Potential Expansion of the area of the Stratford campus and revisiting priorities resulted in the creation of a master plan in 2009. However, more recent changing circumstances has created a new opportunity to develop a new Master Plan that reflects current thinking and potential opportunities for the growth of the SOM Campus.

This initiative will develop a blue print for a Phased strategy for the long-term growth of the SOM. The master plan will establish a comprehensive campus vision, provide a guide for future development, maximize development opportunities, and provide a flexible and phased plan for development. The SOM master plan will also improve and enhance pedestrian / vehicular circulation and amenities. The Plan will also provide a strategic basis for prioritization of projects, development costs and financing.
