

Neurodiversity & Food Insecurity Study

Are you interested in participating in a research study about Neurodiversity and Food Insecurity? Volunteer today!

Time Commitment

This study will include one interview, which is expected to take 60-90 minutes. The interview can be conducted in-person or, alternative, via Zoom.

Enrollment Requirements

Volunteers must be:

- Enrolled at Rowan University
- 18 years of age or older
- Neurodivergent (no diagnosis required)
- Food Insecure, or have had difficulty finding food in the past.

Purpose of Study

The purpose of this research study is to study how neurodiverse Rowan University students experience hunger. We seek to understand how neurodiverse RU students experience hunger. We thus seek to answer the following research question (RQ): *How do neurodiverse RU students experience hunger?*

Compensation

Volunteers will be compensated for their time with a \$25 ClinCard for the narrative interview, and a \$10 ClinCard after reviewing the transcribed interview audio. International students who do not have a SSN will be provided equivalent cost Rowan Swag from the Rowan University Bookstore.

Contact Information

For more information, or to participate in the study, please email Principal Investigator, Dr. Justin Major, at: majorj@rowan.edu

What does food insecurity entail?

Myth: Food insecurity means starvation.

Fact: Food insecurity also entails worrying about running out of food, having to skip meals, or having to opt for cheaper, less nutritious food.

Include a short caption to describe an image.
