Attendance

- Attend Monday-Friday from 8am-12pm for the three credit course. Breakfast is included.
- Attend Monday-Friday from 8am-6pm for course, leadership and academic workshops. Breakfast and lunch are included.
- Attend Monday-Friday, overnight stay, but go home on weekends.
- Attend for three weeks, weekends included.

Any student who chooses the Pathways program must stay overnight during the week.

STEM + Art = STEAM

Open to students entering grades 7 through 12, Rowan University’s STEAM Academy features instruction and presentations by top faculty whose diverse curriculum better prepares students for college and career paths in one of the fastest growing segments of today’s economy: STEM education.

With three distinct program options, the STEAM Academy offers high-achieving students the opportunity to experience college life while preparing them for their futures. Students will gain valuable insight and practical tools that will better equip them to achieve their personal, educational and career goals.

Chart your path to college!
With both a day-only program and two different residential programs, our three-week long STEAM Academy exposes high school students to college campus life while immersing them in STEAM-focused learning experiences and field trips. Residential students stay in supervised, on-campus housing, dine in Rowan’s cafeteria and at local restaurants, and enjoy our Recreation Center. Upon successful completion of the program, residential students earn three transferable, college-level Rowan University credits.

Our Programs

Voyagers:
Voyagers is specially designed for students entering 7th through 9th grades. This will be a chance for attendees to experience the core of STEAM (campus experience, personal development, and academic achievement) in a hands-on, holistic day program.

Running Monday through Thursday during normal school hours, each day begins with breakfast and then a morning session focused on Forensics (chosen specifically for its interdisciplinary qualities) follows. After lunch, students participate in our Scholar Leader personal development curriculum, filled to the brim with personal development, leadership building, and peer group engagement. The Voyagers program is both a gateway into STEAM subjects as well as a program created to inspire curiosity and academic independence for students about to start high school.

Navigation:
The Navigation program is our oldest and most popular track. Open to rising sophomores, juniors, and seniors, Navigation gives students the closest thing to college a high schooler can experience! Every weekday morning, students take an official, accredited Rowan University course. Afternoons are devoted to personal and academic development, and include special workshops on career counseling, standardized test preparation, conflict resolution, and leadership training. All students graduate the STEAM Academy with three fully transferable college credits and a unique, holistic experience that has prepared them for success on campus and beyond.

Weekends are optional—those who stay have the opportunity to travel with us on field trips to fun and different locations. Previously, STEAM campers visited the Franklin Institute, the National Gallery of Art, Edelman Fossil Park at Rowan University, and Hershey Park!

Pathways:
Our most academically challenging option, Pathways is an exclusive research internship program that gives rising sophomores, juniors and seniors a unique opportunity to pursue research in STEAM fields they are interested in, all with individualized support from a Rowan faculty member! These high-achieving students will also take a full three credit course in the mornings, but their afternoons will be structured around this internship opportunity as well as their scholar-leader personal development immersion. This is all in addition to the benefits of living on campus, eating in the cafeteria, and acclimating to being responsible for academic achievement in the collegiate realm.

The STEAM Academy’s Pathways program is an innovative venture that will put students already interested in STEAM subjects on a forward-looking trajectory to a successful college career. Pathways follows a three week schedule and offers a weekend leave option, as well as field trips.
