More About Maggie

Maggie Rehiel is an accomplished professional who had an amazing 31-year career in Commercial Appraisal and Valuation as the office manager, bookkeeper and personal assistant to the owner. Holding all of these titles simultaneously. Maggie started as a secretary typing commercial appraisal reports, then got promoted to Office Manager and Bookkeeper for offices in Center City Philadelphia, Wilmington, DE and Allentown, PA. Maggie wore many hats each and every day. She was responsible for all of the finances for the company as well as the owner's personal finances. During her time there she worked for the same company from 1992-2017 until the company was acquired then transitioned to a new position at Newmark becoming a Regional Coordinator from 2017-2023 before moving on to Rowan University.

Maggie started the second chapter of her career at Rowan University in 2023 where she works as the Administrative Assistant to the Department Head in Biological and Biomedical Sciences in the College of Science and Mathematics. While learning many new tasks and programs, Maggie will always give a student her undivided attention as well as being a team player. She is hoping to build on the strong connections she already made at Rowan and join other committees in the future and make a difference along the way.

Outside of work Maggie enjoys spending time with her husband, son and wolf-dog Nashoba. Maggie will always make time for her family and friends. She can also be found taking long walks and reading. Maggie is always willing to jump in and lend a hand to others.
