

The Chemistry Department placement process is conducted through Canvas, Rowan's learning management system. Students can enroll themselves in this Canvas "course," and complete the placement test on the day and time of their choosing, as no appointment is needed. This is a 60-minute timed test. If you have received testing accommodations in the past for extended time, please email testingservices@rowan.edu and copy genchem@rowan.edu with details, so that accommodations can be made for you to take this test as well.

To enroll yourself in the Canvas course to begin the placement process, follow these steps.

Step 1: Click this link: <https://rowan.instructure.com/enroll/B3MR9K>

Step 2: Select "Enroll in Course."

Step 3: Select "Go to the Course" to access the course and get started with placement.

Step 4: You should now be in the course and can work through the placement process.

NOTE: If you encounter issues during the placement process (something isn't working or something is unclear), please contact Dr. Matthew Pilarz, coordinator of the Chemistry Placement Test at pilarz@rowan.edu and copy testingservices@rowan.edu for assistance.
