Potential expansion of the Stratford campus drove the creation of a master plan effort in 2009. However, more recent circumstances have created an opportunity to develop a new Master Plan that reflects current thinking and potential opportunities for the growth of the SOM Campus.

This initiative is developing a blueprint for a Phased strategy for the long-term growth of the SOM. The updated Master Plan will establish a comprehensive campus vision, provide a guide for future development, maximize development opportunities, and provide a flexible and phased plan for development.
