I. PROJECT BACKGROUND

A. Project Overview and Status

- 1.** The New Jersey FamilyCare (NJFC) Integrated Eligibility System project (IES), the “project”, is the New Jersey Medicaid Eligibility and Enrollment (E&E) solution that was implemented by the Division of Medical Assistance and Health Services (DMAHS), the State Medicaid Agency, to meet the requirements of the Affordable Care Act (ACA). The project includes consolidating and standardizing applications for health coverage under Medicaid and is in the process of replacing many antiquated and legacy systems. The overall purpose of the NJ FamilyCare IES Project is to:
 - a.** Improve the health outcomes of eligible clients by providing timely access to health coverage.
 - b.** Increase enrollment of eligible clients by developing a system that allows for ease in application and devices options as well as in the submission of required documentation.
 - c.** Advance the principles of the Medicaid Information Technology Architecture (MITA) framework.
 - d.** Significantly reduce Medicaid eligibility and enrollment error rates.
 - e.** Improve managerial oversight of the Medicaid programs.
 - f.** Improve capacity and eliminate backlogs by increasing worker efficiencies.
 - g.** Significantly improve overall client satisfaction through electronic verification of client information resulting in timelier eligibility determination and renewal process.
 - h.** Meet CMS requirements for enhanced funding and meet all federal and state regulatory requirements.

B. Agile Project Approach

- 1.** The NJ FamilyCare IES project is using agile methodology to deliver modules utilizing iterative software development with the fundamental values as below.
 - a.** Individuals and interactions over processes and tools.
 - b.** Working software over comprehensive documentation.
 - c.** Customer collaboration over contract negotiation.
 - d.** Responding to change over following a plan.
 - e.** Phased deployments to enable new functionality as it becomes available and limit “big bang” risks.
 - f.** Automated regression testing to allow for thorough regression testing for weekly or monthly updates to production.
- 2.** Following this approach method increases the frequency of feedback loops and delivery cycles. Incorporating agile methodology in the project development advocates frequent “releases” in short development cycles, which is intended to improve productivity and introduce checkpoints at which new customer requirements can be adopted. The effectiveness of this approach over the standard “waterfall” project management method is evidenced by the NJ FamilyCare IES project being able to successfully implement the modules and enhancements in quick succession contributing to the project’s efforts to successfully comply with the requirements of the One Big Beautiful Bill Act or the H.R. 1 of the 119th Congress (H.R. 1). Utilizing this agile and modular approach, the project currently includes the implementation of the following functionality and planned enhancements.
 - a. Operational**
 - (1)** Development and deployment of the NJ FamilyCare Worker Portal module within the NJ FamilyCare IES cloud solution.
 - (2)** Interfacing and deployment of the Modified Adjusted Gross Income in the cloud (MitC) to the NJ FamilyCare IES cloud solution.
 - (3)** Development and deployment of an integrated screening module for NJ FamilyCare, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and General

Assistance (GA) within the Client portal module. The screening application uses United States Digital Service (USDS) design best practices.

- (4) Development and deployment of the NJ FamilyCare Aged, Blind and Disabled (ABD) online application within the Client Portal module.
- (5) Interfacing and deployment of the Asset Verification Software (AVS) module to the NJ FamilyCare IES cloud solution.
- (6) Interfacing and deployment of Federal Data Service Hub (FDSH) web services to the NJ FamilyCare IES cloud solution.
- (7) Compliance with the privacy and security requirements as defined by appropriate safeguards to ensure privacy and security requirements. This procedure includes administrative, technical, organizational, and physical safeguards to protect the confidentiality, integrity, and availability of PII/PHI in all applicable NJ-DHS systems. The IV&V service provider must adhere to all state and federal laws, regulations, and obligations governing the protection and restricting the use and disclosure of PII and PHI and ensure that all activities, including application development, integrations, or system enhancements, comply with the most recent versions of NIST standards, MARS-E 2.2, and ARC-AMPE (Acceptable Risk Controls for ACA, Medicaid, and Partner Entities), as applicable, or with the latest versions of the security framework relevant to all covered systems.

b. Planned or in development

- (1) NJFC IES Modernization starting with the Aged, Blind and Disabled module.
- (2) Interfacing, deployment and enhancement of additional Federal Data Service Hub (FDSH) web services to the NJFC IES cloud solution and/or the Health Benefits Coordinator.
- (3) Development and deployment of enhancements to the Client Portal module that includes; Client/Mobile Access and File Upload, Electronic Notification, Redetermination/Renewal, Application/Reapplication, Change in Circumstance.
- (4) Development and deployment of enhancements to the Worker Portal module that includes: Paper Application to Online Application, Medicaid Eligibility System Upload, Address Verification Service module, Connectivity to Imaging Applications (Digital Imaging Management System [DIMS] and Division of Revenue and Enterprise Services [DORES]).
- (5) Development, migration and deployment of other legacy applications and processes from the mainframe Medicaid Eligibility System to the NJ FamilyCare IES cloud solution.
- (6) Development of the Worker Portal functionality to allow the Health Benefits Coordinator (HBC) to utilize the NJFC IES for application processing.
- (7) Other Eligibility and Enrollment projects that will be defined based on federal and state regulatory requirements.
- (8) Any additional IV&V recommendations once H.R.1 assessments are completed to ensure activities are added to the roadmap, impacts are planned for, and mitigation strategies are put in place for future changes.

II. CONTRACTOR QUALIFICATIONS

A. Independence and Transparency

1. Rowan SOM will select an IV&V Contractor that operates independently from project stakeholders involved in the implementation of the NJ FamilyCare IES. The contractor must ensure that they establish an IV&V structure and approach that complies with the requirements of Federal regulations (e.g., 45 CFR Part 307.15(b)(10)(ii)) in order to maintain technical, financial and managerial independence from Rowan SOM leadership.

2. Rowan SOM however, deems it important that the IV&V Contractor and its Team functions as an integral part of the project leadership structure. The degree to which the NJ FamilyCare IES Steering Committee utilizes the recommendations by the IV&V Team will contribute to the overall effectiveness of the IV&V role. The IV&V approach must promote objective and transparent performance feedback by ensuring that IV&V findings and recommendations are readily available to the NJ FamilyCare IES Steering Committee. The primary function of the IV&V Team will be to promote visibility, accountability, and fact-based decision making to enhance the likelihood of a successful IES module and enhancement implementation.

B. Contractor Capability

1. The responder must have a demonstrated ability to perform the following activities, which are the same as those stated in Federal regulations at 45 CFR Parts 95.626 and 307.15 (Please Note: these are required capabilities, not necessarily deliverables. See Scope of Work section for deliverables):
2. Development of a project work plan. The plan must be provided directly to the cognizant Federal Office(s) at the same time it is given to the State.
3. Review and make recommendations on both the management of and the technical aspects of the project. The results of this analysis must be provided directly to the cognizant Federal Office(s) at the same time it is given to the State.
4. Consultation with all stakeholders and assessment of the user involvement and buy-in regarding system functionality and the system's ability to meet program needs.
5. Providing a risk management assessment, develop a risk management plan, create risk response plans, and provide capacity planning services, taking into consideration work done prior to this engagement.
6. Developing performance metrics which allow tracking of project completion against milestones set by the State.
7. The responder must also possess the corporate knowledge and experience demonstrating the following capabilities and capacities: at least three years' experience in IV&V work including risk assessments and planning as well as project audits and, successful completion of agile IV&V experience with another State,
8. Analyzing project management; evaluate project progress, resources, budget, schedules, work flow and reporting.
9. Reviewing and analyzing project management planning documents.
10. Reviewing and analyzing project software development documents.
11. Reviewing and monitoring development processes to ensure they are being documented, carried out, and analyzed for improvement.

C. Conflict of Interest

1. Any contractor (and its subcontractors) serving in the role of IV&V service contractor/provider to the NJ FamilyCare IES project is prohibited from soliciting, proposing, or being awarded any project management, quality assurance, software design, development, or other manner of planning, design, development, or implementation phase activity on the NJ FamilyCare IES project for which these IV&V services are being procured.
 - a. This exclusion is executed in accordance with federal regulations at 45 CFR 95.626, which require that this IV&V effort be conducted by an entity that is independent from the State (unless the State receives an exception from the CMS/HHS).
2. For purposes of clarity, the Center for Medicaid and CHIP Services (CMCS) defines "the State" in the above regulatory citation as being a state's IT project, and the umbrella agency or department. The primary purpose of this exclusion is to ensure that the IV&V service provider avoids any real or perceived conflicts of interest. For federal purposes, the scope of IV&V includes planning, management, and other programmatic activities in conformance with the term's usage in federal regulations at 45 CFR 95.626.

3. IV&V is the set of verification and validation activities performed by an agency not under the control of the organization developing the software. IV&V services must be provided and managed by an organization that is technically and managerially independent of the subject software development project. This independence takes two mandatory forms.
 - a. First, technical independence requires that the IV&V services provider organization, its personnel, and subcontractors are not and have not been involved in the software development or implementation effort or in the project's initial planning and/or subsequent design. Technical independence helps ensure that IV&V review reports are free of personal or professional bias, posturing, or gold plating.
 - b. Second, managerial independence is required to make certain that the IV&V effort is provided by an organization that is departmentally and hierarchically separate from the software development and program management organizations. Managerial independence helps ensure that the IV&V service provider can deliver findings and recommendations to state and federal executive leadership and management without restriction, fear of retaliation, or coercion (e.g., reports being subject to prior review or approval from the development group before release to outside entities, such as the federal government).

III. SCOPE OF WORK

A. Approach to IV&V

1. As previously discussed, the NJ FamilyCare IES historically had been implemented as the State solution to meet the requirements of H.R. 1 as approved by CMS. Since there are several modules and enhancements that are already in production, the services for this IV&V RFP will be focused on the review of evidence criteria recommended by CMS in the Streamlined Modular Certification (SMC) for Medicaid Enterprise Systems as defined by CMS in State Medicaid Director Letter (SMDL) #22-001, Updated Medicaid Information Technology Systems Guidance: Streamlined Modular Certification for Medicaid Enterprise Systems. The SMC approach is designed to:
 2. Demonstrate measurable improvements to a state's Medicaid program resulting from the delivery of a new module or enhancement to an existing system.
 3. Leverage data and testing to inform CMS' assessment of the successful delivery of systems and inform subsequent funding decisions.
 4. Enable operational reporting for system performance and functionality to ensure ongoing oversight of data and evidence that demonstrates the continuous achievement of required and desired outcomes.
 5. Reduce burden on states and CMS during the certification process without compromising CMS's responsibility to ensure those systems satisfy all statutory and regulatory requirements.
 6. Advance the NJFC IES incrementally toward full modernization and Streamlined Modular Certification process.

B. IV&V Framework (Agile Framework)

1. The NJ FamilyCare IES was developed and implemented using agile and modularity, the IV&V contractor is expected to evaluate the effectiveness of the iterative development cycle. This work includes:
 2. Monitoring the work towards establishing effective product focused teams.
 3. Preparing IV&V test plan utilizing Rowan SOM regression testing process as an evaluation strategy.
 4. Advising on test approaches, test design, automation, continuous integration and scenarios.
 5. Monitoring development activity including planning, execution, and analysis.
 6. Monitoring functional and regression testing validation.
 7. Identifying specific issues and risks indicating potential delays in the project and recommending improvements and mitigation strategies.

8. Validating that user stories are constructed appropriately and testable, interfaces and data conversion tools have been developed as planned, and that effective plans are in place for testing and user training.
9. IV&V assessment activities include evaluation of the following project artifacts as applicable:
 - a. User stories and tasks that populate the backlog
 - b. High level timeline goals that align with the product roadmap
 - c. Potential risks and issues
 - d. Team makeup and structure
 - e. Processes and strategies (development, testing, planning/adapting)
 - f. System Documentation
 - g. Policies and Procedures
 - h. Operations and maintenance manuals
 - i. Data use and exchange agreements
 - j. Validation of testing results
 - k. Training, including training strategies, plans, materials, and results

C. The CMS Streamlined Modular Certification for Medicaid Enterprise Systems (SMC)

1. The contractor is expected to perform IV&V functions based on the guidance provided by CMS as defined in the “Approach to IV&V” section above. The contractor will produce IV&V Progress Status Reports that objectively illustrate the strengths and weaknesses of the IES project and provide recommendations for correcting any identified weaknesses. The IV&V Team will monitor and evaluate DMAHS’ efforts to complete SMC required artifacts when appropriate. IV&V Progress Reports will be prepared using the CMS approved template along with the appropriate Enterprise checklist. As appropriate, the contractor will work closely with DMAHS to monitor and evaluate completion of the checklists including evaluation of supporting certification documentation and recommend improvements to documentation, and document completion status of reviews.

The IV&V service provider staff will interview and observe the NJ FamilyCare IES project management and development staff or any project contractors/subcontractors as applicable. Service provider staff also will observe project meetings and activities to understand the processes, procedures, and tools used in the E&E program and NJ FamilyCare IES project environments. They will review and analyze all applicable and available documentation for adherence to accepted, contractually defined industry standards. The IV&V contractor will fill out the reviewer comment portion of the Eligibility and Enrollment Checklists and append them to the progress report.
- b. In preparation for the milestone reviews, the IV&V provider shall evaluate state documents and evidence, along with any working modules/code applicable to that particular review, and complete the reviewer comments portion of the Eligibility and Enrollment Checklists. The completed checklists are appended to the E&E IV&V Progress Report. The progress report shall be delivered 4 weeks prior to the scheduled milestone review.

- c. The IV&V service provider shall provide the progress reports to CMS at the same time they are presented to the state. This reporting process, in accordance with federal regulations, includes final report issuance as well as all draft report submissions.

CMS continues to refine their understanding and approach for the SMC requirements to allow for diverse development frameworks. Describe your approach given the above.
