five). Age appropriate assessments, DEC best practice guidelines and NJ content standards will be presented in a strength-based, naturalized environment and family-centered context. Students will have multiple opportunities to reflect on and present new learning.
ECSE 10503: Supporting Diverse Families, Community Partnerships, and Transitions 3 s.h.
Prerequisite(s): ECSE 10500
This course provides foundation content for educators to better understand the field of Early Childhood Special Education. The content of this course will focus on supporting young children with special needs and collaborating with their families. Course material will include early childhood transitions and the effective collaboration with community and educational stakeholders. Students will have multiple opportunities to reflect on and present new learning.

EDST 24502: Initiation Of Internship Project 1 s.h.
See EDST 24.608

EDST 24565: Analysis And Application Of Research 3 s.h.
Students will develop skills necessary to critically analyze and interpret educational research. Interpretation of statistics, analysis of research design, and the use of educational databases will be components of the course. Emphasis will be on the application of educational research to actual classroom problems through a case study method as well as student-designed projects.

EDST 24602: Development Of Internship Project 1 s.h.
See EDST 24.608

EDST 24608: Internship Project Report 2 s.h.
Students will design and complete an individual internship project applying scientific inquiry and research methodology to an identified problem of interest in an area related to instructional practice, curriculum development and/or learning. These courses, Initiation Of Internship Project (1 S.H.), Development Of Internship Project (1 S.H.) and the Internship Project Report are completed during Phases II, III and IV of the Master of Science in Teaching Program.

EDUC 01500: Trends And Practices In Classroom Teaching 3 s.h.
Corequisites: ELEM 02511
This course focuses on emerging trends in elementary and subject matter classroom practices. Topics include standards and accountability, constructivist and experiential teaching, inclusion and differentiation, culturally responsive teaching, and collaboration with families and communities. Special emphasis is placed on the background of each trend, related issues, and implications for practice.

EDUC 01601: Clinical Internship I 3 s.h.

EDUC 01603: Clinical Seminar I 2 s.h.
Students will complete a field experience focusing on sequenced observations and supervised beginning teaching experiences in a variety of school settings. Specific competencies shall be developed in: 1) teaching and learning, 2) curriculum, 3) pupil guidance, and 4) classroom organization and management. Concurrent seminar study will focus on knowledge of the special needs of students, applications of educational technology and student assessment and evaluation.

EDUC 01605: Clinical Internship II 7 s.h.

EDUC 01607: Clinical Seminar II 1 s.h.
Students will complete a supervised semester-long teaching internship in an assigned classroom and school setting. They will research and apply general and specialized knowledge to the processes involved in full-time classroom teaching and other teacher responsibilities. Seminar study will emphasize effective teaching practices that extends their previous learning and current intern teaching.

EDUC 01608: Internship Project Report 1 s.h.
Students will design and complete an individual internship project applying scientific inquiry and research methodology to an identified problem of interest in an area related to instructional practice, curriculum development and/or learning. These courses, Initiation Of Internship Project (1 S.H.), Development Of Internship Project (1 S.H.) and the Internship Project Report are completed during Phases II, III and IV of the Master of Science in Teaching Program.

EDUC 01610: TCHNG FOR EQUIT/ACHIEV DVRS CL 3 s.h.
This course focuses on issues and concepts in critical multicultural education and their implications for teaching and learning in diverse school settings. Students will critically examine influences on students' schooling experiences and the historic and current challenges of non-dominant students in the U.S., such as racism, discrimination, school organization, and the social and political contexts of school and society. The course will also focus on methods to build a multicultural classroom that supports equity and achievement for all students.
EDUC 01624: Educational Change 3 s.h.
Prerequisite: ELEM 02550 with a minimum grade of B

To assume leadership roles and to become change agents for their respective schools, teachers will analyze the influences, trends, social and political forces that generate and impact educational change at varying levels, i.e., at the classroom, school, community, state, and national levels. They will develop knowledge of the stages of systemic education change and strategies to achieve and sustain momentum for change. Various field work components will be integrated throughout this course.

EDUC 01700: Leadership Through Professional Learning Communities 3 s.h.
This course is designed to provide Ed.D. students with the opportunity to plan and put into practice their knowledge, skills, and dispositions for providing leadership through Professional Learning Communities. This course will begin by examining the critical stages of group development in establishing Professional Learning Communities, through the lens of detailed school-based examples. Students will follow this examination by engaging in their own identification of an educational issue, and complete a subsequent PLC plan, implement the plan, document and analyze experience and report.

EDUC 02602: MST Professional Seminar 1 s.h.
Prerequisites: EDUC 01610 and SELN 42954 and EDUC 01601 and either ELEM 02513 or SMED 60501. Corequisites: EDST 24504 and EDUC 01605

This course provides support to MST candidates as they undergo their student teaching experience (Clinical Internship II). Candidates are required to reflect regularly on their teaching and school experiences and use these reflections as a basis for discussion in the course. Throughout the semester, they will make connections between the course readings and discussions and their professional practice. Specific course topics will include classroom management, assessment, inclusion, culturally responsive teaching, motivating students, working with families and communities, the job search, and professional development.

ELEM 02338: Practicum In Mathematics And Literacy 1 s.h.
Corequisites: ELEM 02336 and READ 30551 Prerequisites: ELEM 02319 and SPED 08316

This field experience course provides an opportunity for candidates in the Elementary Education Specialization to practice their developing instructional skills once a week in a K-5 classroom setting. Candidates will work with partners in assigned classrooms to assist with literacy and mathematics instruction and to take the lead in developing and teaching lessons in literacy and mathematics.

ELEM 02511: Learning Community Classrooms 3 s.h.

This course focuses on identifying the characteristics of a learning community classroom, the propensities of learning community teachers, and the stages of group development in establishing a learning community. Course activities include study of personal planning, implementing, and reflecting strategies for establishing a learning community classroom.

ELEM 02512: Teaching Math, Science, And Health In Elementary Classrooms 3 s.h.
Prerequisites: ELEM 02511 and EDUC 01500Corequisites: READ 30555

This course focuses on understanding and developing inquiry-based, interdisciplinary instruction based on national and state standards in mathematics, science, and health at the elementary school level. Students will critically examine the principles of inquiry-based instruction and develop interdisciplinary lesson plans along with performance-based assessments. As a culminating project, students will develop a hands-on learning kit for the elementary classroom.

ELEM 02513: Teaching Language Arts, Social Studies And The Arts In Elementary Classrooms 3 s.h.
Prerequisites: READ 30515 and ELEM 02512Corequisites: EDUC 01601 and EDUC 01610 and SELN 42954

This course examines the use of established elementary education content standards and teaching methods in social studies, the arts, and language arts and how interdisciplinary, thematic units of inquiry facilitate meeting those standards. Students apply current research on how children learn and on effective teaching methods in social studies, the arts, and language arts. Students also apply instructional knowledge and skills they are developing related to inquiry-based interdisciplinary instruction, assessment, and differentiating that instruction for elementary students in the co-requisite field internship.

ELEM 02539: Contemporary Curriculum Processes/Elementary Language Arts 3 s.h.

This course examines current theory and practice in the teaching of all of the language skills of the elementary school. Criteria are developed for evaluating teaching practices in terms of today’s demand for improved and expanded communications skills. This course may not be offered annually.

ELEM 02540: Contemporary Curriculum Processes/Elementary Mathematics 3 s.h.

The primary purpose of this course is to examine and evaluate practices of teaching and criteria of evaluating mathematics in the elementary grades. Criteria will be obtained by studying research findings and examining the recommendations of authorities in the field. Courses of study will be evaluated using established criteria. This course may not be offered annually.
ELEM 02550: Analysis Of Classroom Teacher Behavior 3 s.h.
Through a review of the literature and self-analysis, students will examine relationships between teacher personality characteristics, classroom processes, and pupil achievement. All students will have opportunities to identify variables which research reveals as significantly correlated with pupil growth. Ample opportunity will be provided for students to develop expertise in the use of a low-inference, relatively objective, and highly reliable system of analyzing classroom interaction. This course may not be offered annually.

ELEM 02552: Research On Children's Mathematical Learning 3 s.h.
This course introduces the graduate student to theories of how elementary and middle-school students learn mathematics and to current research on children's thinking and learning of mathematics. It surveys research findings on the child's understanding of mathematical concepts such as number, operations, fractions and proportions, measurement, and space. The focus of the course is how children learn mathematics, and it will enable the graduate student to see mathematics from the standpoint of the elementary and middle school child. This course will aid the teacher in discerning a child's understanding of mathematics as a basis for determining the type of mathematics instruction for which he/she is ready.

ELEM 02556: Principles Of Identification And Treatment Of Mathematics Deficiencies 3 s.h.
This course introduces the student to the principles of identifying, prescribing, planning and teaching for mathematics deficiencies in elementary school children. Students have the opportunity to design a diagnostic instrument and plan an individualized instructional program based upon findings. This course may not be offered annually.

ELEM 02601: Seminar In Elementary Teaching 3 s.h.
Each student is expected to conceive, conduct and report an investigation that will display sound knowledge of educational theory, appropriate research procedures and skill in communication. (ELEM02.600 offered in fall only; ELEM02.601 offered in spring only.)

ELEM 02602: Self Study Research in Teacher Leadership 1 s.h.
Prerequisites: CURR 29580, LDTC 18510, ELEM 02511, ELEM 02550, EDUC 01624, READ 30566
During the final semester of their studies in the Master of Education in Teacher Leadership degree, students will work closely with a faculty member to conduct a scholarly self-study that examines how their emerging teacher leadership skills reflects the standards that guide current research in teacher leadership. This self-study will result in the production of a Synthesis Portfolio, a visual or graphic organizer, and a slide-show guided presentation of the graduate candidates' work and accomplishments during the time of their program studies in teacher leadership.

FNDS 21230: Characteristics Of Knowledge Acquisition 3 s.h.
This course will focus on how human beings think, process information and acquire skills. Discussion of learning philosophies and applications in a variety of settings will be addressed. Methods of inquiry, reflection, motivation, creativity and critical thinking will be explored.

FNDS 21530: Foundations Of Multi-Cultural Education 3 s.h.
This course is designed to focus on the key relationships between formal education as a social and cultural institution in American society and multicultural education as a response to contemporary societal needs. The course examines the areas of curriculum, pedagogy and evaluation in multicultural education as they affect and are affected by the education professional. The course requires empirical investigation and subsequent analysis through selected topics in research in Intercultural Education.

LDTC 18500: INDEPENDENT STUDY 1 to 6 s.h.
LDTC 18503: Foundations Of Learning Disabilities 3 s.h.
A general introduction to learning disabilities, with emphasis upon remediation of basic skills and pedagogical rationale. Students will become familiar with the various types of disorders encountered in pupils with learning disabilities and with appropriate instructional techniques and materials.

LDTC 18504: Assessment Of Learning Disabilities 3 s.h.
In this two semester sequence, emphasis will be on evaluation and remediation of learning disorders in school age children. A case study is required. Enrollment limited to students matriculated in the Learning Disabilities program. (LDTC18.504 is offered in the fall semester and LDTC18.505 is offered in the spring semester.)
Course Descriptions

LDTC 18505: Correction Of Learning Disabilities 3 s.h.
In this two semester sequence, emphasis will be on evaluation and remediation of learning disorders in school age children. A case study is required. Enrollment limited to students matriculated in Learning Disabilities program. (LDTC18.504 is offered in the fall semester and LDTC18.505 is offered in the spring semester.)

LDTC 18510: Applied Theories Of Learning 3 s.h.
Educators will develop and articulate their own theories of learning after examining carefully and critically the prevalent existing and competing theories of learning. The study of motivation and its effect on learning including the use of rewards and incentives will be covered as well.

LDTC 18516: Applied Tests And Measurements 3 s.h.
Emphasis is placed upon data-gathering, the evaluation of data and the use of data in educational measurement. Standardized tests, both group and individual, will be studied. Generally, enrollment is limited to those who have been formally admitted to the student personnel services, learning disabilities and school psychology programs.

LDTC 18520: Neurological Bases Of Educational Disorders 3 s.h.
The student will study the nature of physiological readiness for learning with regard to the various disabilities. The varieties of physical, mental, and learning disabilities will be related to the neurophysiological basis for learning.

LDTC 18525: Advanced Assessment Techniques 3 s.h.
This course is designed for the advanced graduate student in learning disabilities. It provides for the development of competence in a variety of assessment instruments useful in differential diagnosis of complex learning problems. This course may not be offered annually.

LDTC 18540: Motor Development In Young Children With Disabilities 3 s.h.
The course investigates motor development resulting in disabling conditions in young children. Major theorists and research are an integral part of the course work. Assessment options and research-based interventions are explored. This course may not be offered annually.

LDTC 18545: Language Development In Young Children With Disabilities 3 s.h.
The course investigates language acquisition and the physiological, environmental and psychological factors which may influence that development in the young children. This course may not be offered annually.

LDTC 18550: Foundations In Early Childhood Special Education 3 s.h.
The course surveys the bases of disabilities in young children. Diagnostic techniques, materials and methods are explored. Classic studies and current research will be studied.

LDTC 18600: Seminar And Research In Learning Disabilities 3 s.h.
This course considers current issues, trends, problems, and research of significance to learning disabilities. Students complete a thesis/project which evidences capacity for research and independent thought. Registration by permission of the program advisor only. The comprehensive examination is taken during LDTC18.601.

LDTC 18601: Seminar And Research In Learning Disabilities 3 s.h.
This course considers current issues, trends, problems, and research of significance to learning disabilities. Students complete a project which evidences capacity for research and independent thought. Registration by permission of the program advisor only. The comprehensive examination is taken during LDTC18.601.

LDTC 18650: Clinical & Field Experiences In Learning Disabilities 3 to 6 s.h.
Students engage directly in supervised case work with children demonstrating learning disorders. Assessment and appropriate, research-based remediation of learning problems, consultation skills and in-service program design are required in a 120-clock hour clinical and field setting. Only matriculated students may register for this course.

SELC 10576: Effective Inclusive Instruction 3 s.h.
This course is designed to begin developing the knowledge, skills, and dispositions necessary for general education teachers to understand and educate students in inclusive classrooms. Emphasis will be on: (a) understanding the legal foundations for inclusive instruction, (b) recognizing students’ diverse strengths and needs, (c) designing, implementing, and assessing effectively differentiated lessons that feature research-based strategies, and (d) organizing and managing a flexible, student-centered classroom.
Course Descriptions

SELN 10577: Collaborative Instruction In Inclusive Classrooms 3 s.h.
Prerequisite: SPED 08555
This course will focus on instructional strategies in inclusive classrooms for students with and without disabilities. Collaborative and consultative skills for working with parents, regular education teachers, special education teachers, support personnel, and school administrators will be discussed and modeled, as well as role play for team teaching in such environments.

SELN 10578: Administration And Supervision In Special Education 3 s.h.
This course considers the problems in administering and supervising programs for students with disabilities between three and twenty-one years of age. Attention is given to organizing, financing and supervising such programs at federal, state and local levels.

SELN 10580: Teaching Students With Moderate And Severe Disabilities 3 s.h.
Through this course students acquire knowledge of the curriculum, assessment procedures, and intervention strategies required to effectively teach individuals with moderate and severe disabilities. Among the areas of emphasis are functional academics, personal care, recreation/leisure, vocational and community living skills. Research-based best practice in instruction for students with moderate and severe disabilities is stressed.

SELN 10581: Implementing Positive Behavior Supports 3 s.h.
This course provides the student with a comprehensive study of the goals of misbehavior in classrooms and in other settings. Specific theoretical techniques and methodology in channeling deviant behavior through the use of behavior modification and other management techniques will be explored. Curricula content, self-development, attitudes, and research finding will enable each student to acquire effective skills in working with learning resistant and deviant behaving children and adults.

SELN 10582: Communication Skills For Students With Disabilities 3 s.h.
This course provides an intensive study of the language needs of students with moderate and severe disabilities and includes individual assessment for the identification of initial communication and the development of acceptable language procedures. Finger spelling, basic American Sign Language, and using technology to develop alternative communication strategies will be covered.

SELN 10585: Educational Assessment In Special Education 3 s.h.
Prerequisite: SPED 08555
Trends, practices, problems and issues in educational assessment will be examined. The course is designed to enable the special education teacher to administer criterion-referenced, informal, or standardized tests and to plan individualized educational programs for students with special needs. Curriculum-based assessment is emphasized.

SELN 10586: Emotional And Behavioral Support Strategies 3 s.h.
This graduate course will discuss positive strategies, related laws and regulations, and services to support students with behavioral and emotional problems. Social and emotional factors that affect behavior and learning will be explored. Emphasis will be placed on appropriate academic and social skills instruction, and pro-social interventions to meet the needs of students with difficulties in social and emotional adjustments.

SELN 10590: Introduction To Autism Spectrum Disorders 3 s.h.
This course is designed to provide graduate level instruction in the salient issues involved in the education of students with autism spectrum disorders (including autism, Asperger’s syndrome, Rett syndrome and other pervasive developmental disorders). It provides an overview to candidates about the characteristics, language development, social relationship development, and instructional interventions for children with autism spectrum disorders.

SELN 10591: Instructional Methods For Students With Autism Spectrum Disorders 3 s.h.
Prerequisites: SELN 10590
This course is designed to provide graduate level instruction in the assessment and instruction of students with autism spectrum disorders. Students will learn about evidence-based practices for enhancing the academic, social, behavioral, and communication skills of students with autism spectrum disorders. They will apply their learning in both in-class case study activities and in field experiences. In addition to specialized practices, students will learn how to modify instruction in general education classes to meet the needs of students with autism spectrum disorders.

SELN 10591: Instructional Methods For Students With Autism Spectrum Disorders 3 s.h.
Prerequisites: SELN 10590
This course is designed to provide graduate level instruction in the assessment and instruction of students with autism spectrum disorders. Students will learn about evidence-based practices for enhancing the academic, social, behavioral, and communication skills of students with autism spectrum disorders. They will apply their learning in both in-class case study activities and in field experiences. In addition to specialized practices, students will learn how to modify instruction in general education classes to meet the needs of students with autism spectrum disorders.

SMED 60501: Teaching Methods II: Subject Matter 3 s.h.
Prerequisites: SMED 60500 and READ 30515; Corequisites: EDUC 01601 and EDUC 01610 and SELN 42954
This course is the second of two subject-specific methods courses required for secondary candidates in the Master of Science in Teaching program. Candidates will continue to learn ways to organize instructional materials into standards-based units and daily lessons appropriate for K-12 learners. In conjunction with a co-requisite Internship I experience, this course covers a range of topics necessary to building a learning community in secondary classrooms, such as learning theory, standards-based lesson and unit planning, pedagogy, classroom management, and learner diversity.

SMED 60561: Curriculum, Instruction, & Assessment II 3 s.h.
Prerequisite: SMED 60.650 and Co-requisite: SMED 60.563
The second of two subject-specific methods courses, this class is designed for teacher candidates majoring in English, the social studies, or a world language and planning careers as K-12 teachers. In addition to exploring topics addressed in Curriculum, Instruction, & Assessment I in greater depth, this course places an emphasis on practitioner research, requiring students to develop inquiry questions about their own practice and to collect and analyze relevant data from the field.

SMED 60563: RESIDENCY II 6 s.h.
Prerequisite: SMED 60.562; Co-requisite SMED 60.561
This is the second of the two field experiences required for candidates in the SME MST program. Continuing in their field placement from Residency I, candidates will attend their field placements 4 full days per week during the Spring semester. Using both Rowan and placement school district measures of teaching effectiveness, supervisors will evaluate residents on requires demonstrated mastery of subject area content, lesson planning, and multiple instructional strategies to meet varied student needs and demonstrated ability to assess learner progress and modify instruction accordingly, manage all aspects of classroom activity, and work collaboratively with all instructional, administrative, parental, and community members of the classroom and school community.

SMED 60564: MST SME Professional Seminar 3 s.h.
Prerequisite: SMED 60.562 and Co-requisite: SMED 60.561
This is the capstone course in the MST SME and will prepare candidates for their teaching positions by focusing on issues critical to new teachers. The course is designed to support candidates in their final transition from teacher candidate to teacher. Topics include understanding school climate, developing a professional development plan, developing a plan for communicating with families, planning for the first six weeks (or unit) of school, and preparing for a substitute teacher.

SPED 08130: Human Exceptionality 3 s.h.
This general education course is designed to develop students’ awareness and understanding of the nature and needs of individuals with exceptionalities. It provides a lifespan perspective that will assist students in better understanding and, hopefully, accepting and advocating for individuals with disabilities. A field component is required.
This course emphasized linking assessment with educational instruction. Prospective classroom teachers will learn how to routinely use norm-referenced instruments and criterion-referenced techniques, with an emphasis on performance assessment. Introduction to statistical factors in testing, observation of testing, and administration of selected assessment instruments will be included. Teacher candidates will also have the opportunity to develop informal assessments in conjunction with a required field experience component.

SPED 08308:  
Assistive Technology And Transition Planning  
3 s.h.  
Prerequisites: SPED 08130  
This course will focus on exposing students to a variety of technologies used by and with students with exceptional learning needs. Students will gain hands-on skills in designing technology-based instructional materials for students with a wide range of exceptionalities. A focus on Universal Design for learning is at core of this course- with a goal of providing students with the ability to adapt technology, instruction, and assessment to meet a range of student needs. Exposure to adaptive and assistive technologies, as well as state-of-the-art software and hardware, is also emphasized in the course. All of this will be addressed as part of the development of Individual Educational Plans (IEPs) for students, with special emphasis on transition planning. Transition planning will address all major life transitions(e.g., early intervention to preschool; preschool to elementary; elementary to secondary; and secondary to post-secondary and work environments). A field component will be required.

SPED 08316:  
Differentiated Instruction In The Inclusive Classroom  
2 s.h.  
Prerequisites: SPED 08130  
This Junior Level (300) course will focus on how the diverse needs of individuals with educational disabilities/differences can be met within the general education classroom environment. Emphasis will be on developing communication/collaboration, instructional and assessment strategies that will assist the classroom teacher in diversifying instruction to meet individual needs. A field component is required.

SPED 08325:  
PRACT SPEC ED I  
4 s.h.

SPED 08326:  
PRACT SPEC ED II  
4 s.h.

SPED 08360:  
Positive Behavioral Support Systems For Students With Exceptional Learning Needs  
3 s.h.  
Prerequisite: SPED 08130  
This course exposes students to a variety of theoretical approaches in behavior management of students with exceptional learning needs and how to apply those skills in classroom practices. A field component is required.

SPED 08415:  
Specialized Instruction For Students With Exceptional Learning Needs  
3 s.h.  
Prerequisites: SPED 08130 and SPED 08316 and SPED 08307  
This senior-level course enhances the systematic progression of skills initiated during the earlier stages of the Teacher of Students with Disabilities Endorsement Program. The course prepares candidates to teach students with exceptional learning needs, covering instructional methods and strategies to teach self-help, motor, reading, math, language, study skills, science, and social studies. The course also emphasizes supporting students with exceptional learning needs in inclusive classrooms. There is a required field experience component with this course.

SPED 08445:  
Clinical Seminar In Special Education  
1 to 2 s.h.  
Prerequisites: SPED 08415  
This course is designed to be taken with Clinical Practice in Special Education. The seminar will focus on three major areas within the candidate’s area of specialization, application of effective teaching research, and analysis and evaluation of the Clinical Practice experience. This course is intended to be a capstone experiences for all candidates in the Teacher of Students with Disabilities Endorsement Program.

SPED 08450:  
Clinical Practice In Special Education  
4 s.h.  
Prerequisites: SPED 08415 or SPED 08416  
This is the culminating field experience for candidates in the Teacher of Students with Disabilities Endorsement Program. Clinical Practice provides candidates with full-time placement in a classroom setting that serves students with exceptional learning needs. Under University supervision and working with a clinical teacher, candidates assume full responsibility for planning, teaching, and managing a special education program during this placement. As the culminating field experience for seniors in the Teacher of Students with Disabilities Endorsement Program, Clinical Practice provides candidates with one full-time placement in a classroom setting, serving students with exceptional learning needs. Under college supervision, and working with a clinical teacher, teacher candidates assume full responsibility for planning and teaching during this placement.

This course will provide an overview of instructional strategies for teaching students with special needs. It will focus on research-based best practices of instruction to students with disabilities in the areas of academics, social interactions, and transition from school to adulthood and employment. Training and education to prepare individuals with disabilities for successful community living will also be emphasized. Field-based assignments are required.

This advanced literature survey course in bioinformatics covers current and emerging topics in the field of Bioinformatics through the analysis of current primary literature. The multidisciplinary nature of bioinformatics will be highlighted through examples of computational approaches to solving biological, biochemical, and applied biomedical research problems. Emphasis is placed on the interplay between computational methods and how they are applied to solve real problems in biology and biochemistry. Students will engage in semester-long research projects culminating in a presentation of a topic from the primary literature.

This course provides a culminating experience for students graduating with an M.S. in Data Analytics. This course will reinforce ethical awareness and good decision making in health-related situations and discuss the specific professional and ethical responsibilities of the health data practitioner.
Course Descriptions

DA 01510: Data Analytics Laboratory I
Prerequisite(s): Graduate standing or permission of the instructor.
This lab provides faculty guidance and supervision beyond the scope of existing courses. Students learn how to develop and structure their deliverables, as well as how to use data analytics tools in the context of real-world or research projects.

DA 01511: Data Analytics Laboratory II
Prerequisite(s): Graduate standing or permission of the instructor.
This second lab provides additional faculty guidance and supervision beyond the scope of existing courses. Students learn how to develop and structure their deliverables, as well as how to use data analytics tools in the context of real-world or research projects.

DA 02505: Data Mining I
Prerequisite(s): Graduate standing or permission of the instructor.
This is a first graduate level course in Data Mining, which is designed to teach students the key steps in data mining, along with the primary algorithms related to data acquisition, cleansing, and supervised and unsupervised learning.

DA 02510: Visual Analytics
Prerequisite: Graduate standing or permission of the instructor.
This is a graduate level course that investigates visual analytics tools and techniques used to synthesize information and derive insight from massive, dynamic, ambiguous, and often conflicting data, and to communicate the findings effectively for decision-making. Extensive use of case studies based on real-world events will be used to illustrate course concepts. Students will be required to present recent conference or journal papers from the visual analytics literature and to apply visual analytics techniques toward a focused research problem in a real-world application or a domain of interest.

DA 02515: Data Warehousing
Prerequisite: Graduate standing or permission of the instructor.
This course is designed to teach students data modeling, enterprise data integration, and other issues related to managing massive data sets necessary for data mining for business intelligence. The course focuses on data warehousing and cloud storage, with an emphasis on modeling and architectures, and their application to decision support.

DA 02605: Data Mining II
Prerequisite(s): DA 02505
This course follows Data Mining I which is designed to train students in the necessary algorithms for extracting intelligence from large datasets. In Data Mining II, more advanced topics are covered including advanced clustering techniques, Principal Component Analysis, Naïve Bayes clustering and other techniques.

DA 03505: Data Quality and Web/Texting Mining
Prerequisites: Graduate standing in M.S. in Data Analysis and Data Mining I (DA 02.505)
This course studies data quality problems and solutions in the context of text and web mining, which is the exploration of vast amounts of digitized text for use in knowledge discovery or more particularly drug discovery in the biomedical field.

DA 03510: Patient Data Understanding
Prerequisite(s): Graduate standing or permission of the instructor
In this course we focus on understanding the patient and other health-related data, including the various sources of data and their commercial use. Furthermore, industry trends and developments related to health-related data will be researched and tracked by the students.

Course Descriptions

INTR 11511: Urban Teacher Residency 0 s.h.

SE 01501: Sustainable Engineering Fundamentals 3 s.h.
Sustainable Engineering incorporates development and implementation of products, processes, and systems that meet technical and cost objectives while protecting human health and welfare and elevating the protection of the biosphere as a criterion in engineering solutions. This course will introduce the role of engineers in sustainability and provide tools to measure sustainable systems.

SE 01502: Life Cycle Assessment 3 s.h.
This course will introduce students to the fundamental principles of Life Cycle Assessment. Students will apply the ISO 14000 standard methodology to perform a life cycle assessment of a product or process. Students will perform assessments using process-based analysis models, input-output and hybrid approaches of life cycle assessments. Critical Assessments of published life cycle assessments will be conducted. Extensive use of life cycle assessment software will be required for this course. Software programs will be used extensively in this course.

SE 01503: Environmental Policy 3 s.h.
This course is an introduction to the history, organization, goals, and ideals of environmental policy in America. It examines the shift in emphasis from nature protection to pollution control to sustainability over the twentieth century and develops critical tools to analyze changing conceptions of nature and the role of science in environmental policy formulation. Of central interest is the relationship between knowledge, uncertainty, and political or legal action. Theoretical approaches are combined with case studies of major episodes and controversies in environmental protection.

SE 01504: Environmental Management 3 s.h.
This course deals with integrated environmental management issues and methodologies with a global perspective. Topics include environmental decision-making from a socio-economic and environmental standpoint, environmental data collection, analysis, and management techniques for environmental assessment and feasibility case studies. The course is intended to give students an understanding of current environmental issues and tools for analysis of data for environmental management. The issues are examined from the worldwide perspectives of science, engineering, business and society. The course will culminate in an original research project and presentation.

SE 01505: Sustainable Energy 3 s.h.
Sustainable Energy is an introduction to the characteristics of a sustainable source of energy. Numerous energy sources will be investigated to determine their role in a sustainable future. Technologies such as solar, wind, biomass, geothermal, hydropower and other emerging technologies will be studied. A fundamental concept of the course is that a sustainable energy source must be technically feasible, economically viable, protect human health and welfare, as well as protect the biosphere.

SE 01505: Sustainable Energy 3 s.h.
Sustainable Energy is an introduction to the characteristics of a sustainable source of energy. Numerous energy sources will be investigated to determine their role in a sustainable future. Technologies such as solar, wind, biomass, geothermal, hydropower and other emerging technologies will be studied. A fundamental concept of the course is that a sustainable energy source must be technically feasible, economically viable, protect human health and welfare, as well as protect the biosphere.

JRN 02210: Journalistic Writing For Nonmajors 3 s.h.
Prerequisites: COMP 01112
This course introduces students to a wide variety of news writing forms. The course covers material ranging from news writing to features, editorials, sports copy and blogging. Students learn how to strengthen their writing through techniques such as using active voice, varying sentence length, and copy editing. The course is designed for non-Journalism majors.

JRN 02313: Magazine Article Writing 3 s.h.
Prerequisites: JRN 02210 or JRN 02310 or PR 06301 or WA 01300 with a grade of C- or better
Students get started as freelance magazine article writers by conceiving article ideas, interviewing, researching, and writing. The course provides instruction in adjusting style and slant to reach potential readers. Students learn to sharpen writing, resolve clarity problems, and add vigor to writing. The course analyzes freelance markets. Students submit work for publication.

JRN 02314: Photojournalism 3 s.h.
Prerequisites: 45 credits required
This course covers the practices and techniques used by photojournalists on modern American newspapers. Students take digital photographs and edit in Photoshop. Weekly laboratory assignments are required.

<td>Publication Layout And Design</td>
<td>3 s.h.</td>
</tr>
<tr>
<td><strong>Prerequisites:</strong> 45 credits required</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This course focuses on design, layout, and make-up of brochures, magazine and newspaper pages, newsletters, fliers, and advertisements. Students will learn how to coordinate art and typography with content. A workshop approach is used to show students how creativity in design can increase the effectiveness of communication. Students learn how to work with various computer applications to achieve effective layout.

| JRN 02321   | Online Journalism I                               | 3 s.h.  |
| **Prerequisites:** JRN 02205 or RTF 03295 or PR 06501 |         |

This course examines the online news landscape. Students learn which principles of traditional journalism can and should be applied to writing online news, and which should not. Students explore how to write news in ways that leverage the unique aspects of the online environment.

| JRN 02332   | The Publishing Industry                          | 3 s.h.  |
| **Prerequisites:** 75 credits required           |         |

The Publishing Industry examines the business and practice of publishing through broad readings and research related to industry operations and trends, field trips, guest speakers, interactive projects, and directed discussion. Students explore publishing aspects of books, magazines, newspapers, online material, blogging, podcasting, self-publishing, and editing. When students complete this course, they will have a better idea of the career path they would like to pursue.

| JRN 02335   | Media Law                                         | 3 s.h.  |
| **Prerequisites:** 45 credits required           |         |

This course examines laws that deal with the legal responsibilities of print, broadcast, online and film media as well as public relations and advertising practitioners. Students analyze topics such as libel, privacy, broadcast regulations, and copyright.

| MAWR 02510  | Writing For Broadcast                            | 3 s.h.  |

This course teaches students how to write scripts and script segments for radio, TV and documentary film. Exercises include use of broadcast style, writing for audio and video, dialogue, narrative, attribution, and structure. The goals of this class are to expose students to techniques common in all news and documentary writing and to integrate the use of cameras and microphones with the spoken word.

| BLED 40509  | Issues And Innovations In Foreign Language Education | 3 s.h.  |

This course is designed for educators responsible for planning and supervising the foreign language curriculum K-12. The course deals with the issues of sequential curriculum development in foreign languages in keeping with state and national standards. Emphasis is placed on innovations resulting from implications of research in second language acquisition, the interrelationship of language and culture and models for foreign language curriculum development. Topics include modes of communication, aspects of culture, scope and sequence of content, and curriculum evaluation.

| BLED 40510  | Issues Of Language And Cultural Diversity In ESL/Bilingual Programs | 3 s.h.  |

This course focuses on foundational theories and areas of research related to the field of TESOL and bilingual education. Special emphasis is placed on the forces affecting students and policies related to second language schooling in state, national and international contexts. Students will develop a reflective philosophy for educating English Language learners.

| BLED 40512  | Linguistics And Second Language Acquisition For Teaching Languages | 3 s.h.  |

This course addresses basic concepts of linguistic theory and second language acquisition research. Students will compare and contrast second language acquisition paradigms and investigate their applicability to the classroom. Discussion will also focus on components of the language system in the context of second language teaching.

| BLED 40512  | Linguistics And Second Language Acquisition For Teaching Languages | 3 s.h.  |

This course addresses basic concepts of linguistic theory and second language acquisition research. Students will compare and contrast second language acquisition paradigms and investigate their applicability to the classroom. Discussion will also focus on components of the language system in the context of second language teaching.

| BLED 40515  | Language, Culture And Communication               | 3 s.h.  |

In this course students examine the experiences and identities of English Language Learners, focusing on culture, socioeconomic status, race, religion, national origin, disability and gender. Special issues related to immigration and the forms of discrimination that ELL students encounter are also addressed. Students also discuss advocacy issues as well as ways to support partnerships with families and communities.
Course Descriptions

BLED 40515: Language, Culture And Communication 3 s.h.
In this course students examine the experiences and identities of English Language Learners, focusing on culture, socioeconomic status, race, religion, national origin, disability, and gender. Special issues related to immigration and the forms of discrimination that ELL students encounter are also addressed. Students also discuss advocacy issues as well as ways to support partnerships with families and communities.

BLED 40517: Modern Developments In ESL/Bilingual Education 3 s.h.
This course examines the implications of current theoretical positions regarding second language acquisition for program development and instruction. The course deals with a range of methodologies, the selection of content, instructional techniques, the selection and use of materials, and the development of alternative assessment measures.

BLED 40520: Planning, Teaching, And Assessment In ESL Classrooms 3 s.h.
Corequisite: BLED 40523
This course concentrates on how teachers plan, teach, and assess in ESL classes. Students will create unit plans that incorporate both language and content area objectives and learn a variety of research-based instructional methods to support language acquisition and student learning.

BLED 40521: Teaching Bilingual/Bicultural Education: Process And Practice 3 s.h.
The course examines current programs and available materials in bilingual education appropriate to a range of content areas and grade levels. Microteaching and peer coaching are practiced to provide a basis for reflective teaching. The course is open to candidates who possess or are eligible for a standard or provisional New Jersey instructional certificate. State-approved examinations in oral and written English and the target language are required for certification.

BLED 40522: Integrating Language And Content In The ESL/Bilingual Education Classroom 3 s.h.
This course examines the theory and practice of integrating language and content in K-12 ESL, bilingual and content-area classrooms. Specific focus is given to methods pertaining to implementing sheltered instruction models, content-based ESL, students' proficiency levels, proficiency testing, and strategies for collaborating with other teachers and school leaders.

BLED 40523: Integrating Language And Content In The ESL/Bilingual Education Classroom 3 s.h.
This course examines the theory and practice of integrating language and content in K-12 ESL, bilingual and content-area classrooms. Specific focus is given to methods pertaining to implementing sheltered instruction models, content-based ESL, students' proficiency levels, proficiency testing, and strategies for collaborating with other teachers and school leaders.

BLED 40524: Practicum In Teaching English As A Second Language 1 s.h.
Corequisite: BLED 40520
This course is offered as a co-requisite to Teaching ESL: Process and Practice (BLED 40.520). The course will consist of a field experience in teaching English as a Second Language (ESL) and an accompanying class that focuses on reflective evaluation of that field experience. Candidates currently teaching English language learners will use their own classes for the field experience. Candidates not currently teaching English language learners will be assisted in placement for the field experience.

BLED 40525: Clinical Internship In English As A Second Language 6 s.h.
Prerequisites: BLED 40510 AND BLED 40512 AND BLED 40515 AND BLED 40520 AND BLED 40523 AND BLED 40522 (40522 may be taken concurrently)
This field-based course provides the teacher education candidate with opportunities to demonstrate the subject content, professional knowledge, pedagogical skills, and dispositions that are developed in program course work. The Clinical Internship experience is a supervised, full-time activity conducted in a public elementary, middle or high school ESL classroom. Successful completion of the Internship requires demonstrated mastery of subject area content, lesson planning, and multiple instructional strategies to meet varied student needs; demonstrated ability to assess learner progress and modify instruction accordingly, ability to manage all aspects of classroom activity, ability to work collaboratively with all instructional, administrative, parental, and community members of the classroom and school community, and ability to document evidence of doing all of the above. Admission to this course requires completion of all previous Teaching ESL coursework, including a minimum program grade point average of 3.0.

EDUC 01270: Teaching In Learning Communities I 3 s.h.
Prerequisites:
This course for teacher candidates in undergraduate teacher certification programs provides an introduction to the elements of successful, caring learning communities and will serve as a foundation for Teaching in Learning Communities II and future education courses. Teacher candidates will learn about, observe, participate in, and reflect on various aspects of learning communities and types of collaborative teaching and learning. They will begin their understanding of the interactions between and among curriculum, planning, instructional approaches, assessment, culture, diversity, and management within a learning community environment. Field visits will provide the opportunity for teacher candidates to begin to make the connection between the content of the course and its application in elementary classrooms.
EDUC 01272: Teaching In Learning Communities II 3 s.h.
Prerequisite: C- or better in EDUC 01270
This course provides in-depth examination and practice of instructional planning and assessment in a caring learning community. Candidates study viable learning community approaches where content-rich, research-based, and culturally responsive teaching and democratic and inclusive practices are used in caring learning environments. Candidates develop skills in objective, lesson, unit, and assessment design. Field component is required.

FNDS 21150: History Of American Education 3 s.h.
This course provides an in-depth study of American education from 1600 to the present, covering preschool through post-secondary education. It focuses on the social forces, sources of conflict, major educational figures and patterns of schooling during each period. In addition, the course will highlight the ways in which diversity has been accommodated, marginalized, or rejected in American education. Students will be able to identify and discuss ways in which diversity has been accommodated, marginalized, or rejected in American education.

LIBR 01502: Survey Of Children’s Literature 3 s.h.
The course surveys literature for children from birth to age 14, including genre study, major authors and illustrators, current trends in publishing, issues in criticism, electronic resources related to children’s literature, methods of promoting reading, teaching children’s literature to children, and using multicultural children’s literature in classrooms and libraries.

LIBR 01503: Survey Of Young Adult Literature 3 s.h.
Students will consider the reading and media interests of young people ages 12-18 in view of current information about adolescence in the United States. Topics covered include major genres, authors, literary qualities, criticism and reviewing, awards, selection principles, censorship, and promotional techniques for classrooms and libraries.

LIBR 01505: Reference Resources And Services I 3 s.h.
Students focus on the provision of reference services as well as the evaluation and use of reference sources in schools and libraries. Topics covered include characteristics and use of information sources and systems, policies and procedures, basic reference sources in both print and electronic formats, and skills and attitudes needed to assist diverse individuals in meeting their information needs.

LIBR 01506: Foundations Of Librarianship 3 s.h.
This course introduces the field of librarianship and is the first course students should take in the program. Includes: the roles of libraries and librarians in society, the history of libraries and communications, models of library service, professional ethics, and contemporary issues in school and public libraries.

LIBR 01507: Managing Library Programs 3 s.h.
The management of school and public library services is the focus of this course. Students learn and apply principles of library organization, personnel administration, budgeting and finance, facilities and equipment, public relations, policies and procedures, accountability and evaluation.

LIBR 01510: Library Collections And Resources 3 s.h.
The course focus is on issues, practices, and policies in the selection of print, nonprint, and electronic resources in school and public libraries. Emphases include: intellectual freedom, effective communication through policies, technology applications, bibliographic aids and review practices, and collection evaluation and maintenance.

LIBR 01511: Organization Of Library Resources 3 s.h.
The course studies the library’s responsibility to provide physical and intellectual access to print, nonprint, and electronic resources. Topics include: cataloging and classifying resources according to national standards; use of current technology resources; evaluating commercial and network sources; and understanding of theories and issues related to the organization of knowledge.

LIBR 01516: School Media Centers For Teaching And Learning 3 s.h.
Focus is on the relationship of the library media program to the school curriculum with emphasis on library/media, information, and computer skills in the pre-K-12 instructional program. Students observe library media services in school settings.

LIBR 01521: Design And Production Of Educational Media 3 s.h.
Focus is on new and emerging electronic technologies in libraries and media centers. Students use a variety of software to create such products as databases, library web pages, spreadsheets, presentations, and curriculum and public relations products. The course includes video technology, Internet searching, copyright and equity issues, and reflective writing.
This course also requires a weekly field experience in a pre-school setting.

Students will be able to identify, assess, adapt, and implement a variety of strategies that take into account children with special needs. The importance of literature-enrichment activities and making curricular connections is highlighted. Field component is required.

This course helps students integrate reading and writing methods and strategies into subject matter instruction in grades K-12 ranging from emergent literacy to comprehension of narrative and expository text. There is an emphasis on strategies for developing phonemic awareness, word recognition skills, fluency, vocabulary, and comprehension through various instructional settings as well as integrating writing to learn strategies. Students acquire understanding for assessing pupil abilities, selecting suitable materials and fostering language, comprehension, and study skills needed for mastery of academic subjects. The importance of literature-enrichment activities and making curricular connections is highlighted.

This course helps students integrate reading and writing methods and strategies into subject matter instruction in grades K-12 ranging from emergent literacy to comprehension of narrative and expository text. There is an emphasis on the interrelationship of language, thought, and social practice.

This course will provide students with historical and cultural perspective of how and why people acquire and use literacy to meet personal and societal needs. By viewing literacy through different lenses students will acquire an understanding of the interrelationship of language, thought, and social practice.

Completion of the research project selected in Graduate Thesis in Library Services I.

Focus is on observation and participation in important aspects of library operations, including selection and organization of materials; reference and bibliographic services; curriculum development; and techniques of teaching library media use. This course must be pursued at an approved site under the supervision of an appropriately certified school or public librarian and a college supervisor.

This course helps students integrate reading and writing methods and strategies into subject matter instruction in grades K-12 ranging from emergent literacy to comprehension of narrative and expository discourse are covered. There is an emphasis on strategies for developing phonemic awareness, word recognition skills, fluency, vocabulary, and comprehension through various instructional settings and across all curricular areas. The importance of literature-enrichment activities and making curricular connections is highlighted. Field component is required.

This course prepares prospective teachers to blend evidence-based phonemic awareness, phonics, word identification, and spelling instruction strategically into an integrated language arts approach to teaching literacy. Major topics include the development of children's phonemic/spelling knowledge; what teachers should know about language; informal techniques to assess children's early literacy, word identification, and spelling understandings; systematic and meaningfully applied instruction to meet development, cultural, and linguistic differences; and communicating with parents and professionals.
about phonics and/or spelling.

READ 30350: Using Children’s Literature In The Reading/Writing Classroom  3 s.h.
Prerequisites: REED 30280 or READ 30280
This course prepares prospective teachers to integrate reading and writing in a language arts program through the use of book selections that reflect quality writing in the genres typically found in children’s literature. The course will provide students with sufficient background and knowledge in children’s literature so that they may teach reading by using trade books, emphasizing process writing and developing thematic units. Language, literacy, and learning will be enhanced by integrating children’s literature across the curriculum.

READ 30351: Differentiated Literacy Instruction  2 s.h.
Prerequisite: READ 30280
This course prepares teacher candidates to provide differentiated literacy instruction in diverse classrooms with a wide range of developmental levels, instructional needs, interests, and backgrounds. Teacher candidates will learn how to select, administer, and analyze various assessment tools to inform instruction. Field experience is required.

READ 30421: School Reading Problems-Writing Intensive  4 s.h.
Prerequisites: COMP 01112 and READ 30547
In this course, students learn to teach struggling readers by applying their knowledge of literacy instruction learned in prerequisite coursework. They use assessments and observations to identify students’ reading levels. Students are required to use on-going diagnostic teaching techniques to plan, teach, and adjust instruction according to the needs and interests of struggling learners. Process writing is used throughout. As a course requirement, students work in the Rowan Reading Clinic. Students tutor a K-12 student for 20 hours and write a final report.

READ 30451: Supervised Clinical Practice In Reading  3 s.h.
Prerequisites: READ 30421 or READ 30350
Students in this course apply diagnostic, reflective teaching procedures in order to teach struggling readers in a clinical setting. They select materials and instructional strategies that meet the specific needs of the child. Emphasis is placed on on-going, diagnostic teaching that integrates the language arts in instruction that adjusts to the needs and interests of struggling readers. Students will conduct informal reading assessments at the end of the clinic session in order to write a formal report that includes assessment data; students’ strengths and needs; and recommendations to parents, classroom teachers, and future tutors for further instruction.

READ 30500: Theory and Practice in Literacy Education  3 s.h.
Prerequisite(s): READ 30510 and READ 30520
This course will examine influential theories and research that address the developmental, cognitive, motivational, literary, linguistic, sociocultural and sociopolitical foundations of reading. The course considers how leading and often competing reading theories developed over time and how seminal research has influenced scholars, practitioners and policy makers. In addition, there is emphasis on research shaping current conversations in the literacy field in which the definitions, purposes and practices of reading depend on reader characteristics (e.g., English Language Learners, economic class and gender), text factors (e.g., print vs. electronic, magazines vs. literature), and contextual considerations (e.g., in-school vs. out of school settings, local vs. federal reading policy).

READ 30510: Teaching Elementary Reading  3 s.h.

READ 30515: Teaching Reading And Writing Across The Grades  3 s.h.
Students acquire a background in current theory and practices related to emerging literacy, word identification, fluency, comprehension, study skills, and recreational reading in grades K-12. The relationships between reading and the other language arts and between reading and other subject areas are addressed. Additionally, students become familiar with various methods, materials and technology used in teaching reading, assessing reading performance, and organizing and managing a reading program in the K-12 classroom. This course is required for those seeking the M.A. in reading education and/or reading specialist certification. Teachers and administrators who wish to increase their knowledge in the K-12 reading curriculum and instruction may also enroll.

READ 30520: Content Area Literacy  3 s.h.
This course is designed for reading and non-reading majors interested in increasing knowledge and skills in teaching reading in the content areas. It is a required course for those seeking an M.A. in reading. Instruction is provided in the developmental aspects of reading with little emphasis on corrective or remedial practices. The content of the course may be oriented toward the subject matter areas represented by the students enrolled in the course. Special emphasis is also given to developing vocabulary, comprehension, and study skills as well as to assessing pupil ability to read content material and to select suitable materials for instruction.
Students in their individual contexts.

Candidates first actively engage in using digital tools themselves, ultimately exploring possibilities with their focus communication and collaboration both within and outside the course and across various platforms (e.g., blogs, word press, twitter). The importance of knowing what to teach and when is emphasized. Major topics include: the development of word knowledge from emergent literacy to adulthood, strategies for instruction, the role of assessment, and parental involvement.

The purpose of this course is to examine the role of the reading specialist in planning, developing, supervising, and evaluating reading programs at all levels. Major topics include reading program budget planning, components of an overall reading program, subsystems, special provisions, evaluating teacher performance, planning and conducting in-service workshops, organizational patterns, planning and preparing district materials, and selection and evaluation of commercial materials.

This course will focus on reading and actively engaging with a wide variety of multicultural texts for children and adolescents. Multicultural literature will be broadly defined to include an examination of difference that looks closely at those traditionally absent or marginalized in texts for young readers. Course readings will emphasize issues of selection versus censorship and the ability of multicultural literature to provide enjoyment while allowing for the development of cultural awareness/sensitivity.

This course with strong research base and specific instructional strategies, covers the essential topics of first and second language acquisition, oral language development, writing, reading, vocabulary, and reading and writing across the curriculum. Educators need to understand K-12 English language learners’ literacy and language acquisition as well as instructional practices, approaches, and methods that address different cultural and linguistic backgrounds.

This course with strong research base and specific instructional strategies, covers the essential topics of first and second language acquisition, oral language development, writing, reading, vocabulary, and reading and writing across the curriculum. Educators need to understand K-12 English language learners’ literacy and language acquisition as well as instructional practices, approaches, and methods that address different cultural and linguistic backgrounds.

Students in this course will become aware of the factors which influence reading achievement. They will learn to administer standardized and informal tests to individuals as well as to small groups. Furthermore, they will recognize the need to modify some procedures for exceptional learners. Throughout the course, the importance of on-going assessment will be emphasized. Finally, strategies for interpreting and reporting test results will be delineated. As a course requirement, students will administer selected tests to a student and summarize the results in a report.

Such areas as the following are explored: methods and materials for teaching reading and determining reading levels; influencing factors in reading disability; and differences in teaching varied types of children. Demonstrations, hands-on experiences and group work are involved. May not be offered annually.

This course addresses newly defined literacies in the technological world. Candidates will examine a range of theoretical, methodological and practical approaches to identifying and understanding new literacies. They will understand that the demands of 21st-century literacy are more complex and more challenging that earlier periods in history. The course has as its focus communication and collaboration both within and outside the course and across various platforms (e.g., blogs, word press, twitter). Candidates first actively engage in using digital tools themselves, ultimately exploring possibilities with their students in their individual contexts.
Course Descriptions

READ 30557: 21st Century Literacies in Today's Schools 3 s.h.
Prerequisite(s): READ 30500 and READ 30545 and READ 30555 and READ 30530 and READ 30611 and READ 30552 and READ 30547

READ 30560: Corrections Of Remedial Reading Problems 3 s.h.
Prerequisite: READ 30550 with minimum grade of B
Students in this course become aware of factors that are considered when planning instruction for readers experiencing difficulty. In planning lessons students design and adapt instructional materials, develop computer-based teaching strategies, and implement instructional procedures in an integrated language arts perspective. The course instructor supervises students as they use diagnostic teaching strategies to instruct remedial readers in field-based settings.

READ 30566: Reseaching Classroom Practice 3 s.h.
This course will provide opportunities for students to read and analyze various types of research for the purposes of improving practice. Students will focus on action research by designing a project that includes selecting the issue, determining the data to be collected, data analysis and interpretation, and change of teaching and learning behavior.

READ 30570: Clinical Experiences In Reading 6 s.h.
Prerequisite: READ 30560 or REED 30560
Students plan and execute reading lessons for groups of remedial readers. They integrate the results of testing, observation and the assessment of reading-related factors in order to devise appropriate sequences of corrective instruction. Students select and use varied teaching strategies, including remedial techniques in order to adjust to the individual needs of their pupils. Following weekly observations, students discuss their performance with the instructor. During the seminar portion of the class, students learn to administer, interpret and evaluate diagnostic instruments. They are taught to use corrective procedures which integrate the language arts and utilize computers.

READ 30600: Seminar And Research In Reading 3 s.h.
The most commonly used techniques employed in educational research are studied. Guided reading and discussion of research articles in reading education are provided. Research studies are analyzed and critiqued with special attention given to the methodology of the studies. Enrollment is limited to matriculated graduate students with permission of the graduate advisor.

READ 30610: INTERNSHIP-READING 6 s.h.
Prerequisite(s): None
This course is an examination of various types of literacy problems and the techniques, processes and instruments for assessing literacy. Topics include the administration of a variety of assessment tools and the interpretation of assessment data for selecting instructional methods, facilitating instructional decisions, monitoring students' performance, and providing intervention based on informed assessment.

READ 30611: Literacy Assessment 3 s.h.
Prerequisite(s): None
This course is an examination of various types of literacy problems and the techniques, processes and instruments for assessing literacy. Topics include the administration of a variety of assessment tools and the interpretation of assessment data for selecting instructional methods, facilitating instructional decisions, monitoring students performance, and providing intervention based on informed assessment.

SECD 03350: Teaching Students Of Linguistic And Cultural Diversity 1 s.h.
Corequisites: ECED 23446 and ECED 23447 or ELEM 02445 and ELEM 02448 or SECD 03435 and SECD 03436
The issues of inclusion form an integral part of a teacher preparation program. The schooling of all children demands that diversity in multiple forms be addressed in the inclusive classroom, including cultural and linguistic diversity. Knowledge about diversities and the performance of appropriate instructional strategies are emphasized in this course, and attention is directed to the sensitivity needed to assist the learning of students of linguistic and cultural diversity.
SMED 60550: Schools & Society: Foundations for Secondary Teaching 3 s.h.
This introductory course addresses a number of foundational questions in the field of education, including: Who goes to school and for what purposes? What is taught and who decides? How are schools organized and who funds them? How are schools different now than they were 100 years ago? What legal precedents and reform movements have shaped education today? How are schools in the United States similar to and different from those abroad? In addition to reading and discussing works by seminal schools in the field of education, students will also be required to engage in a field-based service-learning project in order to build a bridge between theory and practice. Students are expected to spend 3 hours/week in the field engaged in their project. Placements will be facilitated by the Office of Field Experiences.

SMED 60552: Teaching Content in Diverse Classrooms 3 s.h.
Prerequisites: SMED 60.550
This course will enable Subject Matter Education candidates to gain a multifaceted understanding of the individual and institutional elements that impact student achievement and schooling experience. Candidates will investigate the roles the gender, SES, race, ethnicity, home language, religion, and other identity-based aspects shape school experiences, learning, and achievement. Candidates will then learn about specific approaches and instructional practices that they can use in the classroom to promote learning for culturally and linguistically diverse students, including teaching academic language, differentiating instruction and assessments, and supporting home, community and school partnership.

SMED 60553: Creating Supportive Middle and High School Learning Environments 3 s.h.
Prerequisites: SMED 60.550
This course will enable Subject Matter Education teacher candidates to gain an understanding to the effect of the learning environment on student achievement. Candidates will learn strategies for creating and maintaining a positive learning environment in which all learners can achieve their potential. This course will focus on student-centered instructions that promotes civil discourse and strategies to address non-engagement.

SMED 60560: Curriculum, Instruction & Assessment I 3 s.h.
Prerequisite: SMED 60.553 and Co-requisite: SMED 60.562
The first of two subject-specific methods courses, this class is designed for teacher candidates majoring in English, the social studies, or a world language and planning careers as P-12 teachers. In conjunction with a co-requisite residency, this course includes both campus and public school-based experiences dealing with a range of topics necessary to build a functioning learning community, including: subject-specific pedagogy, lesson and unit planning, classroom management, and attention to learning among the diverse populations who attend New Jersey Schools.
This graduate level course introduces the student to the broad range of topics inherent within criminal justice sentencing. The course covers the major theories of sentencing, including: retribution, deterrence, incapacitation and rehabilitation. We delve into the philosophy of each major form and examine the moral, ethical and practical limitations and advantages of each. Students examine theoretical and empirical writings and are expected to write a major paper based on a relevant sentencing issue. The course also examines sentencing policy in the United States, and in other countries, with particular attention paid to the intended and unintended consequences of major sentencing initiatives such as: guidelines, recidivist statutes, mandatory penalties and other current sentencing policies.

Course Descriptions

CJ 09515: Law And Society 3 s.h.
This course will allow students to understand the basic process for law formation and the obvious and hidden influences on the creation of American law; to understand the role of laws in American society, in part as a reflection of needs, in part as a reflection of public/political desires, and in part as tools of the powerful; to understand how the complexities in law and its relationship to society impact on other aspects of the criminal justice system; and to be able to critically assess the formation of law, the interpretation of law, and the application of law in American society.

CJ 09515: Law And Society 3 s.h.
This course will allow students to understand the basic process for law formation and the obvious and hidden influences on the creation of American law; to understand the role of laws in American society, in part as a reflection of needs, in part as a reflection of public/political desires, and in part as tools of the powerful; to understand how the complexities in law and its relationship to society impact on other aspects of the criminal justice system; and to be able to critically assess the formation of law, the interpretation of law, and the application of law in American society.

CJ 09516: Administrative Law/Ethics 3 s.h.
This course focuses on the relevance of administrative law and ethics as they relate to the decision making process in criminal justice. Administrative actions and ethical issues permeate the criminal justice system. As such, students will be exposed to Administrative Law, including discussion of key principles of Administrative Law, limiting doctrines, and particular agency rules. Students will also spend time studying ethics. Discussions may include police corruption, prosecutorial misconduct, ethical issues in sentencing, prison corruption, and ethics in the creation and implementation of crime control policy.

CJ 09517: Criminal Justice Policy Analysis 3 s.h.
This course will enable students to understand the importance of program and policy evaluation, to understand how to evaluate programs and policies with several outcome measures, to be aware of the effectiveness of current criminal justice policies and procedures, and to be able to evaluate a current criminal justice policy or procedure using primary or secondary data.

CJ 09518: Contemporary Developments In Theory 3 s.h.
This course will allow students to understand the modern development of criminal justice theory, to understand current approaches in theory, including strengths and weaknesses of various theoretical perspectives, to be able to conduct research guided by theory, and to be able to critically assess research studies in the field.

CJ 09519: Seminar In Criminal Justice Planning 3 s.h.
This course focuses on the techniques of program and policy planning and evaluation. Students will focus on existing criminal justice programs and policies while at the same time learning the process of proper program and policy evaluation. Specifically, students will learn how to plan change through a series of steps: problem analysis, creating time-bound and measurable goals and objectives, designing a program or policy, developing action plans, developing a monitoring plan, developing an evaluation plan and instrument and finally how to initiate the program or policy. Where appropriate, students will conduct their analysis on existing and policies as well as creating their own plans as outlined above.

CJ 09520: Courts And Supportive Agencies 3 s.h.
This course deals with cases that come from both juvenile and adult courts and which often result in referrals to supportive social agencies. Included are an analysis of the services provided by supportive agencies, such as foster home services, substance abuse services or anger management services, as well as witness decorum while providing reports to a court, such as presentation investigation reports.

CJ 09521: Prevention And Rehabilitation 3 s.h.
This graduate seminar will include in-depth study of the theory and research on the causes of criminal behavior; the legal, ethical, and practical issues involved in working with offenders; and classification and treatment in the correctional context. Students will become familiar with the most widely used and effective correctional treatment approaches and empirical research evaluating programs and policies.

CJ 09522: Seminar In Violence 3 s.h.
This graduate seminar will include an in-depth study of current theory and research on the biological, psychological, and sociological causes of violent behavior. It will examine the various types of violent offenses and the impact of these crimes. Students will learn to critically assess the empirical research on the causes and impact of violence, and understand the practical applications of this research.
### Course Descriptions

**CJ 09523: White-Collar Crime**
This graduate course will include an in-depth study of white-collar crime. White-collar crime has generally been a neglected topic in criminology and criminal justice, but it has gained more prominence as scholars recognized the costs associated with white-collar crime and the importance of studying it for prevention purposes. The course will cover a range of topics from the definitional issues and the problems involved in measuring and collecting data on white-collar crime to theoretical explanations and the prevention of white-collar crime. Students will learn to critically assess significant research concerning white-collar crime and understand the practical applications of this research. This course will not be offered every semester.

**CJ 09524: Police And Society**
This course will focus on the theories and scholarly studies in policing and apply this knowledge to understanding police functions in society. The objectives of this course are to understand the police function both in terms of its nature and its relationship with society, to appreciate advances and emerging theories in policing, and to assess current research in the field and its implications for the police profession. Students are expected to follow the scientific research process to do research, write papers, and have informed discussion of current police policies and practices.

**CJ 09525: Altruism, Cooperation, And Criminal Justice**
This course examines the philosophical and empirical data of altruism and cooperation and relates these fields to the study of criminal justice organizations. Specifically, we examine whether it is necessary to "be nice" to work in the criminal justice field. We further examine whether those that are more cooperative and altruistic perform their jobs more effectively and how relationships between client and worker, and worker and supervisor are influenced by altruistic and cooperative tendencies of the individuals. Finally, students will collect, analyze, and summarize original data testing the hypotheses offered within the course.

**CJ 09526: Management Of Criminal Justice Organizations**
The course focuses on diagnosing criminal justice organizations based on their: structure, purpose, leadership styles, rewards and motivations, relationships and communication theories, decision-making processes, goals and objectives. Students learn how to assess the effectiveness of various criminal justice agencies based on the aforementioned concepts and will also learn how to integrate planned change to a criminal justice organization. Criminal justice organizations exist in different political and legal environments than private, for-profit institutions and students learn how to assess these differences and gain an understanding of how criminal justice organizations work at the organizational and individual level.

**CJ 09527: Gender & Crime**
This graduate course will include an in-depth study of gender issues in criminal justice system. The class will start with a historical view of female criminality and then examine the empirical reality of female offending. Discussions will cover theoretical explanations for female offending and the processing of female offenders throughout the criminal justice system, from arrest to parole. Students will also learn about females as victims of crime and their experiences with criminal justice system. Further, the class will explore the issues faced by female professionals employed within the criminal justice system. Students will also learn how to critically assess the current information on female offenders and victims in order to determine the best way to address their needs and issues.

**CJ 09528: Seminar In Juvenile Justice And Delinquency**
This course will examine the biological, psychological, and sociological factors that increase the risk of juvenile delinquency, and how the justice system has reacted to crime committed by young people. Topics such as early intervention, protective factors, diversion, gangs, research based rehabilitation programs, and transfer to adult court will be examined. Students also will learn to critically assess and design evaluations of prevention and rehabilitation programs designed for juveniles.

**CJ 09529: Community Justice**
This course will examine how the community can work with police, courts, and correctional agencies to prevent crime and rehabilitate and reintegrate offenders. It will examine the effect on implementing community programs of the organizational environment and effective recruitment, screening, and training of community members. Techniques such as participatory management, collaboration, problem solving, and mediation will be examined. Students also will learn to critically assess and design evaluations of community programs.

**CJ 09530: International Criminal Law Seminar**
This graduate course will include an in-depth study of international crimes and the international criminal process. It will examine the various types of international criminal offences, the impact they have on the international community, and the international legal consequence for such crimes. Students will learn to critically analyze historical international cases and understand case precedents and their future impact on international criminal law.
CJ 09532: Race, Ethnicity, Class & Justice  
This graduate course will include an in-depth study of race, ethnicity and class, and their evolving impact upon the U.S. criminal justice system, as well as the system's impact on minorities, the poor, and their communities. A major focus of this course will be a critical examination and analysis of how race, ethnicity, and class have impacted the nature, content, and quality of justice that is rendered within the nation. One major purpose of our study is to provide students with an opportunity to gain sophisticated understanding of the inequities that minorities experience within our system of justice and in the wider community. Students will learn to critically assess significant research concerning race, ethnicity and class and the criminal justice system, and understand the practical applications of this research.

CJ 09600: INDEPENDENT STUDY  
1 to 6 s.h.

CJ 09601: Master's Thesis In Criminal Justice I  
3 s.h.
This course requires students to design and begin implementing their own research project to be used to satisfy the program's thesis requirement. Under the guidance of a member of the Law and Justice Department faculty who agrees to serve as Thesis Advisor, the student will develop a Research Proposal that will consist of an introduction and Statement of the Problem, a Literature Review, a Data and Methods Section, and a brief summary of the proposed research. The student will defend this Research Proposal in front of the Master’s Thesis Committee, and will begin implementing the research after obtaining the Committee’s approval.

CJ 09602: Master's Thesis In Criminal Justice II  
3 s.h.
This course requires students to complete the research project they began in Master’s Thesis in Criminal Justice I in order to satisfy the program's thesis requirement. Under the guidance of a member of the Law and Justice Department faculty who has agreed to serve as Thesis Advisor, the student will collect their data or obtain secondary data, analyze the data, and write the results, discussion and conclusion, and references section. They will combine their work from Master’s Thesis I and II into a completed thesis which they will present to the Master’s Thesis Committee for approval.

LAWJ 05120: Introduction To Security  
3 s.h.
This course presents the organization and management of the security function in industry, business, government and institutions. It also covers the protection of personnel, facilities and other assets as well as the administrative, legal and technical problems of loss prevention and control.

LAWJ 05175: Survey Of Criminal Justice  
3 s.h.
This general education approved social science elective course deals with the nature of crime and criminal responsibility, and elements of social control. It also surveys the criminal justice process from original law enforcement contact through the judicial and correctional phases. It includes professional roles and opportunities in the criminal justice field.

LAWJ 05200: Introduction To Corrections  
3 s.h.
This course studies the historical development of correctional practices in the handling of criminals from early to modern times. Students survey contemporary correctional organized structures and treatment processes, as well as institutional and community based programs and problems.

LAWJ 05201: Introduction To Courts  
3 s.h.
This course covers the organization of both the state and federal court systems; the management and administration of those courts; the relationship of courts to the police, corrections, and community; the criminal trial process, including pre-trial and post-trial processes; and the judiciary and judicial power, including the areas of separation of powers and judicial behavior.

LAWJ 05202: American Police  
3 s.h.
This course covers the philosophy and history of the police role in society. It surveys organizational forms and basic procedures of police work; police ethics and professional preparation for law enforcement; and, major police problems confronting the police today.

LAWJ 05205: Minorities, Crime And Criminal Justice  
3 s.h.
In this course students critically examine the involvement of minorities with crime in the U.S. both as perpetrators and victims. Additionally, they will be afforded the opportunity to understand, critically examine, and apply significant theoretical perspectives for the study of minority criminality. They will develop an understanding of the impact of race and class within the law-making process, the content of the law, and the quality of justice afforded minorities within the American criminal justice system.
Course Descriptions

LAWJ 05210: Restorative Justice 3 s.h.
This course surveys the major theoretical and applied concepts of Restorative and Community Justice. Students will examine how the Restorative and Community Justice processes differ from the traditional, retributive criminal justice system and how Restorative Justice models attempt to benefit the victim, offender and the community. Some of the issues to be covered are: informal justice practices, reintegrative shaming, forgiveness and resentment, and the efficacy of Restorative and Community Justice initiatives. Additionally, students may have opportunities to interact with adjudicated youth from New Jersey's Restorative Justice Project.

LAWJ 05220: Victimology 3 s.h.
This course gives students insight into the "forgotten" party in a crime, the victim. The course covers victims' rights in the Justice System with specific coverage of the following: the social, economic and racial impacts of crime on victims; victims and courts; police reaction to victims; restitution; offender accountability and the dramatic increase in victims programs and services.

LAWJ 05255: Criminal Law 3 s.h.
This course offers a comprehensive review of the major common law and statutory crimes including homicide, rape and all related personal and property offenses. The students will be introduced to domestic violence offenses. Considerable attention is given to the social, moral and constitutional frameworks of the criminal law with a review of recent and standard judicial interpretations. It also offers a review of defenses and mitigation.

LAWJ 05274: Criminal Justice And Community Relations 3 s.h.
This is a broad-based course on the relationship between the community and crime and the criminal. The course covers such topical areas as police-community relationships, the culture of the inner city, human service delivery systems, the role of citizen and business groups and the criminal justice system, and the various ways in which criminal justice agencies have an obligation to the community at large.

LAWJ 05276: Parole, Probation And Community Corrections 3 s.h.
A comprehensive review of the noninstitutional response to criminal behavior, this course covers probation, parole and community corrections in depth. It includes topics like work release, education release, half-way houses, drug and alcohol centers, legal aspects of these processes and the effectiveness of these programs.

LAWJ 05285: Criminal Investigation 3 s.h.
Students study the criminal investigation process. Analysis of problems encountered in interviewing, interrogating and investigating is included. The course covers investigative techniques that may be applied to investigative problems and develops application of criminal investigation theories to the administration of justice.

LAWJ 05290: Forensic Law 3 s.h.
This class offers a comprehensive analysis of legal issues involving forensic techniques in the justice systems. This course examines the importance of admissibility, relevance and materiality as it relates to the evidence and the various experts in Forensics. The topics include bloodstain patter and trace evidence, pathology and gunshot wounds, DNA fingerprinting, micrography, postmortem determinations and case studies in Forensic Science.

LAWJ 05310: Criminal Jurisprudence 3 s.h.
Students study the history and philosophy of modern criminal law. This course covers problems of contemporary jurisprudence and especially the typology of constitutional issues as it relates to due process and its requirements.

LAWJ 05312: Criminal Procedure II 3 s.h.
This course will examine the legal procedures by which the criminal justice system operates. Students will assess United States Supreme Court opinions so as to explore issues related to the Fourth, Fifth, Sixth, Eighth, and Fourteenth Amendments to the Constitution, including pre-trial processes, speedy trial, the prosecution function, bail, the identification of suspects, the right to counsel, the adjudication process, the law of confessions and interrogation, and the privilege against compelled self-incrimination. This course has two primary objectives. The first is to introduce students to the analysis of judicial opinions, a primary source of law in the American legal system. The second is to become familiar with both the fundamental doctrines of constitutional criminal procedure and the important policy issues that emanate therefrom.
### LAWJ 05312: Criminal Procedure II

This course will examine the legal procedures by which the criminal justice system operates. Students will assess United States Supreme Court opinions so as to explore issues related to the Fourth, Fifth, Sixth, Eighth, and Fourteenth Amendments to the Constitution, including pre-trial processes, speedy trial, the prosecution function, bail, the identification of suspects, the right to counsel, the adjudication process, the law of confessions and interrogation, and the privilege against compelled self-incrimination. This course has two primary objectives. The first is to introduce students to the analysis of judicial opinions, a primary source of law in the American legal system. The second is to become familiar with both the fundamental doctrines of constitutional criminal procedure and the important policy issues that emanate therefrom.

### LAWJ 05315: Criminal Justice And Social Conflict

This course covers the major crises in our basic American institutions. Students examine the various aspects of social mobility, population explosion, social stratification, sex revolution, militarism, and the generation gap as they relate to problems of social justice in our society.

### LAWJ 05320: Civil Aspects Of Law Enforcement

Students undertake an analysis of those areas in civil law with which law enforcement professionals frequently encounter. Topics include family law, torts, administrative and environmental issues, property disputes, liens, business and consumer transactions.

### LAWJ 05322: Drugs And Crime In America

This course explores and analyzes the relationship between illegal drugs and crime and all the relevant issues and ramifications. These include, but are not limited to: national and international trafficking, control of the problem, legalization, and explanations for drug use.

### LAWJ 05324: Sentencing And The Rights Of The Convicted

Students explore, analyze, and critique the relevant structures, processes, and impacts of criminal sentencing and sentences. The course is designed to examine critically the relevant political, philosophical and social driving forces of change and their impacts on the system and society.

### LAWJ 05325: Comparative And International Criminal Justice

**Prerequisites: LAWJ 05175**

The course is an introduction to comparative and international criminal justice. It compares the criminal justice system in the United States with other national systems in the five continents and major regions of the world. Areas examined include crime, criminal law, policing, court processes, and corrections. This course also provides an introduction to the globalization of crime including terrorism, drug trafficking, human smuggling, and war crimes and the development of domestic and international efforts in fighting these crimes. The goal of this course is to help students develop comparative and international perspectives in addressing problems facing the criminal justice system.

### LAWJ 05326: International Terrorism

This course explores the historical development of international terrorism and provides a foundational knowledge of current terrorist groups and their tactics. Specifically, this course introduces the student to the definition, origin, and evolution of international terrorism; the roles of world-views, ideologies, mind sets, and motivations; and the different types of terrorism. Students will also study the organization, tactics, operational capabilities and threats posed by terrorist groups. Finally, the course will introduce the current status of anti- and counterterrorism efforts in the United States.

### LAWJ 05330: Problems In World Justice

This multidisciplinary course examines the principles of justice and their application to the criminal justice system and society at large. Additionally, a critical examination of significant issues and concerns of world justice will be offered.

### LAWJ 05335: Criminal Procedure I

This course will examine the legal procedures by which the criminal justice system operates. Students will assess United States Supreme Court opinions so as to explore issues related to the Fourth Amendment to the Constitution, including search and seizure of premises and persons, the arrest and detention of suspected criminals, and the remedies available for constitutional violations. This course has two primary objectives. The first is to introduce students to the analysis of judicial opinions, a primary source of law in the American legal system. The second is to become familiar with both the fundamental doctrines of constitutional criminal procedure and the important policy issues that emanate therefrom.
LAWJ 05335: Criminal Procedure I 3 s.h.
This course will examine the legal procedures by which the criminal justice system operates. Students will assess United States Supreme Court opinions so as to explore issues related to the Fourth Amendment to the Constitution, including search and seizure of premises and persons, the arrest and detention of suspected criminals, and the remedies available for constitutional violations. This course has two primary objectives. The first is to introduce students to the analysis of judicial opinions, a primary source of law in the American legal system. The second is to become familiar with both the fundamental doctrines of constitutional criminal procedure and the important policy issues that emanate therefrom.

LAWJ 05337: Treatment Of The Offender 3 s.h.
This course covers the major therapeutic approaches to the correction of criminal and delinquent behavior and a review of processes and procedures of corrections and of research on the outcome of various treatment approaches. Students analyze the ethical and legal problems related to rehabilitation in a correctional setting.

LAWJ 05342: Counseling And Guidance Of The Offender 3 s.h.
A survey of basic principles and techniques of counseling of offenders, this course includes interviewing, case conferences, case histories, individual and group counseling, classification procedures, and team treatment participation.

LAWJ 05346: Women, Crime And Criminal Justice 3 s.h.
This course covers the many facets of women, crime and criminal justice, including past and present trends of female crime along with its relationship to the three major components of the criminal justice system: police, courts and corrections. Furthermore, this course addresses gender as a significant variable in all aspects of society, both criminal and non-criminal.

LAWJ 05356: Criminal Justice Internship I 3 to 6 s.h.
Prerequisites: COMP 01112 or HONR 01112
This course provides practical immersion in a criminal justice-related agency for pre-service students; this course will for in-service students (law enforcement, courts and corrections personnel) involve placement in a social service related agency, or a research paper. A criminal justice related cooperative education experience may be substituted for the internship. In unusual circumstances other coursework may be substituted for the internship; this requires the approval of the department chair. (Implemented Spring 2004)

LAWJ 05361: Introduction To Juvenile Justice 3 s.h.
This course covers the history and philosophy of the juvenile justice system, which includes the development of the system through the 19th and 20th centuries and the decisions rendered by the United States Supreme Court. The student also scrutinize the various steps in the police, courts and corrections stages of the juvenile justice system.

LAWJ 05369: Theories Of Crime And Criminality 3 s.h.
In this course students explore the extent of crime and delinquency in the United States and the full range of relevant theories of causation. They also synthesize and apply appropriate theories to such concepts and topics as race, social class, gangs, drugs, family, schools, and neighborhoods.

LAWJ 05379: The "Political Prisoner" 3 s.h.
This course examines the causes and significance of the political prisoner concept on the criminal justice system generally and the U.S. prison systems specifically. The course deals with varying perceptions of different segments of the population about the existence and scope of this phenomenon in depth.

LAWJ 05380: Criminal Justice Research 3 s.h.
Prerequisites: LAWJ 05369
Students study the basic principles of research and statistics. This course undertakes a review of contemporary criminal justice research projects, emphasizing evaluation of journal studies and basic planning and writing of the research paper.

LAWJ 05392: Criminal Justice Administration 3 s.h.
This course provides upper level students with the concepts, theories, and principles of managing and administering criminal justice organizations. The content of the course is applied to police, courts, and corrections agencies and gives the student a total system approach to the subject.

LAWJ 05395: The Incarceration Experience 3 s.h.
This course focuses on the exploration of various aspects of incarcerating criminals. It includes the history of incarceration, the prisonization process, prison subcultures, violence and victimization, and the underground prison economy.
LAWJ 05401: Law And Human Rights 3 s.h.
This course reviews individual civil rights and liberties in detail with a particular emphasis on federal-state legislation on discrimination, substantive and procedural due process materials and 1st amendment problems. Specific attention is given to the role police, courts and correctional systems play in the enforcement and enhancement of such rights.

LAWJ 05415: Selected Topics In Criminal Justice 3 s.h.
This course promotes intensive research and analysis in Special Topics in Criminal Justice. Students engage in either theoretical or applied research in topics that can be mutually agreed upon between faculty and student. Topics will vary but may include female criminality, XYY theory, insanity, mental health and the justice systems, advanced security systems or radical criminology.

LAWJ 05469: Seminar In Law/Justice - Wi 3 s.h.
Prerequisites: LAWJ 05175, LAWJ 05255, LAWJ 05380, one of: LAWJ 05200, LAWJ 05201, or LAWJ 05202 and senior standing.
This seminar will cover topics relating to how law and justice are put into practice by the police, courts, and corrections system. Important issues affecting society and the criminal justice system as a whole will be examined in depth. Students will be expected to read scholarly work exploring these issues; participate in class discussions; conduct library research; write short, informal memos and a senior level research paper; present oral reports on their research; and demonstrate their understanding of assigned readings and the research reported by classmates in a final examination.

BUS 01505: MBA Supervised Internship 3 s.h.
This course requires a field experience in government, business, industry or non-profit organizations. Students complete assignments that prepare them for productive employment upon graduation. The MBA faculty member will partner with each employer and student to define and enrich the student’s work experiences and to monitor and assess the learning process. This course is integral to the MBA Program and Supervised Internship credits cannot be used to substitute MBA elective credits.

BUS 01518: Integrative Managerial Skills 3 s.h.
This course serves as a keystone course for the M.B.A. program. Key skills, tools, and issues necessary for further study will be developed and extended. Course topics and techniques include information systems, financial ratios, behavioral, presentation, team building, quantitative analysis, critical thinking, written communication, legal and ethical issues, and library research including electronic data bases and internet research.

BUS 01521: Integrative M.B.A. Seminar 3 s.h.
A capstone course for the M.B.A. program, it aids students in reinforcing and integrating core courses by studying strategic audits and process analysis techniques. Student projects will use teams to analyze how organizations use people, operational management, information systems and financial measurements to achieve strategic and operational effectiveness.

BUS 01550: INDEPENDENT STUDY 1 to 4.5 s.h.

BUS 01600: Special Topics In Business Administration 3 to 6 s.h.
Students will study advanced level topics in specific disciplines as identified through participation in indepth seminars on topics to be determined by faculty in consultation with the Graduate Committee of the College of Business. Students will complete research or projects on specialized topics in various disciplines in Business Administration. Students may take each topic only once. This course may not be offered annually.

ENT 06504: Strategic Project-Based Experience 3 s.h.
This course is designed to provide strategic focused field based project learning experiences and opportunities for graduate students by affording them the opportunity to work with a wide variety of public and private organizations. The course uses a team-based approach to offer consulting advice to organizations with the goal of improving their performance. The emphasis in the course is on experiential approaches that provide a participative type of learning about the crucial issues faced by organizations. This course is interdisciplinary in nature and open to all graduate students.
Course Descriptions

ENT 06505: Entrepreneurship And Innovation 3 s.h.
Prerequisites (effective Spring 2009): ACC 03500 and MGT 06502 and MKT 09500
This course provides a broad framework for understanding the nature of entrepreneurship in multiple organizational settings. The course introduces students to the innovation and idea generation process and helps students apply an alternative way of "thinking" to assist in solving difficult issues for government, business, and the non-profit sector.

ENT 06506: Corporate Entrepreneurship And New Venture Development 3 s.h.
This course provides an overview of the potential for innovation and entrepreneurial opportunities or new ventures within a corporate environment. The course covers various aspects of corporate entrepreneurship and new venture development. Major topics include understanding the corporate entrepreneurial revolution, learning about the nature of entrepreneurship within established organizations, understanding the requirements for setting up an environment conducive to new ventures within a corporate setting, and learning about the entrepreneurial direction of firms as they grow and evolve. Among the issues discussed are application of entrepreneurship to established firms, the disparity between start-up and corporate entrepreneurship, the role of creativity within corporate entrepreneurship, the relation to product innovation and technology, the importance of corporate strategy within an entrepreneurial framework, and what it takes to create an entrepreneurial culture.

ENT 06599: Special Topics In Entrepreneurship 3 s.h.
Students will study advanced level topics in Entrepreneurship. The exact topics to be covered will change over time. Contact the MBA office or the Management and MIS Department for details.

HRM 06500: INDEPENDENT STUDY:HRM 1 to 6 s.h.

HRM 06598: Special Topics In Human Resources Management 3 s.h.
Students will study advanced level topics in Human Resources Management. The exact topics to be covered will change over time. Contact the MBA office or Management and MIS Department for details.

HRM 06605: Strategic Human Resource Management 3 s.h.
Prerequisite(s): Admission into the MBA Program or Admission into the Certificate of Advanced Graduate Study (CAGS) in Business Management
Strategic Human Resource Management consists of planned organizational activities designed to increase organizational effectiveness and equity. This course outlines the transformation of HRM from a clerical function to an important strategic partner of top management. It focuses on the ability of HRM to provide a source of competitive advantage to forward-thinking organizations.

HRM 06688: Human Resource Management In Health Promotion 3 s.h.
Prerequisite: Admission into the Master of Health Promotion Management (MHPM) program.
Human resource management consists of planned organizational activities that are designed to improve efficiency and equity. In this class, health promotion professionals will develop their capabilities as human resource managers and will enhance their appreciation of human resource management professionals who make the strategic choice to promote employee health.

MGT 06510: Professional, Legal and Managerial Responsibilities 3 s.h.
Prerequisite: Admission into the MBA program or admission into the COGS in Business.
In that business leaders have become personally and professionally responsible for the legal and ethical behaviors of the individuals within their organizations, the need for formal training in ethical and legal decision making is essential. In this course students will learn how to effectively apply a variety of legal and ethical frameworks within the global marketplace. Students will also learn appropriate and effective legal and ethical issue reporting practices, principles and responsibilities.

MGT 06500: Organizational Behavior 3 s.h.
Prerequisite(s): Junior standing and matriculation in the Business minor or a Business major
This course examines human relations in management. The course studies the concern for both task and process in the light of structure, goals and human relationships found in organized efforts. It also covers the application of new management theories in the areas of motivation, leadership and group problem-solving by a variety of means, including simulation, case studies, and role playing.

MGT 06504: Organizational Change And Development 3 s.h.
Prerequisites: MGT 06500 or MGT 06509 or PST 08220
This course studies factors that facilitate or inhibit organizational change as well as research findings and theory which deal with methods for diagnosing organizational climate, and selecting and utilizing techniques for bringing about change and overcoming resistance to change. It also analyzes and evaluates roles and strategies used by change agents to initiate structure and direct organizational change.

MGT 06507: Manufacturing and Service Operations Management 3 s.h.

Prerequisite(s): Admission into the MBA program or Business COGs

This course provides an introduction to the field of manufacturing and service operations management. The course aims to familiarize students with the set of business activities whereby resources, flowing within a defined system, are combined and transformed to add value in accordance with organizational objectives. OM is one of the three major functions of any organization, and it is integrally related to all the other business functions in the context of manufacturing and services. The focus of this course is to provide the students with the tools, technologies, and processes they need to improve their organization’s profitability and service by adhering to the ethical norms of the society.

MGT 06510: Strategic Engineering Management 3 s.h.

The course introduces engineers to the concepts and application of strategic planning specifically to the roles and responsibilities of the engineering function in the strategic planning process for high-tech firms.

MGT 06519: Leadership In Health Promotion 3 s.h.

The course is designed for graduate students in the M.A. in Wellness and Lifestyle Management program. Course content will cover the theories of leadership in health promotion and the focus of this course will be on leadership from a variety of perspectives - health organizational leadership in the external environment, as well as leadership at the top, middle and lower levels inside organizations. Students will focus on the theory and implementation of various health leadership tasks and responsibilities including working with other leaders in a multinational world, supervising workers with different backgrounds. These leadership skills will include establishing workplace goals, recruiting and managing work units for productivity, conducting interviews, giving feedback to subordinate employees, designing and implementing employee motivation programs, changing organization culture, the capacity to lead globally, leading work teams and managing workforce diversity. By the end of this course, students will be able to effectively diagnose the complex dynamics of leadership in health organizational environments and take action as leaders and to improve individual and organizational performance.

MGT 06520: Global Leadership And Organization Culture 3 s.h.

The course is designed for graduate business students. Course content will cover the theories of business leadership and the focus of this course will be on leadership from a variety of perspectives - organizational leadership in the external environment, as well as leadership at the top, middle and lower levels inside organizations. Students will focus on the theory and implementation of various business leadership tasks and responsibilities including working with other leaders in a multinational world, supervising workers with different backgrounds. These business skills will include establishing workplace goals, organizing work units for productivity, conducting interviews, giving feedback to subordinate employees, designing and implementing employee motivation programs, changing organization culture, the capacity to lead globally, leading work teams and managing workforce diversity. By the end of the course, students will be able to effectively diagnose the complex dynamics of leadership in business environments and take action as leaders and to improve individual and organizational performance.

MGT 06521: Leadership Theory and Practice 3 s.h.

Prerequisite(s): Graduate Standing or Permission from Instructor.

The elective course is designed for graduate in MBA Management program students. Course content will cover the theories of leadership and practice. The focus of this course will be on a leadership influence on organizational concept and practices from a variety of perspective in the external environment, as well as leadership at the top, middle, and lower levels inside organizations. Students will be able to perform analysis of the dark side of leadership, destructive patterns of leadership behavior, and multiple intelligences. Furthermore, students will be able to understand the psychology of leadership, including the role of personality, employee motivation, and dealing with difficult people, importance of ethics, empowerment of employees, managing diversity in the work culture, the theory of creating a powerful vision, helping employee through change and burnout prevention, leadership in negotiation and alliances, leading and developing teams, and understand professional performance and sustaining discipline. By the end of the course, students will be able to effectively diagnose the complex dynamics of leadership, provide execution for organizational success, use effective theory, alignment, prioritization, in organizational environments and take action as leaders to improve individual, organization performance, and profitability.

MGT 06599: Special Topics In Management 3 s.h.

Students will study advanced level topics in management. The exact topics to be covered will change over time. Contact the MBA office or Management and MIS Department for details.

MGT 06601: Strategic Planning For Operating Managers 3 s.h.

This course prepares the operating manager for the responsibilities of performing strategic planning. The course will identify what goes into and how strategic planning is performed. Strategy formation and evaluation will be assisted by computer decision models and management games. The interrelationships of organizational units and pro-active management posture with respect to environmental forces will be stressed. This course may not be offered annually.
This course introduces the fundamental Lean Six Sigma principles that underlay modern continuous improvement approaches for industry, government and other organizations. Six Sigma is a quality system developed at Motorola which focuses on elimination of variation from all processes. The basic principles have been applied to a wide range of organizations and sectors to improve quality, productivity, customer satisfaction, employee satisfaction, time-to-market and financial performance. In this course, students will learn how lean, six sigma, and ERP systems improve business processes.

As understanding organizations in the context of their general and competitive environments is vital, future managers must learn how to utilize the perspectives and frameworks designed for strategic analyses and decision making. In this course students will learn how to conduct analyses across organizational functions and levels and effectively manage goals and strategies for different types of organizations.

Technical skills are necessary but insufficient for success in engineering management. It is also necessary for engineering managers to be effective motivators and leaders. In this course, students will also learn optimal techniques of hiring and rewarding engineers.

This course requires the application of analysis and decision making tools in a business setting, with emphasis on the evaluation of problems facing the modern firm in a changing global marketplace. It provides in-depth coverage of analytical tools that are invaluable to the entrepreneur/manager as he or she is confronted with strategy and implementation decisions in a competitive world.

This course is designed to acquaint the graduate student with the advanced statistical forecasting techniques. Upon completion of the course, the student should be able to identify a forecasting problem, gather data and use computerized statistical packages to obtain solutions, analyze results, determine the validity and reliability of the model, and if necessary, recommend alternative methods to solve the model. This course may not be offered annually.

As an improvement methodology that reduces product waste or service failure rates to near perfection, Six Sigma utilizes a disciplined, data-driven approach. Six Sigma practitioners use data to monitor, control, and improve operational performance by eliminating and preventing defects in products and associated processes, including management, service delivery, design, production and customer satisfaction. Lean Six Sigma helps eliminate not only product defects, but six other forms of waste. This course will give a complete overview of the Six Sigma process and prepare students for its management and methodology/
Course Descriptions

MGT 98242: Legal Environment Of Business 3 s.h.
Students in this course examine the legal process and the legal environment within which business must operate, as well as the interrelationship of government and business. Students develop an understanding of the methods by which legal decisions are formulated as they affect both individual rights and business transactions.

BUS 01303: Business Practicum 3 s.h.

BUS 01401: Issues in Business: Directed Research (WI) 3 s.h.
Pre-req: COMP 01.111, COMP 01.112, BUS 01.101 COLLEGE COMP 1 & 2 AND BUSINESS PERSPECTIVES OPEN ONLY TO LIBERAL STUDIES: HUMANITIES AND SOCIAL SCIENCE MAJORS
An upper-division course for students in Liberal Studies: Humanities & Social Sciences, Sequence B Perspectives of Business. Issues in Business: Directed Research is a course that focuses on the current issues and trends in business as found in the business media. The course is designed to allow students to explore areas of personal interest through the collection of research and the presentation of such material in written and spoken formats.

MIS 02150: Integrated Business Software Tools-RS 3 s.h.
Students will expand their use of integrated software tools that include database management systems, spreadsheets, and other business applications. They will apply these tools to actual business decision-making situations by means of case studies and research projects.

MIS 02234: Management Information Systems 3 s.h.
Prerequisites: 15 earned credits required and MATH 01125 or MATH 03125 or MATH 01130 or MATH 01140 or STAT 02260 or College Level Math test with minimum score 60
Information systems are an integral part of all business activities and careers. This course is designed to introduce students to contemporary information systems and demonstrate how these systems are used throughout organizations. This course focuses on the key components of information systems - organizations, people, software, hardware, data, and telecommunications - and how these components can be integrated and managed to create competitive advantage. Students will gain hands-on experience with business software tools commonly applied to business data analysis and database management. It is expected that students entering this class have completed College Algebra or its equivalent.

MIS 02338: Design Of Database Systems 3 s.h.
Prerequisite: Junior standing
This course explores the fundamentals of designing a database for a business organization. It emphasizes the relational model; however, the course also explores the hierarchical and network models. Additionally, the course covers such topics as recovery, integrity, security, concurrency, distributed databases, data dictionaries and the role of the database administrator.

MIS 02500: Issues In Management Information Systems 3 s.h.
Prerequisites: Admission to the MBA Program or admission to the COGS in Business or admission to the COGS in MIS
Information technology and systems are pervasive in business today and will become more so in the future. Therefore, this course is designed to provide skills for managing this changing environment. The primary focus of the course is on the management of technology. The management of technology and systems is not left solely to information systems professionals; it is the responsibility of all managers.

MIS 02510: EXPERT SYS BUSINESS 3 s.h.

MIS 02511: ERP Systems For Management 3 s.h.
Prerequisites: Admission to MBA, COGS in MIS, or CAGS in MIS programs
Students will learn the various key business processes, the role of enterprise resource planning systems (ERPs) in integrating and supporting these processes, and the many challenges an organization faces during implementation and management of such systems. There will be hands-on computer laboratory exercises where students will gain experience in executing the key business steps and extracting meaningful information about the business processes using a well-regarded ERP software solution.

MIS 02515: Electronic Commerce 3 s.h.
Prerequisite: Admission to the MBA Program OR Admission to Certificate of Graduate Study (COGS) in MIS OR Admission to Certificate of Advanced Graduate Study (CAGS) in MIS
This course will introduce students to electronic business. It will cover such diverse issues as: e-commerce payment mechanisms, encryption and authentication of data, web assurance, electronic data interchange, legal issues on the web, and web marketing. There will also be a lab component that will provide students with exposure to and practice in web page design and creation.
Course Descriptions

MIS 02522: Systems Analysis And Design 3 s.h.
Prerequisites: Admission to the MBA Program OR Admission to Certificate of Graduate Study (COGS) in MIS OR Admission to Certificate of Advanced Graduate Study (CAGS) in MIS
This course explains the methodology and techniques in analysis and design of computer information systems. The systems analyst, the architect of information systems, is a liaison between user and programmer. The roles and responsibilities of the systems analyst are emphasized at all stages of the systems development life cycle.

MIS 02525: Project Management 3 s.h.
Prerequisites: Admission to the MBA Program OR Admission to Certificate of Graduate Study (COGS) in MIS OR Admission to Certificate of Advanced Graduate Study (CAGS) in MIS
In this course, students will learn the Project Management Body of Knowledge (PMBOK) as put forward by the professional association, the Project Management Institute (PMI). Students will not only study the various phases and documents of project management, they will also have experience creating each of the documents for a given project.

MIS 02526: Project Management For Engineers 3 s.h.
In this course, students will learn the Project Management Body of Knowledge (PMBOK) as put forward by the professional association, the Project Management Institute (PMI). Students will not only study the various phases and documents of project management, they will also have experience creating each of the documents for a given project.

MIS 02528: Business Application Design And Development 3 s.h.
Prerequisites: Admission to MBA, COGS in MIS, or CAGS in MIS programs
Students will design, create, and maintain web applications that: dynamically display content from relational and hierarchical databases, provide transaction processing from procurement to fulfillment, connect to and share internal data with supply chain partners (extranet), afford ubiquitous access to internal data via secure channels (intranet). Students will gain experience working with integrated software development tools, various programming languages, and many web-based business standards.

MIS 02528: Database Design 3 s.h.
Prerequisites: Admission to the MS in Bioinformatics, MBA, COGS in MIS, or CAGS in MIS programs
This course explores the fundamentals of designing a database. It emphasizes the relational model; however, the course also explores the hierarchical and network models. Additionally, the course covers such topics as data insertion, modification, and extraction using SQL. CASE tools and database management tools will be employed.

MIS 02538: Special Topics In Management Information Systems 3 s.h.
Prerequisites: Admission to the MBA Program OR Admission to Certificate of Graduate Study (COGS) in MIS OR Admission to Certificate of Advanced Graduate Study (CAGS) in MIS
Students will study advanced level topics in Management Information Systems. The exact topics to be covered will change over time. Contact the MBA office or the Management and MIS Department for details.

MKT 09200: Principles Of Marketing 3 s.h.
Prerequisites: COMP 01105 or COMP 01111 and 12 Credits Required
This course provides an overview of the theory and practice of marketing within a corporate and societal context in a dynamic environment. The major functions of marketing are covered from the perspective of management strategy seeking competitive advantage.

MKT 09375: Business Logistics 3 s.h.
Prerequisites: MKT 09200 and 57 Credits Required OR C918 Systems Engineering Concentration.
This course focuses on the logistics of physical distribution and supply chains. Topics include traffic routing, inventory analysis and control, warehousing, location of production and storage facilities, and transportation.

MKT 09379: International Marketing 3 s.h.
Prerequisites: MKT 09200 and 37 Credits Required OR C918 Systems Engineering Concentration.
This course focuses on the logistics of physical distribution and supply chains. Topics include traffic routing, inventory analysis and control, warehousing, location of production and storage facilities, and transportation.

MKT 09500: Marketing Management 3 s.h.
Prerequisites: Admission to the MBA Program or COGS in Business
This course focuses on managing the marketing function in a dynamic, competitive environment in coordination with other organizational functions to enhance the overall performance of an organization. Attention will be devoted to the design of strategies for the achievement of competitive advantage in product/service offerings, pricing, promotion and distribution. Students will build upon their existing knowledge base of marketing concepts and will develop or extend competencies in analytical decision-making, ability to identify market opportunities, and ability to develop and evaluate marketing plans.
MKT 09501: Consumer Analysis 3 s.h.
Students will conduct detailed analyses of consumer and/or business markets. After examining a range of conceptual materials and research methodologies, they will apply these insights to the analysis of actual decision-making situations by means of case studies and/or independent research projects.

MKT 09502: Marketing Research 3 s.h.
Contemporary marketing decisions are based on marketing research information. This course will help students develop a managerial perspective on the use of marketing research information in making decisions, as well as specific research skills and practical experiences that will enhance their career advancement. The skills covered in this course are applicable to marketing problems encountered in both consumer and business-to-business markets. Students will experience a "project-based learning" to apply marketing research tools and methods to identify and solve specific marketing problems.

MKT 09503: Marketing Communication And Promotion 3 s.h.

MKT 09510: Foundations of Marketing 3 s.h.
Prerequisite(s): Admission into the MBA or Business COGS program
For graduate students in the MBA or Business COGS programs, this course provides a foundational overview of the theory and practice of marketing within a corporate and societal context in a dynamic environment. The major functions of marketing are covered from the perspective of management strategy seeking competitive advantage by better serving customers' needs more effectively and profitably than competitors.

MKT 09575: Introduction To Logistics And Supply Chain Management 3 s.h.
Prerequisite: Admission to graduate programs
The course is a basic introduction to the field of logistics and supply chain management, including both defense logistics and commercial supply chain management. The objective of the course is to provide students a solid awareness and understanding of the processes and functions that comprise a supply chain. The course serves as the introductory course of a three course specialization in Supply Chains and Logistical Systems in the MBA program. Moreover, students are required to complete a term project to demonstrate their understanding of logistics and supply chain issues. Case analysis and hands-on experience in this class will offer students the opportunity to broaden their horizon on the critical roles that the supply chain plays in this globalized and interdependent world.

MKT 09599: Special Topics In Marketing 3 s.h.
Prerequisites: Admission to the MBA Program
Students will study advanced-level topics in Marketing. The exact topics to be covered will change over time. Contact the MBA office or the Marketing Department for details.

MKT 09999: Special Topics In Marketing 3 s.h.
Prerequisites: Admission to the MBA Program
Students will study advanced-level topics in Marketing. The exact topics to be covered will change over time. Contact the MBA office or the Marketing Department for details.

MKT 09600: International Marketing 3 s.h.
Students will examine all issues facing marketing managers in the light of the unique challenges posed by the internationalization of the economy. The cultural, economic, political, and legal environment will be examined. Market research in world markets, the planning and development of consumer and industrial products, promotion, pricing and distribution will also be analyzed. This course may not be offered annually.

MKT 09605: Competitive Advantage Through Supply Chain Management 3 s.h.
Prerequisite: MGT 09575
The course has been developed to be the capstone course for the Supply Chain and Business Systems specialization in the Master of Business Administration program. As such, the course will provide the culminating experience for graduate students in their final courses in the graduate program and will serve as a point of assessment. Utilizing the relationship between the RCOB and SAP, students will have the opportunity to utilize the SAP SD (Sales and Distribution) Module of SAP software in applications that are common in logistical systems. Students will have to complete their term projects. In addition, students will be required to participate in SAP case competition, which encourages students to comprehend, integrate and apply supply chain management concepts in the context of SAP.

SCL 01380: Global Supply Chain 3 s.h.
Prerequisites: MKT 09575
The course is designed to assist students in developing the analytical skills necessary to manage the processes and functions that exist in modern global supply chains. Using the case method and recommended textbook, students will analyze realistic situations and problems confronting supply chain managers in a global setting. They will also identify solutions and develop implementation plans for their recommended solutions. Within this process, students will develop an acceptance, understanding, and appreciation of the economic, political, and cultural differences that make up a global market. Cases for
analysis and discussion will include topics such as supply chain strategy, operations management, inventory management, lean systems and six sigma quality issues, and sustainability supply chain management.

MATH 01122: Precalculus Mathematics 4 s.h.
This course helps prepare students for Calculus I or Calculus T&A. The contents include: a brief review of intermediate algebra, the structure of the real number system, elementary analytic geometry, and algebraic, exponential, logarithmic and trigonometric functions (including their inverses and related functions). Graphs of functions and conic sections also are studied. A graphing calculator is required. Students are expected to have completed an equivalent of Basic Algebra II.

MATH 01130: Calculus I 4 s.h.
Prerequisite(s): Minimum C- in MATH 01122, or 60 on CLM Exam or 60 on CLM re-test, or 600 on SAT, or 27 on ACT Math.
Calculus is a subject about functions. This course deals primarily with the two most fundamental concepts in Calculus: derivatives and definite integrals. It begins with a discussion of notions of the limit and continuity of a function. Then the definition of a derivative is introduced, and techniques of computing derivatives are studied. Through applications to analysis of functions, optimizations and problems in sciences, a student can appreciate the importance of the derivative. The concept of a definite integral as a limit of approximating sums emerges naturally in the context of problems of areas. Hidden links between the two concepts are formulated in the Fundamental Theorems of Calculus, which also provide a convenient shortcut for computing definite integrals. A graphing calculator is required for this course, and so is the use of computer software, such as Mathematica. Students are expected to have completed an equivalent of (Math 01122) Pre-Calculus.

MATH 01131: Calculus II 4 s.h.
Prerequisites: C- or better in MATH 01130
This course begins with applications of integration (such as volume of a solid of revolution work, arc length, area of a surface of revolution, center of mass) and derivatives of inverse trigonometric functions. Integration by parts, partial fractions and other more advanced integration techniques are introduced, along with a discussion of numerical integration, improper integrals, indeterminate form, sequences and infinite series. A graphing calculator is required for this course, and so is the use of computer software, such as Mathematica.

MATH 01205: Technological Tools For Discovering Mathematics 2 s.h.
Prerequisites: C- or better in CS 01104 and MATH 01131 and MATH 03150
This course will use mathematics-specific technologies to help students discover mathematics and to develop a better understanding of new content. Throughout the course students will become aware of the broad range of mathematics-specific technologies available to mathematicians, become proficient in the use of these, and pursue the advantages, disadvantages, and limitations of such technologies. Students will solve problems and advance their understanding of topics in the areas of pre-calculus, calculus, geometry and statistics.

MATH 01210: Linear Algebra 3 s.h.
Prerequisites: C- or better in MATH 01131 and (MATH 03150 or MATH 03160)
This course includes: linear equations and matrices, vector spaces, linear dependence and independence, dimension and basis of a vector space, linear transformations, inner product and cross product, orthogonality, eigenvalues and eigenvectors. Use of graphing calculators is required and computers may be used at the option of the instructor.

MATH 01230: Calculus III 4 s.h.
Prerequisites: C- or better in MATH 01131
This course includes: vectors, vector functions, velocity, acceleration, partial differentiation, directional derivatives, multiple integration, and vector calculus. The student is expected to use computer software, such as Mathematica, in addition to the graphing calculator.

MATH 01231: Ordinary Differential Equations 3 s.h.
Prerequisites: C- or better in both MATH 01210 and MATH 01230
Applications of ordinary differential equations and their methods of solution form the major part of this course. It also includes the solution of nth order equations, particularly of first and higher degree linear differential equations, and series and Laplace Transform solutions. Students might be asked to use computers and/or graphics calculators as an aid in solving equations.

MATH 01310: College Geometry 4 s.h.
Prerequisites: C- or better in PHIL 09130 and MATH 01210 and MATH 01230 and MATH 03150
This geometry course will use both synthetic and analytic approaches to study advanced concepts in Euclidean geometry, to introduce non-Euclidean geometry, to explore the basics of Transformational geometry and Higher Dimensional geometry, and to trace the historical development of geometry. Computer use will be emphasized throughout the course.
MATH 01330: Introduction To Real Analysis I
Prerequisites: C- or better in MATH 01230 and MATH 03150
This course prepares students for more advanced courses in analysis as well as introducing rigorous mathematical thought processes. Topics included are sets, functions, the real number system, sequences, limits, continuity and derivatives.

MATH 01331: Introduction To Real Analysis II
Prerequisites: C- or better in MATH 01330
This course is a continuation of Introduction to Real Analysis I. The purpose is to extend student's understanding of basic analysis and the calculus. Topics included are: the mean-value theorem, existence of the Riemann integral, Riemann-Stieltjes integration, infinite series, convergence tests and Fourier series.

MATH 01332: Numerical Analysis
Prerequisites: C- or better in CS 01104 and MATH 01131 and MATH 01210
This course includes: elements of error analysis, real roots of an equation, polynomial approximation by finite difference and least square methods, interpolation, quadrature, numerical solution of ordinary differential equations, and numerical solutions of systems of linear equations. The student should expect to program a computer in addition to using a graphing calculator.

MATH 01340: Modern Algebra I
Prerequisites: C- or better in MATH 03150 and MATH 01210 and PHIL 09130
This course includes: the natural numbers, integers, rationals, and reals as mathematical systems, and the introductory theory of groups, rings, integral domains, and fields. Also included are homomorphisms and isomorphisms, subgroups, kernels, rings and ideals and polynomial rings. At the option of the instructor, computer use can be required.

MATH 01341: Modern Algebra II
Prerequisites: C- or better in MATH 01340
This course extends the study begun in Modern Algebra I to a more detailed investigation of abstract algebraic structures. Included are Sylow theorems, rings and ideals, polynomial rings, ring and field extension and Galois theory.

MATH 01352: Theory Of Numbers
Prerequisite: C- or better in both MATH 01210 and MATH 03150 or C- or better in both MATH 01210 and MATH 01160
This course includes divisibility properties of integers, theory of congruence, Diophantine Analysis, congruences of higher degree, quadratic residues and famous problems of number theory.

MATH 01354: Introduction To Topology
Prerequisites: MATH 01330
This course covers the properties of general topological spaces, separation, compactness, connectedness and the Heine-Borel and Bolzano-Weierstrass theorems.

MATH 01386: Introduction To Partial Differential Equations
Prerequisites: C- or better in MATH 01231 or MATH 01236
This course is a study of partial differential equations and their applications. Topics include the derivation of the wave equation, Laplace's equation and the heat equation, Fourier series and integrals, boundary value problems, Bessel functions and Legendre Polynomials.

MATH 01410: History Of Mathematics
Prerequisites: C- or better in two 300-level (or higher) Math major courses
This course includes a survey of the development of mathematical ideas from early times up to present day college mathematics. Emphasis is on historical mathematical problems and their solution. Readings and reports on selected topics are required.

MATH 01421: Mathematics Field Experience
Prerequisites: MATH 01131 and STAT 02360
Students accept assigned projects in a professional environment. These projects normally involve applied mathematics or statistics. Students are expected to work at least 150 hours during the semester for which they receive credit. Written reports are required.

MATH 01430: Introduction To Complex Analysis
Prerequisites: C- or better in MATH 01330
This course includes properties of complex numbers and their conjugates, functions of a complex variable, limits, continuity and derivatives for complex functions. Also included are: Integration and the Cauchy integral theorems, uniform convergence, Taylor’s and Laurent’s series and conformal mapping.

<td>This course will cover various techniques for solving linear and nonlinear partial differential equations (PDEs) arising from physical and engineering applications; this includes both analytical and numerical methods. More specifically, students will learn the method of separation of variables for solving multi-dimensional problems, Fourier/Laplace transforms for solving infinite-domain problems, numerical methods (finite-difference, finite-element, Monte-Carlo), Green's functions, method of characteristics, and inverse scattering. Basic applications include a vibrating membrane (wave equation), heat flow along a metal plate (heat equation), steady-state fluid flow (Laplace's equation), traffic flow (shock waves), and solitary waves (solitons). Students will be required to use a computer algebra system, e.g. Mathematica, to solve problems.</td>
<td></td>
</tr>
</tbody>
</table>
MATH 01520: Topics In Applied Mathematics 3 s.h.
This course provides an overview of the mathematical modeling process and includes applications to optimization, dynamical systems, and Stochastic processes. Models of specific real world systems will be developed and studied using analytical and numerical methods.

MATH 01521: Nonlinear Differential Equations 3 s.h.
This course examines analytic and computer methods for the solution of ordinary differential equations which are of interest in applications. Topics are selected from differential equations in the phase plane, geometrical and computational aspects of the phase plane, averaging methods, perturbation methods, stability, Liapunov methods, existence of periodic solutions, bifurcations and chaos. Applications are also included that are of use in science and engineering.

MATH 01522: History Of Mathematics 3 s.h.
Topics will include: Babylonian, Egyptian and Greek mathematics. Attention will be given to the development of trigonometry, algebra, analytic geometry and the calculus.

MATH 01523: Selected Topics In Mathematics 1 to 6 s.h.
This course provides students with the opportunity to explore current issues in mathematics. The course will have a changing focus that will permit faculty to offer specialized seminars focused on new developments in the field, issues of significance, areas of faculty research, or in response to students' requests. Students may take this course for credit more than once (limit: 9 s.h.), as long as the focus of the course is different each time the student enrolls.

MATH 01524: Abstract Algebra I 3 s.h.
This introduction of abstract algebra will include the construction of number systems, theory of groups, rings, integral domains and fields. Other than on recommendation of the adviser, this course should not be chosen if a corresponding similar course has been part of the student's undergraduate study.

MATH 01525: Modern Geometry 3 s.h.
This course provides an overview of the field of geometry by studying selected geometries in depth, both Euclidian and non-Euclidian. Indicative exploration and the axiomatic method, as well as synthetic and algebraic approaches to problems, are examined. Unless recommended by the adviser, this course should not be chosen if a similar course has been part of the student's undergraduate program.

MATH 01526: Point Set Topology 3 s.h.
An introduction to one of the major branches of modern mathematics covering axiomatic development of topological spaces and metric spaces, and the concepts of convergence, continuity, separation, compactness and connectedness.

MATH 01527: Abstract Algebra II 3 s.h.
The continuation of Abstract Algebra I covering advanced material from group theory, ring theory and field theory.

MATH 01528: Mathematical Modeling & Algebraic Reasoning 3 s.h.
Students in this course will learn about polynomial, rational, and exponential functions by building and analyzing mathematical models for a variety of situations. Using algebraic representations, problem solving, using technology, connecting abstract algebra with middle grades mathematics, and fluency with algebraic procedures will be stressed.

MATH 01529: Numerical Analysis 3 s.h.
This course examines the theoretical foundations of numerical methods and studies in detail existing numerical methods for solving many standard mathematical problems in analysis and algebra. Error analysis will be developed for all methods. Some recent advances in the theory of chaos and nonlinear dynamics will also be presented.

MATH 01530: Graduate Seminar In Mathematics 3 s.h.
Students will be introduced to mathematics not found in textbooks. They will learn how to read journal articles and analyze them. An emphasis will be placed on communication skills, both oral and written. Students will be required to give both oral and written analysis of their readings.

MATH 01531: Independent Study 1 to 6 s.h.
This course is designed for an individual who wishes to study a mathematical subject or topic not included in the listed offerings of the program. The student undertakes independent study under the supervision of a mathematics staff member. Registration by permission of the department chairman and the supervising department member.

</tbody>
</table>
MATH 03501: Mathematical Modeling for Biological Systems 3 s.h.
Prerequisite(s): MATH 01210 or MATH 01231 or permission of instructor
This course introduces students to modeling biological systems using ordinary differential equations. It focuses on the modeling process including the construction, analysis, and interpretation of mathematical models. It introduces new techniques for studying the solutions to these mathematical models and develops procedures for making the models more realistic.

MATH 03511: Operations Research I 3 s.h.
This course is an introduction to mathematical modeling, analysis, and solution procedures applicable to decision-making problems in deterministic environment. Methodologies covered include the simplex and interior point methods of solving linear programming models, project planning, network optimization, assignment and transportation problems, dynamic programming and game theory. Solutions will be obtained using theoretical methods and software packages.

MATH 03512: Operations Research II 3 s.h.
This course is an introduction to mathematical modeling, analysis, and solution procedures applicable to decision-making problems in an uncertain (stochastic) environment. Methodologies covered include dynamic programming, simulation, Markov chains, queuing theory, decision analysis, dynamic programming, system reliability and inventory theory. Solutions will be obtained using theoretical methods and software packages.

MATH 03525: Partial Differential Equations in Biomathematics 3 s.h.
Prerequisite(s): MATH 01231 or permission of instructor.
This course covers topics in partial differential equations as it applies to biomathematics. These include second order linear and nonlinear partial differential equations, diffusion and conservation laws, waves and pattern formation, Chemotaxis and other forms of cell and organism movement. Computer software, such as Mathematica, will be used.

MATH 03550: Topics In Discrete Mathematics 3 s.h.
This course provides an advanced approach to topics in discrete mathematics for persons with substantial backgrounds in traditional mathematics. Selected topics are explored in depth and related to concepts from other areas of mathematics. Topics normally included are logic, combinatorics, number systems, data structures and representations, Boolean algebra, induction, graphs and trees.

MATH 03600: Topics In Elementary Mathematics 3 s.h.
This course is designed to improve the understanding and attitudes of practicing elementary teachers (K-8). Specific topics to be addressed include quantitative reasoning, spatial reasoning, inductive and deductive reasoning, mathematical systems, and communication in mathematics. Students are expected to engage in some independent work.

MATH 03610: Applied Statistical Epidemiology 3 s.h.
Prerequisite: MATH 01505, MATH 01502 AND CS 01104 or equivalent or Permission of Instructor
This course introduces the basic concepts of epidemiology and focuses on analyzing epidemiological data using a statistical programming language such as R, one of the most efficient programming languages for statistical computing and graphics. This course will lay the ground work to successfully design, conduct, analyze and interpret findings from epidemiological studies using the appropriate statistical methods.

MATH 03611: Special Topics in Biomathematics 3 s.h.
This course covers in depth a wide-range of advanced topics in biomathematics inspired by applications of mathematics in biology and health sciences problems. The course will offer students the opportunity to learn modern emerging cutting edge research approaches not covered by other courses.

MATH 03612: Thesis in Biomathematics 3 s.h.
This course is a graduate Master's thesis course and will serve as capstone experience. It provides students with hands-on research experience in a topic of interest in biomathematics under the supervision of a faculty from the Department of Mathematics. Upon completion of the research project, the results will be presented to a Master's thesis committee for approval.

STAT 02100: Elementary Statistics 3 s.h.
This course gives a basic introduction to the fundamental concepts and methods of statistics. Its topics include: basic measures of central tendency and variability, graphical displays, elementary design of experiments, descriptive simple linear regression, elementary probability, the normal and t-distributions, confidence intervals and hypothesis testing. Use of a statistical calculator, graphing calculator or software package is required. Note: many majors require a different introductory statistics course; students should check their major requirements before signing up for this course.
This course examines the principles behind statistical data analysis, and introduces students to major areas of statistical data analysis needed by a practicing biomathematician. Using simulation, students will use bootstrapping to develop the mechanics of confidence intervals, use randomization to develop the mechanics of hypothesis tests, and learn the types of conclusions that can justifiably be made from a study. They will also be introduced to models of analyzing data that is categorical, numerical, and a combination of both, through the study of contingency tables, linear regression, and the analysis of variance. They will use at least one statistical software package.
STAT 02513: Applied Stochastic Processes 3 s.h.
Prerequisite(s): STAT 02360 and MATH 01210 or ECE 009435 or permission of instructor.
This course introduces the concept of a sequence of random events known as a stochastic process, as well as the mathematical methods used to model variety of types of stochastic processes and analyze their short and long-term behavior. A broad spectrum of examples from biology, health, and medicine will be included throughout the course. Topics include the basic classifications of stochastic processes, Markov chains, Poisson processes, continuous-time Markov chains, renewal processes, and branching processes. Statistical and computer algebra system software will be used when relevant.

STAT 02514: Decision Analysis 3 s.h.
Prerequisite(s): STAT 02360 or equivalent.
This course examines the basic principles for performing a decision analysis, including those needed for decision making in areas such as medicine, the environment, and public health. Topics include the components of a decision and a model of a decision, the use of probability as a model for reasoning with uncertainty, subjective probability, utility theory, Bayesian inferential methods, sensitivity analysis, Monte Carlo simulation, and multi-objective decision problems. Professional decision analysis software will be used throughout the course.

STAT 02515: Applied Multivariate Data Analysis 3 s.h.
Prerequisite(s): Graduate standing in M.S. in Data Analytics or (MATH 01131 and MATH 01210) and (STAT 02360 and STAT 02260 or STAT 02290) or permission of the instructor.
This course examines the principles behind statistical data analysis for multivariate data, and introduces the students to major areas of multivariate data analysis. Topics include multiple and logistic regression, principal component analysis, factor analysis, cluster analysis, MANOVA, multidimensional scaling, discriminant analysis and canonical correlation. The students will use at least one statistical software package.

STAT 02525: Design and Analysis of Experiments 3 s.h.
Prerequisite(s): Graduate standing in M.S. in Data Analytics or at least the 200 level, or permission of the instructor.
This is a graduate level course that investigates fundamental topics in experimentation as well as design methods. The course also introduces the analysis associated with various experiments. Examples and case studies based on real-world events will be used to illustrate course concepts. Students will be required to complete and end-to-end project that will include an experiment’s design, data collection and analysis.

ENGR 01512: Principles Of Nanotechnology 3 s.h.
Prerequisite(s): (PHYS 02200 OR PHYS 00220) AND (PHYS 02201 OR PHYS 00222) AND CHEM 06100
This course explores the science and engineering at the nanometer scales. Topics include fundamentals of nanotechnology, types and properties of nanomaterials, methods of fabrication, how these materials are characterized and the potential applications.

ENGR 10513: RENEWABLE ENERGY 3 s.h.
Renewable Energy: Photovoltaics and Energy Harvesting
This course covers concepts and technologies related to renewable energy. The emphasis will be placed upon photovoltaics and energy harvesting. Topics include energy economy, renewable energy concepts and resources, photovoltaics, semiconductors, p-n junctions, solar cells using crystal materials, thin films, and organic materials, and energy harvesting using piezoelectric and thermoelectric devices. Course topics will be reinforced by in-depth discussion on research progress in renewable energy. Students will complete a term paper with the focus on an advanced topic in renewable energy.

ME 10501: Computer Integrated Manufacturing And Automation 3 s.h.
The course covers the basic aspects of computer integrated manufacturing and automation systems. Hard and flexible automation concepts are introduced. Various automation strategies are presented. Coding and classification ideas of group technology are related to computer aided process planning. Topics of numerical control, industrial robotics, and artificial intelligence are discussed.

The topics will be announced in the course schedule.

This course presents the concepts of chemically reacting systems (flames) along with many practical applications. Topics include chemical equilibrium, chemical kinetics, premixed laminar flames, detonations, diffusion flames and environmental issues. The course uses chemically reacting flow software for combustion modeling.

In this course, the principles of rocket propulsion theory are presented along with practical applications of rocket propulsion design. Theoretical topics include performance analysis of ideal rocket engines, departure from ideal performance and detailed thermochemical propellant calculations. Practical design issues are addressed for both liquid propellant engines and solid rocket motors. The course also includes an introduction to electric propulsion.

The topics covered in this course extend and complement the Thermal-Fluid Sciences II course. While Thermal-Fluid Sciences II provides an overview and introduction to the engineering fundamentals of heat transfer, Principles of Advanced Heat Transfer will provide a deeper knowledge of heat transfer principles, and will allow more rigorous and open-ended problems to be examined. The course will include two additional topics, radiation and mass transfer. Students successfully completing this course will be able to solve a wider range of heat and mass transfer problems encountered in industry.

This course will introduce energy conversion technologies for the generation of electrical power. Topics will include a review of power cycles, steam and gas cycles, generation of thermal power, combustion and fuels, steam power plant design considerations, gas turbine power plant operation and design considerations, combined cells, and environmental considerations in power generation. A course project will be required on an advanced topic of mutual interest between the student and instructor.

This course emphasizes application of the conservation equations of mass, momentum and energy to solve problems in one-dimensional and two-dimensional compressible flow including one-dimensional isentropic flow, flow with area change, adiabatic flow with friction, normal shock waves and flow with heat addition. The method of characteristics is introduced to solve two-dimensional compressible flow problems. Numerical techniques are presented and a numerical analysis project is completed on one-dimensional, unsteady flow.

This course introduces computational fluid dynamics (CFD) using a primarily software-based approach. Following an overview of the key steps involved with CFD, the class reviews the fundamental mathematics that govern fluid dynamics. An overview of governing equation discretization techniques is presented with assignments that involve building custom algorithms to solve simplified CFD problems. CFD essentials such as consistency, stability and convergence are covered in-depth. Several modeling labs are used to build software skill and explore internal and external flows that are largely incompressible and viscous. The final weeks of this class are dedicated to a final project on a student-selected topic. The student will complete an independent laboratory exercise of project.

This course will provide students with knowledge of modern manufacturing processes, how design is optimized for manufacture, and information on future directions of manufacturing, such as additive (3D printing) manufacturing techniques and the use of digital data across the product life cycle. The course will also discuss the taxonomy of manufacturing processes and provide an examination of current state of the art manufacturing with an emphasis on trends and directions in manufacturing, the relationship of digital data to design and production, and the impact of supply chain on production decisions.

This course presents an in-depth coverage of the design of mechanisms using matrix methods as the platform to model, synthesize, analyze and simulate mechanisms. It covers advanced design techniques that include type synthesis, numerical optimization techniques as applied to mechanism design. It also covers branch defects and circuit defects that occur during mechanism synthesis and modeling and simulation of mechanical systems. Students will perform analysis and simulation using appropriate mechanism design software.

This course presents an in-depth coverage of the design of mechanisms using matrix methods as the platform to model, synthesize, analyze and simulate mechanisms. It covers advanced design techniques that include type synthesis, numerical optimization techniques as applied to mechanism design. It also covers branch defects and circuit defects that occur during mechanism synthesis and modeling and simulation of mechanical systems. Students will perform analysis and simulation using appropriate mechanism design software.

This course introduces the students to the design and development of mechatronic systems. It introduces the students to the multidisciplinary nature of mechatronic products, and teaches them to design and develop such products. Students will learn about mechatronic design philosophy, mechatronic system modeling, sensors, actuators, microprocessors and their interfaces. The course project will involve the design of a real-world mechatronic system. A final project will be required.

This course introduces students to the design of systems from the Design for X perspective. The Design for X course teaches how to deal with conflicting and ever-increasing constraints upon the design process. It teaches students to adopt a systematic design approach that addresses issues related to manufacture, assembly, environment, reliability and other factors.

Students will engage the three-tiered framework used to interrogate problems involving bodies of continuous media. This begins with derivation of the governing equations from the conservation of mass, momentum, and energy followed by the application of constitutive models, such as Hooke’s law, that govern the behavior of particular materials, and concludes with the solution of boundary value problems. In addition to the study of classical problems and their solutions, students will be required to program numerical algorithms for the solution of problems that cannot be solved in closed form. Kinetic and kinematic constraints, such as material frame indifference, compatibility, and objectivity, will be addressed. The material covered will include both cylindrical and Cartesian coordinate frames.

Students will engage the three-tiered framework used to interrogate problems involving bodies of continuous media. This begins with derivation of the governing equations from the conservation of mass, momentum, and energy followed by the application of constitutive models, such as Hooke’s law, that govern the behavior of particular materials, and concludes with the solution of boundary value problems. In addition to the study of classical problems and their solutions, students will be required to program numerical algorithms for the solution of problems that cannot be solved in closed form. Kinetic and kinematic constraints, such as material frame indifference, compatibility, and objectivity, will be addressed. The material covered will include both cylindrical and Cartesian coordinate frames.

The control of noise is an important part of engineering practice in many industries today. Vital to effective noise control is an understanding of wave behavior in structures. This course will teach engineers the fundamentals of the generation of noise in structures, with an emphasis on the phenomena of mechanical resonance and modal behavior. Topics covered include vibration of strings, bars, beams and plates. An introduction to simple acoustic sources will be given.

This course is an advanced introduction to three-dimensional motion of particles and rigid bodies. Students study modern analytical rigid body dynamics equation formulation and computational solution techniques applied to mechanical systems and multibody systems. Students will formulate Newton/Euler and Lagrangian equations for applications to engineering systems, Hamiltonians principle, study kinematics of motion generalized coordinates and speeds, analytical and computational determination of inertia properties, generalized forces, holonomic and nonholonomic constraints, computational simulation.

Many important structures (e.g. buildings, bridges, aircraft frames) have buckling as a primary mode of failure. Because of this, it is important for structural engineers to have at least a cursory knowledge of elastic stability phenomena. This course will provide graduate-level Mechanical Engineering students with an overview of elastic stability in structures, and a brief introduction to dynamic stability, as applied to rotating shafts. Applications of mathematical theory to real-world structural design problems will be emphasized.
Course Descriptions

ME 10570: Principles In Biomechanics 3 s.h.
This course presents topics in the biomechanics of human motion. The course will encompass the use of engineering principles to describe, analyze and assess human movement. Topics will include kinematics, kinetics, anthropometry applied to the synthesis of human movement and muscle mechanics. A course project and laboratory project will enhance this course.

ME 10571: Principles In Biotransport 3 s.h.
Prerequisites: ENGR 01341 or ME 10321
This course introduces biotransport in terms of heat transfer, mass transfer, and fluid mechanics related to the human body. Some examples include cryosurgery of warts and drug delivery from skin patches. Beginning with biotransport problem formulation, the course explores software tools that enable mathematical modeling. Fundamental principles of model validation, mesh convergence, sensitivity analysis, and objective functions are presented. Several modeling labs are used to build software skill and explore various heat and mass transfer processes inside and around the human body. Medical device development concepts are presented, making a connection between modeling activities and product development. The final weeks of this class are dedicated to a final project on a student-selected topic. The student will complete an independent laboratory exercise or project.

ME 10572: Principles In Biomaterials 3 s.h.
Prerequisites: ENGR 01281 or ENGR 01283
The goal of this course is to introduce the numerous issues that factor into material selection for biomedical devices. Issues to be examined include mechanical properties, biocompatibility, production costs, and ease of manufacture. This course will familiarize students with relevant material issues and highlight the process for matching material performance with the desired design characteristics and functionality.

ME 10576: Principles In Orthopaedic Biomechanics 3 s.h.
Prerequisite: ENGR 01272 or ENGR 01273
This course presents both introductory and emerging areas of orthopaedic biomechanics. The course will encompass the use of engineering principles to describe, analyze and assess the musculoskeletal system. Topics will include bone and soft tissue mechanics, implant systems, fracture fixation, joint replacements and reviews of current research.

MED 01627: Scholars Workshop IV 1 s.h.

MED 01628: Ambulatory Clerkship IV 1 s.h.

MHP 00610: Basic Laboratory Techniques-Biology 3 s.h.
Prerequisite: MBS 00501 and MBS 00502; or equivalent, with course director's permission.
This course will teach students the most basic techniques used in a modern biomedical laboratory, to prepare them to integrate these techniques into more advanced processes they will use later. *This course is only open to students in the Masters in Histopathology program.*

MHP 00611: Histology I: Basic Tissue Types 3 s.h.
Prerequisite: MBS 00501 and MBS 00502; or equivalent, with course director's permission.
This course introduces students to the basic tissue types, as well as some of the common stains used to differentiate elements of tissue. In addition, students will learn to use a microscope and analyze photomicrographs critically. *This course is only open to students in the Masters in Histopathology program.*

MHP 00612: Histology II: Techniques 4 s.h.
Prerequisite: MHP 00511 and MHP 00512 and MHP 00514 and MHP 00611
This advanced animal techniques course will reinforce what students learned about basic mouse colony management and teach students advanced preclinical research techniques. This course is lab intensive. Students will receive one-on-one instruction for each of the indicated skills listed in the syllabus. This format will allow students to develop advanced animal research skills, which is valuable for job placement upon graduation. *This course is only open to students in the Masters in Histopathology program.*

MHP 00613: Histology III: Organ Systems 3 s.h.
Prerequisites: MHP 00511 and MHP 00503; or equivalent, with course director's permission.
In this course, students will apply their knowledge of tissue types to develop an understanding of organ structure and function. This will include information specific to commonly used animal models (e.g. rats, mice, rabbits). *This course is only open to students in the Masters in Histopathology program.*
MHP 00614: Basic Animal Techniques
Prerequisites: MHP 00511 and MHP 00512 and MHP 00514.
This basic animal techniques course will teach students mouse colony management and preclinical research techniques. This course is lab intensive. Students will receive one-on-one instruction for each of the indicated skills listed in the syllabus. This format will allow students to develop basic skills in managing a mouse colony and processing of tissues, which is valuable for job replacement upon graduation. *This course is only open to students in the Masters in Histopathology program.*

MHP 00615: Advanced Animal Techniques
Prerequisites: MHP 00511 and MHP 00512 and MHP 00611
This advanced animal techniques course will reinforce what students learned about basic mouse colony management and teach students advanced preclinical research techniques. This course is lab intensive. Students will receive one-on-one instruction for each of the indicated skills listed in the syllabus. This format will allow students to develop advanced animal research skills, which is valuable for job placement upon graduation. *This course is only open to students in the Masters in Histopathology program.

MHP 00616: Topics in Pathology
Prerequisite: MBS 00609 Co-requisite: MHP 00513
This course will provide students in the Masters in Histopathology program exposure to the pathology of major organ systems. This course is only open to students in the Masters in Histopathology program.

MUS 04514: Choral Procedures
2 s.h.
Designed as a laboratory course for choral directors in the organization of rehearsal techniques, selection and placing of voices and development of programs. Special attention is given to individual vocal needs.

MUS 04536: Chamber Music I
1 s.h.
The study and performance of selected repertoire for specific instrumental groups and combinations. Students will be assigned to a small ensemble and will be required to rehearse and to perform the chosen repertoire in a public setting.

MUS 04537: Chamber Music II
1 s.h.
The study and performance of selected repertoire for specific instrumental groups and combinations. Students will be assigned to a small ensemble and will be required to rehearse and to perform the chosen repertoire in a public setting.

MUS 04540: Jazz Arranging And Composition
3 s.h.
The course presents techniques in arranging and composition in the jazz idiom and is tied to the course CD Project in that it coordinates the needs of the second course through preparation in Jazz Arranging and Composition. Students will be required to arrange and orchestrate existing compositions and compose original music in the jazz idiom.

MUS 04541: Jazz Piano
1 s.h.
This course in applied music for the non-pianist focuses on the basic keyboard skills needed by the professional jazz musician, especially the use of the piano to realize harmonic progressions and concepts. The student must have passed the piano proficiency exam before enrolling for this course.

MUS 04545: Opera Role Study I
3 s.h.
A complete opera role from the standard repertoire will be learned and performed in each semester through private instruction and coaching, either in staged or unstaged, in public.

MUS 04546: Opera Role Study II
3 s.h.
A complete opera role from the standard repertoire will be learned and performed in each semester through private instruction and coaching, either in staged or unstaged, in public.

MUS 04551: Piano Accompanying I
1 s.h.
This course in applied piano accompanying will pair the student with a vocal or instrumental student under the supervision of the piano instructor.

MUS 04555: Counterpoint
3 s.h.
The principles of counterpoint and its practical application in musical literature are studied.

</table>
MUS 10501: Graduate Secondary Applied Instrument I 2 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10502: Graduate Secondary Applied Instrument II 2 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10503: Graduate Secondary Applied Instrument III 2 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10504: Graduate Secondary Applied Instrument IV 2 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10505: Graduate Secondary Applied Voice I 2 s.h.
Private instruction in techniques of singing. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10506: Graduate Secondary Applied Voice II 2 s.h.
Private instruction in techniques of singing. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10507: Graduate Secondary Applied Voice III 2 s.h.
Private instruction in techniques of singing. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10508: Graduate Secondary Applied Voice IV 2 s.h.
Private instruction in techniques of singing. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10509: Graduate Applied Instrument I 4 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest performer as a performer.

MUS 10510: Graduate Applied Instrument II 4 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10511: Graduate Applied Instrument III 4 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10512: Graduate Applied Instrument IV 4 s.h.
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10513: Graduate Applied Voice I 4 s.h.
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10514: Graduate Applied Voice II 4 s.h.
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.
MUS 10515: Graduate Applied Voice III
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10516: Graduate Applied Voice IV
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10517: Graduate Applied Instrument I
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10518: Graduate Applied Instrument II
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10519: Graduate Applied Instrument III
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10520: Graduate Applied Instrument IV
Private instruction on a student’s major instrument. Designed to guide the development of each student toward the realization of his fullest potential as a performer.

MUS 10521: Graduate Applied Voice I
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10522: Graduate Applied Voice II
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10523: Graduate Applied Voice III
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10524: GRADUATE APPLIED VOICE IV
The continuation, on an advanced level, of the intensive study of vocal technique and performance begun in the undergraduate level. Successful completion requires the preparation and performance of a graduate recital of sufficiently high quality to provide access to professional auditions, doctoral programs and teaching positions in higher education.

MUS 10525: Graduate Music Composition I
The student develops his undergraduate compositional skills, completing a major work for chamber ensemble which demonstrates an ability to use contemporary compositional ideas in the organization of music.

MUS 10526: Graduate Music Composition II
This course prepares the student to complete his/her major requirement in music composition: a thesis consisting of a major compositional work and a paper describing its genesis. May be re-taken.

MUS 10527: Graduate Music Composition I
The student develops his undergraduate composition skills, completing a major work for chamber ensemble which demonstrates an ability to use contemporary compositional ideas in the organization of music.
Course Descriptions

MUS 10528: Graduate Music Composition II 6 s.h.
This course prepares the student to complete his/her major requirement in music composition: a thesis consisting of a major compositional work and a paper describing its genesis. May be re-taken.

MUS 10529: Graduate Conducting I 4 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential.

MUS 10530: Graduate Conducting II 4 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential.

MUS 10531: Graduate Conducting III 4 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential. During semester III of the conducting sequence, the student is expected to serve as Assistant Conductor of an appropriate ensemble at the discretion of the conducting faculty.

MUS 10532: Graduate Conducting IV 4 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential. During semester IV of the conducting sequence, the student is expected to serve as Assistant Conductor of an appropriate ensemble at the discretion of the conducting faculty. In addition, as a culminating activity, the student will present a full-length conducting recital.

MUS 10533: Graduate Conducting I 6 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential.

MUS 10534: Graduate Conducting II 6 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential.

MUS 10535: Graduate Conducting III 6 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential. During semester III of the conducting sequence, the student is expected to serve as Assistant Conductor of an appropriate ensemble at the discretion of the conducting faculty.

MUS 10536: Graduate Conducting IV 6 s.h.
Private instructing in conducting. This course in the conducting sequence, is designed to guide the development of conductors to a full realization of their technical and musical potential. During semester IV of the conducting sequence, the student is expected to serve as Assistant Conductor of an appropriate ensemble at the discretion of the conducting faculty. In addition, as a culminating activity, the student will present a full-length conducting recital.

MUS 10537: Graduate Ensemble: Concert Choir 1 s.h.

MUS 10538: Graduate Ensemble: Concert Choir 1 s.h.

MUS 10539: Graduate Ensemble: Concert Choir 1 s.h.

MUS 10540: Graduate Ensemble: Concert Choir 1 s.h.

MUS 10541: Graduate Ensemble: Jazz Band 1 s.h.

MUS 10542: Graduate Ensemble: Jazz Band 1 s.h.

MUS 10543: Graduate Ensemble: Jazz Band 1 s.h.

This course provides an in-depth view of the major technological disruptions and the ensuring business opportunities that have shaped the music industry, from wax cylinder to vinyl record, cassette, CD, MP3, and Internet streaming services, with a particular focus on how the digital age has utterly transformed the music industry. Comprehensive research and analysis of current and cutting-edge music business models and marketing strategies complete this course curriculum.

MUS 97400: Voice Class
A study of the basic principles of singing taught in a group setting. Students will learn beginners breathing technique, tone placement and projection through the singing of group and solo repertoire. Course is open to non-music majors.

MUS 97401: Bassoon Class
This course teaches the fundamentals of the bassoon.

MUSG 05547: Music And The Related Arts
The aesthetics of music is approached from the point of view that the same forces motivate all the arts and that significant parallels exist among them. This course may not be offered annually.

MUSG 06303: Choral Literature
A chronological study and analysis of small and large choral works from the early chant to the present is stressed through recordings, live performances and class participation. Conducting of choral work is a major activity of this course.

MUSG 06503: Jazz History
This course presents an overview of jazz history and requires the student to prepare in-depth studies of any three topics related to the history of jazz, chosen in consultation with the professor. Students must exhibit their mastery of these areas by written and oral assignments.

MUSG 06505: History And Literature Of Guitar And Lute
This course provides in-depth study of the literature of the family of plucked instruments, especially the guitar and lute, from the Renaissance to the present day.

MUSG 06506: Art Song Literature
The in-depth study of the evolution and development of the art song as a genre, its development, structure, styles and composers from the 17th century to the present. Aural familiarity and stylistic recognition will be emphasized, as will the association of song composers with their works and periods.

MUSG 06509: String Instrument Literature
This course explores the literature written for stringed instruments from both stylistic and technical points. Students will study and analyze the most important solo works for the bowed string instruments and will be expected to identify aurally these works and to provide written analyses of several. It is a required course for string students in the master of music program and is available also as an elective.

MUSG 06510: Keyboard Literature
This course presents a broad overview of the massive literature for the keyboard from Baroque through the end of the 20th century. Students learn to listen, to analyze, and to identify the stylistic characteristics of the great composers for the piano. They will, within the course of the semester, choose several composers whose works are of particular interest to them, thoroughly catalogue their literature and analyze in depth several compositions by each. The results of this work will be presented in oral and written form.

MUSG 06511: Twentieth Century Band Literature
This course will survey all levels of band repertoire, from elementary through high school, and standard college and professional band works. Students will have a knowledge of where to find musical selections for any scenario, from teaching works to standard competition pieces and public performance selections.
MUSG 06542: Opera Literature 3 s.h.
An historical survey of opera, its development and composers, from 1600 to the present. The course will emphasize the most important operas, their plots, forms and main musical numbers.

MUSG 06545: Development And Interpretation Of Choral Literature 2 s.h.
Studies choral music from Gregorian chant to contemporary works. Representative works of various types studied in detail. These are drawn from various categories such as motet, madrigal, polyphonic chanson, cantata and oratorio. This course may not be offered annually.

MUSG 06546: Development And Interpretation Of Symphonic Literature 3 s.h.
The evolution of instruments, the standardization of the orchestra in the classic period, the introduction of new instruments and the growth of the orchestra are studied. The principal orchestral forms such as the symphony and the concerto are studied and various types of orchestration are examined. This course may not be offered annually.

MUSG 06555: SEL TOPICS-MUSIC ED 3 s.h.

SMED 01120: Foundations Of Music Education 3 s.h.
Foundations of Music Education is an introductory course in the music education program. It provides a broad overview of the field of music education, addressing the historical development of music education in the United States as well as current approaches and issues in the field. The course is framed by three guiding questions: What is the purpose of music education?; How can students best explore music?; and How can teachers best create music learning experiences for their students? In addition, two projects that extend throughout the music education major are introduced: a personal philosophy of music education, and a digital portfolio.

SMED 32329: Teaching/Learning Music A: Elementary General Music 3 s.h.
Prerequisites: C- or better in MUS 04130, MUS 04131, MUS 04132, MUS 04133, MUS 04240, MUS 04241, MUS 04242, MUS 04243, EDUC 01284, READ 30319 and SMED 33420
The methods, materials and techniques of teaching music from K through 12 are surveyed. Attention is given to the developmental sequence in the building of musical concepts necessary for the organization of an effective general music program in the public schools.

SMED 32330: Teaching/Learning Music B: Vocal Methods And Techniques 3 s.h.
This course, along with other courses in a series, helps to prepare students to teach the choral arts in the public schools with particular attention to grades 7-12. Techniques of teaching, vocal training, choral organization and the philosophy of teaching choral music are the areas to be emphasized.

SMED 32331: Teaching/Learning Music B: Instrumental Methods And Techniques 3 s.h.
A survey is made of the necessary understanding, techniques, and materials to develop an effective instrumental music program. Consideration is given to the place of instrumental music and its relationship to the total school program.

SMED 32502: Teaching Of Music Theory 3 s.h.
Methods of teaching theory such as listening, reading, writing, analyzing, playing and creating are examined. The content of music theory courses and representative music theory texts are analyzed and evaluated. This course may not be offered annually.

SMED 32505: Selected Approaches In Music Education 3 s.h.
The approaches are those of: Gordon, Kodaly, Orff, Montessori, Suzuki, and Jacques-Dalcroze. The student will research each approach, and while doing an in-depth study on one approach, develop a curriculum for his or her teaching situation. This course is offered bi-annually.

SMED 32506: Guitar Pedagogy 3 s.h.
The student will be made aware of the philosophies of guitar instruction, be familiar with the two or three most widely-used method books and will have begun to develop his/her own pedagogical system. A practicum experience is included in the course.

SMED 32507: Piano Pedagogy 3 s.h.
The course will systematically present the pedagogical methods and materials readily found in the United States for teaching beginning, intermediate and early advanced students of the piano. A supervised practicum is an essential part of the course.
AHI 05501: Integrated Information Technology In Health Care 3 s.h.
Prerequisite: BSN, BS or BA (in health care related field) and evidence of successful completion of an undergraduate computer course that contained content in healthcare informatics.

The delivery of efficient health care requires the integration of information technology. This course builds on basic informatics knowledge and challenges the learner to apply these principles to the health care setting. The student will consider emerging technology and creatively investigate ways to improve patient care.

NURS 03303: Comprehensive Health Assessment 3 s.h.
This course builds upon the Registered Nurse’s fundamental knowledge and skills of health assessment. In utilizing a systematic approach, the student will develop a holistic approach in assessing the patient throughout the lifespan. Upon completion, the student will show competency in obtaining a thorough health history and becoming efficient in the physical skills of inspection, palpation, percussion and auscultation. Differences between normal and abnormal findings will be explored and appropriate documentation of findings will be stressed. Students will also be exposed to the cultural differences in health and will incorporate evidence based approaches to assessment.

NURS 03304: Nursing Informatics 3 s.h.
This course reviews the information needs and information systems related to nursing practice. Students will experience the manner in which informatics supports all areas of practice, including education, clinical practice, administration and research.

NURS 03309: Topics In Health Care Ethics 3 s.h.
Students in this nursing course will examine moral dilemmas created or intensified by recent advances in medical technology and study ways of analyzing those dilemmas. Discussion topics include: euthanasia and the right to die, abortion, behavior modification, allocation of scarce medical resources, in vitro fertilization, genetic screening and engineering and human experimentation. These moral dilemmas will be related to nursing.

NURS 03401: Community Health Nursing 6 s.h.
Prerequisite: NURS 03303
This course will explore how community health nurses use concepts from nursing and public health to provide comprehensive, continuous, preventative healthcare thereby promoting health for communities, populations at risk, aggregates, families, and individuals. This course prepares the RN to BSN student to develop competencies in managing health status in the context of multicultural communities. Students will be able to expand current knowledge and skills, develop enhanced research and critically thinking skills with the application of these skills to the multicultural community and the global society considering the biopsychosocial, cultural, ethical, legal, and economic issues that impact the community as a client. The clinical practicum focuses on clients with diverse needs in a variety of settings.

NURS 03403: Nursing Care Delivery Systems 4 s.h.
Prerequisite: NURS 03303
The focus of this course is the professional nurse’s leadership and management role within health care delivery systems. The multi-faceted aspects of the role of the nurse as leader and manager are explored in depth, with emphasis on the role of the nurse as change agent. Organizational behavior, decision-making, the change process and the management of health care organizations are components of this course. The concepts of professionalism, leadership-management, research and teaching-learning are integrated with the professional nurse’s role. This course prepares students to function as change agents in the health care delivery system. The clinical component focuses on the application of relevant theory and research as a basis for decision-making. Students are mentored by faculty, and interact with members of the nursing leadership team to explore Nursing leadership.

NURS 03404: Research Applications In Nursing Practice - Wi 3 s.h.
Prerequisites: STAT 02100 and COMP 01112
This course introduces students to the concepts and process of research in nursing. Emphasis is placed on writing and critiquing published studies and developing plans for using research findings in practice.

NURS 03405: Health Care Policy And Finance 3 s.h.
The focus of this course is the professional nurse’s role in health care policy and finances within health care systems. The multi-faceted aspects of health care policy making and financing within today’s ever-changing health care environment are explored. Risk management and quality care are integrated into the course. This course gives the student a financial understanding of the health care delivery system. Students are exposed to the political and legislative process within health care agencies and health care policy development at the state and federal levels. Ethical and legal issues in nursing and health care are explored.
Course Descriptions

NURS 03503: Nursing Research 4 s.h.
Prerequisites: STAT 02100 or the equivalent and enrollment in the UMDNJ/Rowan Joint R.N. to B.S.N. Program and NURS 03404
Students focus on the theoretical and scientific underpinnings for evidence-based advanced nursing practice. In-depth critical analysis of scientific research and methods for systemic review, as relevant to patient care and health policy outcomes, are emphasized. Ethical, legal, economic, and cultural issues surrounding the conduct and utilization of research practice are examined. Students obtain skills in using bibliographic databases. The roles of the advanced practice nurse in research are explored.

NURS 05501: Advanced Health Assessment 3 s.h.
Prerequisites: Licensed as a Registered Nurse (R.N.) AND BSN OR BA (If student has BA then NURS03303 AND NURS 03404 AND NURS 03405)
Advanced Health Assessment prepares the graduate nurse to identify abnormal findings and critically analyze these findings. Critical analysis will result in problem identification and planning. This course will serve as a core requirement for completion of a graduate nursing degree.

NURS 05502: Teaching and Learning in Nursing 3 s.h.
Successful Completion of Core MSN courses with a minimum GPA of 3.0
This course begins preparation for the professional nurse to investigate teaching and learning in the nursing field. This initial course lays the foundation for more advanced testing and curricular development courses. Key concepts for investigation include evidence based teaching, learning theories, nursing education theories, technological advances in nursing education and clinical competency.

NURS 05503: Advanced Nursing Research 4 s.h.
Prerequisite(s): STAT 02100 or equivalent; enrollment in Rowan Nursing Program
Students focus on the theoretical and scientific underpinnings for evidence-based advanced nursing practice. In-depth critical analysis of scientific research and methods for systemic review, as relevant to patient care and health policy outcomes, are emphasized. Ethical, legal, economic, and cultural issues surrounding the conduct and utilization of research practice are examined. Students utilize skills in searching bibliographic databases. The roles of the master's prepared nurse in research are explored.

NURS 05504: Advanced Pathophysiology 3 s.h.
Prerequisite: Licensed as a Registered Nurse and NURS 03303
This course describes the disordered physiology and clinical consequences resulting from common disease processes. Seminar discussions focus on alterations in normal functions of major organ systems. Through problem-solving exercises and case studies, students are encouraged to recognize the pathophysiological basis of clinical findings associated with disease processes. This course serves as an essential link between the basic sciences and clinical management.
NURS 05505: Advanced Pharmacology 3 s.h.
Prerequisite: Licensure as a registered nurse and NURS 03303 and NURS 05504
This course expands students’ knowledge of clinical pharmacology to provide a sound basis from which to engage in prescriptive drug management. Pharmacodynamics, pharmacokinetics and pharmaco-therapeutics of drug classes are explored through a variety of teaching-learning methodologies, including seminar discussion, problem-based case study presentations, focused readings, and web-based exercises.

NURS 05506: Learning Assessment in the Classroom and Clinical Environment 3 s.h.
Successful Completion of Core MSN courses with a minimum GPA of 3.0
Nurse educators use a variety of strategies to evaluate student learning in a variety of settings. This course prepares the nurse educator to use assessment and evaluation strategies effectively in relationship to all domains of learning.

NURS 05507: Leadership & Care Delivery Environment 3 s.h.
Prerequisites: Licensed as a Registered Nurse (R.N.) AND BSN OR BA (if BA then NURS 03303 AND NURS 03404 AND NURS 03405)
This course is focuses on the analysis, integration and application of principles of leadership and management to health care organizations and to population-based efforts across the health care delivery system. The concepts of leadership and stewardship are explored from a historical and contemporary perspective with particular application to the health professions. The course fosters self-awareness as a necessary condition for effective self-management and self-development, and a prerequisite for leading others. Special emphasis is placed on the practical skills needed for nurses to succeed as leaders and managers in today’s local, state, national and international health care environment.

NURS 05508: Special Issues & Trends In Nursing 3 s.h.
Prerequisites: Licensed as a Registered Nurse (R.N.) AND BSN OR BA (if BA then NURS 03303 AND NURS 03404 AND NURS 03405)
This course focuses on current trends and issues in professional nursing and health care delivery. The course is individually tailored to meet each student’s educational goals and area of special interest in nursing and healthcare delivery in the twenty-first century. The topic will vary dependent on the student’s interests, goals and objectives as discussed with faculty. Students under the direction of an instructor complete individually designed projects addressing major trends and issues in their emphasis area of nursing and health care delivery.

NURS 05509: Clinical Nurse Leader Role 3 s.h.
Prerequisites: Minimum GPA of 3.0: NURS 03504 AND NURS 03505 AND NURS 03503 AND NURS 05501 AND DAH 05501 AND NURS 05507 AND NURS 05508 AND LICENSED AS A REGISTERED NURSE (R.N.) AND BSN
This course immerses the student in the role of the Clinical Nurse Leader. The Clinical Nurse Leader (CNL) is a master’s prepared nurse who delivers expertise in care as a generalist. The CNL manages care for patients, individuals, families, and communities. The CNL functions as a provider and manager for care at the point of system entry and strives to produce quality based outcomes. This course discusses the role of the clinical nurse leader as leader, outcomes manager and care environment manager. The graduate student, through participatory learning, will master the key concepts that are imperative to the successful transition into the CNL role.

NURS 05510: Evidence Based Practice In Illness/Disease Management 3 s.h.
Prerequisites: Minimum GPA of 3.0: NURS 05504 AND NURS 03505 AND NURS 03503 AND NURS 05501 AND DAH 05501 AND NURS 05507 AND NURS 05508 AND LICENSED AS A REGISTERED NURSE (R.N.) AND BSN
Evidence based practice in illness and disease management is a requirement for quality care delivery. This course serves as one of the mandatory courses in the clinical nurse leader track. This course discusses care management, client outcomes, application of assessment, pharmacology, and pathophysiology to specific disease states, and evidence-based practice.
### NURS 05511: Clinical Nurse Leader Practicum I
**Prerequisites:** NURS 05509 AND NURS 05510
This course prepares the graduate nursing student for the full clinical implementation of the Clinical Nurse Leader role. Concepts of care environment management are discussed and explored in the clinical setting. Through and interwoven marriage of didactic and clinical experience, the registered nurse will begin to experience the role of the Clinical Nurse Leader. 200 Clinical Hours Required

### NURS 05512: Clinical Nurse Leader Practicum II
**Prerequisite:** NURS 05511
The Clinical Nurse Leader (CNL) is a master’s prepared nurse who delivers expertise in care as a generalist. The CNL manages care for patients, individuals, families, and communities. The CNL functions as a provider and manager for care at the point of system entry and strives to produce quality based outcomes. This course prepares the graduate nursing student for the full clinical implementation of the Clinical Nurse Leader role. Through an interwoven marriage of didactic and clinical experience, the registered nurse will experience the role of the Clinical Nurse Leader. 200 Clinical Hours Required

### NURS 05513: Nursing Curricular Design and Evaluation
**Prerequisite(s):** Successful completion of CORE MSN courses with minimum GPA of 3.0, NURS 05502, NURS 05506
Nurse educators are responsible to develop curricular plans that reflect contemporary health care trends. Curricular plans should hinge upon realistic program outcomes that prepare graduates to function effectively in the health care environment. This course explores curricular design, program outcomes, and robust changes in response to curricular evaluation.

### NURS 05514: Nurse Educator: Leadership, Quality, and Planned Change in the Practice Environment I
**Prerequisite(s):** NURS 05502 and NURS 05506
The nurse educator must be aware of the political, institutional, social and economic factors that impact the role. This course introduces the nurse educator student to concepts of competence, self-assessment, quality improvement and scholarship within the educational environment. Nursing theory and nursing research are presented as a focus for clinical practice implications. The student is provided the opportunity to analyze nurse education and identify an area of practice interest by exploring various roles, such as nurse education at bedside, nurse educator in technical setting, and nurse educator in academia. 100 clinical hours required

### NURS 05515: Nurse Educator: Leadership, Quality, and Planned Change in the Practice Environment II
**Prerequisite(s):** NURS 05514
This course serves as the final comprehensive nurse educator course. All course activities are based upon the eight competencies of a nurse educator defined by the National League of Nursing (NLN) and supported by the American Association of the College of Nursing (AACN). Through ongoing faculty tutelage the graduate student completes eight competency projects. In addition, clinical submersion in the role of nurse educator occurs in a precepted environment. 200 clinical hours required

### NURS 05516: Epidemiology Health Promotion & Disease Management
**Prerequisite:** Completion of the core MSN course with a GPA of 3.0 or higher and admission into a Nurse Practitioner specialization
This course introduces the graduate nursing student to the concepts of epidemiology and population based medicine. Theories of wellness, health promotion and global opportunities for healthy living are presented. Through synthesis of these concepts the advanced practice nursing student will develop a theory of practice that incorporates health promotion throughout the lifespan. This course examines the relation of human groups to their environments as mediated by culture.
Course Descriptions

NURS 05517: Nurse Practitioner Role: History, Practice Regulations, Reimbursement and Ethics 2 s.h.
Prerequisite: Completion of the core MSN course with a GPA of 3.0 or higher and admission into a Nurse Practitioner specialization
This course will investigate the role of the nurse practitioner from a historical perspective with implications to current practice requirements. The nurse practitioner student will investigate the history of their specialty nurse practice, the regulations that apply to their specialty nurse practice, their role as a leader and advocate. A synthesis of this information that incorporates evidence based practice initiatives will occur. Special emphasis on ethical and cultural diversity and considerations about age variations, cultural variations, religious variations, health promotion and diversity across the lifespan will assist nurse practitioner students in developing their practice own practice philosophy.

NURS 05518: AGACNP: Assessment, Diagnosis, & Differential Disease Management 1 s.h.
Prerequisite: Completion of the core MSN courses with a GPA of 3.0 or higher and admission in the Adult-Gerontology Acute Care Nurse Practitioner specialization
This course challenges the nurse practitioner student to apply previously obtained advanced assessment techniques to technologically derived data to differentiate conditions in acutely ill patients. Interpretation of relevant data, radiographs, and electrocardiographs will be presented. Condition treatment plans will be discussed in relation to available acute care settings. Laboratory practice will occur and include procedures commonly encountered in the acute setting.
The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.
25 clinical hours

NURS 05519: AGACNP I: Evidence Based Clinical Care for Adult Gerontological Acute Care Nurse Practitioner 3 s.h.
Prerequisite(s): NURS 05518
This course introduces the AGACNP student to key concepts in the management of acutely ill individuals across the adult lifespan. All information is presented via case study format. The graduate student will apply evidence based practice, and diagnostic reasoning when developing the treatment plan. The need to organize advanced assessment, diagnostic interventions, and caring practices will be illuminated. Disease specific conditions are presented with a focus on pathophysiology and advanced therapeutics. This is the first of three clinical practice courses. Successful course completion is defined as success in both the didactic and clinical portions of the course.
The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

NURS 05520: AGACNP II: Evidence Based Clinical Care for Adult Gerontological Acute Care Nurse Practitioner 4 s.h.
Prerequisite(s): NURS 05519
This course investigates medical conditions encountered by the acutely ill adult across the lifespan. Special consideration is given to medically challenging cases and mental health disorders. The AGACNP student will analyze data and develop evidence based treatment plans. The challenges to perform in a collaborative environment and partner with patients, families and communities will be discussed. Topics for future nurse practitioner researcher will be discussed. The student will be submersed in clinical practice with an experienced preceptor.
The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

NURS 05521: AGACNP III: Evidence Based Clinical Care for Adult Gerontological Acute Care Nurse Practitioner 4 s.h.
Prerequisite(s): NURS 05520
This course investigates medical conditions encountered by the acutely ill adult across the lifespan. Special consideration is given to medically challenging cases and mental health disorders. The AGACNP student will analyze data and develop evidence based treatment plans. The challenges to perform in a collaborative environment and partner with patients, families and communities will be discussed. Topics for future nurse practitioner researcher will be discussed. The student will be submersed in clinical practice with an experienced preceptor.
NURS 05521: AGACNP III: Evidence Based Clinical Care for Adult Gerontological Acute Care Nurse Practitioner

Prerequisite(s): NURS 05520

This course investigates surgical conditions encountered by the acutely ill adult across the lifespan. Special consideration is given to challenging cases and traumatic injuries. The AGACNP student will analyze data and develop evidence based treatment plans. The ethical dilemmas presented by acute injury and advanced age will be discussed. Reimbursement and quality improvement initiatives will be presented. Topics for future nurse practitioner researcher will be discussed. The student will be submersed in clinical practice with an experienced preceptor. The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

NURS 05522: Family Nurse Practitioner I: Primary Care of the Adult Patient and Older Adult Patient

Prerequisite(s): Completion of the core MSN courses with a GPA of 3.0 or higher and admission into the Family Nurse Practitioner specialization

This course focuses on the role of the APN in the primary care of the adult and older adult. Utilizing lectures, assigned readings, and case studies the advanced practice student will incorporate advance assessment skill to formulate differential diagnoses of a variety of acute and chronic conditions that inflict the adult and older adult client. Conditions discussed in this course focuses on the Skin, Head, Eyes, Ears, Nose and Throat, Heart and Lungs. Clinical judgment skills will be developed to select proper pharmacological and non-pharmacological therapies of management. Concentration of the aspects of health promotion and disease prevention will be highlighted. Clinical portion will emphasize didactic components of the course and apply them to episodic and chronic problems of the adult and older adult.

100 clinical hours

NURS 05523: Family Nurse Practitioner II: Primary Care Management of the Adult Patient and Older Adult Patient

Prerequisite: NURS 05522

This course focuses on the role of the APN in the primary care of the adult and older adult. Utilizing lectures, assigned readings, and case studies the advanced practice student will incorporate advance assessment skills to formulate differential diagnoses of variety of acute and chronic conditions that inflict the adult and older adult client. Conditions discussed in this course will address the gastrointestinal, hepatobiliary, neurology, renal and urinary, and reproductive systems. Issues of Mental Health such as anxiety, depression, bipolar, eating and substance abuse will also be brought into focus. Clinical judgment skills will be developed to select proper pharmacological and non-pharmacological therapies in the management of these conditions. Concentration of the aspects of health promotion and disease prevention will be highlighted. Clinical portion will emphasize didactic components of the course and apply them to episodic and chronic problems of the adult and older adult.

333
NURS 05524: Family Nurse Practitioner III: Primary Care Management of the Female Patient 4 s.h.
Prerequisite: NURS 05523
The course builds upon the current knowledge from primary care management of the adult and older adult I and II and extending its focus to the issue of women's health issues. Using lecture, assigned readings and case studies, the didactic component of this course will focus on episodic and chronic disease facing women from diverse populations from menarche throughout the postmenopausal stage. Care management concepts of the pregnant client will also be introduced. Course content will also reflect prescribing practices in relation to the pharmacodynamics and pharmacokinetics that can affect pregnant and lactating women. Clinical hours will reinforce the didactic element of the class incorporating skills of assessment, differential diagnosis, and evidence base practice to provide optimal obstetrical and gynecological care of the female client.

NURS 05524: Family Nurse Practitioner III: Primary Care Management of the Female Patient 4 s.h.
Prerequisite: NURS 05523
The course builds upon the current knowledge from primary care management of the adult and older adult I and II and extending its focus to the issue of women's health issues. Using lecture, assigned readings and case studies, the didactic component of this course will focus on episodic and chronic disease facing women from diverse populations from menarche throughout the postmenopausal stage. Care management concepts of the pregnant client will also be introduced. Course content will also reflect prescribing practices in relation to the pharmacodynamics and pharmacokinetics that can affect pregnant and lactating women. Clinical hours will reinforce the didactic element of the class incorporating skills of assessment, differential diagnosis, and evidence base practice to provide optimal obstetrical and gynecological care of the female client.

NURS 05525: Family Nurse Practitioner IV: Primary Care Management of Children and Adolescents 4 s.h.
Prerequisite: NURS 05524
This course focuses on the primary care of the infant, child, and adolescent population. Developmental and culturally competent health assessment is a key component of the course. Utilizing these skills the advanced practice student will learn through lecture, assigned readings and case studies how to develop differential diagnoses in order to plan, implement and manage common acute and chronic health problems of the pediatric/adolescent client. Clinical hours will reinforce the didactic component of the class in addition to concentrating on evidence based practice to address the needs of this population.

NURS 05526: Family Nurse Practitioner V: Practicum in Family Practice 4 s.h.
Prerequisite: NURS 05525
This is a clinical immersion practicum that is a culmination of the learning experience for the family nurse practitioner student. Its purpose is to allow the students the opportunity to provide comprehensive health care to diverse clients across the lifespan. Successful completion will entail the ability for the student to completely demonstrate the use of theory, evidence-based practice in assessing, diagnosing, and treating clients. Students will be able to provide cost-effective and safe family based care integrating concepts of health promotion and disease prevention. Monthly meetings with assign faculty will occur within this clinically focused course to identify problems and answer relevant questions.

NURS 05526: Family Nurse Practitioner V: Practicum in Family Practice 4 s.h.
Prerequisite: NURS 05525
This is a clinical immersion practicum that is a culmination of the learning experience for the family nurse practitioner student. Its purpose is to allow the students the opportunity to provide comprehensive health care to diverse clients across the lifespan. Successful completion will entail the ability for the student to completely demonstrate the use of theory, evidence-based practice in assessing, diagnosing, and treating clients. Students will be able to provide cost-effective and safe family based care integrating concepts of health promotion and disease prevention. Monthly meetings with assign faculty will occur within this clinically focused course to identify problems and answer relevant questions.

NURS 05527: Adv Dev, Hlth Asmt, Wellness, Hlth Promotion & Disease Prvntn of the Infant, Child, and Adolescent 3 s.h.
Prerequisite(s): Admission into Acute Care Pediatric Nurse Practitioner Specialty and 100 Clinical Hours
This course focuses on the role of the Acute Care in the health assessment, advanced development, wellness, health promotion and disease prevention of the infant, child, and adolescent. Utilizing lectures, assigned readings, laboratory experienced, clinical solutions and case studies the advanced practice pediatric student will utilize advance assessment skills to promote health and wellness in the infant, child, and adolescent. This course will focus on the health assessment of infants, children and adolescent. Disease prevention will be a focus to promote optimal health in the infant, child and adolescent. The clinical component will integrate concepts discussed in the class and apply them to the patient population in well baby and pediatric situations.
NURS 05527:  Adv Dev, Hlth Asmt, Wellness, Hlth Promotion & Disease Prvtn of the Infant, Child, and Adolescent

Prerequisite(s): Admission into Acute Care Pediatric Nurse Practitioner Specialty and 100 Clinical Hours

This course focuses on the role of the Acute Care in the health assessment, advanced development, wellness, health promotion and disease prevention of the infant, child and the adolescent. Utilizing lectures, assigned readings, laboratory-experienced, clinical solutions and case studies the advanced practice pediatric student will utilize advance assessment skills to promote health and wellness in the infant, child and adolescent. This course will focus on the health assessment of infant’s, children and adolescent. Disease prevention will be a focus to promote optimal health in the infant, child and adolescent. The clinical component will integrate concepts discussed in the class and apply them to the patient population in well baby and pediatric situations.

NURS 05528: Advanced Chronic Care of the Infant, Child and Adolescent in the Health Care System

Prerequisite(s): NURS 05527 and 150 Clinical Hours

This course focuses on the role of the Acute Care Pediatric Nurse Practitioner in the care of the infant and child and adolescent in the health care system with chronic conditions. Chronic health conditions will be reviewed in relation to each body system. The pharmacological interventions for each condition will be explored and evaluated. Utilizing lectures, assigned readings, laboratory experiences, clinical situations and case studies the advanced practice pediatric student will implement evidenced based practice to care for the infant, child and the adolescent with chronic health care deviations. The clinical component will integrate concepts discussed in class and apply them to the patient population.

NURS 05529: Advanced Acute Care of the Infant, Child and Adolescent in the Health Care System

Prerequisite(s): NURS 05528 and 150 Clinical Hours

This course focuses on the role of the Acute Care Pediatric Nurse Practitioner in the care of the infant and child adolescent in the treatment of acute health care deviations. Acute health conditions will be reviewed in the relation to each body system. The pharmacological interventions for each condition will be explored and evaluated. Course content relates to the acute health care problems in infants, children and adolescent and their impact on the family. Incorporating evidenced based research, a family-centered perspective, care is provided which includes psychosocial factors, and ethical considerations. Utilizing lectures, assigned readings, laboratory experiences, clinical situations and case studies the pediatric nurse practitioner will prescribe and provide care based on outcomes. The clinical component will integrate concepts discussed in class and apply them to the patient population in well baby and pediatric situations.

NURS 05530: Advanced Clinical Care for the Infant, Child and Adolescent in the Community and Medical Home

Prerequisite(s): NURS 05529 200 Clinical hours The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

This course focuses on the care provided to the infant, child and adolescent in the community and medical home. This course provides the Acute Care Pediatric nurse practitioner with the ability to synthesize and integrate the knowledge, skills, and attitudes important to providing care for infant, child, and adolescent and the community in which they live. The course emphasizes the importance of a holistic perspective and an understanding of the client and family as individuals with diverse spiritual and cultural needs and expectations and as a member of the community. Synthesis and analysis of previously learned concepts will provide the student with the opportunities to recognize their own feelings, needs, and issues regarding care, and issues pertaining to end of life while addressing the multicultural needs of the infant, child and adolescent while addressing health care disparities. Content includes societal, physical, psychological, ethical, and spiritual aspects of life and death. The pharmacological interventions will be explored and evaluated individually. Course content relates to the health care problems in infants, children and adolescent and their impact on the community. Incorporating evidenced based research, a family-centered perspective, care is provided which includes psychosocial factors, and ethical considerations. Utilizing lectures, assigned readings, laboratory experiences, clinical situations and case studies the Acute Care Pediatric nurse practitioner will prescribe and provide care based outcomes.
NURS 05530: Advanced Clinical Care for the infant, child and adolescent in the community and medical home 4 s.h.

Prerequisite(s): NURS 05529 200 Clinical hours The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

This course focuses on the care provided to the infant, child and adolescent in the community and medical home. This course provides the Acute Care Pediatric nurse practitioner with the ability to synthesize and integrate the knowledge, skills, and attitudes important to providing care for infant, child, and adolescent and the community in which they live. The course emphasizes the importance of a holistic perspective and an understanding of the client and family as individuals with diverse spiritual and cultural needs and expectations and as a member of the community. Synthesis and analysis of previously learned concepts will provide the student with the opportunities to recognize their own feelings, needs, and issues regarding care, and issues pertaining to end of life while addressing the multicultural needs of the infant, child and adolescent while addressing health care disparities. Content includes societal, physical, psychological, ethical, and spiritual aspects of life and death. The pharmacological interventions will be explored and evaluated individually. Course content relates to the health care problems in infants, children and adolescent and their impact on the community. Incorporating evidenced based research, a family-centered perspective, care is provided which includes psychosocial factors, and ethical considerations. Utilizing lectures, assigned readings, laboratory experiences, clinical situations and case studies the Acute Care Pediatric nurse practitioner will prescribe and provide care based outcomes.

NURS 05539: Screening of Women throughout the Lifespan & Health Promotion: Genetics, Diagnostics & Interventions 1 s.h.

Prerequisite(s): Completion of the core MSN courses with a GPA of 3.0 or higher and admission into the Women’s Health Nurse Practitioner specialization. (50 Clinical hours) The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

This course focuses on the role of Women’s Health Nurse Practitioner in the health assessment, advanced development wellness, health promotion and disease prevention of the female patient throughout the lifespan in health, pregnancy, post-partum, and acute/chronic illness. Utilizing lectures, assigned readings, laboratory experiences, clinical practicum and case studies the advanced practice will utilize advance assessment skills to promote health and wellness of the female across the lifespan. The clinical component will integrate and apply concepts to the female patient population. Through active clinical learning the student will apply newly acquired knowledge.

NURS 05540: Primary Care for the Women’s Health Nurse 3 s.h.

Prerequisite(s): NURS 05539 100 Clinical hours The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.

The course builds upon the current knowledge from screening of women throughout the lifespan and health promotion. Students perform comprehensive assessment of the female client to determine normal, benign variants and disease processes. Based upon assessment plans are formulated and prioritized by differential diagnosis. The student applies knowledge in the clinical setting and demonstrates the ability to deliver effective primary care to females. This care is evidenced based, culturally sensitive, and includes health promotion and disease management.

NURS 05541: Evidence Based Practice for Women's Health and Gynecological Issues Across the Lifespan 4 s.h.

Prerequisite(s): NURS 05540 200 Clinical hours The student who does NOT meet the clinical requirement will receive a failing grade in this course regardless of the course work evaluation scores.

This course focuses on the role of the Women's Health Nurse Practitioner in providing evidence based care to women experiencing gynecological issues across the lifespan. Utilizing lectures, assigned readings, laboratory experiences, clinical practicum and case studies the advanced practice student will utilize advance assessment skills to promote health and wellness of the female across the lifespan. This course will focus on the health assessment of the female across the lifespan. Through active clinical learning the student will apply newly acquired knowledge.
Course Descriptions

NURS 05541: Evidence Based Practice for Women's Health and Gynecological Issues Across the Lifespan 4 s.h.
Prerequisite(s): NURS 05540 200 Clinical hours The student who does NOT meet the clinical requirement will receive a failing grade in this course regardless of the course work evaluation scores.
This course focuses on the role of the Women's Health Nurse Practitioner in providing evidence based care to women experiencing gynecological issues across the lifespan. Utilizing lectures, assigned readings, laboratory experiences, clinical practicum and case studies the advanced practice student will utilize advance assessment skills to promote health and wellness of the female across the lifespan. The course will focus on the health assessment of the female across the lifespan. The clinical component will integrate and apply concepts to the female patient population. Through active clinical learning the student will apply newly acquired knowledge.

NURS 05542: Evidence Based Practice for Women's Health/Obstetrics: The Pregnant Woman, Fetus, Neonate and Family 6 s.h.
Prerequisite(s): NURS 05541 200 Clinical hours The student who does NOT meet the clinical requirements will receive a failing grade in this course regardless of the course work evaluation scores.
This course focuses on the role of the Women's Health Nurse Practitioner in providing evidence based care to women experiencing pregnancy. Utilizing lectures, assigned readings, laboratory experiences, clinical practicum and case studies that advanced practice student will utilize advance assessment skills to promote health and wellness of the pregnant female. The clinical component will integrate and apply concepts to the female patient population. Through active clinical learning the student will apply newly acquired knowledge.

NURS 05543: Evidence Based Practice Clinical Course 2 s.h.
Prerequisite(s): NURS 05503 and NURS 05510 40 Clinical hours and Clinical project
Evidence-based practice in illness and disease management is a requirement for quality care delivery. This course supports the student through the development, implementation, and evaluation of an evidence-based practice project in the clinical setting. This course requires successful completion of 40 clinical hours and a clinical project.

PHIL 09110: The Logic Of Everyday Reasoning 3 s.h.
This course in informal logic aims at improving the student’s reasoning through a thorough exposure to common logical fallacies as these appear in ordinary language, and through a study of rational procedures for problem-solving. Students have opportunities for extensive practice at discovering and overcoming their own logical faults in writing and speech as well as practice at rational problem-solving.

PHIL 09120: Introduction To Philosophy 3 s.h.
This basic course in the methods of philosophical inquiry investigates how these methods have been applied to selected philosophical issues by classical and contemporary philosophers.

PHIL 09130: Introduction To Symbolic Logic 3 s.h.
This course provides students with a working familiarity with the principles and procedures involved in deductive logic.

PHIL 09241: Philosophy And Society - Wi 3 s.h.
Prerequisites: COMP 01112
Same as PHIL09.240, but meets general education writing intensive guidelines with a variety of graded and ungraded writing assignments.

PHIL 09310: Aesthetics 3 s.h.
Prerequisite: at least one PHIL 09 course, or more than one Arts course (ART, ARHS, MUS, MUSG, THD, RTF).
This course offers students an approach to such philosophical issues as the nature; the role of the arts in human culture; and the articulation of criteria for interpretation and criticism. Students will refine their own approach to these issues by attending to specific works of poetry, fiction, drama, music, painting, sculpture, and other arts, including student works.

PHYS 00220: Introductory Mechanics (Lecture and Lab) 4 s.h.  
Co/Prerequisite: MATH 01130 or Math 01140  
This course studies the basic principles or mechanics and is equivalent to most calculus based introductory mechanics courses often entitled Physics I. The course is designed to cover introductory mechanics. (Newton's laws, energy and momentum conservation, rotating systems, statics, gravity and simple harmonic motion) at a level appropriate for future scientists and engineers. The course includes a laboratory component and it emphasizes problem-solving techniques.

PHYS 00220: Introductory Mechanics (Lecture and Lab) 4 s.h.  
Co/Prerequisite: MATH 01130 or Math 01140  
This course studies the basic principles or mechanics and is equivalent to most calculus based introductory mechanics courses often entitled Physics I. The course is designed to cover introductory mechanics. (Newton's laws, energy and momentum conservation, rotating systems, statics, gravity and simple harmonic motion) at a level appropriate for future scientists and engineers. The course includes a laboratory component and it emphasizes problem-solving techniques.

PHYS 00221: Introductory Thermodynamics, Fluids, Waves, & Optics (Lecture and Lab) 4 s.h.  
Prerequisite: PHYS 00220 Corequisite: MATH 01131 or MATH 01141  
This introductory course studies the basic principles of thermodynamics, fluids, waves, and optics and their application. The concepts will be applied through problem solving and laboratory experiences. A large portion of the content of this course builds from the concept of conservation of energy covered in the introductory mechanics course. The course is required for any physical science major and recommended for those majoring in biochemistry, chemistry, biology, engineering, or mathematics. The specific topics covered include elastic properties of materials, fluid mechanics, mechanical waves, sound, conduction of heat, kinetic theory of gasses, the laws of thermodynamics, light, geometric optics, interference and diffraction.

PHYS 00222: Introductory Electricity & Magnetism (Lecture and Lab) 4 s.h.  
Prerequisite: PHYS 00220 Corequisite: MATH 01131 or MATH 01141  
This course studies the basic principles of electricity and magnetism and is equivalent to most calculus based introductory electricity and magnetism courses often entitled Physics II. The course is designed to cover introductory electricity and magnetism (charge, current, potential, fields, AC and DC circuits, Maxwell's Equations, and electromagnetic waves) at a level appropriate for future scientists and engineers. The course includes a laboratory component and it emphasizes problem-solving techniques.

PHYS 00222: Introductory Electricity & Magnetism (Lecture and Lab) 4 s.h.  
Prerequisite: PHYS 00220 Corequisite: MATH 01131 or MATH 01141  
This course studies the basic principles of electricity and magnetism and is equivalent to most calculus based introductory electricity and magnetism courses often entitled Physics II. The course is designed to cover introductory electricity and magnetism (charge, current, potential, fields, AC and DC circuits, Maxwell's Equations, and electromagnetic waves) at a level appropriate for future scientists and engineers. The course includes a laboratory component and it emphasizes problem-solving techniques.

PHYS 00300: Modern Physics (Lecture and Lab) 4 s.h.  
Prerequisites: (MATH 01131 or MATH 01141) AND (PHYS 00221 or PHYS 00222)  
This course covers modern physics developed since the turn of the 20th century. After a review of some classical physics, course topics include special relativity, wave and particle aspects of radiation, matter waves, models of the atom, ionization, spectra, x-rays, and introductory quantum theory. It also covers theories developed by Planck, Einstein, Rutherford, Bragg, Bohr, Compton, de Broglie, Pauli, Schrodinger and Heisenberg.

PHYS 00310: Analytical Mechanics 4 s.h.  
Prerequisite: PHYS 00300  
This course teaches students Newtonian, Lagrangian and Hamiltonian formulations of mechanics, and their applications to such problems as Central Force Motion, Linear and Nonlinear Oscillations, Collisions between particles, Noninertial Systems, Coupled Oscillations and Normal Coordinates, and Rigid Bodies.

PHYS 00320: ELECTRICITY & MAGNETISM I 4 s.h.  
Prerequisite: 00300  
This course studies classical electro-magnetism. Its topics include: the laws of electromagnetic force, Maxwell's equations, electromagnetic induction, interaction of currents, and electromagnetic energy and waves. This course may not be offered annually.
PHYS 00330: Mathematical Physics 3 s.h.  
Prerequisite: PHYS 00300  
This introductory course studies topics as they apply to physics: infinite series, complex numbers, determinants and matrices, partial differentiation, vector calculus, Fourier series. Certain more advanced topics may be treated: calculus of variations, gamma and beta functions, coordinate transformations, tensor analysis, functions of a complex variable, Legendre polynomials and Bessel functions. This course may not be offered annually.

PHYS 00340: Optics And Light (Lecture and Lab) 4 s.h.  
Prerequisite: PHYS 00300  
This course studies the nature and propagation of light, dispersion, reflection and refraction at plane and spherical surfaces, lenses (thin and thick), aberrations of lenses and mirrors, optical instruments, polarization, diffraction and photometry. It also discusses modern developments and techniques (such as fiber optics, lasers, holography). This course may not be offered annually.

PHYS 00360: Biophysics I (Lecture and Lab) 4 s.h.  
Prerequisites: PHYS 00300 or BIOL 01203 or BIOL 01202 and PHYS 00211 or PHYS 00221 or PHYS 00222  
This course is aimed at understanding the physics of biological systems. The goal of the course is to quantitatively define biological systems and their functions. Key emphasis will be placed on (1) understanding theories, laws, and axioms that govern systems and their behavior and (2) the use of physics to determine quantitative information about systems and their behaviors. For each topic, the basic laws of physics will be reviewed followed by their application to specific biomolecular and biological system examples. The laboratory component is aimed at giving students hands-on experience in measurement and observation for biological systems.

PHYS 00410: Quantum Mechanics I 4 s.h.  
Prerequisite: PHYS 00300  
This course will serve as an introduction to quantum mechanics. Students will learn the basic concepts of quantum mechanics and how to solve simple problems using quantum mechanics. Topics selected for study include the origins of quantum mechanics, the free particle in wave mechanics, particles in one-dimensional potentials, the axiomatic formulation of quantum physics, particles in three-dimensions, spin and the Pauli exclusion principle.

PHYS 00430: Statistical Physics 3 s.h.  
Prerequisite: PHYS 00300  
The student will study in detail the laws of thermodynamics. The statistical derivation of these laws will be presented. Topics include: ideal gases, classical and quantum distribution functions, phase transitions, and other special topics.

PHYS 02527: Statistical Mechanics 3 s.h.  
The student will consider the laws of thermodynamics from a statistical point of view. Topics may include: ideal gases, simple thermodynamic systems, classical and quantum distribution functions, phase transitions, and other special topics. The requirements for this course include a graduate laboratory project and/or research paper. Admission to the course will be at the discretion of the graduate advisor.

PHYS 02528: Electricity And Magnetism I 4 s.h.  
This course studies static fields and charges and the application of vector calculus to electricity and magnetism. Maxwell's equations are derived from basic electrostatic phenomena. Some of the immediate consequences of Maxwell's equations, such as electromagnetic waves, will also be covered. The requirements of this course include a graduate research paper or a laboratory project. Admission to the course will be at the discretion of the graduate advisor.
PHYS 02529: Electricity And Magnetism II 3 s.h.
In this course, some of the major consequences of Maxwell’s equations, such as the generation and propagation of electromagnetic waves, scattering, and special relativity will be explored. A special attention will be given to the connection of electricity and magnetism with relativity. The requirements of this course include a graduate laboratory project or research paper. Admission to the course will be at the discretion of the graduate advisor.

PHYS 02530: Applied Physics Lab 4 s.h.
This course introduces modern experimental techniques commonly used in physics. Projects consist of original experimental research experiences in Solid State Physics, Laser Physics, and/or other experimental areas of current research in the department. Experimental results are correlated with existing theories. Technical writing and presentation skills are developed and evaluated.

PHYS 02541: Quantum Mechanics I 4 s.h.
This course will serve as an introduction to quantum mechanics. Students will learn the basic concepts of quantum mechanics and how to solve simple problems using quantum mechanics. Topics selected for study include the origins of quantum mechanics, the free particle in wave mechanics, particles in one-dimensional potentials, the axiomatic formulation of quantum physics, particles in three-dimensions, spin and the Pauli exclusion principle. The requirements of this course include a graduate research paper or a laboratory project.

PHYS 02542: Quantum Mechanics II 3 s.h.
This course is a continuation of Quantum Mechanics I. Students will learn more advanced concepts and problems in quantum mechanics. Topics selected for study include the formalism of quantum mechanics, particles in three-dimensions, spin and angular momentum, quantum statistical mechanics, time-independent perturbation theory, time-dependent perturbation theory, and scattering. Some topics may overlap with the ones in Quantum Mechanics I, but are taught at a higher level. The requirements of this course include a graduate research paper or a laboratory project.

PHYS 02555: Mechanics 4 s.h.
Emphasizes Newton's laws of motion, the conservation laws, kinetics and reactions, calculation of moments of inertia, periodic motion and heat. Theories and principles will be related to the motion and properties of gross bodies, and the relevance of these ideas to modern atomic physics will be pointed out. The requirements of this course include a graduate laboratory project and/or research paper. Admission to the course will be at the discretion of the graduate adviser. This course may not be offered annually.

PHYS 02599: INDEP STUDY PHYS SCI 3 s.h.

ECON 04101: An Introduction To Economics-A Macroeconomic Perspective 3 s.h.
This course analyzes the overall level of economic activity in the United States and examines its major determinants, public stabilization policies, economic growth and international trade.

ECON 04102: An Introduction To Economics-A Microeconomic Perspective 3 s.h.
This course analyzes resource allocation among alternative uses. It studies consumer demand, product and factor price determination, general equilibrium and optimal income distribution.

EDPA 02490: Public Service Internship 3 to 12 s.h.
Prerequisites: EDPA 02120 or POSC 07300 or POSC 07303
Students are provided with an opportunity to get first-hand experience in government administration and related political processes through work in a variety of public settings (government agencies, public officials' offices, law firms, etc.).

POSC 07100: Introduction To Government And Politics 3 s.h.
Professors who teach this course will normally focus on some, but not all, of the following topics: political and governmental structures, functions, and processes; political behavior; public law and public policy; and political values or philosophies.

POSC 07110: American Government 3 s.h.
This course focuses on the American Federal government, emphasizing the structure, operation and processes of our political system. Coverage will include political values as they are reflected in major public policies.
Course Descriptions

POSC 07360: Methodology And Statistics In Political Science Research 3 s.h.
Prerequisites: POSC 07360 prerequisite General Requirements:
This course considers the varied ways that political scientists study problems, with primary attention to scientific method and quantitative skills. Students are expected to become adept at using and interpreting forms of descriptive statistics commonly used in the social sciences.

CMS 05381: PSYCHOLINGUISTICS 3 s.h.

PSY 01106: Psychology Of Scientific Thinking 3 s.h.
Prerequisites: PSY 01107
Students will be introduced to the methods of science and the role that science plays in the understanding of how the world works. The development of critical thinking skills and an evidence based approach to evaluating scientific claims will be emphasized. Students will also be introduced to the psychological processes that underlie the scientific method and the persistence of belief in pseudoscientific and non-scientific claims.

PSY 01107: Essentials Of Psychology 3 s.h.
Students will be introduced to psychology, the scientific study of behavior. This course will highlight the key areas in psychology that help to explain human behavior. This course will include discussion of diverse topics such as, perception, learning, thinking, memory, motivation, emotion, stress, and health, personality, physiological processes, psychological disorders and treatment, development, intelligence, and social psychology.

PSY 01230: Psychology Of Personality 3 s.h.
Prerequisites: PSY 01100 or PSY 01107
Students study major theories of personality and techniques for measuring personality. Personality is that field of psychology that investigates the predispositions or inherited characteristics and the acquired or learned qualities that affect an individual.

PSY 01316: Behavioral Assessment And Measurement 3 s.h.
Prerequisite: PST 02310
This course provides students with the knowledge and skills needed to conduct behavioral assessments and choose appropriate target outcomes and intervention strategies. Additionally, students will learn to objectively measure behavior, display data graphically, and experimentally evaluate the effectiveness of behavioral interventions. This course is one of the courses required for the Specialization in Behavioral Services for Children and Their Families in the psychology department.

PSY 01424: Professional Issues In Applied Behavior Analysis 3 s.h.
Prerequisites: PST 02310 and PST 01316 Corequisite: PST 02305 AND Complete a Board Certification in Behavior Analysis practice exam
This course is a capstone course in Specialization for Behavioral Services for Children and their Families, providing an in-depth overview of innovative and empirically validated behavior assessment and intervention techniques aimed at promoting system-wide change. Students will be exposed to professional development as behavior analysts including ethical issues, career options and responsibilities, and development of clinical skills.

PSY 01425: Fieldwork in Applied Behavior Analysis 3 s.h.
Prerequisites: PST 02310, PST 01316
Students should be matriculated in the Specialization for Behavioral Services for Children & Families OR the Post-Baccalaureate in ABA to enroll in this course due to limited enrollment. Students are assigned placements in applied settings under the supervision of a Board Certified Behavior Analyst (BCBA) to gain experience in the design and implementation of behavioral interventions. Students are required to complete 150 hours of supervised fieldwork in their assigned placements.

PSY 01500: Professional Skills for Behavior Analysts 3 s.h.
Prerequisites: Matriculation into the MA in ABA
This course introduces students to the professional standards of the field of applied behavior analysis. This course emphasizes essential skills and strategies that students need to be successful professional behavior analysts. Topics include vital work habits, interpersonal relationships, business skills, applying behavioral knowledge, consulting repertoires, introduction to professional and scientific writing, and professional service. This course is the first course to be taken in the MA in the ABA program and will be offered annually.
The course provides an in-depth examination of the philosophical and conceptual underpinnings of behavior analytic theory. Students will evaluate how behavior analysis as a conceptual system fits in the larger historical and conceptual contexts of philosophy, science, and psychology. Applications to behavior analytic problem solving and case conceptualization in applied setting will be emphasized.

PSY 01564: Counseling Theory And Techniques I
Prerequisite: Matriculation in the Master's Program in Clinical Mental Health Counseling
This course is designed to be an overview of several major theoretical approaches to psychotherapy, including: Humanistic-Existential, Behavioral, and Cognitive-Behavioral. The course will include didactic and experiential components, and will focus on developing the skills and knowledge necessary to use techniques from these theories in a professional context.

PSY 01566: Counseling Theory And Techniques II
Prerequisite: PST 01595 and PST 01564 with grade of B- or above
This course is designed to be an overview of several major theoretical approaches to psychotherapy, including: Psychodynamic, Systems, Cognitive, and Interpersonal. The course will include didactic and experiential components, and will focus on developing the skills and knowledge necessary to use techniques from these theories in a professional context. In addition to these general skills, the course will also focus on the application of these techniques to specific populations of interest within the psychological community.

PSY 01570: Research Methodology And Statistics In Counseling Psychology
This is a graduate level introduction to research methodology and statistics with special application of these principles to the practice of mental health counseling. Students will develop the skills necessary to critically evaluate and interpret research and statistics, thus allowing them to be excellent consumers of research as well as developing practice-relevant research projects.

PSY 01572: Research Methodology And Statistics In Counseling Psychology I: Basics
Prerequisite: Matriculation in the Masters Program in Clinical Mental Health Counseling
This is a graduate level introduction to research methodology and statistics with special application of these principles to the practice of mental health counseling. Students will develop the skills necessary to critically evaluate and interpret research and statistics, thus allowing them to be excellent consumers of research as well as developing practice-relevant research projects.

PSY 01574: Research Methodology And Statistics In Counseling Psychology II: Applied
Prerequisite: PST 01572 with B- or above
In this graduate level course, students will learn how to apply the skills learned in Research Methodology & Statistics in Counseling Psychology I: Basic course through all of the steps required to propose an empirical project requiring either postulating a testable hypothesis and delineating the methodology used to test the hypothesis or to apply knowledge of research methodology to the empirical evaluation of counseling interventions with a single or small number of clients.

PSY 01610: Career And Lifestyle Development
Advanced students will learn the major theories of career choice and development, gaining an understanding of the complex personal, organizational, and societal factors that impact upon career choice. Students will learn to understand occupational trends and occupational classification systems, and have the opportunity to study and administer various career interest batteries. Students will gain an appreciation for the changing nature of work and career focus across the life span, including predictable career transitions and challenges. Theoretical and self assessment techniques will be utilized to help students gain an understanding of the need for balance between work and personal life, and will provide insight into the theories and choices involved in leisure activity and in stress management practices. Experiential exercises and projects will be an integral aspect of the course leading to an appreciation not only of theory but of its application.
PSY 01612: Group Counseling And Psychotherapy 3 s.h.
Prerequisite: PST 09595 and PST 01623 with grade of B- or above
This course addresses fundamental issues concerning the development and dynamics of group counseling and provides the student with a background in group counseling theories and methods. Issues covered include group process components, the stages of group development and leadership styles and approaches. Methods for evaluating the effectiveness of group counseling are discussed.

PSY 01615: Professional Proseminar 1 s.h.
Prerequisites: Matriculation in the Masters Program in Clinical Mental Health Counseling
This seminar is intended to serve two purposes for students in the first year of training in the MA Program in Clinical and Counseling Psychology. First, students will be provided with the ability to discuss how the skills and knowledge they have acquired during their training should be integrated to form a coherent professional identity. Second, students will have the opportunity to gain more knowledge and understanding of the profession they are being trained in and how to become an active/contributing member to that profession. Current accreditation standards in the field place a particular emphasis on students developing a solid sense of professional identity, which includes knowledge of a) the history of the profession, b) current trends in the field, c) licensing and credentialing issues, and d) areas of work and influence in the field. This course will provide the vehicle for discussing and disseminating these issues.

PSY 01616: The Counseling Profession: Ethics And Professional Identity 3 s.h.
This course is designed to enrich the student’s understanding of the counseling profession and the professional identity of counselors. The student will be exposed to the professional roles, functions, goals, and objectives of the counseling profession, as well as organizations and associations of the profession. Students will study the history and development of counseling as a profession and will examine current trends in counseling. Finally, the student will explore professional ethics and standards of practice (ACA, ASGW, AMHCA, NCAD) and will become familiar with professional licensure in New Jersey and national certifications (NBCC AND CCE) and with accreditations standards for counseling (CACREP). (For Summer 2011 the course is offered as web-assisted, with some content delivered online.)

PSY 01620: Legal, Ethical, and Professional Issues In Counseling 3 s.h.
Prerequisite: Matriculation in the Masters Program in Clinical Mental Health Counseling
This course covers legal and ethical issues involved in the delivery of human services and counseling. Issues addressed include ethical standards for therapists, the role of the mental health professional in the legal system, and standards of ethical practice for counselors. The student will consider the possible legal consequences of treatment decisions and approaches. This course will provide an understanding of all aspects of professional functioning including history, roles, ethics, standards and credentialing.

PSY 01623: Psychopathology I: Diagnosis And Epidemiology 3 s.h.
Prerequisite: PSY 09595 and PSY 01624 with grade of B- or above
This course reviews the diagnostic criteria for the major categories of psychopathology included in the DSM-IV-TR. The emphasis for course is reviewing the prevalence rates and differential diagnosis for the various categories. The course reviews the concepts and skills necessary to provide a five axis diagnosis for adults and children.

PSY 01624: Psychopathology II: Conceptualization And Etiology 3 s.h.
Prerequisites: PSY 01623 with B- or above
This course reviews the diagnostic criteria for the major categories of psychopathology included in the DSM-IV-TR. The course emphasizes the etiological factors for the various diagnostic categories as well as the course and prognosis for each disorder. Current research for evidence based interventions for each of the disorders will also be reviewed.

PSY 01624: Psychopathology II: Conceptualization And Etiology 3 s.h.
Prerequisites: PSY 01623 with B- or above
This course reviews the diagnostic criteria for the major categories of psychopathology included in the DSM-IV-TR. The course emphasizes the etiological factors for the various diagnostic categories as well as the course and prognosis for each disorder. Current research for evidence based interventions for each of the disorders will also be reviewed.
Course Descriptions

PSY 01630: Family Systems Theory And Family Therapy 3 s.h.
This graduate level course will explore the importance of family therapy in the human service delivery system. The course will emphasize several areas. First, the course will review the major theoretical approaches to family therapy as well as the foundation concepts of general system theory. Second, the skills and techniques unique to family therapy will be reviewed. This aspect of the course will utilize role plays to demonstrate specific intervention strategies. Third, the course will review assessment tools and evaluation research of family therapy. Finally, the ethical and documentation issues involved in a family therapy will be discussed.

PSY 01650: Practicum In Counseling 1 to 9 s.h.
Prerequisite: PST 01624 and PST 01566 and PST 01620
Students will be placed in human service settings where they will provide, under supervision, counseling and related services. Both on-site and Psychology Department supervisors will monitor student progress. Students will work with clients to establish goals for change, employ appropriate counseling techniques and evaluate goal attainment.

PSY 01660: Practicum In Applied Behavior Analysis I 3 s.h.
Prerequisite(s): PST 02670 and Permission of Program Advisor
In this course students are placed in a community agency to apply their knowledge and skills in applied behavior analysis. Students will be required to meet weekly with the instructor of the course.

PSY 01661: Practicum In Applied Behavior Analysis II 3 s.h.
Prerequisites: PST 01660
In this course students are required to complete intensive supervised fieldwork in a community agency to further develop their clinical skills in applied behavior analysis. Focus will be placed on advanced assessment, intervention, and maintenance programming, treatment integrity, consultation, and staff supervision and training. Students will be required to meet weekly with the instructor of the course.

PSY 01685: Master's Thesis In Psychology I 3 s.h.
Prerequisite: PST 01574 with B- or above
This course requires the design of an independently executed research project. The project will be supervised by a member of the Psychology Department. The student may choose a group design, single subject ABA design or Case Study for their project. The thesis will include a literature review, design of the project and the initial implementation.

PSY 01687: Master's Thesis In Psychology II 3 s.h.
Prerequisite: PST 01685
This course requires the completion of the independently executed research project that was initiated in Masters Thesis in Psychology I. The project will be supervised by a member of the Psychology Department. Completion of the course will include the production of a comprehensive final product that needs to be approved by the student’s project supervisor.

PSY 01750: Multicultural Perspectives 3 s.h.
Prerequisite: PST 09.700
The purpose of this course is to ensure that students know and are able to define culture, assimilation, acculturation, and cultural differences, identify different types of diversity, explores challenges and benefits of diversity, recognize the problem of stereotyping, prejudice, bias, and discrimination and the ways to avoid them, and describe ethnocentrism and its relationships to diversity. Students will gain specific competencies necessary to work effectively with an increasingly diverse population. This graduate level course is required for student in the Ph.D. program in Clinical Psychology.

PSY 01750: Multicultural Perspectives 3 s.h.
Prerequisite: PST 09.700
The purpose of this course is to ensure that students know and are able to define culture, assimilation, acculturation, and cultural differences, identify different types of diversity, explores challenges and benefits of diversity, recognize the problem of stereotyping, prejudice, bias, and discrimination and the ways to avoid them, and describe ethnocentrism and its relationships to diversity. Students will gain specific competencies necessary to work effectively with an increasingly diverse population. This graduate level course is required for student in the Ph.D. program in Clinical Psychology.

PSY 01850: DISSERTATION RESEARCH I 1 s.h.
Prerequisites: Grade of "Pass" in PST 03.814 Thesis Research II
The purpose of this course is to for students to begin to work with their research advisors on their dissertations. At the end of this course, students are expected to have completed at least one draft of the introduction of their research proposal. This course is restricted to students matriculated into the doctoral program in clinical psychology.
Course Descriptions

PSY 01852: DISSERTATION RESEARCH II 1 s.h.
Prerequisites: PSY 01.850 Dissertation Research I
The purpose of this course is to for students to continue to work with their research advisors to develop a high-quality, scientifically rigorous research study. At the completion of this course, students are expected to have written a complete proposal including the introduction, background, and methodology for the study. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 01853: DISSERTATION RESEARCH III 1 s.h.
Prerequisites: Grade of "Pass" in PSY01.852 Dissertation Research II
The purpose of this course is for students to continue to work with their research advisors to develop a high-quality, scientifically rigorous research study. At the completion of this course, students are expected to have begun data collection. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 01854: DISSERTATION RESEARCH IV 1 s.h.
Prerequisites: Grade of "Pass" in PSY01.853 Dissertation Research III
The purpose of this course is for students to complete work on their dissertation research project. At the end of this course, students are expected to have completed a draft of their research project. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 02257: Psychology As A Profession And Practice 3 s.h.
Prerequisites: PSY 01.107 or both PSY 01.100 and PSY 01104
This course will introduce students to traditional and emerging applied areas in psychology, with the goal of increasing students' knowledge about how psychological information is used to impact peoples lives. In addition, students will learn how psychological knowledge can be applied in ways that allow us to better understand the individual and the broader social world. Finally, students will explore possible career paths in psychology and learn how to best prepare themselves for a career in psychology or related fields post graduation.

PSY 02305: Applied Behavior Analysis 3 s.h.
Prerequisite: PSY 02310
This course deals with the principles, procedures and utility of behavior modification in normal and clinical settings.

PSY 02310: Learning And Behavior 3 s.h.
Prerequisite(s): PSY 01107 or Matriculation in the Post- Baccalaureate Certificate in Applied Behavior Analysis.
This course provides an overview of the experimental analysis of behavior with minor attention to other theories of learning. Topics may include classical conditioning, operant conditioning, and schedules of reinforcement.

PSY 02500: Basic Principles Of Behavior 3 s.h.
This course is a graduate course in the basic principles of behavior. Course content includes the historical basis of behavior analysis, the distinction between respondent/classical and operant conditioning, and the basic principles, processes, and concepts of behavior analysis.

PSY 02510: Research Methods In Behavior Analysis 3 s.h.
Prerequisite: PST 02500
This course provides students with the knowledge and skills to choose and implement an appropriate experimental design to evaluate the success of behavioral interventions.

PSY 02520: Assessment And Interventions For Social Skills And Relationships In Children 3 s.h.
This course is a graduate course in examining the development of social and emotional competence in children, the assessment of social skill deficits, and various interventions aimed at improving social skills and relationships in children and children with special needs.

PSY 02600: ABC's Of Applied Behavior Analysis 3 s.h.
This course provides a graduate level introduction to the field of behavior analysis. The course will cover the history of the field, behavioral assessment, and behavioral intervention. The focus of this course is on knowledge of the field and not the application of skills.

PSY 02600: ABC's Of Applied Behavior Analysis 3 s.h.
This course provides a graduate level introduction to the field of behavior analysis. The course will cover the history of the field, behavioral assessment, and behavioral intervention. The focus of this course is on knowledge of the field and not the application of skills.
PSY 02610: APPLIED BEHAVIOR ANALYSIS 3 s.h.

PSY 02620: Behavioral Assessment & Functional Analysis 3 s.h.
Corequisite: PST 02590
This course teaches students how to conduct a comprehensive assessment for behavior problems, to identify, with the client, the appropriate goals and objectives for intervention, to conduct the appropriate assessment techniques, and to select the appropriate measurement procedures to evaluate outcomes.

PSY 02630: Experimental Foundations of Behavior Therapy of Psychology 3 s.h.
Prerequisite: Matriculation into Ph.D. Program in Clinical Psychology
This course provides Ph.D. students in Clinical Health Psychology with advanced and highly specialized knowledge in the experimental analysis of human behavior, specifically as it relates to problems of clinical relevance. Students will master the conceptual underpinnings of the behavior therapies through an examination of complex behavior problems from a behavior analytical and rigorously experimental perspective, including but not limited to behavioral economic, behavioral momentum, variability, Skinner's analysis of verbal behavior, and Relational Frame Theory (RFT). This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 02640: Research Project In Applied Behavior Analysis 3 s.h.
Prerequisite: PST 02510 and PST 01610
This graduate level course requires the design of an independently executed research project evaluating applied behavior analytic techniques for changing behavior. In this course students will work from foundational skills acquired in the prerequisite course in Research Methods in Behavior Analysis (PSY 02510) and with close instructor consultation to fully design and implement an empirical single-subject research study that will culminate in a formal research paper and presentation. This is a required course for the Master's of Arts program in Applied Behavior Analysis.

PSY 02650: SP TP APPLIED BEHAV ANALYSIS 3 s.h.
Prerequisite: PST 02590 and PST 01610
This course is a graduate seminar course providing in-depth coverage of special topics in the practice of Applied Behavior Analysis. Course content will reflect the most current issues involving the design and implementation of behavioral interventions for specific populations and circumstances. Course topics may include but are not limited to: verbal behavior, curriculum design for children with autism, behavioral interventions for basic life skills, behavior analysis in education, behavioral interventions for children with emotional/behavioral disorders, behavior analysis of addiction, legal issues for applied behavior analysts, early intensive behavioral intervention, and large-scale behavioral intervention.

PSY 02660: Ethics In Applied Behavior Analysis 3 s.h.
Prerequisite(s): PSY 02610 and PSY 02620
This graduate level course is required for students in the Master of Arts program in Applied Behavior Analysis. The purpose of this course is to ensure that students know and are able to apply the Behavior Analyst Certification Board's (BACB) Guidelines for Responsible Conduct for Behavior Analysts. In addition, students will be taught the BACB Professional Disciplinary and Ethical Standards.

PSY 02670: Advanced Practice In Applied Behavior Analysis 3 s.h.
Prerequisite(s): PSY 02610 and PSY 02620
This course provides in-depth hands-on demonstration and practice of a variety of behavior analytic clinical techniques. Students will demonstrate competencies in a variety of clinical skills including those involving specific behavior change procedures, broad behavior change systems and the implementation, management, and supervision of those procedures.
PSY 02706: RESEARCH METHODS
Prerequisite: Matriculation into the Ph.D. in Clinical Psychology Program.
This doctoral level course provides an overview of group research methodologies frequently used in professional psychological research. Topics covered in this course include validity and reliability, systematic observation, self-report measures, sampling techniques, control and comparison groups, treatment evaluation strategies, and research ethics. This course is designed to provide students the tools to design their own research in the discipline of professional psychology as well as the ability to evaluate research generated by others. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03200: Abnormal Psychology
Prerequisites: PSY 01100 or PSY 01107
Abnormal Psychology is a division of the science of psychology that investigates disordered behaviors, deficiencies in behavior capacities, and the persons exhibiting them. This course of Abnormal Psychology is concerned with the application of the methods, concepts, principles and findings of psychological research to deviant behavior. It is also concerned with perception, learning, development and social factors as related to disturbed behavior and experiences of individuals.

PSY 03205: Intake And Interviewing Skills In Psychology
Prerequisites: PSY 01100 or PSY 01107
This course is designed to prepare undergraduates to be able to perform an initial interview or intake in an entry level, human service position. Topics include basic skill development, understanding of content and process in interviewing, family interviews, use of standard intake procedures, and ethical considerations in interviewing.

PSY 03274: PROFESSIONAL PROSEMINAR IV
Prerequisites: Grade of "Pass" in PSY 03.723 Professional Proseminar III
This is the fourth proseminar in that sequence. The seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03275: PROFESSIONAL PROSEMINAR V
Prerequisites: Grade of "Pass" in PSY 03.724 Professional Proseminar IV
This is the fifth proseminar in that sequence. The seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03276: PROFESSIONAL PROSEMINAR VI
Prerequisites: Grade of "Pass" in PSY 03.725 Professional Proseminar V
This is the sixth proseminar in that sequence. The seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03518: Psychological Evaluation And Counseling Services To Combat Alcohol And Drug Abuse
This course provides students with information needed to evaluate and counsel drug and/or alcohol dependent or addicted individuals and their families. Topics covered include strategies necessary for the coordination and delivery of intervention and referral services in a school setting.
PSY 03620: Cognitive-Behavioral Treatment Strategies  
This course is designed to be an overview of cognitive-behavioral treatment and theory. The course will include didactic and experiential components, and will focus on developing the skills and knowledge necessary to use cognitive-behavioral treatment in a professional context. In addition to these general skills, the course will also focus on the application of these techniques to specific populations of interest within the psychological community.

PSY 03624: Psychopathology Of Children And Adolescents  
This course includes relating personality theory to psychopathology, diagnostic nomenclature in child psychopathology, review of major psychotherapeutic approaches for children, techniques for working with parents and treatment facilities away from home. This course may include field trips to appropriate agencies and as well as case preparation.

PSY 03701: Assessment I: Psychometrics and Cognitive Testing  
Prerequisite: Matriculation into Ph.D. Program in Clinical Psychology  
This course is part of the two-course sequence and provides the foundational knowledge needed to critically evaluate test measures and their uses. In addition, students will gain exposure to a wide range of cognitive assessment tools and strategies. Students will be taught the basic assessment skills necessary to conduct an initial consultation regarding cognitive issues, test selection, standardized test administration, test scoring & interpretation using appropriate normative data while considering cultural factors, integrative report writing, and communications of results and treatment recommendations. Students will gain also be introduced to ethical and professional issues related to cognitive assessment, and they will be expected to demonstrate their skills as part of their classroom experience.

PSY 03701: Assessment I: Psychometrics and Cognitive Testing  
Prerequisite: Matriculation into Ph.D. Program in Clinical Psychology  
This course is part of the two-course sequence and provides the foundational knowledge needed to critically evaluate test measures and their uses. In addition, students will gain exposure to a wide range of cognitive assessment tools and strategies. Students will be taught the basic assessment skills necessary to conduct an initial consultation regarding cognitive issues, test selection, standardized test administration, test scoring & interpretation using appropriate normative data while considering cultural factors, integrative report writing, and communications of results and treatment recommendations. Students will gain also be introduced to ethical and professional issues related to cognitive assessment, and they will be expected to demonstrate their skills as part of their classroom experience.

PSY 03704: Assessment II: Individual Differences and Personality  
Prerequisite: Grade of B- or better in PSY 03.701  
This class is designed to promote an understanding of the unique individual and contextual factors that influences individual development and personality. Issues related to personality test development and use will examined in-depth. Students will have opportunities to administer, score and interpret various measures that provide information about important individual differences and personality functioning. This course will also cover the use of normative data and cultural factors during the assessment process. Students will gain experience with integrative report writing and the communication of results and treatment recommendations. Students will be introduced to ethical and professional issues related to personality assessment.

PSY 03704: Assessment II: Individual Differences and Personality  
Prerequisite: Grade of B- or better in PSY 03.701  
This class is designed to promote an understanding of the unique individual and contextual factors that influences individual development and personality. Issues related to personality test development and use will examined in-depth. Students will have opportunities to administer, score and interpret various measures that provide information about important individual differences and personality functioning. This course will also cover the use of normative data and cultural factors during the assessment process. Students will gain experience with integrative report writing and the communication of results and treatment recommendations. Students will be introduced to ethical and professional issues related to personality assessment.

PSY 03710: Intervention I: Foundational Clinical Skills  
Prerequisites: Matriculation into the Ph.D. Program in Clinical Psychology  
The course will focus on an introduction to the pan-theoretical skills that may enhance the development of rapport in context of a therapeutic relationship between therapist and client. This course will also review mental status exams, the content areas of the initial intake interview, assessing for suicide and homicide risk, and basic conceptualization skills. Students are expected to demonstrate these skills through use of roleplays and active learning processes.

This course is designed to be an overview of the major theoretical approaches to adult psychotherapy including: Behavioral, Cognitive, Humanistic-Existential, and Psychodynamic traditions. The course will include didactic and experiential components, and will expose students to the fundamental aspects of each theory and treatment approach. The ultimate goal is for students to develop the skills and knowledge necessary to use techniques from these theories in a professional context. This course is restricted to students matriculated into the doctoral program in clinical psychology.

This course provides an intensive overview of an ecological approach to child, adolescent, and family therapy. Starting with the integration of a developmental perspective into clinical practice, the material in this course reviews different models of therapy for children, adolescents, and families. The remainder of the course focuses on learning the evidence-based interventions for specific disorders unique to childhood and adolescence. Issues of prevention of mental health issues in children and adolescents are reviewed. This course is restricted to students matriculated into the doctoral program in clinical psychology.

This class will allow students in the Doctoral Program in Clinical Psychology to develop their skills in Cognitive-Behavioral Treatment at a deeper level and learn to apply these skills to specific populations and settings. Additionally, this class will allow students to learn specific treatment protocols for specific types of disorders and in non-traditional settings and with unique populations.

The seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

This seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

This seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

Students enrolled in Doctoral Program in Clinical Psychology are required to enroll in one section of Professional Proseminar every Fall and Spring semester during their first four years in the program. This is the fifth proseminar in that sequence. The seminar is intended allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend them self to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students
matriculated into the doctoral program in clinical psychology.

**PSY 03726: PROFESSIONAL PROSEMINAR VI**

Prerequisites: Grade of "Pass" in PST 03. 725 Professional Proseminar V

Students enrolled in Doctoral Program in Clinical Psychology are required to enroll in one section of Professional Proseminar every Fall and Spring semester during their first four years in the program. This is the sixth proseminar in that sequence. The seminar is intended to allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend themselves to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

**PSY 03727: PROFESSIONAL PROSEMINAR VII**

Prerequisites: Grade of "Pass" in PST 03. 726 Professional Proseminar VI

Students enrolled in Doctoral Program in Clinical Psychology are required to enroll in one section of Professional Proseminar every Fall and Spring semester during their first four years in the program. This is the seventh proseminar in that sequence. The seminar is intended to allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend themselves to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

**PSY 03728: PROFESSIONAL PROSEMINAR VIII**

Prerequisites: Grade of "Pass" in PST 02. 727 Professional Proseminar VIII

Students enrolled in Doctoral Program in Clinical Psychology are required to enroll in one section of Professional Proseminar every Fall and Spring semester during their first four years in the program. This is the eighth proseminar in that sequence. The seminar is intended to allow students to explore emerging areas and build competencies consistent with emerging trends in clinical psychology. Additionally, students will be introduced to specific types of competencies that do not lend themselves to the comprehensiveness of a traditionally structured course. Finally, the course serves as a place for professional discourse and growth for students as they progress through the program. This course is restricted to students matriculated into the doctoral program in clinical psychology.

**PSY 03740: Professional, Ethical, and Legal Issues in Clinical Psychology**

Prerequisite: Matriculation into the Clinical Psychology Ph.D. program.

This course covers ethical, legal, and professional issues involved in the discipline of psychology. Students will learn about historical and contemporary issues shaping the field of psychology and the training/supervision requirements needed to ethically/legally engage in various roles. Students will be challenged to actively apply the APA principles and ethical standards through a variety of exercises. State and Federal laws and regulations, including landmark legal cases, will be examined in-depth. Students will consider the possible legal consequences of their behaviors/decisions. This course is restricted to students matriculated into the doctoral program in clinical psychology.

**PSY 03740: Professional, Ethical, and Legal Issues in Clinical Psychology**

Prerequisite: Matriculation into the Clinical Psychology Ph.D. program.

This course covers ethical, legal, and professional issues involved in the discipline of psychology. Students will learn about historical and contemporary issues shaping the field of psychology and the training/supervision requirements needed to ethically/legally engage in various roles. Students will be challenged to actively apply the APA principles and ethical standards through a variety of exercises. State and Federal laws and regulations, including landmark legal cases, will be examined in-depth. Students will consider the possible legal consequences of their behaviors/decisions. This course is restricted to students matriculated into the doctoral program in clinical psychology.
The Introductory Practicum is designed to let students develop intake, diagnostic, and assessment skills that they have learned during the first year in the program. Students will first shadow one of the more advanced clinical students and assist them in a clinical evaluation and assessment. Following this, students will then be expected to conduct their own evaluation independently. Additional experiences may also be available. Students will also be expected to engage in regular supervision provided by their practicum supervisor. This course is restricted to students matriculated into the doctoral program in clinical psychology.

The Practicum is designed to provide students with a vehicle for obtaining practical experience and training to become competent clinical psychologists. Students will be assigned to either an internal or external practicum site. At that site, they will conduct clinical evaluations, assessments, psychotherapy and other work appropriate to the role of a clinical psychologist. The Foundation Practicum sequence is designed such that students will develop foundational clinical skills related to their clinical work. Students will also be expected to engage in regular individual and group supervision provided by their practicum supervisor. This course is restricted to students matriculated into the doctoral program in clinical psychology.

The Intermediate Practicum sequence is designed such that students will develop increasingly more complex and advanced clinical skills related to their clinical work. Students will also begin to develop skills consistent with their chosen concentrations. In addition to their clinical work, students will also be expected to engage in regular individual and group supervision provided by their practicum supervisor. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03742: INTRODUCTORY PRACTICUM 3 s.h.
Prerequisites: Grade of B- or better in PST 03.703 Assessment II: Cognitive AND PSY 03.712 Intervention II: Evidence-Based Interventions with Adults AND PST 03.732 Psychopathology II: Children & Adolescents

PSY 03744: FOUNDATIONAL PRACTICUM I 3 s.h.
Prerequisites: Grade of "Pass" in PSY 03.742 Introductory Practicum

PSY 03746: FOUNDATIONAL PRACTICUM II 3 s.h.
Prerequisites: Grade of "Pass" in PSY 03.744 Foundational Practicum I

PSY 03748: FOUNDATIONAL PRACTICUM III 3 s.h.
Prerequisites: Grade of "Pass" in PSY 03.746 Foundational Practicum II

PSY 03800: INTERMEDIATE PRACTICUM I 3 s.h.
Prerequisites: Grade of "Pass" in PSY 03.748 Foundational Practicum III

PSY 03802: INTERMEDIATE PRACTICUM II 3 s.h.
Prerequisites: Grade of "Pass" in PSY 03.800 Intermediate Practicum I
PSY 03804: INTERMEDIATE PRACTICUM III 3 s.h.
Practicum III, 3 S.H. Prerequisites: Grade of "Pass" in PSY 03.802 Intermediate Practicum II
The Practicum is designed to provide students with a vehicle for obtaining practical experience and training to become competent clinical psychologists. Students will be assigned to either an internal or external practicum site. At that site, they will conduct clinical evaluations, assessments, psychotherapy and other work appropriate to the role of a clinical psychologist. The Intermediate Practicum sequence is designed such that students will develop increasingly more complex and advanced clinical skills related to their clinical work. Students will also begin to develop skills consistent with their chosen concentrations. In addition to their clinical work, students will also be expected to engage in regular individual and group supervision provided by their practicum supervisor. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03812: THESIS RESEARCH I 1 s.h.
Prerequisite: Grade of B- or better in PSY 02.706 Research Methods
The purpose of this course is for students to begin to work with their research advisor on their master's thesis. At the end of this course, students are expected to have completed at least one draft of the Introduction and Method sections of their research proposal. This course is restricted to students matriculated into the doctoral program in Clinical Psychology.

PSY 03814: THESIS RESEARCH II 1 s.h.
Prerequisite: Grade of "Pass" in PSY 03.812 Thesis Research I
The purpose of this course is for students to complete their work with their research advisor on their master's thesis. At the end of this course, students are expected to have completed a final copy of their master's thesis. This course is restricted to students matriculated into the doctoral program in Clinical Psychology.

PSY 03820: ADVANCED PRACTICUM I 3 s.h.
Prerequisites: Grade of "Pass" in PSY 03.804 Intermediate Practicum III
The Practicum is designed to provide students with a vehicle for obtaining practical experience and training to become competent clinical psychologists. Students will be assigned to either an internal or external practicum site. At that site, they will conduct clinical evaluations, assessments, psychotherapy and other work appropriate to the role of a clinical psychologist. The Advanced Practicum sequence is designed such that students will develop increasingly more complex and advanced clinical skills related to their chosen concentration. Students will also have the opportunity to supervise other students in the program to begin to develop their applied supervisory skills. In addition to their clinical work, students will also be expected to engage in regular individual and group supervision provided by their practicum supervisor. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03822: ADVANCED PRACTICUM II 3 s.h.
Prerequisite: Grade of Pass in PSY 03820 Advanced Practicum I
The Practicum is designed to provide students with a vehicle for obtaining practical experience and training to become competent clinical psychologists. Students will be assigned to either an internal or external practicum site. At that site, they will conduct clinical evaluations, assessments, psychotherapy and other work appropriate to the role of a clinical psychologist. The Advanced Practicum sequence is designed such that students will develop increasingly more complex and advanced clinical skills related to their chosen concentration. Students will also have the opportunity to supervise other students in the program to begin to develop their applied supervisory skills. In addition to their clinical work, students will also be expected to engage in regular individual and group supervision provided by their practicum supervisor. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 03830: HEALTH PSYCHOLOGY 3 s.h.
Prerequisites: Grade of B- or better in PSY 10.630 Biological Bases of Behavior AND PSY 02.715 Intervention II: Evidence-Based Interventions with Adults
This course will provide doctoral students with a foundation of clinical health psychology. Theories of health behaviors will be introduced in relation to behavioral risk factors. Focus will be on assessment and treatment of primary behavioral problems encountered in health psychology. This course is restricted to students matriculated into the doctoral program in clinical psychology and is a required course.

</table>

This seminar is intended to be flexible in content and responsive to emerging trends in healthcare and treatment of individuals within a variety of different contexts. Cognitive-Behavioral treatments have been at the forefront of evidence-based treatments and therefore the content of this seminar may focus on developments within this framework. However, the specific content of this seminar will be deliberately flexible and emerging evidence-base care models and treatments, regardless of the theoretical foundations from which they emerge, will also be included. The focus of the class will be on helping students develop both a knowledge base and an ability to implement and critically evaluate emerging treatments.

What is a "good life?" What personal qualities and life experiences determine happiness? Are there things we can do that increase satisfaction with life in a meaningful and consistent way? How do people overcome adversity and build hope, strength and courage? In short, what really matters? Positive Psychology is an emerging area of psychology that attempts to scientifically examine these timelines and central questions. Positive Psychology focuses on such topics as happiness, hope, contentment, gratitude, creativity, optimism, values and resilience. This class will examine contemporary theory and research in Positive Psychology, with the goal of exploring how we might build a more satisfying life for ourselves and for others, and ultimately use this knowledge to improve organizations, schools, and other institutions for a healthier community.

</thead>
<tbody>
<tr>
<td>PSY 05610</td>
<td>Social And Cultural Diversity</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

This course will review studies that provide an understanding of the issues and trends in a multicultural and diverse society and their influence on social thinking, social influence, and social relations. It will examine research dealing with the dynamics and impact of socially constructed categories. These categories include culture, ethnicity, nationality, age, gender, sexual orientation, mental and physical characteristics, education, family values, religious and spiritual values, socioeconomic status and unique characteristics of individuals, couples, families, ethnic groups, and communities. The implications of these issues for effective counseling is addressed.
PSY 05621: Social Issues in Health and Wellness 3 s.h.
Prerequisite: Matriculation into Ph.D. Program in Clinical Psychology
This course will focus on the ways in which prominent social psychological theories and perspectives have been tested and applied in the context of health, disease, and wellness. Topics including cognitive dissonance, social comparison, social perception, social influences, attitudes, communication and persuasion, relationships and social support, coping style, self-efficacy, self-motivation and self-regulations will be examined for their relations with health and wellness. Specific ways in which the broader socio-cultural environment has an impact on health behaviors, physiology, and disease risk will also be explored. The integration of theoretical and empirical social psychological contributions to health will be emphasized.

PSY 05651: Interpersonal Theory And Psychotherapy 3 s.h.
This course is designed to be an overview of interpersonal psychotherapy and theory. The course will include didactic and experiential components, and will focus on developing the skills and knowledge necessary to use interpersonal techniques in a professional context. In addition to these general skills, the course will also focus on the application of these techniques to specific populations of interest within the psychological community.

PSY 05652: Advanced Seminar In Clinical Practice 3 s.h.
This advanced seminar in clinical practice is intended as a vehicle for bringing cutting edge information to current and future practitioners engaged in clinical services. The topic(s) covered in a specific section will vary depending upon focus chosen by the faculty member who is directing the class. However, the broad focus of each seminar will be on developing knowledge and skills that directly benefit the students' ability to function as a mental health professional.

PSY 05700: Social Psychology 3 s.h.
Prerequisite: Matriculation in Ph.D. in Clinical Psychology Program
Course includes a survey of the field of social psychology with emphasis upon: basic psychological factors affecting social behavior; attitudes; language and communication; society and culture; individual in relation to social groups and organizations; group effectiveness and role behaviors. Emphasis will be placed upon major theories and concepts of social psychology and relationships to other disciplines.

PSY 06533: Tests And Measurements 3 s.h.
The use, organization and interpretation of individual and groups standardized tests are studied. Other means of evaluation, such as observations, inventories and use of cumulative records, will be included. Opportunity will be provided for examining and evaluating these various evaluation instruments and techniques.

PSY 06625: Assessment I: Psychometrics, Evaluation, & Treatment Planning 3 s.h.
Prerequisite: PST 06625 with B- or above
This course will introduce students to three unique applications of assessment principals within clinical and counseling contexts. Specifically, students will learn about the use of the assessment process and instruments for the purpose of career and vocational counseling. In addition, students will learn how to design and implement procedures aimed at assessing the effectiveness of their services at an individual (treatments) and organizational (programs) level. Students will also be introduced to ethical and professional issues related to assessment in these contexts, and they will be expected to demonstrate their skills as part of their classroom experience.

PSY 06631: Psychological Testing Of The Preschool Child 3 s.h.
Practice in administration, analysis and evaluation of individual tests with infants and preschool children with emphasis upon such tests as the Gessell Infant Intelligent Scale, Cattell Infant Intelligence Scale, Gessell Developmental Tests, Minnesota Preschool Test and so forth. Tests will be administered under supervision with subsequent reports.
Course Descriptions

PSY 07201: Research Methods In Psychology
Prerequisite(s): PSY 01106 and PSY 01107 and PSY 07202
This course addresses research design and methodologies for data collection in psychological research. Observation, correlational, and experimental techniques are studied. Also examined are ethics in research and responsible interpretation of research results. There will also be an emphasis throughout the course on applying statistical concepts learned in Statistics in Psychology (PSY 07202), culminating in a formal research project.

PSY 07202: Statistics In Psychology
Prerequisite(s): PSY 01106 AND PSY 01107
This course focuses on the many statistical procedures used in psychological research. Students will learn to select and calculate appropriate procedures to analyze both quantitative and qualitative data. They will gain an understanding of how to select and perform descriptive, correlational, and inferential procedures. There will also be emphasis throughout the course on learning to use statistical software.

PSY 07144: Statistics for Clinical Psychology I: Univariate
Prerequisites: Grade of B- or better in PSY 02.706 Research Methods
This graduate level course provides an overview of basic statistical analyses frequently used in clinical psychological research. Focus is on the appropriate applications and interpretations of these statistical analyses. This course is restricted to students matriculated into the doctoral program in clinical psychology. Faculty Workload Hours: 3

PSY 07740: Statistics for Clinical Psychology II: Multivariate and Advanced Statistics
Prerequisites: Grade of B- or better in PSY 07.714 Statistics for Clinical Psychology I: Univariate
This graduate level course provides an introduction to advanced multivariable statistical analyses frequently used in psychological research, such as canonical correlation analysis, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, path analysis, factor analysis, logistic regression, multidimensional scaling, and cluster analysis. Issues of time-series analysis and meta-analysis are also explored. Focus is on the appropriate applications and interpretations of these statistical analyses in various areas of psychological research, including clinical, cognitive, physiological, and social psychology. This course is restricted to students matriculated into the doctoral program in clinical psychology.

PSY 09209: Child and Adolescent Development
The content of this course covers the physical, cognitive, perceptual, linguistic, emotional, social, moral and sexual development in humans, from the womb through adolescence. The influence of biological and sociocultural mechanisms underlying development within these domains are also considered.

PSY 09210: Adolescent Development
This course studies current theory and practice related to biological, cognitive, psychoanalytic, psychosocial, sexual and moral development in adolescence. Students gain experience in developing beginning levels skills in selection and use of evaluative techniques and in the use of activities appropriate to the various levels of adolescent development. This course is intended for nonmajors and will not fulfill requirements of the Psychology major. Psychology majors must take Lifespan Development (PSY 01308) in order to fulfill the requirements of the major.

PSY 09210: Adolescent Development
This course studies current theory and practice related to biological, cognitive, psychoanalytic, psychosocial, sexual and moral development in adolescence. Students gain experience in developing beginning levels skills in selection and use of evaluative techniques and in the use of activities appropriate to the various levels of adolescent development. This course is intended for nonmajors and will not fulfill requirements of the Psychology major. Psychology majors must take Lifespan Development (PSY 01308) in order to fulfill the requirements of the major.
### Course Descriptions

**PSY 09218:**  Lifespan Development  
**Prerequisites:** PSY 01100 or PST 01104 or PST 01107  
This course provides an overview of human development across the lifespan, including physical, cognitive, social, and personality development. All the major lifespan developmental theories and research will be presented, with heavy emphasis on students' critical thinking about research. This course will cover both normative and atypical development across the lifespan, including the major physical, mental health, and social problems occurring during the life span.

**PSY 09305:**  Developmental Psychopathology  
**Prerequisites:** PSY 01100 or PST 01107  
Using a developmental framework, the student will examine normal and abnormal behavior from infancy through adolescence. Students will learn about the pathways to normal and abnormal behavior, explore the factors that place children at risk for problems as well as the factors that protect children from adversity. Topics will include autism, depression, anxiety, aggression, attentional difficulties, developmental delay, and physical illness.

**PSY 09511:**  Child Psychology  
This course is designed to help professional educators and others concerned with facilitating healthful child development to become more aware of the interrelationship of children's needs, potentialities and competencies. Attention is devoted to the physical, social, mental and emotional growth of the child from conception to puberty.

**PSY 09560:**  Lifespan Development  
This course focuses on the developmental processes across the lifespan. Major theoretical perspectives are presented. Attention is given to physical, cognitive, social and emotional development at each significant developmental periods.

**PSY 09595:**  Introduction To Counseling: Development Of Basic Skills  
This course is a graduate level introduction to the foundation skills necessary for mental health counselors. Thus, there is a minimum expectation of satisfactory understanding from certain core undergraduate areas (e.g., Abnormal Psychology, Personality Theories) and basic experiences with people who have mental illness. This course will cover a wide variety of theoretical and applied topics including, the development of professional identity, observation skills, micro counseling skills and developing a multicultural competence. This course will also review mental status exams, the content areas of the initial intake interview, assessing for suicide and homicide risk, and conceptualizing clients. Students are expected to demonstrate these skills through the use of role plays and videotapes.

**PSY 09700:**  Human Development  
**Prerequisite:** Matriculation into Ph.D. Program in Clinical Psychology  
In this course, students will understand development as a fusion of biological, cognitive, affective, and social aspects of mind and behavior interacting in the context of culture. Students will learn about the theories and methodologies used to study human development across the lifespan from prenatal development through adulthood. The interplay between cognitive, affective, and social development will be emphasized, including such topics as perception, attention, memory, language, problem solving, decision making and interpersonal relationships. This course is restricted to students matriculated into the doctoral program in clinical psychology.

**PSY 10131:**  Physiological Psychology  
**Prerequisites:** PSY 01100 or PST 01104 or PST 01107  
An introductory course in physiological psychology designed to give the student an understanding of the neural processes mediating behavior. A study of advances in such areas as the neural coding of memory and learning; control of human behavior and emotions through physiological changes; the environment as it affects the nervous system; psychobiology of sex; psychosomatic illness; and instrumentation and techniques for investigating problems in physiological psychology.

**PSY 10610:**  Psychopharmacology And Biological Bases Of Behavior  
This course will provide an understanding of basic neurological mechanisms and how they are effected by psychotropic medications. It includes a description of the functioning of neurotransmitters and their role in the etiology of some mental illnesses. The course will review the major classes of psychotropic medications and their use for specific psychological disorders. The integration of psychotropic medications into best practice treatment plans and case management is discussed.

**PSY 10630:**  BIOLOGICAL BASES OF BEHAVIOR  
**Prerequisites:** Matriculation into Ph.D. Program in Clinical Psychology  
This course examines the structure and function of the nervous system, from the cellular to the behavioral level. Topics will include cell types, neuronal membrane electrical properties, synaptic properties, neurobiology of the senses, control of movement, development of the nervous system, and the effects of the nervous system on learning, memory and other psychological behaviors. Current research and animal models will also be discussed. Students will be expected to become proficient in both the basic biological mechanisms as they affect psychological functioning, and in current research in improving psychological functioning through neural and biological interventions. This course is restricted to students matriculated into the doctoral program in clinical psychology.
PSY 22507: Development And Learning 3 s.h.
This course is an introduction to the basic theories, vocabulary and principles of developmental psychology. Special attention is focused upon the role of environmental and educational factors in development, and the application of learning theory to modify behavior. Age-appropriate behaviors expected of children and adolescents are described.

PSY 22512: Educational Psychology 3 s.h.
The dynamics involved in the process of learning are emphasized. An objective of the course is a consideration of the ways psychology can be of value in facilitating the teaching-learning process. Such topics as formulating objectives, motivation and evaluation of learning are considered.

PSY 22586: Psychology Of Motivation And Learning 3 s.h.
An intensive study of the basic theories of learning and current research in motivation and learning is emphasized in this course. Stress is placed upon the significance of these theories and investigations for educational practices.

PSY 22600: Seminar I In Applied Research: School Psychology 3 s.h.
This course will concentrate on the latest developments in the field of educational psychology, emphasizing theoretical and research findings. An introduction to the field of school psychology will also be included. Students will be expected to complete a project to demonstrate scholarly and professional awareness in the field.

PSY 22601: Seminar II In Applied Research: School Psychology 3 s.h.
This course will concentrate on the latest developments in the field of educational psychology, emphasizing theoretical and research findings. An introduction to the field of school psychology will also be included. Students will be expected to complete a project to demonstrate scholarly and professional awareness in the field.

PSY 22602: Applied Research: School Psychology 1 s.h.

ADV 04330: Introduction To Advertising 3 s.h.
Prerequisites: Public Relations/Advertising Major or Advertising Minor
The course provides an overview, including techniques and terminology that are useful in the professional world. Topics include history of advertising, marketing, ethics, law, consumer behavior, print and electronic media, and retail and corporate advertising. The course combines theory of advertising with practical applications.

ADV 04360: Integrated Marketing Communication 3 s.h.
Prerequisites: PR 06350 and ADV 04330
This course explores the expanded as well as the communication portion of the organization’s business and marketing plans. Emphasis is placed on how to translate marketing strategies into a well-defined and seamless communication program directed at all of the organization’s publics.

MAPR 01511: Writing Speeches 1 s.h.
Students will learn how to research the audience, how to locate information and how to write various kinds of speeches. Evaluating the effectiveness of a written speech will be covered.

MAPR 01522: PERSUASION TECHNIQUES 1 s.h.

MAPR 01524: Fundraising And Development 2 s.h.
Students will learn how fundraising and development offices are organized, what research and case studies say about fundraising and development and how to plan and evaluate campaigns.

MAPR 01528: Communication with Special Publics 1 s.h.
This course will show students how to recognize the characteristics of special publics such as blacks and other minorities, women, senior citizens, youth influential and the community power structure. Featured will be communication methods and strategies of communicating effectively with these special publics.

MAPR 01528: Communication with Special Publics 1 s.h.
This course will show students how to recognize the characteristics of special publics such as blacks and other minorities, women, senior citizens, youth influential and the community power structure. Featured will be communication methods and strategies of communicating effectively with these special publics.
Both lateral and vertical communications will be studied in various organizations. The importance of good internal communications on effective external communications will be highlighted. Ideas, plans and methods of initiating and maintaining an effective internal communications program will be emphasized.

MAPR 01531: Media Planning And Buying
1 s.h.
Students will learn how to devise a media plan that will most effectively carry their message to the target audiences. They will gain practice identifying audiences, developing a media budget, devising a media work plan and buying media.

MAPR 01533: Crisis Public Relations
1 s.h.
Students will learn how to anticipate crises and how to plan a communications program that works during a crisis. Working with internal and external audiences before, during and after a crisis will be covered.

MAPR 01534: Small Group Communications
1 s.h.
Addressed in this course will be the definition of small group communication; why to study small group communications; and communication factors such as group size, spatial arrangement in face-to-face groups, status, rank, and power; leadership; group climate; cooperation, competition, and conflict in group climate; and communication networks.

MAPR 01535: Interpersonal Communications
1 s.h.
Considered in this course will be communication between two people. Models of communications developed by authorities in the field will show how the communications process works. Featured will be the concepts of communications such as the frame-of-reference, empathy, authenticity, interpersonal trust, and feeling content. The course will help students understand some of the communication barriers encountered in day-to-day work.

MAPR 01536: Public Relations Law And Ethics
1 s.h.
The course will acquaint students with the substance and interpretation of the "Code of Professional Standards for the Practice of Public Relations," which is the official code of the Public Relations Society of America. During the course students will become familiar with the major laws governing broadcasting, publishing and speaking. A key ingredient of the course will be the opportunity for students to develop personal ethical stances about communications and to refine their skills at judging ethically unclear situations in communications.

MAPR 01537: Contemporary Public Relations Challenges
1 s.h.
This course will mix lecture with seminar discussions on key issues of the day affecting the practice of public relations. Classic problem-solving and decision-making designs will be part of the discussion about the contemporary events. Individual, on-the-job problems from class participants will be discussed and solved in case study fashion. (Using the computer for PR purposes will be stressed.)

MAPR 01538: Legislative Liaison For Public Relations Practitioners
1 s.h.
From this course students will learn how to identify from government officials and records information that affects organizations; to work effectively with government officials at all levels, local, state and federal; to promote legislation that would be helpful to an organization; and to obtain cooperation from government officials and groups.

MAPR 01541: Understanding And Writing Grants And Proposals
1 s.h.
Students will learn where to get grants, how proposals are evaluated and how to write and present proposals.

MAPR 01544: Public Relations Planning
2 s.h.
This course will cover the classic ways to construct a public relations plan, including writing goals and objectives, establishing campaign themes, and strategies, developing PERT and GANTT charts, specifying plan details and learning how to monitor and evaluate the plan. Students will also learn how to write a proposal, how to identify the real communications problem, and how to counsel management about policy related to the success of the plan.

MAPR 01547: Techniques In Communication
3 s.h.
This course consists of five writing modules with varying credits: MAPR01.506-Newswriting, MAPR01.507-Tightening Writing and Translating from Jargon to Comfortable Language, MAPR01.509-Writing Leads That Get Attention, MAPR01.510-Writing Reports, Letters and Memos, and MAPR01.513-Feature Writing. Instruction is given in the five modules in journalistic writing and editing. Students will learn how to prepare effective news releases, to edit the way professional writers do, to gain readers’ attention by writing effective leads, to write reports, memos and letters that communicate effectively, and to prepare and place feature stories for newspapers, journals and magazines. Description of individual modules is given under each respective number.

Rowan University Division Of Global Learning & Partnerships Catalog 2017-2018
360
MAPR 01548: Graduate Writing Basics
In today's fast-action world, you are required to write accurate, hard-hitting communication at a moment's notice. This course provides practical guidelines for students who need to write with speed, precision and power.

MAPR 01548: Graduate Writing Basics
In today's fast-action world, you are required to write accurate, hard-hitting communication at a moment's notice. This course provides practical guidelines for students who need to write with speed, precision and power.

MAPR 01550: Introduction To Communication Research
A study of the research process as it relates to the task of writing a communication thesis. Emphasis will be placed on the four standard, accepted types of research. Students will examine the unique purposes, features, procedures and uses of each research type, using the information as the basis for creating a thesis proposal.

MAPR 01551: Public Relations Overview
This is an overview of the relationships between an organization and its publics. Development of understanding among them is stressed. The course presents the theoretical foundation of public relations and outlines techniques of structured communications between an organization and its publics.

MAPR 01553: Graduate Case Studies In Public Relations
This course reviews and predicts how organizations solve their PR challenges. Through case studies, students evaluate issues, audiences and strategic elements of each situation. Students work through problems in seminar situations and write position papers.

MAPR 01554: Planning Special Events
This course will survey the problems and solutions surrounding the staging of special events and workshops in the practice of public relations. Events like ground-breaking news conferences, dignitary visits, seminars, anniversary celebrations and many more pose planning and implementation problems for the practitioner. Students will anticipate and solve these problems and have the option to make plans of their own for upcoming events. Included will be budgeting, involving the audience in planning, choosing sites, working with speakers and evaluating the event workshop.

MAPR 01555: Persuasive And Feature Writing
Students will learn in this module additional technical skills in modifying opinion through writing. Students will receive a personal checklist of their persuasive writing needs during the course. In addition, students will learn how to prepare and place feature stories for newspapers, journals, and magazines.

MAPR 01556: Organizational Public Relations Management & Counseling
This three-credit course will acquaint students with many aspects of the public relations profession (or review for some). Students will learn about the composition of PR departments, the steps necessary to manage a public relations department and accepted methods to establish budgets in a public relations shop. Students will be expected to analyze the economic realities surrounding the practice of public relations in a variety of settings. For the first time, there will be a concentration on public relations counseling, media training and rehearsal, and media relations.

MAPR 01557: Using Electronic Media In Public Relations
This course will acquaint students with the techniques of producing video for electronic media and its proper use in a public relations program within a given budget. They will become familiar with the different requirements for electronic media production. Students will also study the steps involved in applying this method: choosing appropriate film subjects and film principles, properly conducting the planning of a story and performing the right production practices.

MAPR 01558: Integrated Marketing Communication
The relationship of marketing, public relations and advertising will be explored. Marketing, PR and advertising techniques—including cost-effective ways of reaching key audiences—will be discussed, as will positioning, testing and evaluating.

MAPR 01559: Strategic Public Affairs
The course examines theory and practice of strategic political communications, including depth study of persuasion campaigns, use of propaganda in public affairs, and the role of communicators in engaging the public in the critical public policy issues.
This course is an overview of the ethical and legal means used by public affairs representatives in influencing the political, legislative, and regular process of government. Emphasis is placed on demonstrating strong writing and research skills, as well as developing effective communication plans.

MAPR 01561: ADV TECHNIQUES COMMUNICATION 3 s.h.

MAPR 01562: INTEG MKT COM (IMC) ONLINE OVR 3 s.h.

MAPR 01563: RSRCH, MESSAG & AUD ONLINE ANA 3 s.h.

MAPR 01564: IMC AND NEW MEDIA 3 s.h.

MAPR 01566: Public Affairs Advertising 1 s.h.

This 5-week module will teach students the basic principles of advertising in the public area. Topics will include using advertising to set the agenda of a public policy debate; how to apply the lessons of product advertising; conditions that enhance the effectiveness of advertising; issue advertising as protected speech; the importance of a good working relationship with advertising agencies; advertising in a crisis; the role of research in advertising; and evaluating the effectiveness of public affairs advertising. The module will also convey real-world examples from practitioners to present to the student a broad understanding of public affairs advertising.

MAPR 01567: Public Affairs And Labor Communication 1 s.h.

This 5-week module concentrates on the role public affairs plays in an organization's relationships with its employees and the unions which represent them. Students will explore the relationship between management, unions and labor, and the role of public affairs in those relationships. Topics include: community organizing; employee communications; building and maintaining political support; federal and state regulations regarding employee relations; media relations; the "Managerial Creed;" and the legal aspects of labor/employee communication. Students will gain thorough knowledge by learning about current cases.

MAPR 01568: Graduate Strategic Visual Communication 3 s.h.

The ability to conceive, produce and deploy rich visual imagery is now a core requirement for advertising and PR practitioners. To help students prepare for this rapidly evolving field, this class explores how and why visual media have overtaken text-based content. Through practical, hands-on individual experiences and class projects, it provides a framework for understanding the different types of visual media and their participants, choosing the right tools, and devising the strategies to succeed in this new digital era.

MAPR 01575: INDEP STDY-PUBLIC RELATIONS .5 to 6 s.h.

MAPR 01610: Internship In Public Relations 3 to 6 s.h.

This course requires on-the-job apprenticeship in a public relations program that involves a wide variety of tasks. The internship is overseen by a public relations professional on the job and by a PR professor.

MAPR 01620: Seminar In Public Relations 3 to 6 s.h.

Prerequisites: MAPR 01547 (allows concurrent enrollment), MAPR 01550 (allows concurrent enrollment), and MAPR 01551 (allows concurrent enrollment).

Each student will be required to develop a major communication project on any phase of educational or corporate communications. The project will display appropriate research procedures and skill in communications. Some seminar sessions will be used to provide additional communication background for students. Students are required to complete both the fall and spring seminars for the program. The fall semester is a prerequisite for the spring semester. The student must have completed or be enrolled in Public Relations Overview (MAPR 01551), Techniques of Communication (MAPR 01547), and Intro to Communications Research (MAPR 01550).
Course Descriptions

MAPR 06505: Special Topics In Public Relations 1 s.h.
Special topics provide an opportunity for graduate students to explore an emerging issue in the field of public relations in a timely fashion. The course presents an opportunity to study the topic under the guidance of an expert in the particular field or issue.

MAPR 06515: Online Public Relations 3 s.h.
Public relations has moved to the Internet, and in the process online communication skills have become essential to online and offline public relations practice. Online public relations explores the practical tools necessary for using the internet in public relations and provides a broad overview for creating an online newsroom.

MAPR 98503: School Public Relations 3 s.h.
This is an overview of the relationships of the school and its various publics. The public character of the school and the need for public understanding of the school are considered. Development of understanding between the school and the community is stressed.

MAPR 99523: POLLS & SURVEYS 1 s.h.

PR 06301: Basic Public Relations Writing 3 s.h.
Basic Public Relations Writing introduces students to the tasks of writing and editing required in a public relations position. Students will learn to write for both print and electronic media, develop their skills in grammar, syntax and usage and learn to copy edit their own work and the work of others.

PR 06310: Introduction To Public Relations/Advertising Research 3 s.h.
Prerequisites: 60 credits required
The course studies both qualitative and quantitative research methods necessary for success in the fields of public relations and advertising. Emphasis is placed on evaluation of secondary searches, individual and group interviews, media audience measurements, market structure, segmentation and usage studies, and tracking studies.

PR 06350: Introduction To Public Relations 3 s.h.
Prerequisite(s): Public Relations/Advertising Major
This course explores the history and role of public relations in society. Students explore mass media, persuasion, publicity, radio and television. Students examine special events, crisis management, communication techniques, research and evaluation, communication law and ethics. Basically a theory course, this introduction also applies ideas practically to real clients and organizations.

PR 99162: Public Opinion 3 s.h.
Prerequisites: PR 06310
This course includes the nature and role of public opinion, the dynamics of public opinion processes and the numerous factors which shape or influence opinion. Students examine the mass media, evaluating their roles as molders and reflectors of public opinion. Major topics that influence public opinion are discussed, including gratifications, agenda setting, knowledge gaps, censorship and propaganda.

RTF 03270: Film History And Appreciation I 3 s.h.
Prerequisite(s): COMP 01111
Students trace the development of motion pictures as an art form from the 1890s to 1941. Representative selections from the various genres are screened, then discussed in terms of art, technique, content and historical perspective, as well as directorial style. Part I is not a prerequisite for Part II; these courses may be taken in any order; students may opt for one or both courses.

RTF 03271: Film History And Appreciation II 3 s.h.
Prerequisite: COMP 01111 and COMP 01112
This course is a continuation of RTF 03.270 with emphasis on contemporary genres and implications. Students trace the modern cinema from 1941 to the present. Students may take Part II prior to Part I; although the content is chronological, Part I is not a prerequisite for Part II.

RTF 03275: Applied Media Aesthetics: Sight, Sound And Story 3 s.h.
Prerequisites: COMP 01111 and COMP 01112
This course offers students an introduction to the aesthetic concepts as applied directly to radio, television, and film media. Using examples from these media, students will study, discuss, and analyze design and composition elements as they apply to the production process. A basic vocabulary of aesthetic terminology will be assembled and students will be responsible for understanding and applying those terms through various written and visual assignments.
RTF 03295: Introduction To New Media 3 s.h.
Prerequisites: COMP 01111 and COMP 01112

Introduction to New Media surveys emerging digital communication and entertainment media and teaches new media from the perspective of the producer. Students will discuss the evolution, social and historical implications, and production of media forms with an emphasis on social networking, user generated and other web media.

RTF 03393: Film Scenario Writing - Wi 3 s.h.
Prerequisites: COMP 01111 and COMP 01112

The course covers the basic technical requirements for writing movie scripts and the problems of adapting material to screen and script analysis. By viewing contemporary movies and studying plotting, point-of-view, character creation and dialogue, students learn how a film script is put together and write an original script.

RTF 10520: Graduate Audio Production 3 s.h.

Graduate Audio Production teaches the basic concepts of sound as it relates to the medium of radio, television, and film. Through coordinated reading assignments and in-class listening, students will become familiar with various styles of documentary audio production. Students will also study the historical evolution of film sound and music through lectures, viewing, and in-class discussion. Students will be expected to integrate this information into the production of professional audio documentaries and sound design for film.

RTF 10521: Graduate Documentary Production 3 s.h.

Graduate Documentary Production is a graduate course where students lacking will gain knowledge and skills to produce documentary projects. Students will explore the culture of the media professional through a series of group assignments that stress productive collaboration, objective criticism and analysis, professional ethics, and time management. Students will develop competencies in the processes and equipment of television field production, experiencing all phases of pre-production, production, and post-production as they research, write, shoot and edit creative projects.

RTF 10522: Graduate Film Production 3 s.h.

Graduate Film Production is a graduate course where students are introduced to the technological, organizational and aesthetic production competencies for shooting narrative films using color, lights and sound. Readings will emphasize cinematic visual storytelling conventions. Homework assignments will emphasize preproduction, previsualization and production coordination of short narrative films. Students will produce a series of production assignments culminating in the production of a short narrative film.

RTF 10523: Graduate Screenwriting 3 s.h.

Graduate Screenwriting is an intensive writing workshop where students learn the basics of dramatic writing for the screen. The first half of the course is built around screenings, lectures, discussions and exercises where students explore the fundamentals of daily writing, dramatic structure, visual writing, characterization, dialogue and proper screenplay formatting. Film analysis will focus on classic and contemporary shorts and feature films. The second half of the semester focuses on the development, and re-writing of a narrative short film based on an incident from a longer feature screenplay outline.

EDTC 33510: Emerging Technology Tools and the Curriculum 3 s.h.

The purpose of the course is to investigate the philosophical, psychological, sociological, and educational implications of emerging technology tools and their impact on the public school curriculum. Current relationships between theory and practice, along with future technologies, are examined. Students taking this course will reflect on in-depth evidence-based technology infusion within the curriculum and determine changes that should be incorporated within their own lessons and their school/district curriculum.

EDTC 33531: Coding and Logical Thinking to Support Learning 3 s.h.

The course prepares educators to focus on exploring rationales, resources, and strategies of incorporating coding, programming, and logical thinking in P-12 classrooms. Educators will not only become familiar with the basics of coding and logical thinking, but they will also research case studies and evaluate best practices, available resources, and curriculum. The content of this graduate-level course will focus on the development of the educators' understanding of ways to effectively use best-practice teaching strategies with respect to coding, programming, and logical thinking so as to support P-12 learning.
EDTC 33540: Developing Online Resources for P-12 Students  
This course prepares educators to develop online lessons and resources for P-12 students in classroom and online learning environments. Participants will learn the theory and practice of P-12 online teaching and learning and explore effective strategies to develop useful web-based lessons and resources. Emphasis is placed on understanding the trend of P-12 online education, selecting effective tools for online instruction, engaging students through collaborative activities, and developing and evaluating online resources. Participants will become familiar with technological tools for designing online resources and develop knowledge of online resources for teaching and student use.

EDTC 33570: Researching and Analyzing Educational Technology  
The course is designed to induct teachers into educational technology research. The primary goal of this course is to introduce instructional system design (ISD) theories and frameworks and the types of educational technology research in P-12 and higher education settings. Participants will review the instructional system design processes and explore both qualitative and quantitative research studies of educational technology in P-12 and higher education settings. Participants will develop their skills in analyzing and summarizing literature in educational technology.

EDTC 33580: Introduction To Educational Technology  
This course is intended for educators and educational leaders who place a high value on successful teaching and learning. The purpose of the course is to help educators reflect on educational technology best practices and discover ways to begin infusing technology into their teaching so as to improve student learning and engagement. Students of this course will investigate two essential questions. The first one will focus on how teachers can use technology to support learning in their classrooms. The second one will focus on how teachers can find other effective technology tools to support learning in their classrooms. The course will draw on examples from elementary, secondary, and postsecondary education. This course will provide the initial opportunities necessary to begin technology infusion within the classroom.

EDTC 33584: Digital Citizenship in 21st Century Schools  
The primary objective of this course is to provide a comprehensive introduction to digital citizenship in the 21st Century for educators. This course provides a constructivist approach to exploring digital citizenship issues thus ensuring teachers are experts and modelers of digital citizenship. Additionally, the experiences in this course will focus on building on the learners' abilities to teach students in depth about digital citizenship.

EDTC 33584: Digital Citizenship in 21st Century Schools  
The primary objective of this course is to provide a comprehensive introduction to desktop publishing using desktop publishing programs that can be used in the educational setting. This course provides a hands-on approach to desktop publishing using both high-end and low-end publishing programs. The experiences in this course will help students to become more involved with the visual impact of their ideas on the readers. Students will learn to integrate ideas with words, typestyle, graphics and other features involved in the production of publications with a high level of visual impact.

EDTC 33585: Internet In The Classroom  
This course provides and introduction to the Internet emphasizing its value in teaching and learning. In this course students will discover how to use some basic Internet navigation programs to locate and gather information from the Internet. Lessons will include finding and subscribing to listserv lists in education, using ERIC online, accessing and employing web search engines, locating and downloading files, handling files with e-mail, discovering and capturing multimedia elements on the web, developing a personal web page, and analyzing the implication of the Internet for lifelong learning in education.

EDTC 33600: Seminar in Educational Technology  
The purpose of this course is to introduce educators to current research trends and topics in educational technology through literature review, discussions, and case studies. The course focuses on building a knowledge base in trendy topics, concepts, and technologies that drive educational change and innovation in P-12 education. Participants will explore important developments of educational technology, trends of technology adoption, as well as challenges and potential solutions of implementing advanced technologies in teaching and learning. In addition, participants will become familiar with the major sources of educational technology research and improve their analytical and critical thinking skills.
EDUC 01282: Teaching In Learning Communities II-Art
Prerequisite: C- or better in EDUC 01270
Teaching in Learning Communities II Art furthers the understanding of successful and caring learning communities begun in Learning Communities I. A field component is required.

EDUC 01284: Teaching In Learning Communities II-Music
Prerequisite: C- or better in EDUC 01270
Teaching in learning Communities II Music is specifically designed to continue the development of an understanding of successful and caring learning communities begun in the Teaching in Learning Communities I course and apply it specifically to the music classroom as a "learning community." This course will be music education specific to develop a broad and deep knowledge of music education processes throughout grades K-12 in music settings. A field component is part of this course.

HPE 00100: Teaching Concepts of Driver Education
Prerequisite(s): (ATR 00235 or PHED 35235) and (HPE 00325 or HLTH 37325) or (ATR 00235 or PHED 35235) and (HPE 00326 or HLTH 37326)
The course is designed for individuals seeking New Jersey Driver Education teacher endorsement. The content includes learning to teach motor vehicle operation, driving environment and the student development of teaching techniques emphasizing safety, risk perception, and decision-making processes applied in a vehicle. Learning how to instruct others in performing behind-the-wheel driving will be scheduled outside of class time.

SECD 03330: Practicum In Teaching And Learning A
Practicum in Teaching and Learning A is a co-requisite with Teaching and Learning Mathematics A, Teaching and Learning English/Language Arts A, Teaching and Learning Social Studies A, or Teaching and Learning Foreign Language A, Teaching and Learning Science A. The course will consist of a general opening session, a general closing session, sessions at a cooperating public middle school, and visits to government agencies, commercial sites, community sites, campus-based laboratories (when appropriate) and/or museums.

SECD 03332: Practicum In Teaching And Learning B
Practicum in Teaching and Learning B is a co-requisite with Teaching and Learning Mathematics B, Teaching and Learning English/Language Arts B, Teaching and Learning Social Studies B, or Teaching and Learning Foreign Language B, Teaching and Learning Science. The course will consist of a general opening session, a general closing session, sessions at a cooperating public high school, and visits to governmental agencies, commercial sites, community sites, campus-based laboratories (when appropriate) and/or museums.

SMED 31350: Elementary Art Methods: Teaching and Learning Art A
Prerequisites: C- or better in EDUC 01282 and READ 30319 and SMED 33420
Corequisite: SECD 03330
This course prepares pre-service teachers for instructing preschool, elementary and middle school students in the visual arts. Through laboratory and clinical field experiences learners will apply theories of artistic learning to authentic arts classroom situations while under faculty supervision. Assignments involve the learner in examining art curriculums, a variety of assessment strategies used by art teachers in the classroom, and approaches for critiquing student works and aesthetic enrichment. The learner will be required to prepare art lessons and units of study that demonstrate a working knowledge of artistic concepts and skills, an understanding of the artistic development of children, and considerations for adaptive learning in the arts for special populations.
SMED 31360: Secondary Art Methods: Teaching and Learning Art B 3 s.h.
Prerequisites: ELEM 02270 and ELEM 02282
This course prepares pre-service teachers for instructing high school students in the visual arts. Through laboratory and clinical field experiences learners will apply theories of artistic learning to authentic arts classroom situations while under faculty supervision. Assignments involve the learner in examining high school art curriculums, a variety of assessment strategies used by art teachers in the classroom, and approaches for critiquing student works and aesthetic enrichment. The learner will be required to prepare art lessons and units of study that demonstrate a working knowledge of artistic concepts and skills, an understanding of the artistic development of the adolescent, and considerations for adaptive learning in the arts for special populations.

SMED 31450: Residency II: Elementary and Secondary Art 10 s.h.
Corequisites: SECD 03350 and SMED 31451
This senior level course provides the teacher education candidate with opportunities to demonstrate the professional knowledge, pedagogic skills and dispositions developed in preservice professional course work. The student teaching experience is a supervised, full-time activity conducted in public elementary, middle and secondary art classrooms. The experience requires demonstrated mastery of artistic content, lesson planning, instructional techniques in the arts, student assessment and classroom management. Admission to this course requires completion of professional education courses and near completion of academic major courses. A minimum grade point average of 3.0 in major and professional education courses is required.

SMED 31451: Clinical Practice Seminar In Art Education 1 s.h.
Corequisites: SECD 03350 and SMED 31450
This capstone seminar for art teacher candidates provides an opportunity to establish structural knowledge that will enable the integration of applied art classroom experiences during the subsequent weeks of student teaching and; creates a forum for students to process new experiences in the elementary, middle and secondary schools with art professionals who share an understanding of the context in the art classroom. Interviewing skills and a professional portfolio will be developed during this course.

SMED 32411: Clinical Practice In Music 10 s.h.
Corequisites: SECD 03350 and SMED 32412
This senior level course provides the teacher education candidate with opportunities to demonstrate the professional knowledge, pedagogic skills and problem-solving ability developed in preservice, professional course work. The student teaching experience is a supervised, full-time activity conducted off-campus in a public secondary school classroom. The experience requires demonstrated proficiency in lesson planning and evaluation, instructional techniques, student assessment and classroom management. Admission to student teaching requires near completion of academic major, minimum grade point average of 3.0 in major and recommendations by major field academic department and teacher education faculty.

SMED 32412: Clinical Practice Seminar In Music 1 s.h.
Corequisites: SECD 03350
This capstone seminar for music student teachers provides an opportunity to establish structural knowledge apriori that will enable the integration of applied music classroom experiences during the subsequent weeks of student teaching, and; creates a forum for students to process their new experiences in the schools with music professionals who share the context for the music classroom.

SMED 33420: Educational Technology 1 s.h.
This laboratory course focuses on the use of educational technology in support of student learning, and integration of technology into the K-12 curriculum. Strategies to incorporate technology and the World Wide Web into the school curriculum will be explored. Each student will develop an electronic portfolio to demonstrate their growth over time and record evidence of their teaching competencies.
SMED 33510: Computers And The Curriculum 3 s.h.
The philosophical, psychological, sociological and educational implications of the computer and its impact on the public school curriculum are explored. Current relationships between theory and practice, along with future technologies, are examined.

SMED 33600: Problems In Mathematics Education I 3 s.h.
Investigates recent developments and relevant research in mathematics education. The student will determine a problem and investigate the problem as a project. The project must deal with a problem in mathematics, mathematics education, or computer science education. This project may be local or national in scope.

SMED 33601: Problems In Mathematics Education II 3 s.h.
Investigates recent developments and relevant research in mathematics education. The student will determine a problem and investigate the problem as a project. The project must deal with a problem in mathematics, mathematics education, or computer science education. This project may be local or national in scope.

STEM 60501: STEM: Teaching & Research Methods I 3 s.h.
Prerequisite(s): Matriculation in the MA in STEM EducationCorequisite(s): STEM 60510 and READ 30520
This is the first course in the 3-course STEM methods sequence for candidates in the Master of Arts in STEM Education program. Through integrated STEM coursework, candidates will focus on learning how to make content explicit; eliciting and interpret students’ thinking; engage in strategic relationship-building conversations with students; analyze instruction for the purpose of improving it; and communicate with other professionals.

STEM 60502: STEM: Teaching & Research Methods II: Mathematics 5 s.h.
Prerequisite(s): B- or higher in STEM 60501, STEM 60510, and READ 30520
This is the second course in the 3-course STEM methods sequence for candidates in the Mathematics specialization in the Master of Arts in STEM Education program. Grounded in national and state mathematics standards, the course introduces teaching models that support good mathematics teaching practices. Course activities and assignment are directly connected to the co-requisite resident experiences. The course will help prepare pre-service mathematics teachers to develop STEM pedagogy in the teaching of mathematics. This course is offered annually during the fall semester.

STEM 60503: STEM: Teaching & Research Methods III: Mathematics 6 s.h.
Prerequisites B- or higher in STEM 60501, STEM 60510, READ 30520 Co-requisites: STEM 60512
This is the final course in the 3-course STEM methods sequence for candidates in the Mathematics Specialization in the Master of Arts in STEM Education program. Grounded in relevant research in mathematics and STEM education with implications for teaching practice and national and state mathematics standards, the course continues to build on teaching models that support good mathematics teaching practices. In addition, this course explores contemporary issues in mathematics and STEM education. Course activities and assignments and directly connected to the co-requisite residency experiences. This course is offered annually during the Spring semester.

STEM 60504: Professional Seminar for STEM Educators 3 s.h.
Prerequisite(s): B- or higher in STEM 60513 and STEM 60503
This is the capstone course in the MA in STEM Education and will prepare candidates for their teaching positions by focusing on issues critical to new teachers. The course is designed to support candidates in their final transition from teacher candidate to teacher. Topics include understanding school climate, developing a professional development plan, developing a plan for communicating with families, planning for the first six weeks (or unit) of school, and preparing for a substitute teacher.

STEM 60510: Teaching STEM in Diverse Settings 3 s.h.
Prerequisite(s): Matriculation in the MA in STEM EducationCorequisite(s): STEM 60501, READ 30520
This course will enable STEM Education candidates to gain a multifaceted understanding of the individual and institutional elements that impact student achievement in STEM. Candidates will investigate the role that gender, SES, race, ethnicity, home language, religion, and other identity-based aspects shape school experiences, learning, and achievement in STEM. Candidates will then learn about specific approaches and instructional practices that they can use in the classroom to promote learning for nonmainstream students, including teaching academic language, differentiating instruction and assessments, and supporting home, community and school partnerships.
STEM 60512:  STEM: Education Residency I  
Prerequisite(s): B- or higher in STEM 60501, STEM 60510, and READ 30520
This course serves as the first semester of the yearlong teacher residency required for candidates in the MA in STEM Education. Each resident is placed in a middle or high school and attends that placement 3 full days per week during the Fall semester. Using both Rowan and placement school district measures of teaching effectiveness, supervisors will evaluate residents on requires demonstrated mastery of subject area content, lesson planning, and multiple instructional strategies to meet varied student needs and demonstrated ability to assess learner progress and modify instruction accordingly, manage all aspects of classroom activity, and work collaboratively with all instructional, administrative, parental, and community members of the classroom and school community.

STEM 60513:  STEM: Education Residency II  
Prerequisite(s): B- or higher in STEM 60502, STEM 60512 and SELN 60576
This is the second of the two field experiences required for candidates in the MA in STEM Education. Continuing in their field placement from STEM Education Residency I, candidates will attend their field placements 4 full days per week during the Spring semester. Using both Rowan and placement school district measures of teaching effectiveness, supervisors will evaluate residents on requires demonstrated mastery of subject area content, lesson planning, and multiple instructional strategies to meet varied student needs and demonstrated ability to assess learner progress and modify instruction accordingly, manage all aspects of classroom activity, and work collaboratively with all instructional, administrative, parental, and community members of the classroom and school community. The course will run from January through June to enable candidates to engage in all end-of-year activities at their residency sites.

STEM 60522:  STEM: Teaching & Research Methods II: Science  
Prerequisite: STEM 60501 and READ 30520 and STEM 60510; Co-requisite: STEM 60512 and SELN 60576
This is the second course in the 3-course STEM methods sequence for candidates in the Science track in the Master of Arts in STEM Education program. Grounded in national and state science standards, the course introduces teaching models that support good science teaching practices. Courses activities and assignments are directly connected to the co-requisite residency experiences. The course will help prepare pre-service science teachers to develop STEM pedagogy in the teaching of science. This course is offered annually during the Fall semester.

STEM 60523:  STEM: Teaching & Research Methods III: Science  
Prerequisites: B- or higher in STEM 60522 and STEM 60512 and SELN 60576; Corequisite: STEM 60513
This is the final course in the 3-course STEM methods sequence for candidates in the Science Track in the Master of Arts in STEM Education program. Grounded in relevant research in science and course continues to build on teaching models that support good science teaching practices. In addition, this course explores contemporary issues in science and STEM education. Course activities and assignments are directly connected to the co-requisite residency experiences. This course is offered annually during the Spring semester.
ANTH 02202: Introduction To Cultural Anthropology  
This course presents cultural anthropology as a coherent system of data and theory designed to explain the variety of human group behavior, giving special emphasis to the structure and function of non-western cultures.

ANTH 02250: Introduction To Anthropological Linguistics  
Students in this interdisciplinary course will engage in the scientific study of language with particular reference to the relationships among the languages, thoughts, and cultures of speech communities living all over the world, including within the United States, France, India, Canada, Spain, Japan and Peru, among others. Additional course topics include the process of human language acquisition, structures of human language, bilingualism and the ways in which race, class, gender, and other social characteristics may be displayed through the use of language. This course is offered every other year, beginning in 2009.

ANTH 02321: Cultural Ecology  
Prerequisites: ANTH 02202  
This course examines the relation of human groups to their environments as mediated by culture. It emphasizes the interaction of significant variables in the natural habitat, technology, and social institutions. This course may not be offered annually.

DPEM 43300: Bioterrorism and Weapons of Mass Destruction  
Prerequisite: DPEM 00101  
This introductory course provides an overview of the different agents of biological, chemical and nuclear weapons of mass destruction. The intelligence preparation for vulnerability analyses from nuclear, biological and chemical weapons including low-level radiation, depleted uranium, toxic industrial chemical concerns and vulnerability reduction measures that can be implemented for population protection are also addressed.

DPEM 43355: Emergency Exercises-Design, Implementation and Evaluation  
Prerequisite(s): DPEM 43101  
This course provides insight into the tasks, roles and responsibilities required to design and conduct an emergency management exercise that is a part of a long-term, carefully constructed plan in which exercises help the community prepare for disasters. Students will use a community needs assessment to develop the case for exercises, design an exercise, and outline an evaluation plan aimed at improving competence in all emergency functions. Students will also be introduced to the concept of a comprehensive exercise program used to improve on the four phases of emergency management. The course instruction will follow and meet the guidelines established by the Federal Emergency Management Agency exercise design and evaluation courses and the Department of Homeland Security Exercise and Evaluation Program.

DPEM 43395: Emergency Operations and Business Continuity  
Prerequisite(s): DPEM 43101 and DPEM 43350 or Permission of Instructor  
This course provides a step-by-step approach to the development of a comprehensive emergency/disaster/crisis management plan for organizations (e.g. manufacturing companies, corporate offices, retailers, utilities, government agencies, or any organization where people work or gather). By analyzing how organizations prepare for, respond to, and recover from an emergency/crisis (e.g., severe winter storm) or more localized (e.g., chemical spill, building fire), this course emphasizes collaborative processes, applied methodologies used to plan and recover systems and processes when faced with various types of disaster and crisis recovery scenarios that impact communities, businesses and organizations as they seek to continue their operations. Finally, the course will emphasize how disaster preparedness directly correlates to the ability to continue organizational operations.

DPEM 43420: Risk Analysis for Disaster Preparedness and Homeland Security  
Prerequisite(s): DPEM 43101  
This course provides an analysis of vulnerability assessment as the foundation for effective hazard mitigation by introducing and explaining various methodologies to carry out the process of vulnerability assessment. Moreover, this course will introduce students to (1) material in the risk communication/risk perception literature; (2) basic modeling techniques in quantitative risk assessment; (3) a risk management framework suitable for quantitative risk modeling and risk communication, and (4) case studies related to technological hazards and natural hazards.

DPEM 43495: Internship in Disaster Preparedness and Emergency Management  
Prerequisite(s): DPEM 43101 and DPEM 43400 or Permission of Instructor  
This course is designed to provide students with an experience in the profession of emergency management, homeland security and disaster preparedness beyond that of the classroom.

NOTE: Additional placement requirements such as background checks and fingerprinting may be required.
HSRV 01100: Introduction to Human Services 3 s.h.
Prerequisite: BA in Human Services Majors
An interdisciplinary orientation to major Human Services agencies and institutions in this region, including social work, education, corrections, substance abuse, child welfare, mental health, recreation, geriatrics, etc. Participants will study the roles and functions of professionals in these types of Human Services careers.

HSRV 01200: Applied Ethics in Human Services 3 s.h.
Applied Ethics in Human Services provides an in depth analysis of human services ethics, application of the National Organization of Human Services (NOHS) Code of Ethics, and concepts and dilemmas specific to helping relationships. From a foundation in multicultural values, the course investigates the issues of responsible practice through critical analysis and discussion. The student will apply decision making skills and critical analysis to professional situations where standards conflict. Topics include: confidentiality, duty to warn, client rights, dual relationships, competence, multi-cultural issues, sanity, malpractice and expert testimony.

HSRV 01351: Field Experience for Human Services I 3 or 6 s.h.
Prerequisite: HSRV 01100, HSRV 01310, and EITHER SOC 08120 or PSY 01107
This course provides students with the opportunity to be engaged in a field experience which will require them to apply the knowledge they have gained from their previous classes focused on human services course content, theory, and research methods. Students are required to take the course, followed by the Field Experience II course, over their senior year, three credit hours during the fall semester and three credit hours during the spring semester. Both courses are primarily aimed at an academic objective: applying theory to experience. This is accomplished by having each student conduct a research exercise while working at an internship within a selected agency in the community, and by having students react to fellow students’ research within the classroom setting.

HSRV 01400: Senior Seminar in Human Services 3 s.h.
Prerequisite: senior standing and completion of core requirements.
HSRV 01400: Senior Seminar in Human Services - WI Senior Seminar constitutes the capstone experience for students majoring in Human Services and represents the culminating exit course for students. This course is a writing intensive experience designed to help students integrate their classroom and field experience into a coherent sense of human services as a profession as well as a sense of the student’s personal commitment to the values and ethics of the profession. As a culminating experience, this course is based on a portfolio created from the experience the student has accrued during his/her participation in both the academic and experiential components of the major. Prerequisite: senior standing and completion of core requirements.

HSRV 08310: Research Methods for Human Services 3 s.h.
Prerequisites: HSRV 0110, either STAT 02100 or STAT 02260, AND EITHER SOC 08120 or PSY 01107
This course introduces the student to the scientific methods used in the social sciences, the relationship between theory and methodologies of data collection and analysis, the rudiments of basic types of data analysis and interpretation. Given the applied nature of the human services degree, particular emphasis is placed on qualitative research methods and analyses. This course is offered annually.

SOC 08120: Introduction To Sociology 3 s.h.
Prerequisites
This course analyzes the characteristics of social organization and focuses on the study of social relationships and interaction. It examines the social basis of behavior patterns, the nature of social problems and the possibilities for social change. (Required for Sociology majors)

SOC 08121: Introduction to Sociology for Premed Students 3 s.h.
Prerequisite(s): None
This course provides students with a general understanding of the theoretical, conceptual, and methodological approaches to studying people in groups, institutions, societies and interpersonal interaction. It examines some of the realities of everyday life and critically analyzes perceptions of these social phenomena. Special attention is given to understanding social phenomena with particular relevance to health and medicine, as well as a wide range of other social arenas.

SOC 08211: Social Problems 3 s.h.
This course examines major social problems in the society as a part of the ongoing social process, with particular reference to their economic, political and other social roots. Topics covered can include such areas as mental illness, poverty, structured inequality, various forms of addiction, war, racism and crime.
Course Descriptions

SOC 08223: The Sociology Of Social Welfare
Prerequisites: SOC 08120
This course examines the socio-historical development of social welfare, focusing upon changes in the theory and practice of social welfare in American and other societies. This course may not be offered annually.

SOC 08328: Sociology of Disasters and Crisis
Prerequisites: None
This course explores disasters and emergency response via a sociological lens and examines the need to systematically understand the social impacts of such tragic events. Participants will learn how to be better prepared to function as an effective member of their community to enhance the chances of improving preparedness, mitigation, and response to possible natural or technological hazards. Furthermore, this course will include discussions of disaster types, individual and collective vulnerabilities of various populations to disasters, disaster-related organization and social policies, issues of disaster preparedness, the media and disaster response, and challenges/opportunities of disaster recovery and prevention.

SOC 08331: Classical Sociological Theory
Prerequisites: SOC 08120
This course studies the historical and conceptual development of the major schools of thought within the "sociological tradition." It emphasizes an understanding of the nature of theory and systems of theory, the application of theory, the problems inherent in theorizing about society and social life and the relations between sociological theory and research. (Required for sociology majors)

SOC 08332: Contemporary Sociological Theory
Prerequisites: SOC 08120
Contemporary Sociological Theory is one of two core courses that starts with the classical period and culminates with this course covering theory in recent times. Contemporary Sociological Theory examines the state of the field in the twentieth century, focusing on theoretical issues and frameworks that have come to define Sociology, its research and methods. It will include consideration of the Parsonian structural functionalism of the 1950s, the critique of Positivism that emerged during the 1960s, and the fragmentation of the field into the many perspectives and approaches there are today.

SOC 08339: Sociological Practice
Prerequisites: SOC 08120
This course focuses on using sociological theories and concepts, research methods, and ethical decision-making processes to solve problems. Sociological practice occurs at all levels from the individual to societal. The course links the student to a variety of career pathways and occupational settings, including mental health, rehabilitation, work in prisons, and youth and family services.

SOC 08375: Sociological Research Methods
Prerequisites: SOC 08120
This course introduces the student to the scientific methods used in the social sciences, the relationship between sociological theory and methodologies of data collection and analysis, the rudiments of basic types of data analysis and interpretation. Students will learn to read and summarize basic scientific reports, to critically analyze and evaluate reported research findings in the social sciences, and to recognize ethical concerns associated with sociological research. (Required for Sociology majors)

SOC 08376: Social Statistics
Prerequisites: SOC 08120
This course familiarizes the student with the basics in elementary statistical methods used in the social sciences and the uses and misuses of statistics for various purposes. The student will learn to calculate and understand the proper use of basic statistics commonly used in the social sciences. (Required for Sociology majors)

SOC 08399: Sociology Of The Holocaust - Wi
Prerequisites: SOC 08120
This course primarily deals with structural and experiential dimensions of the genocidal process affecting the European Jews, their ethnicity, culture and religious community after 1933. Gypsies, Jehovah’s Witnesses, prisoners of conscience, Russian prisoners of war, the Polish intelligentsia, who with the Jews, became a subject of Nazi persecution are also among those remembered. The Holocaust or shoah will provide a model for compassionate insight into the experience of other persecuted ethnic and religious minorities or any who suffer disadvantage due to long-standing discrimination, such as women and homosexuals. Special emphasis will be given to understanding the interpersonal processes which are part of survival and transcendence of situations where we find society against the self. Writing Intensive (WI)
Course Descriptions

SOC 08425: Social Experience of City Life and Urban Inequalities
Prerequisites: SOC 08120, SOC 08331, SOC 08375 and SOC 08376 or permission of the instructor.
This seminar is a capstone experience designed to help students integrate what they have learned as sociology majors in a liberal arts setting. Students will engage in oral discussions and presentations as well as written exercises and essays to demonstrate an understanding of the sociological perspective, theoretical approaches and methods. The substantive focus of the seminar will vary by instructor.

SOC 08429: Organizational Response to Disasters and Crisis
Prerequisite(s): SOC 08120
This course will help students understand the complex social organizations and organizational responses to disasters. A secondary goal of this course is to learn to understand and utilize the vast research published in this interdisciplinary field, while maintaining a specific focus of the sociological core of the research. Students will gain a familiarity with local, state and federal disaster-related organizations and how they respond within the bureaucratic structure to facilitate social recovery in the aftermath of disasters and crisis to enhance the chances of improving disaster preparedness, disaster mitigation, and disaster response to possible natural, human-induced or technological hazards. Furthermore, this course will include discussions of disaster-related organization and social policies, issues of disaster preparedness, the media and disaster response and challenges/opportunities of disaster recovery and prevention.

SOC 08430: Case Management Intervention In Sociological Practice
Prerequisites: SOC 08120 and SOC 08223
This course emphasizes effective case management practice at the micro, mezzo, and macro levels of system intervention for populations at risk; Application of systems thinking to case management issues with individuals, families, and groups; Issues of aging, family mental health, child welfare, adult services and health are interwoven into practice scenarios in an effort to explore the multiple social problems faced by groups in a social service organization on a regular basis.

SOC 08494: Field Experience Seminar In Sociology - Wi
Prerequisites: SOC 08120
This seminar provides the opportunity for students to be engaged in a field experience which will contribute to their sociological development. Students interact with their instructor and the other students in the seminar in the development, supervision and completion of individual projects. Areas of interest may include sociological research, analysis of social agencies and the development of affirmative social action programs.
Writing Intensive - WI

SOC 08575: Social Determinants of Health: Theory and Intervention in Urban Settings
This course expands categories of disease risk beyond disease pathology and individual factors to psychological and sociological phenomena within an urban context. Moreover, this course seeks to describe the relationship between these conditions and health or health outcomes focused on factors such as water and air quality and food safety. More recent public health efforts have identified a broader array of conditions affecting health, including community design, housing, employment, access to health care, access to healthy foods, environmental pollutants, and occupational safety. The link between social determinants of health, including social, economic, and environmental conditions, and health outcomes is widely recognized in the public health literature to address persistent and pervasive health disparities.

SOC 08578: Critical Race Theory: Application and Intervention
Students will explore the social construction of race and the subsequent implications this phenomenon has for particular members of society. Building upon the origins of the Critical Legal Studies Movement and Critical Raced Theory (CRT), students will examine their own dispositions for significant issues from the centrality of race, class and gender to better understand the need for becoming social justice advocates while learning a variety of social justice intervention strategies. Specific attention will be focused on the medical/clinical setting where issues of race, class and gender can pose barriers to culturally competent care for clients.

SOC 08599: Urban Environmental Health
This course examines a broad range of factors affecting public health in urban environments within the context of essential formal public health infrastructures and informal settlements. An in-depth analysis of how increased exposures of industrial toxins, sanitation, air and water quality, poverty, geographic dispersion and how social environments place stress on city inhabitants collectively affect a city’s health, as well as how these cities can respond to meet the increased challenges will be explored.

SOC 08600: Social Experience of City Life and Urban Inequalities
This course will utilize a social psychological perspective, symbolic interaction, to understand urban dynamics. The course will focus on the study of the historical transformation of the city and the creation of social and psychological order in cities, an in-depth study of how the physical and social settings of cities influence health and behavior and how reciprocally urban behavior influences the physical and social settings. A considerable amount of time will analyze urban public behavior and its social psychological consequences in terms of how people conduct their daily routines with strangers, friends, relatives, and neighbors. Everyday interaction patterns of urbanities – pedestrian, transportation, shopping patterns, sports, parks,
playgrounds, museums, theaters, etc. – will be analyzed. Moreover, attention will be turned to the study of urban communities and lifestyles of different social classes concerning urban inequality and social differences. The social and psychological consequence of living in the city is a major theme of concern for this course.

**SOC 08690: Urban Research Studio**

3 s.h.

From community-based research and data collection to conduct original research to policy analysis, program evaluation, or projects that introduce new novel approaches to addressing urban health issues, this is a project-based course that can take a variety of formats. Ideally, with the consultation of an advisor, each participant in this course will undertake a research project. The results of this research may be an academic paper, a health policy position paper, a community education document, or the submission of a grant application to seek funding for future programmatic needs or future research.

**THD 07501: Introduction To Graduate Theatre Study**

2 s.h.

This course examines basic tools for graduate research in theatre. Students learn to analyze, support, and present written research at the level expected of a graduate student. Their writing style will be evaluated and writing exercises will be critiqued. In addition, students will review scholarly documentation and look at various approaches the writer can take to assemble a thesis proposal.

**THD 07502: Studies In World Theatre History And Criticism**

3 s.h.

Through the study of landmark works of drama and dramatic theory, this course investigates style, form, and production methodology in selected periods of European and Asian theatre from the Classical Age to 1915. A research paper is required.

**THD 07503: Studies In American Theatre History And Criticism**

3 s.h.

Building on student background and interest, this course will focus on the history of theatre in America from the colonial period through America's emergence as a world theatre force (the work of O'Neill and others) to the post-modern experiments of today. Students will investigate the work of major playwrights, critics, theatre practitioners, and theorists across a broad cultural and social spectrum.

**THD 07505: Independent Study In Graduate Theatre And Arts Administration**

1 to 3 s.h.

*Prerequisite: Permission of the department Graduate Committee*

Students will pursue research in an area of theatre study determined by the student in consultation with the adviser. The project can include examination of performance activities, historical or critical concerns or any other area of concern to the student.

**THD 07507: Challenges In Design & Technical Production**

3 s.h.

The activity in this course will examine specific set, costume and lighting design and technical production challenges presented by the stylistic and physical demands of a script. The student will be required to research and create practical solutions within an overall design concept.

**THD 07508: Seminar In Directing: Working With The Actor**

3 s.h.

This course explores techniques employed by the director working with actors during the rehearsal period. Topics include: conducting efficient rehearsals, improving physical and vocal effectiveness, guiding characterizations, stimulating emotional credibility, and creating ensemble. Examination of source works on acting and directing is augmented by observation and demonstration.

**THD 07509: Special Problems In Directing**

3 s.h.

Utilizing research, discussion, and a laboratory format, the student will explore advanced concerns of staging and style. This course will focus on topics selected from the following: specialized blocking situations; regionalisms, dialect, and verse dialogue; historical production styles; non-realistic production styles; post-modern approaches to acting and directing; the role of gender in directing; the semiotics of directing. The course culminates in a final scene project.

**THD 07511: Production/Performance/Arts Administration Project**

3 to 6 s.h.

*Prerequisite: Permission of the department Graduate Committee*

This course enables students to use production or arts administrative work as a centerpiece for a reflective and faculty supervised research project. Students may write, design, direct, choreograph, perform, or conduct practical field research in arts administration either on the Rowan campus or at a faculty approved professional arts venue. Combined with further research and writing, the project provides the student with an in-depth look at production activity in a wider context. The prospective project must be approved by and supervised by department faculty. This project may also serve as the capstone experience for the M.A. in Theatre: Arts Administration or the Graduate Certificate in Theatre.
**Course Descriptions**

<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>THD 07515</td>
<td>Internship In The Arts</td>
<td>3 to 6 h.</td>
</tr>
<tr>
<td></td>
<td><strong>Prerequisite:</strong> Permission of the department/Graduate Committee</td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course offers credit for faculty supervised, practical experience with a theatre or arts-related company, in acting, directing, design/production, management or dramaturgy. In general, 3 semester hours are given for a full semester or summer in such a setting and students must complete a comprehensive, reflective report and/or journal of their activities. The course may be repeated to a maximum of 6 S.H. The prospective internship and duties must be approved by and supervised by department faculty in advance.</td>
<td></td>
</tr>
<tr>
<td>THD 07520</td>
<td>Thesis Research And Writing</td>
<td>3 to 6 h.</td>
</tr>
<tr>
<td></td>
<td>Completion of 17 s.h. in the theatre program and approval of advisor is required. This credit is earned for time spent researching and writing the master’s thesis under the supervision of a faculty adviser. The student reports to the adviser on a regular basis during this period. The finished thesis must be approved by a committee composed of the adviser and two other faculty designated by the department. The 6 s.h. of credit may be taken all at one time or be divided between two terms (3 s.h. each).</td>
<td></td>
</tr>
<tr>
<td>THD 07525</td>
<td>Theory And Practice In Teaching Theatre K-12</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>This course presents teaching/learning theory and its application in K-12 theatre education. Students will learn to design and teach theatre arts experiences, observe and evaluate teaching, and develop resources, including instructional plans for a multi-week unit, for teaching at the elementary and secondary level. Through this course, students will actively learn the knowledge and skills needed to teach an effective K-12 theatre curriculum.</td>
<td></td>
</tr>
<tr>
<td>THD 07530</td>
<td>ARTS ADMINISTRATION LEADERSHIP</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>This course provides an overview of the administrative functions of non-profit arts organizations and explores the theories and practices behind decision-making in arts organizations today. The course will focus on analyzing concepts for managing arts organizations, including organizational plans, managing boards, fund-raising, human resources, facilities, program development, and effective evaluation.</td>
<td></td>
</tr>
<tr>
<td>THD 07531</td>
<td>Producing And The Arts</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>This course examines the relationship between the artistic quality and the financial reality of an arts organization. Through lecture, discussion, and projects, students learn about basic accounting, short- and long-term budgeting and planning, and financial management in relation to arts organizations.</td>
<td></td>
</tr>
<tr>
<td>THD 07532</td>
<td>Arts Planning: An Elegant Process</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>The purpose of this course is to introduce students to the artistic process as it relates to planning. By applying the artistic process to planning as the unifying principle, students will understand how artistic behaviors inform organizations to achieve health and dynamic balance. Through lectures, written assignments and discussion students will be led through a planning process and examine professional leadership, vision, core beliefs and values, internal and external relationships, organizational format and equation, planning, assessment and adaptive processes.</td>
<td></td>
</tr>
<tr>
<td>THD 07533</td>
<td>Audience Development</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>The purpose of this course is to provide an overview of basic arts and audience development, behavior and research. Coursework assists students in forming a comprehensive understanding of audience development, while providing frameworks for the practical application of audience development in non-profit arts organizations.</td>
<td></td>
</tr>
<tr>
<td>THD 07534</td>
<td>Education &amp; Outreach Programs In The Arts</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>Education programs allow arts institutions to interact with their communities in a deeply connected manner, build future audiences and provide both children and adults with a deeper appreciation for the place of the arts in their lives. This course studies the development and implementation of such programs within arts institutions ranging across the span of all the artistic disciplines.</td>
<td></td>
</tr>
<tr>
<td>THD 07535</td>
<td>Curatorial Practice In The Arts</td>
<td>3 h.</td>
</tr>
<tr>
<td></td>
<td>This course focuses on the dynamic field of curatorial practice in contemporary art and performance. Through the study of the changing perception of the role of the curator as one who has traditionally &quot;cared for&quot; objects of art, to one who innovates, mediates, critiques and produces, students will gain knowledge of how exhibitions bring works of art and performance to the public. In addition students will research the role of technology and other evolving forms of curatorial practice.</td>

</table>
MAWR 01546: CONTEMPORARY RHETORIC 3 s.h.
This course introduces students to rhetorical theory, classical through modern. Against a backdrop of Sophistic, Greek, and Roman rhetorics and their contemporary applications, students will consider major contemporary rhetorical theories by I.A. Richards, Kenneth Burke, James Kinneavy, and others. In addition to responses to these theoretical works, students will produce a rhetorical analysis of a text or texts from their own area of interest, investigating how the application of rhetorical strategies produces particular outcomes with particular audiences.

MAWR 01549: Issues In Composition Studies 3 s.h.
Issues in Composition Studies examines the dominant theories, texts and ways of knowing that are fundamental to the discipline of composition/rhetoric. Topics include current and historical perspectives on the composing process, the formation and functions of discourse communities, writing as a social process and methods of assessment. The course will demonstrate various avenues for research and teaching in composition and rhetorical studies, will provide students with knowledge necessary to construct a theoretical model for the everyday teaching of writing and will assist students in applying and refining that model.

MAWR 01554: Core I: Theories And Techniques Of Writing 3 s.h.
Core I offers an in-depth examination of theories of composing, focusing on the interdisciplinary nature of writing through inquiry into rhetorical elements common to all writers, for example, genre, tone, audience, point of view, and voice. It also considers basic principles and techniques of writing, including narration, dialogue, exposition and style. Students will examine many genres of writing and compare and contrast the application of techniques to the differing genres.

MAWR 01555: Writing For Electronic Communities 3 s.h.
This course presents the rhetorical, social, and practical dimensions of writing in electronic (cyber) contexts. Students focus both on the various roles an individual creates and maintains when writing for different cybermedia formats and the kinds of conventions, concerns and grammars that exist in discrete electronic systems like the World Wide Web, listservs, distribution lists, the Intranet, e-mail, and hypertext. Seminar presentations and a semester-long project in a concentrated area of writing for a particular electronic community demonstrate students' ability to communicate on-line.

MAWR 01556: Assessment Of Writing 3 s.h.
Assessment of Writing examines the dominant methods, issues and concerns that are central to the discussion and evaluation of students' written work. Topics include current and historical perspectives on writing assessment, the use of various models of writing assessment, the political and legal issues connected to writing assessment, and the validity and reliability of assessment models. The course will introduce students to the types of assessment models used in the field of composition, will explore the effectiveness of comments on papers, and will examine how to assess errors in writing. This class will also provide students with knowledge necessary to apply a range of assessment models in the application of writing across multiple workplace situations, and will assist students in applying and refining those models to new developments in computer-assisted writing.
MAWR 01557: Writing Freelance Features 3 s.h.
Students in this graduate level writing course will learn how to develop ideas for feature-length stories (such as profiles, trend pieces and human interest pieces) and how to research and write features on a variety of topics. They will learn how to structure feature stories, including longer (8,000-plus words) stories; how to write feature leads and "nut grafs;" and how to edit their own work to prepare it for submission. Finally, they will learn how to develop and present stories and story ideas to editors at both print and digital publications and how to submit their completed work for publication.

MAWR 01558: Fiction Workshop 3 s.h.
Students will complete, through the composition of a first draft and revision, works of literary fiction with emphasis upon the short story. In addition, students will read a body of published stories that illustrates such elements of fiction as setting, point of view, characterization and dialogue. Students will develop an analytical vocabulary that enables them to read, interpret, and evaluate the work of other fiction writers. A major portion of this class will be given over to workshop sessions during which students share and evaluate each other’s work. As a workshop, this course can be taken twice for credit.

MAWR 01559: Core II: Research Methods For Writers 3 s.h.
Prerequisite: MAWR 01554
Core II surveys non-quantitative research methods writers use. This class examines techniques of print and on-line research, interviewing, and case studies to develop the ability to weigh and assess the reliability and relevance of information. Students will learn to identify and present problems in writing using different perspectives and learn how these research styles guide a writer’s interpretation of information. The course prepares students to develop their own descriptive research projects.

MAWR 01560: Managerial Communication 3 s.h.
Managerial Communication introduces students to the theoretical and practical insights of corporate communication. The course helps students develop leadership communication skills and is designed to improve communication skills for managers, information workers, and other professional writers. Students will learn about rhetorical theories and rhetorical strategies for responding to communication situations, current forms of corporate communication, effects of technology and globalization on corporate communication, and guidelines for ethical communication. Students will prepare a variety of professional quality documents in response to real world, case-based assignments.

MAWR 01561: Seminar I 3 s.h.
Prerequisites: MAWR 01554 and MAWR 01559
Seminar I addresses the “professionalizing” aspects of writing and demystifies the publication process; students will learn how to negotiate contractual agreements, how to prepare writing for publication, how to handle publishers’ copy editing tactfully, whether to use a literary agent, and the publishing differences across the writing markets (scholarly versus trade, specialized trade publications, textbooks, creative outlets, Internet publishing, and so on). In addition, the class will have a short unit on grants and funding, as many writers need external financial support for their work. Students will explore the benefits of joining writers’ associations and guilds and the types of responsibilities writers take on when writing for publication. Seminar I also introduces students to the Master’s Project requirement and all students are expected to complete a written prospectus and begin the preliminary stages of their Master’s Project.

MAWR 01564: Information Architecture 3 s.h.
Information Architecture explores the connections among web site usability, interactivity, design, and navigation principles as each relate to the written content. Students investigate how written content influences the look and user-friendliness of web sites. Specific issues addressed in the course include presenting content for audiences with disabilities or for non-English speakers; privacy and security concerns; and the rise of information anxiety in the general public.

MAWR 01565: Technical Writing 3 s.h.
Technical Writing introduces students to the rhetorical, ethical, and professional issues associated with technical communication. It focuses on the rhetorical principles behind standard formats and styles of technical documents. It explores topics such as, document design; ethics (including issues of product liability); editing, style, and mechanical correctness; the role of technology; and the impact of the global marketplace.

MAWR 01566: Editing The Literary Journal 3 s.h.
This course provides hands-on experience with the editorial and managerial processes involved in publishing Glassworks, a literary journal in print and electronic formats. Students will study both successful and struggling journals and basic reference guides to determine criteria for success. Working with the instructor and various section editors, students will solicit, evaluate, and select submissions, communicate with contributors about editorial decisions, determine the layout and design of the journal, and distribute the journal. They will also evaluate and produce editorial content in various genres, including book reviews, author interviews, and opinion editorials, for potential publication in the magazine.
MAWR 01566: Editing The Literary Journal 3 s.h.
This course provides hands-on experience with the editorial and managerial processes involved in publishing a literary journal. Students will study successful journals and basic reference guides to determine criteria for success. Working with the instructor and various section editors, students will solicit, evaluate, and select submissions, communicate with contributors about editorial decisions, determine the layout and design of the journal, and distribute the journal. They will become knowledgeable about the funding mechanisms for literary journals, and they will work within the constraints of a budget. Because the syllabus complies with a standard publishing process for literary journals that extends throughout the academic year, contact hours are distributed over two semesters.

MAWR 01571: Seminar II 3 s.h.
Prerequisite: MAWR 01561
Seminar II prepares students to complete the required Master's Project. Students will develop their projects from the prospectus created in Seminar I, select Master's Project Advisors, and write the rough drafts of the first three installments of their projects under the guidance of the Graduate Program Coordinator. Students will then work with their Advisors to revise and polish their projects to present to the faculty and students in a symposium format.

MAWR 01575: Practicum in Teaching Composition 3 s.h.
The Practicum in Teaching Composition supports first-time graduate instructors in the Teaching Experience Program by introducing foundational concepts in Writing Studies and select theories in Composition/Rhetoric, and by exploring and modeling best pedagogical practices. The Practicum in Teaching Composition (MAWR 01575) develops a community of instructors through seminar-style discussions, collaborative projects, and reciprocal classroom observations. Assignments directly relate to students' professionalization as instructors and members of the field of Writing Studies. Students develop reflective teaching practices that prepare them to teach subsequent composition courses.

MAWR 01615: INDEPENDENT STUDY 3 s.h.
MAWR 01618: Special Topics 3 to 6 s.h.
MAWR 01620: Internet And Writing Studies 3 s.h.
This is a theory driven seminar course with a practical component wherein students will learn HTML, CSS, and how to compose web sites according to the latest theories on web design. Students will read scholarly texts that introduce them to the evolution of written communication and writing technologies, Internet studies, and hypertext theory. Students will use these texts and theories to both analyze and compose various web sites, including an online portfolio of work they would like to showcase for future employers or graduate schools.

MAWR 01621: Visual Rhetoric And Multimodal Composition 3 s.h.
This is a theory driven seminar course with a practical component. Students will read scholarly texts that introduce them to theories on multimodality, semiotics, visual rhetoric, copyright, and remix. Students will use these theories to both analyze and compose visual texts using multiple modes of communication.

MAWR 01622: Publishing For Creative Writers 3 s.h.
In this course, students aspiring to become published authors will explore many facets of literary publishing, from submitting work to agents and editors to editing a manuscript in production and marketing a completed book. Students will examine the many complex processes by which a literary manuscript (novel, story collection, memoir, etc.) becomes a book. Students will learn how to submit creative work to literary magazines, to agents, and to publishers. They will submit at least one completed work (an essay, a story, or a poem) to an appropriate journal or magazine. They will write a query letter and a synopsis for one of their own book-length projects and develop a marketing plan for the projected work. They will learn the most common reasons that writing is rejected and how to avoid them. They will learn about the varied roles of agents and editors from the editorial process through the design, production and promotion of the book. They will learn about the importance of applying for grants and fellowships, of submitting to literary competitions, and of "networking" in the development of a writing career. Students with completed or nearly completed books may use their own manuscripts for all of the above assignments.
Writing And Publishing the Nonfiction Book

Writing and Publishing the Nonfiction book is about the culture and commerce of publishing, as well as the process of writing a nonfiction book. Students finish a proposal for a nonfiction book by the end of this semester and submit it to a commercial publisher. They receive guidance and criticism from the instructor throughout the entire process, submitting and re-submitting the proposals and sample chapters several times during the semester. In addition, students analyze book markets, prepare detailed proposals for their book idea, and present their idea to a mock editorial board making decisions about the publishing promise of the book. During lecture, students develop a clear understanding of the symbiotic relationships among ideas, authors, agents, publishers, and the buying public.

Writing Difference

This course contrasts writing in academic genres against a variety of other forms, such as personal, imaginative, and popular writing. Students examine perspectives on language difference from sociolinguistic, literacy, feminist and composition studies perspectives, and produce writing in hybrid, multigenre or mixed-genre styles.
### MAWR 02522: Nonfiction Workshop
3 s.h.
The Nonfiction Workshop provides an in-depth examination of nonfiction genres, including news reporting, features, opinion, immersion journalism, biography, criticism, and social commentary and analysis. Lectures cover the methods, techniques, and ethics of nonfiction. Various nonfiction markets and market requirements are discussed. Students read model selections in various nonfiction genres and experiment with writing their own similar selections, which are discussed and critiqued. Students complete substantial published articles and/or book selections in their chosen nonfiction genres. As a workshop, this course can be taken twice for credit.

### MAWR 02523: Writing The Memoir
3 s.h.
Students receive in-depth instruction in writing the memoir, one of the most engaging and popular literary forms today. Students will read widely from selected memoirs, write three short memoirs that may stand alone or be interrelated, and experience the workshop method of critiquing manuscripts. Students will focus on characterization, conflict, point-of-view, and other literary elements traditionally associated with the narrative form as they develop their memoirs.

### MAWR 02524: Writing the Graphic Novel: Theory and Practice
3 s.h.
This course explores the graphic novel genre and its incarnations through readings, writings, and discussion. An original script for a graphic short story or beginning of a novel will be developed in a series of assignments, and discussed and critiqued in a workshop environment. This course may not be offered annually.

### MAWR 03520: Master of Arts in Writing Internship
3 s.h.
**Prerequisite(s): Approval of Graduate Advisor**
Under professional supervision in the field, students put into practice theories and skills learned in the classroom. Students' primary duties involve writing, though types and modes of writing (including electronic modes) may vary. Internship experience totals 120 hours of work. Students maintain a detailed log of working hours, prepare a portfolio of work completed in the internship, write an analysis of the internship experience and are evaluated by their site supervisor.

### WA 01200: Introduction To Writing Arts
3 s.h.
**Prerequisites: COMP 01111 and COMP 01112**
Introduction to Writing Arts familiarizes students with the disciplinary underpinnings of Writing Arts, providing a background in the history of writing, current writing theories, writing as technology, and the writing professions. The course covers these issues within the context of the Writing Arts major, enabling students to situate themselves in a community of writers and language professionals and preparing them for upper-level coursework.

### WA 01300: The Writer's Mind - Wi
3 s.h.
**Prerequisites: COMP 01112 and 45 credits required**
The Writer's Mind increases students' understanding of themselves as writers by learning craft-specific approaches to writing, and by developing critical awareness of their own and others' writing. Working in different genres of writing, students will gain experience in effective revision strategies, in analyzing audience, and in visual aspects of the printed or electronic page.

<tr>
<td></td>
<td>Prerequisite(s): WA 07200 with concurrent enrollment allowed, COMP 01112, and 60 credits required.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course presents the rhetorical, social, and practical dimensions of writing and researching in networked contexts. Students analyze and compose with audio, video, image and text, using a variety of digital writing practices. Students blend research methods informed by current literacy theories and modalities, allowing them to explore meaning-making, circulation, and the ethical ramifications of writing within digital communities.</td>
<td></td>
</tr>
<tr>
<td>WA 01302</td>
<td>Introduction To Technical Writing</td>
<td>3 s.h.</td>
</tr>
<tr>
<td></td>
<td>Prerequisites: COMP 01112 AND WA 07290</td>
<td></td>
</tr>
<tr>
<td></td>
<td>This course introduces students to both the field of technical writing and the uses of technical writing within a variety of professions. Students will learn how technical writers use document design strategies based on rhetorical principles to respond to communication challenges. Through practice with a variety of genres, students will gain experience with audience analysis, communication ethics, research, collaboration, professional style, and editing. The course culminates in a writing project based on a professional, academic, or community issue of the student’s choosing. Students are encouraged, and will be assisted, in designing projects that reflect their professional interests.</td>

Course Descriptions

WA 01409:  Tutoring Writing  
This course provides students theory and practice in tutoring writing at all educational levels. It covers the writing process, the particulars of the tutorial relationship and issues of working with writers from a variety of backgrounds and abilities. It is recommended for students who are presently engaged in the tutoring of writing and those who may teach writing in one-on-one or small-group settings in the future.

WA 01450:  Writing Arts Portfolio Seminar  
Prerequisites: WA 01300 and WA 01301 and WA 01405  
Seniors majoring in Writing Arts will have an opportunity to reflect on the work undertaken as part of the writing arts major. The course asks students to construct and submit a portfolio consisting of work products both from those courses included in the core and from a selection of courses in the required elective clusters. A written reflection on the intellectual and learning experience derived from these courses as evidenced by the items included comprises the written requirement for this course.

WA 07290:  Creative Writing I  
Prerequisite: COMP 01111 or COMP 01105  
This course concentrates on developing students' skills in writing various kinds of poems and in developing fiction techniques. In addition to exploring different poetic forms, students learn how to create characters, establish conflict, and develop a plot while writing a short story. Students examine the work of professional poets and fiction writers.

WA 07291:  Creative Writing II  
Prerequisite: WA 07290 or CRWR 07290  
Building upon the foundations learned in Creative Writing I, students in Creative Writing II will engage in more specific practice in the conventions of short story writing, creative nonfiction and poetry. Students will have directed assignments encouraging experimentation in multiple genres but will prepare a final portfolio that may give more emphasis to a genre of their choice. Special emphasis will be placed on reading examples of these conventions and learning how writers graft or borrow techniques (dialogue, dramatic monologue, voice, description) from one genre to apply it in another.

WA 07309:  Writing Children's Stories  
Prerequisite: 30 credits required  
This course focuses on fiction written for juveniles and young adults. Students examine the rich variety of literature published for young people. They do exercises, write complete stories, critique each other's writing in workshops and meet with the teacher for individual conferences on their work. They also learn how to submit manuscripts to magazine and book publishers.

WA 07391:  Writing Fiction  
Prerequisites: WA 07290 or WA 07291 or CRWR 07290 or CRWR 07291  
This class will provide a forum for students to explore the strategies fiction writers use in creative expression, especially in writing the short story. Students will develop an analytical vocabulary that allows them to read, interpret, and evaluate the work of other fiction writers. A major portion of the class will be given over to workshop sessions, where students can share and evaluate each other's work. Students will also become familiar with a body of published short stories that illustrate techniques of expression such as setting, point of view, characterization, dialogue, and other elements of fiction.

WA 07392:  Fundamentals Of Playwriting  
This course covers the methods of developing and writing a play. During the course, students analyze plays, and outline and work on the draft of a full-length play. This course may not be offered annually.

WA 07395:  Writing Poetry  
Prerequisite: WA 07290 or CRWR 07290  
This class will provide a forum for students to explore the strategies poets use in creative expression. The students will develop an analytical vocabulary that allows them to read, interpret, and evaluate the work of other poets. A major portion of the class will be given over to workshop sessions, where students can share and evaluate each other's work. Students will also become familiar with a body of published poetry that illustrates techniques of expression such as imagery, metaphor, voice, tone, the music and strategy of the line, and other elements of poetry.

WA 07410:  Tutoring Writing  
This course provides students theory and practice in tutoring writing at all educational levels. It covers the writing process, the particulars of the tutorial relationship and issues of working with writers from a variety of backgrounds and abilities. It is recommended for students who are presently engaged in the tutoring of writing and those who may teach writing in one-on-one or small-group settings in the future.

It is recommended for students who are presently engaged in the tutoring of writing and those who may teach writing in one-on-one or small-group settings in the future.
Organization of the University

Board of Trustees
Rowan University operates under the laws of the State of New Jersey. The Board of Trustees of Rowan University is vested by law with the general supervision of the University within general policies and guidelines pursuant to N.J.S.A. 18A:64 et. seq. Some of the responsibilities of the Trustees are to appoint the University president, to approve the educational curriculum and student services program, and to determine policies for the organization, administration, and development of the University.

General Information

Campus Buildings

301 High Street
The three story building is home to the Rowan University Art Gallery and is home to several academic offices and classrooms.

6 High Street
The former bank building is now home to the administrative offices of the College of Communication and Creative Arts.

Barnes & Nobles at Rowan University
Located on Rowan Boulevard, this now serves as the University Bookstore.

Bole Annex
Opened in the spring of 1970, Bole Annex houses the Department of Public Safety.

Bole Hall
Robert D. Bole Hall is the administrative center of the University. It contains the offices of the President, Provost, University finances, and The Office of General Counsel. It is named after former Dean Robert Bole.

Bozorth Hall
Named for a former registrar, Loriot Bozorth, the building was originally opened in 1954 as the campus demonstration elementary school. Today, Bozorth houses the College of Communication offices, Rowan Radio, Rowan TV, a distance learning classroom, film-editing facilities, a computer-equipped journalism newsroom, an advertising/PR client suite, a layout room and a computer-equipped writing laboratory.

Bunce Hall
The first building on campus, Edgar J. Bunce Hall was opened in 1923 and is named for a former president of the University. It is home to the departments of English, Foreign Languages and Literatures, Philosophy and Religion, and Theatre and Dance. This building also features classroom space and Tohill Auditorium.

Business Hall
Opened in 2017, Business Hall is on Rt. 322 and is home to nearly 2,000 business majors.

CREATEs
Opened in 2017, the Center for Research and Education in Advanced Transportation Engineering Systems is located at the South Jersey Technology Park.

Camden Academic Building
The Camden campus is located in the historic First National Bank and Trust Company building and annex, on the corner of Cooper and Broadway, and serves as the heart of Rowan University’s Camden campus. The Camden campus provides an array of services for students, faculty, and staff.

Campbell Library
Opened in 1995, the Keith and Shirley Campbell Library features 118,000-square feet of research, study, archive and office space. It provides connectivity to the campus network, enabling access to many databases and online resources. The Library was named the Keith and Shirley Campbell Library in recognition of the Campbells’ generous gift of an endowment for the facility in 2000. The Departments of Sociology and Anthropology and the Department of Law and Justice are housed on the 5th floor.

Carriage House
Built in 1849 to service the Hollybush Mansion, this building now houses University Publications.

Cassady Maintenance Building
Opened in 1971, the Otto P. Cassady Maintenance Building, named for a former engineer in charge of maintenance, is the main office complex for maintenance operations.
**Chamberlain Student Center**
The Student Center opened in 1974 and serves as a campus focal point where students, faculty, staff and community members congregate for a wide range of events, services and functions. It houses offices for student organizations and publications as well as several administrative offices. The following facilities are located in the three-level center: the information desk, I.D. room, mailroom, an ATM machine, Eynon Ballroom, meeting and conference rooms and eating areas, including the dining hall, a food court, snack bar, outdoor dining terrace, Profs Place and the Owl's Nest Restaurant.

**Cooper Medical School of Rowan University**
The six story building, located in Camden, is home to Rowan's M.D. granting medical School.

**Edgewood Park Apartments**
This four-building complex houses 24 apartments. Four students live in each apartment, which contains two bedrooms, a living room, dining room, kitchen and bathroom.

**Engineering Hall**
Opened in 2017, it sits next to the Henry M. Rowan Hall, home of the College of Engineering.

**Enterprise Center**
Located on Rowan Boulevard, the Enterprise Center opened in 2013 and is home to the College of Graduate and Continuing Education.

**Esby Gym**
The Roland A. Esbjørnsen Hall houses the gymnasium, swimming pool, classrooms and the Health and Exercise Science faculty offices. The building is named after a former chairman of the Health and Exercise Science Department.

**Evergreen Hall**
Evergreen houses 204 students. The building is three stories tall and is separated into two wings. Rooms are arranged in suites. Each suite contains two double bedrooms and a bath.

**Hawthorn Hall**
Formerly a student residence facility, Hawthorn Hall is one of the homes of the College of Communication.

**Hering Central Heating and Cooling Plant**
The J. Leonard Hering Heating Plant, named for a former superintendent of maintenance, houses the centralized heating and cogeneration equipment.

**Herman D. James Hall**
Herman D. James Hall, opened January 2006, is home to the College of Education. The three-story, 135,000-sq. foot building features academic distance-learning facilities, an early childhood development center and an assortment of labs and outreach centers as well as classroom space.

**Holly Pointe Commons**
Opened in 2017, HPC is a 1,400 bed residence hall built with private funds.

**Hollybush Mansion**
Built in 1849, the building was the site of the historic summit meeting between President Lyndon B. Johnson and Soviet Premier Alexei B. Kosygin in 1967. The building now serves as a museum and meeting center.

**Laurel and Oak Halls**
Laurel and Oak are the University's first residence halls. Today, each building houses 45 students.

**Linden Hall**
Formerly a student residence facility, Linden Hall houses a variety of administrative offices.

**Memorial Hall**
Opened in 1956, the building serves as the center for information (computer) resources, housing the campus help desk, Web Services and the Duplicating Center. A dance studio is also in the building.

**Mimosa Hall**
Mimosa accommodates 305 students. Rooms are arranged by suites, and each suite contains two to three double bedrooms and a bath.
**Mullica Hall**
Mullica accommodates 103 students. Rooms are arranged by suites, and each suite contains two double bedrooms and a bath.

**Robinson Hall**
Named after Thomas E. Robinson, a former Rowan University president, this is one of the largest classroom buildings on campus. It is home to several departments of the College of Liberal Arts & Sciences. The core of the building consists of classrooms and seminar rooms.

**Rowan Boulevard Apartments**
Rowan Boulevard Apartments, is made up of two, four-story buildings that house 884 students in 28 one-bedroom efficiency units and 214 four-bedroom suites. The suites include two bathrooms, a kitchen, breakfast nook and living room area. The complex also contains exercise and weight rooms, meeting rooms, laundry facilities and a Public Safety satellite office.

**Rowan Hall**
Opened in January 1998, Henry M. Rowan Hall is the home of the College of Engineering. The 95,000-sq. foot building features three floors of offices, classrooms, labs and the 115-seat Betty Rowan Auditorium.

**Sangree Greenhouse**
Built in 1923, the John Sangree Greenhouse is one of the oldest structures on campus. A preservation and renovation project was completed on this facility in 1998.

**Savitz Hall**
Originally the University library, this building was completely renovated to house all of the student service functions, including the offices of the vice president for Student Affairs, Dean of Students, Career and Academic Planning, Developmental Education, Tutoring, Basic Skills/Testing, Admissions, Counseling, EOF/MAP, Registrar, Financial Aid, Revenue and Collections, Residential Learning & University Housing, Multicultural/International Affairs, Specialized Services, the Center for Service Learning and Volunteerism, the Honors Program and Women's Studies. The building is named after Jerohn Savitz, the University's first president.

**Science Hall**
Dedicated in 2003, the facility features the 102-seat Edelman Planetarium, a rooftop observatory with 16-inch telescope, a rooftop greenhouse, 27 teaching laboratories and 22 research labs. Its 150,000 square feet of space is spread over three floors. Housed here are offices for the departments of Biology, Chemistry and Biochemistry, and Physics and Astronomy.

**Shpeen Hall**
Alvin Shpeen Hall is located one block off of the east corner of campus, on Academy Street. The University purchased the former elementary school building from Glassboro and refurbished it to house offices. Today, Shpeen Hall is home to the R. Grace Bagg Alumni Center and the Rowan Foundation. Alvin Shpeen was a mayor of Glassboro. It is home to University Advancement, including Alumni Relations.

**South Jersey Technology Park at Rowan University**
The Samuel H. Jones Innovation Center is a 45,000 square-foot facility located at the South Jersey Technology Park on Rowan's West campus that provides engineering laboratory, web-laboratory and technology company incubation all within a single facility. In partnership with Rowan's College of Business, the Technology Park offers collaboration and consulting services, product feasibility, development and commercialization services, training seminars and continuing education courses in entrepreneurship for new and established businesses.

**Stratford Campus**
Home to Rowan's D.O. granting medical school.

**Student Recreation Center**
"Opened in 1993, the Student Recreation Center is a comprehensive recreation sports facility. The three-story, 76,000-square-foot building houses an eight-lane swimming pool, a three-lane indoor running track, a three-court multi-sport gym, five racquetball courts, an aerobics room, fitness and free-weight rooms, a conference room and complete locker/shower room facilities. Administrative offices coordinate various programs, including informal sports, intramural sports and fitness activities for students, faculty and staff."

**Team House**
Opened in 1971, the Team House contains locker rooms; training facilities; and intercollegiate athletics, coaching and staff offices. It was renovated and expanded in 2013.
The North Halls: Chestnut, Magnolia and Willow Halls
These buildings house 750 students. Students live in suites and share restroom facilities.

Townhouses
Opened in 2004, the on-campus, 113-unit townhouse complex along Route 322 features four- and six-bedroom configurations convenient to classes and other activities. The complex was built adjacent to a new parking garage and 5,000-square-foot community center with laundry facilities, a game room and meeting space.

Triad Apartments
Triad features 81 apartments which are carpeted, air-cooled and furnished. A variety of apartment types are available to accommodate 288 students in a co-ed living environment.

Wellness Center
Seymour Winans Hall is named for a former faculty member. It is now home to Counseling & Psychological Services and the Wellness Center, formerly the Student Health Center.

Westby Hall
Completed in 1967, the Cleve O. Westby Hall Arts Building, named in honor of the former director of county and state college construction, contains art studios for ceramics, sculpture, jewelry/metals, painting, printmaking and photography, computer labs, classrooms, a lecture hall for 110 students, exhibition galleries, and faculty offices.

Whitney Center
Located on Rowan Boulevard, the Whitney Center (opened 2012) features stores on the 1st floor and student housing on top. It is also home to the Thomas Bantivoglia Honors Program and student apartments.

Wilson Hall
Harold Wilson Hall, named after a former faculty member, opened in 1972 and is primarily home to the performing arts. The building contains two large rehearsal rooms, Boyd Recital Hall, practice rooms, classrooms, two student lounges, a music library, faculty offices, the concert box office and W. Clarke Pfleeger Hall—a 1,000 seat auditorium. The dean of the College of Fine & Performing Arts, and Music Department are also located in the building.
