More About Hetal

Hetal Parekh-Olmedo joined Rowan University in 2024, where she currently serves as a Program Services Specialist/ Laboratory Technician in the Department of Biology and Biomedical Sciences at Rowan University, supporting undergraduate laboratory instruction.

Hetal has held leadership roles in laboratory management, quality compliance, and scientific research as an experienced laboratory professional spanning academic, industry, and research environments. Her research career includes significant contributions to targeted gene repair technologies, with multiple peer-reviewed publications in prominent scientific journals, as well as setting up collaborations with academic and biotech partners. As a former Lab Manager, she oversaw daily lab operations and ensured regulatory compliance.

In addition, Hetal has a passion for education and community service, working as a paraprofessional supporting students with diverse learning needs in public school (K-12). Her research led her to serve on the Board of the Delaware Chapter of Huntington's Disease society of America for several years. She also volunteered as an instructor for Bollywood dancing movements to children with special needs.

This fun-loving, proud mom of two adult children, one dog (Blitz) loves spending time with her family, enjoys traveling, eating out and dancing! She also absolutely loves organizing/hosting social events, bringing families and friends together.
