Project Overview

Rowan University invites qualified firms with an established reputation for the development of museums and related facilities, to submit their qualifications for professional design services for the development of a multifaceted museum and research center, at the Jean & Ric Edelman Fossil Park of Rowan University (“project”).

The responses to this RFQ will be evaluated to shortlist a maximum of five consultants as the first part of the procurement process for the selection of a design consultant. Subsequently, as the second part of the process, the shortlisted consultants will each be invited to submit proposals and make presentations to the committee reflecting design options for consideration and award of a contract for design services for the project.

I. BACKGROUND

A. Rowan University is a comprehensive public research university with a strong regional presence and reputation. Rowan’s campus has experienced significant growth in student population and in infrastructure in recent years. During this time, academic quality and offerings have rapidly increased. The increase in quality has been reflected in the university’s ranking, which has consistently trended upward.

B. The university has undertaken a major initiative that would forge a new vision that would exemplify its commitment to:
   1. Providing access, affordability, quality, and economic development and
   2. Engaging the citizenry in the search for solutions to the myriad of environmental crises facing our society.

C. The initiative would:
   1. Create a new College of Earth & Environment
   2. Develop a related multifaceted major museum and research center named the Jean & Ric Edelman Fossil Park of Rowan University and is the subject of this RFQ.

II. PROJECT GOALS

A. Exemplify experiential learning and improve the quality of teaching in science, math and engineering
B. Inspire and encourage achievement in science, technology, engineering, and mathematics (STEM)
C. Increase STEM literacy for all visitors
D. Expand STEM education and career opportunities for underrepresented groups.
E. Provide a pipeline of highly qualified student applicants to Rowan University
F. Creating an economic engine through eco-tourism and commerce that will help drive the local and regional economies
G. Provide faithful stewardship of our environment and strong leadership on issues pertaining to sustainability
H. Increase the global reach and reputation of Rowan University
I. Incorporate principles of ecology, sustainability and green infrastructure as an intrinsic aspect of the fossil park
III. PROJECT DESCRIPTION

A. The University has purchased a 65-acre parcel for the development of the Edelman Fossil Park. The 65-acre site includes a former open-pit marl mine, that, until, 2015 was operated by the Invers and Company, which mined and sold the glauconitic-rich sediments (marl) for water treatment products and as organic fertilizer.

B. Of the thousands of marl pits that once lined the East Coast, the site of the Edelman Fossil Park contains the last to remain open. It may be the case that purchased site is the one place on Earth where a person can put their finger on a fossil individual that died during that pivotal, calamitous event that wiped out the dinosaurs and 75% of all species, setting the stage for life on Earth as we know it. As the only fossil site of its kind within a major metropolitan area, the fossil park provides an unparalleled opportunity for millions of residents to enjoy an authentic and affordable hands-on exploration of the Earth’s past.

C. The fossil quarry represents only one aspect of the Edelman Fossil Park and plans include more than an excavation site. The University would like to realize its vision for a major community embedded museum and visitor center for citizen science and discovery-based learning.

D. Envisioned is a facility that includes, among many other elements, Exhibition Halls, Displays, social event spaces, use of sustainable and ecological practices, nature trails and a Paleontology-themed playground.

E. On Dec. 29th, 2016, Mantua Township purchased an adjoining 40-acre wooded parcel. The University and township are exploring the possibility of developing both parcels in a blended way to support Edelman Fossil Park facilities and activities.

F. The development of the township parcel is not the subject of this RFQ. Further information on the Edelman Fossil Park on their web site at: http://www.rowan.edu/fossils/

IV. APPENDICES
The following appendices are attached to this RFQ:

A. Appendix 1: Location of Site(s)
B. Appendix 2: Excerpts from the Feasibility Study for the Fossil Park with further information on the site, program opportunities, etc.
C. Appendix 3: Tentative Project Schedule

V. PROPOSED BUDGET
A. The total development cost is estimated at $45,000,000.00 which includes all hard and soft costs associated with the project.

VI. PROCEDURAL REQUIREMENTS & AMENDMENTS
A. The awarded vendor will comply with all procedural instructions that may be issued from time to time by the Contracting Officer of the University or her designee.

F. Rowan University may make changes in the general scope of the contract services provided by the vendor by written notice. The vendor shall promptly comply with the notice and shall bring all subsequent services in conformance with the notice.
G. If any such changes cause a material increase or decrease in the vendor’s cost of operation or the time required for attainment of required service level agreements specifying time parameters for response time, system upgrades and troubleshooting, along with service level commitments, an equitable adjustment in the contract cost or time allotted for fulfillment of the contract shall be negotiated and the contract modified accordingly.
