Project Overview

Rowan University is soliciting proposals from qualified, firms to provide Relocation Management services related to the design, bidding and construction administrative services for programming and selective renovations/repurposing of some campus Facilities on its main campus in Glassboro, New Jersey.

I. BACKGROUND

Rowan University has evolved from its humble beginning in 1923 as a school with a mission to train teachers for South Jersey classrooms, to a comprehensive public research university with a strong regional presence and reputation. The university’s main campus is now spread over approximately 225 acres, bifurcated by Rt. 322 in Glassboro New Jersey. The two sides of the campus are referred to as the South and North Campus and are 70 and 155 acres respectively. For the most part, the North campus is the hub for academic and the South for administrative functions.

Today, Rowan's over 16,000 students can select from bachelors, Masters and doctoral degree programs in colleges and schools across four campuses. The University is one of only 56 institutions in the country with accredited programs in business, education, engineering and medicine.

Sporadic changes in needs over time has resulted in the allocation and reallocation of space with several academic and administrative departments being separated and dispersed across the campus in various buildings with variable degrees of suitability for the functions being housed. In many cases, campus facilities are not being utilized effectively and efficiently, creating barriers to maximizing the quality, affordability, and availability of educational opportunities.

The Rowan campus will experience significant growth in the foreseeable future. The projected growth has resulted in a need for additional space and increased efficiency for the use of existing space on campus. The expansion and addition of various academic and research programs and associated support departments has exerted pressure for the organization of academic and administrative space across the campus.

Several capital improvements and building projects are being planned and developed to support the projected growth and need for additional space, the largest of which is the construction of a new academic and administrative facility on campus.

Additional plans and campus background information may be found on the Facilities Web Site.
