

## What's the Process for Using State Vendors?

We have proactively reached out to all of the reps listed. All quotes and subsequent invoices provided, must include the State Contract # **T0115 17DPP00064 Scientific Equipment, Accessories, Maintenance & Supplies**, or, if you are purchasing through [Fisher Scientific](#), the Cooperative Purchasing Contract # **OMNIA 2021002889 General Lab Supplies**. This ensures we are receiving the appropriate pricing from the vendor. We just ask that you enforce this requirement by double checking the documentation prior to submitting your requisition. You will only need one quote. No bid or sole source requests will be required when using this group of vendors.

## What's the Process for Going Outside of State Vendors (State Funds)?

Purchases between \$10,000 - \$35,500 will require either three quotes or an exception. Exceptions frequently used regarding scientific purchases are Sole Source, IRT or Standardization of Equipment. Purchases over \$35,500 will require a public bid, Sole Source, or BOT Resolution. Please review the requirements found [here](#).

## What's the Process for Going Outside of State Vendors (Grant Funds)?

Grant business as usual. Purchases between \$10,000 - \$35,500 will require either three quotes or a Sole Source. Purchases over \$35,500 will require a public bid or Sole Source. Please review the requirements found [here](#).
