Jean & Ric Edelman Fossil Park Development

**Location:**
Sewell, New Jersey

**Status:**
Feasibility study completed. Design for pre-development water management system underway. The procurement process for project design services has commenced.

**Forecast Project Delivery:**
Summer 2020

**Development Cost:**
$50 million

**Design Consultants:**
Gallagher & Associates
GEI Engineering

**General Contractor:**
To be determined

**Project Planning & Development:** Division of Facilities, Planning & Operations
Rowan University School of Earth & Environment

**Description**
This project, named the Jean & Ric Edelman Fossil Park after its donors, involves the development of a 65-acre parcel located in Mantua township. The site, that includes a former open-pit marl mine, will serve as a major museum and research center for the university and exemplify experiential learning and increase STEM literacy for all visitors. Development of a building at the fossil park will incorporate principles of sustainability and green infrastructure as an intrinsic part of its development, will provide faithful stewardship of our environment and strong leadership on issues pertaining to sustainability.

The project has the potential to welcome thousands of visitors per year, including school groups, nature clubs, scouting groups, and tourists who can participate in amateur fossil digs in the quarry, go on nature walks, and explore the site’s habitats, geology, and unique natural features, and facilities including: a museum, fossil collection rooms, fossil prep labs, event exhibition space, a cafe, and park space amenities.
