Inspira Health Network at Rowan

Introducing the new Inspira Health Network Hospital

Inspira Health Systems has purchased 100 acres from Rowan University to build their new in-patient hospital, urgent care, and health care complex.

Inspira Health's state-of-the-art medical center provides expert care to residents and families across South Jersey. Equipped with high-quality, cutting-edge technology, Mullica Hill's physicians, surgeons and specialists have the latest health care tools at their fingertips. This groundbreaking medical facility is an asset to the community, allowing local residents to seek care where they need it, when they need it most. The proximity to Rowan University is also a real bonus. A number of collaborative projects are in progress, with hope this will facilitate even more in the future.

The new hospital includes: 210 all private patient rooms, the latest in medical and communication technology, home-like birthing suites, a pediatric emergency department with adjacent inpatient unit, a comprehensive cancer program, emergency angioplasty for heart attack patients, and Smart Room technology designed to enhance patient safety and the patient experience.
